

# Horse Use and Pack Animals

## Overview

Numerous trails in Shenandoah National Park are designed for horseback riding and the use of pack animals. Legally defined, horses, mules,

burros, and llamas are all designated as “pack animals.” Collectively, we refer to them as horses in this guide.

## Horse Trails

To minimize trail use problems with hikers, riders may take horses only into areas designated for their use. Horse trails are marked with yellow paint blazes on trees. Most of the Park’s fire roads are included in the horse trail system and are blazed accordingly. Commercial horse use services, such as guided trail rides, require a Commercial Use Authorization.

**The Appalachian Trail (white-blazed) and other hiking trails (blue-blazed) are for foot**

**traffic only and are not maintained for horses.** Meadows and native grasslands, including Big Meadows, contain sensitive vegetation and are strictly off-limits to horse use. The paved roads and developed areas in the Park (such as lodging areas and campgrounds) have high vehicle traffic and other visitor use and are not suited for horses. Use of horses in these areas is prohibited. Exceptions include short stretches of travel along paved roads to access horse use trailheads close to one another.

## Trails Open to Park Animal Use

### North District:

Beecher Ridge Trail†  
Bluff Trail  
Browntown Trail  
Compton Gap Trail  
Dickey Ridge Trail (portion)  
Harris Hollow Trail†  
Heiskell Hollow Trail†  
Hickerson Hollow Trail°  
Hull School Trail†  
Jenkins Gap Trail†  
Jordan River Trail†  
Keyser Run Road  
Knob Mountain Trail†  
Lands Run Road°  
Mathews Arm Trail  
Mount Marshall Trail  
Neighbor Mountain Trail†  
Piney Branch Trail (lower)†  
Rocky Branch Trail†  
Thornton River Trail (lower)  
Springhouse Trail  
Weddlewood Trail†

### Central District:

Berry Hollow Fire Road°  
Conway River Fire Road  
Conway River Trail†  
Dry Run Fire Road  
Fork Mountain Fire Road  
Fork Mountain Trail  
Furnace Spring Trail†  
Graves Mill Trail  
Hazel Mountain Trail  
Hazel River Trail  
Laurel Prong Trail (lower)  
Mill Prong Horse Trail  
Old Rag Fire Road°  
Pine Hill Gap Trail†  
Pocosin Fire Road  
Pocosin Horse Trail†  
Rapidan Camp Road  
Rapidan Fire Road°  
Red Gate Fire Road°  
Rose River Fire Road°  
Skyland Fire Road°  
Skyland/Big Meadows Horse Trail°  
Slaughter Trail†  
South River Fire Road

StonyMan Mountain Horse Trail  
Stony Mountain Trail°  
Tanners Ridge Horse Trail°  
Tanners Ridge Road°  
Upper Dark Hollow Trail°  
Weakley Hollow Fire Road°  
White Rocks Trail†  
Whiteoak Canyon Fire Road°

### South District

Beldor Fire Road°  
Big Run Loop Trail (portion)  
Big Run Portal Trail  
Browns Gap Road°  
Madison Run Road°  
Madison Run Spur Trail  
Stull Run Fire Road†  
North Fork Moormans River Trail  
North Fork Moormans Fire Road  
Paine Run Trail  
Patterson Ridge Trail  
Simmons Gap Fire Road°  
Smith Roach Gap Fire Road  
South Fork Moormans Fire Road  
Turk Branch Trail†  
Turk Gap Trail†

° Also for commercial horse use purposes

† Limited maintenance trail which may be a narrow path in designated Wilderness. Use caution and expect obstacles.

## Trail Maps

Recreational maps published by the Potomac Appalachian Trail Club (PATC) clearly designate horse use portions of trails. These include PATC Map # 9 for North District (Front Royal to US Hwy 211), Map # 10 for Central District (US Hwy 211 to US Hwy 33), and Map # 11 for South

District (US Hwy 33 to Waynesboro). These maps are available for sale throughout the Park at visitor centers, and concession facilities, and through the PATC and Shenandoah National Park Association websites.

