Yosemite National Park
California

National Park Service
U.S. Department of the Interior

Forage Area: Yosemite Creek North (2645)

Yosemite Creek
(102)

Forage Area: Yosemite Creek South (2614)

Stock Site (Preferred Fire Ring)
NPS System Trail
Sensitive Area
Forage Areas

0 60 120 Meters
Scale: 1:3,500

Forage Area: Yosemite Creek North (2645) and Yosemite Creek South (2614) - The forage area has not been investigated for this site, but some meadow areas are visible in aerial photography north and south of the site. Commercial operators should use supplemental feed.

Annual Grazing Capacity: Supplemental Feed Only

Yosemite Creek

Camp ID: 102

Estimated Location: 274,260mE x 4,195,362mN

Handling Practices: This site location has not been verified, but is estimated to be in the Yosemite Creek drainage approximately 2 miles north of Tioga Road at the junction of the trails to Ten Lakes and the Middle Fork of the Tuolumne River. Do not camp or hold stock on the sensitive resource areas indicated on the map due to concerns about stock use causing potential impacts.
