Correspondence: I don't understand why there is confusion here. The mission of the park service is to maintain park. These parks are there for the viewing public and their education/enjoyment. There is plenty of land around this country to be exploited by business and industry. Why are they demanding access to the tiny bits of land we preserve for parks ? Enough !

Correspondence: I am from Bainbridge Island, WA but grew up in southern California. I have lived most of my life on the west coast and value its beauty. There is only one marine wilderness on the west coast, Point Reyes National Seashore, and Drakes Estero, an estuary within it, is considered the ecological heart of the park. I believe this area should be preserved and protected from any commercial use.

The top priorities in decision-making should be providing maximum protection of wilderness resources and giving full effect to the 1976 Point Reyes Wilderness Act. I further believe the NPS should prioritize the long-standing wilderness designation vision over commercial private use. After all, the national parks are for the people, not for private profit. The NPS must also consider the peer-reviewed research that concludes potential and real adverse impacts from the oyster operation on wilderness resources.

Our tax dollars support our National Park system, and so I feel the American people should have this marine wilderness preserved for now and future generations.

Thank you for reading my comments.

Correspondence: This issue means alot to me, but I am not creative or very good at writing. So I am using some form language to express some of my views on this key issue of environmental stewardship. Thank you for your time and consideration.

I must preface the form language by commenting that going to National Parks is one of my all time favorite activities that I look forward to every summer. I am a teacher, so am busy the rest of the year. But in addition, my teaching organization holds its national meetings every summer, alternating locations across the US and Canada. I often take these meetings as a chance to drive, with my family (wife originally from Japan), to the city where the meeting is held (even if it is in Maine and I live in Missouri). We carefully plan our routes so that we go through a major national park or historic site. And we camp/hike to our hearts content for multiple days to enjoy some of the best of the great outdoors that the USA has.

Frankly, i'm tired that so many things in our society have become commercialized. Let's leave it alone. Let's leave it pristine. Let's figure out another way to pay for it. If we can spend $1 trillion on wars in Iraq and Afghanistan, surely we can find a couple hundred million to fund excellent work in/by/at the national parks. Thank you.

--The top priorities in decision-making should be providing maximum protection of wilderness resources and giving full effect to the 1976 Point Reyes Wilderness Act. --The NPS should prioritize the long-standing wilderness designation vision over commercial private use. --The national parks are for the people, not for private profit. --The NPS must consider the peer-reviewed research that concludes potential and real adverse impacts from the oyster operation on wilderness resources.

Correspondence: Greetings,

I am writing about an issue that is important to me.

Providing maximum protection of wilderness resources and giving full effect to the 1976 Point Reyes Wilderness Act should be the top priorities in decision-making.

Since there is many private alternatives for destructive activities the NPS should prioritize the long-standing wilderness designation vision over commercial private use.

I have visited 6 National Parks in the last year alone to enjoy peace and quiet. The national parks are for the people, not for private profit.

The NPS must consider the peer-reviewed research that concludes potential and real adverse impacts from the oyster operation on wilderness resources.

Sincerely,

Susan R Proffitt

Correspondence: To The Stewarts of Our Park and wildlife, I have visited this beautiful place and it is an abomination that commercial profits are infringing on its care. I would think that we need stronger people who care about preservation not profit in protecting our wilderness. We need people who can take the heat to stand up and fight for the rights of keeping the little bits of unspoiled wilderness we have left. --The top priorities in decision-making should be providing maximum protection of wilderness resources and giving full effect to the 1976 Point Reyes Wilderness Act. --The NPS should prioritize the long-standing wilderness designation vision over commercial private use. --The national parks are for the people, not for private profit. --The NPS must consider the peer-reviewed research that concludes potential and real adverse impacts from the oyster operation on wilderness resources.