---

## Hitching Posts

Hitching posts have been placed in a few areas of high horse use. Please use them where provided. Do not tie your horse to a tree. The horse's pawing at the ground causes "doughnuts" of eroded areas around the tree, compacting soil

and killing tree roots. Pickets and other tethers or restraints that will not damage trees or other vegetation should be used where hitching posts are not available. Grazing is not permitted.

---

## Watering Horses

Water your horse at a low rocky spot in the streambank where little vegetation and soil disturbance will occur. Many watering places are small or contain sensitive vegetation and fragile

soils. Water horses away from these sources to prevent damage, or use a collapsible water bucket.

---

## Parking of Trailers

Horses are often trailered into the Park and ridden out on the horse trails from points along the Skyline Drive. **Trailhead parking may be very limited or unavailable both on the Skyline Drive and at Park boundary access points.**

Please be considerate; do not block private property or Park access roads. Remember to clean up after your animals in the parking lots and around high-use areas. Position your trailer so you will be able to exit a full parking lot.

---

## Safety Concerns

Please slow down to a walk when you pass hikers. Few hikers know they should step off on the downhill side of the trail, so you may need to ask them to hold up while you pass. If you are the one being overtaken, remember that hikers might be packing a load of gear and have a right to be on the trail too. Find a good spot and let hikers pass. A little conversation as you pass each other may reduce the chance of your horse being spooked. There may be vehicle traffic on fire roads; please ride single file until the vehicle passes by.

your group is away, especially at Big Meadows, Skyland, and other developed areas. Young children have been known to approach horses and may be kicked or bitten. Bears are present in all areas of the Park and may frighten your animals.

### No Unattended Horses

Please leave someone to watch the horses while

### Reporting Accidents and Getting Help

In an emergency, call the Park emergency number at 1-800-732-0911. Cellular phones have limited range from many trails. Phones are located in most developed areas in the Park, including lodging areas, campgrounds, visitor centers, gas stations, and entrance stations.

---

## Overnight Stays

Shenandoah National Park has no facilities for horses to stay overnight. The campgrounds and concessioner are not able to accommodate horses. Horses may not be kept at the lodges overnight or left overnight in trailers.

Several commercial facilities near the Park will board horses and their riders overnight to facilitate early starts on the trail. Contact Virginia Horse Council or local Chambers of Commerce for nearby horse stable information.

Please contact the Park ahead of time to discuss your overnight trip planning.

Horses are required to remain on the trails at all times while traveling. Grazing is not permitted; you must bring your own feed for your horses. We recommend that you use certified clear feed for your animals since oats and hay may bring damaging non-native grass species into the Park.

Although it is permitted in the Park, camping with horses is discouraged. For all overnight camping in the backcountry, visitors must obtain a free permit and observe all backcountry

camping regulations. Backcountry camping with horses can cause much damage to backcountry natural resources, and visitors are urged to take precautions to reduce the impact on vegetation. Backcountry regulations require all campers to camp at least 20 yards from and preferably out of sight of trails and fire roads. Please lead your horse carefully to your campsite to minimize damage to the vegetation and avoid creating new "trails."

When camped, use the *highlining* technique to secure your horses to minimize damage to trees and other vegetation. Refer to "Leave No Trace" highlining techniques ([www.LNT.org](http://www.LNT.org) or 1-800-332-4100). Tie the horse(s) off to a highline away from trees and rocks. Use "belts" such as tow straps around trees to protect the bark. Do not tie off the lead directly to the highline, but use a swivel or cord to keep the lead from knotting up from horse movement. Try to highline your horses out of sight of trails and roads. Do not tie horses within 50 yards of streams or springs. Upon leaving the site, please scatter manure and rehabilitate the highline site.

Highlining Technique
