Remarks: Bouska investigation report

Narrative:

SUMMARY:

I, Sarah Bouska, US Park Ranger at Yellowstone National Park, was assigned as lead investigator for an overdue hiker the morning of June 8th, 2017. During interviews of friends and family and through reviewing emails and texts from the missing hiker, Joseph "Jeff" Murphy, it was determined that he was searching for the Forrest Fenn treasure in the Turkey Penn Peak area of Yellowstone National Park. Jeff Murphy's body was located by spotters in a helicopter the afternoon of June 9th, two days after he started out on his solo hike.

INITIAL:

Around 11:00am on June 8th, 2017, Ranger Phil Basak called me and asked if I would like to lead Investigations on a Search and Rescue incident involving an overdue hiker. I agreed. Ranger Basak informed me that he was Incident Commander and I would be working directly under him.

When I arrived at the ICP, I was informed that (b)6, (b)7c, wife of Joseph Jeff Murphy, called Yellowstone's dispatch center the evening of June 7th stating that her husband had not returned from his solo hike to Turkey Penn Peak. He flew into Bozeman airport on the evening of the 6th, rented a Hertz rental car and stayed at the Quality Inn in Belgrade. He had called her around 8:00 am the morning of the 7th stating that he was about to start his hike and told her that he would call her when he was back to his car. I was also informed that the rental car of Joseph Jeff Murphy was still located at the Rescue Creek Trailhead the morning of June 8th and that rangers had put a "boot" on it so that Murphy could not drive away without contacting the rangers first for assistance. (b)6, (b)7c, stated that Joseph Murphy had a direct flight from Bozeman Montana to Chicago, IL not much later that day around noon. (b)6, (b)7c, had informed Phil Basak that Joseph "Jeff" Murphy was attempting to locate the Forrest Fenn treasure and he believed that the treasure would either be easily viewed or located at Turkey Penn Peak. She believed that he was going to "top out" Turkey Penn Peak. I was informed that (b)6, (b)7c, and Jeff Murphy had come to Yellowstone for a treasure hunting trip on Memorial Day weekend, May 28th and 29th. I was informed that they were planning to stay at the campsite 1A2 and believed that the treasure was located somewhere near this campsite. IC informed me that Tim Townsend was assigned to assist with investigations and that he was given the backcountry permit holders for the Rescue Creek Trail as well as those slotted to stay at campsite 1A2 around the current time period.

INVESTIGATION:

After being assigned investigations, I met with ASAC Les Seago and asked him to see if he could "ping" Jeff Murphy's cell phone to try to determine its location. I also asked him to run a TLO report. Not much later, I received word from Beth Dreyer in the Yellowstone NP Communications Center that there was no "ping" available for Murphy's phone as it was "turned off". I also received a "clear" report from ASAC Seago for Murphy's TLO. ASAC Seago also sent me an email link to Jeff Murphy's facebook page. I took a quick look at Murphy's facebook page and did not see anything posted recently. I also received an email from Comm Center Beth Dreyer stating (b)7e
(b)7e

I contacted (b)6, (b)7c, shortly after these emails to follow up with some items and to ask questions. {Please see supplemental on (b)6, (b)7c, phone interview.}

Brief summary of what was discussed with (b)6, (b)7c, on this first phone call:

(b)6, (b)7c, stated that Jeff Murphy was looking for the Forrest Fenn treasure to Turkey Penn Peak and that he used his United Airlines miles to book a flight to Bozeman on June 6th. She stated that he rented a Hertz rental car, confirmation H3230309626 and that she had been in contact with Hertz rental car company to have them contact her if they heard from Jeff. She said that he stayed in the Belgrade Quality Inn hotel on the evening of the 6th. She said she had been accessing his credit card activity online and saw that he ate at a Taco Bell the night he arrived in Bozeman and withdrew $200 cash from an ATM.