Correspondence: I understand that you are considering allowing a commercial use of park land in California. While it may make money for your organization, your top priorities in decision-making should be providing maximum protection of wilderness resources and giving full effect to the 1976 Point Reyes Wilderness Act. I think you should prioritize the long-standing wilderness designation vision over commercial or private use. Correct me if I'm wrong but aren't national parks for people to use & enjoy, and not for private profit? I think the NPS must consider the peer-reviewed research that concludes potential and real adverse impacts from the oyster operation on wilderness resources. If you turn our National Parks into places to make money, then ultimately don't you lose the beauty of their unique views, animal habitats, and etc?? Please reconsider your decision on this matter? I'd like to know that should I ever have the money to come to California, I'll be able to see some of the National Parks in that state, undefiled by commercialization! Thank you for taking the time to read my comments. I pray that God will guide you in this and every decision pertaining to parks all over America! God Bless you ALL! with Prayers, Vicki Cooper

Correspondence: The 1976 Point Reyes Wilderness Act is important, and legally has to be honored in both the intent and the execution. To do that, we must prioritize the long-standing wilderness designation vision over commercial private use.

The national parks are for the people, not for private profit. The peer-reviewed research that concludes potential and real adverse impacts from the oyster operation on wilderness resources is significant. To ignore it is to deviate from the law and the intent of the law, especially because it is the only marine wilderness on the West Coast. Please do not allow commercial use at Drakes Estero. The estuary is precious and should continue on the path to receive full wilderness designation in 2012.

Correspondence: Dear Sir or Madam,

Please let me make a request that you take every precaution to protect the Drakes Estero estuary in California and as many of our other estuaries and wild areas as is possible. If we don't take care with our land and other natural resources, our grandchildren will not have the benefits of the few remaining wild areas that are left. Please prioritze the protection of wilderness resources by giving full effect to the 1976 Point Reyes Wilderness. I ask you to ensure that people, not commercial companies and profits, are of highest importance.

Estuaries are particularly important as they act as protection to the coast lines, provide shelter to birds and fill an important filtering/cleaning function. Consider the peer-reviewed research that concludes that potential and real adverse impacts result from oyster operations on wilderness resources.

Thank you for the opportunity to provide comments.

Rebecca K. Stuart

Correspondence: Please protect what little we have left to protect. The proliferation of man is quickly exceeding what our earth can support.

Every bit of pristine land we have, especially those of particular significance are our only hope of perpetuating into the future in a sustainable balance with nature such that we can survive with a quality of life worth living.

Please consider the ramifications of letting this land go developed.

Where does it end.

If you map our our current trajectory, even without out the surge in population/economic production that is likely to continue, our future looks very bleak.

Correspondence: I am shocked the NPS would even consider allowing a private industry to use the Drakes Estero for its own commercial profit-making use. This is an estuary within California's Point Reyes National Seashore that is considered the ecological heart of the park. National parks are for wildlife and the public -- not for private profit.

Instead the NPS should prioritize the long-standing wilderness designation vision over commercial private use. What you are contemplating doing is no different than what another federal government agency is doing, namely the BLM. The BLM rounds up tens of thousands of mustangs and corrals them so the private ranchers can use our lands to graze their herds.

What is wrong with my federal government that they even think of giving private industry use of public lands? Don't be another BLM. They are violating

the law and you will be too if you allow the private company to use Drakes Estero.

I hope you will consider this move very carefully.

Correspondence: The top priorities in decision-making should be providing maximum protection of wilderness resources and giving full effect to the 1976 Point Reyes Wilderness Act.

The NPS should, of course, prioritize the long-standing wilderness designation vision over any commercial private use.

The national parks are for the people, not for private profit.

The NPS must consider the peer-reviewed research that concludes potential and real adverse impacts from the oyster operation on wilderness resources.

Correspondence: The top priorities in decision-making should be providing maximum protection of wilderness resources and giving full effect to the 1976 Point Reyes

Wilderness Act. The NPS should prioritize the long-standing wilderness designation vision over commercial private use. Commercial uses tend to destroy wildernesses in ways their advocates claim are unforeseeable, leaving excluding them as the only sane choice.

The national parks are for the people, not for private profit. The are supported primarily by tax dollars and should be available for use by all the people, not by any of the corporations.

The NPS must consider the peer-reviewed research that concludes potential and real adverse impacts from the oyster operation on wilderness resources. While I am aware that oyster companies may see opportunity in the current market, science must trump profit on public properties, especially wilderness areas.

Correspondence: Do not commercialize any part of Point Reyes National Seashore nor even any of the surrounding areas. Keep this National Seashore as is, public, as it was originally intended. Private financial interest does not care about this country's beauty, health, or condition. Keep this, and all already established parks free from their destructive influences.