She said that he had a direct flight booked from Bozeman to Chicago at 12:18pm on June 8th and when I spoke with her it was already after 12:18pm. She said she was frequently checking his United Airlines account online and saw that he never checked in for his flight, which he normally does the night prior to his flight. His United Airlines confirmation # was AEX40Y. She said that he had no known medical issues besides visiting a chiropractor pretty regularly. (b)6, (b)7c, Privacy Act
(b)6, (b)7c, Privacy Act
(b)6, (b)7c, Privacy Act he said he would be wearing khaki pants (unknown brand, but ones he frequently wore while hiking), a navy blue "second skin" shirt, a bright yellow t-shirt, and carrying a gray Columbia jacket with royal blue shoulders. She was unsure what shoes he would be wearing, but said she would forward photos of his hiking "gear" in future emails to me.

After speaking briefly with (b)6, (b)7c, Tim Townsend called me to inform me that he was going to open the rental car and asked if I would like to be present. I drove down to meet him at the rental car parked at the

Rescue Creek Trailhead. While looking through the contents in the rental car, we noticed a backpack sitting on the front passenger seat. There were also clothes, a pair of shoes and food in the very back of the vehicle, including a six pack of orange Gatorade with 2 bottles missing. While looking through the backpack on the front seat, we discovered an Apple MacBook Pro and various papers including one that seemed to have hand-written notations of Yellowstone locations and their elevations.

{See external document uploaded into IMARS labeled as "Hand Written notations of Yellowstone Location Elevations" for photo of this item}

On the front seat was also a receipt for entrance into the park. It showed that Murphy paid with $40 cash at kiosk #2 at 08:08 am on June 7th. The receipt showed "YELL-DBART" as the employee who worked the transaction.

{See external document uploaded into IMARS labeled as "Murphy 07-07-17 North Entrance Receipt" for photo of this item}

Ranger Tim Townsend secured the laptop and we departed the vehicle.

I went to the North Entrance Station kiosk to ask questions of the Entrance Station Ranger who interacted with Mr. Murphy when he paid and entered the park. I was informed that she was not working at the time and was given her phone number. I called her and asked her to call or email me if she remembered anything at all about her interaction with Mr. Murphy. I never received a phone call or was contacted by this Ranger. I was informed that she was working in kiosk #2 lane, so Mr. Murphy would have entered the park using the outside pay lane at the entrance station. (b)7e

(b)7e

I contacted the Quality Inn hotel in Belgrade and asked if they had security cameras of their parking lots or front desk. I was looking to obtain documentation of what Mr. Murphy was wearing when he left the hotel and to confirm that he was alone. I was informed that they did, in fact, have multiple security cameras throughout the property and they could give me the security camera footage if I could get someone to their location to download it. I was informed by phone call later that day that they did not have video footage of Mr. Murphy checking out at the front desk on the 7th and they believed that he probably checked out by phone. They did confirm that he stayed with them the evening of the 6th and checked out of the hotel the morning of the 7th. They said that I should contact them should I need video footage of the other areas outside of the front desk.

After contacting the North Entrance Station, I returned to the office and talked with (b)6, (b)7c, a couple more times. (b)6, (b)7c, and Jeff Murphy's sister (b)6, (b)7c, both contacted me throughout the day explaining intentions of flying into Bozeman the next day, June 9th. I referred them to the assigned family liaison, Katy Anderson Wilkinson. Throughout the day, both (b)6, (b)7c, Privacy Act emailed me pictures of Jeff Murphy hiking or fishing to show what type of clothes and gear he normally took with him while doing these activities. I also received some via text from Katy Anderson Wilkinson that (b)6, (b)7c, forwarded to her by phone.

{See supplemental (b)6, (b)7c, interview report.}

June 9th:

After attending the briefing that took place with the search teams, I contacted Tom Taylor of Yellowstone's computer support services to try to look at the content on Mr. Murphy's laptop. I was informed by Tom that I needed a password in order to view the contents of the laptop. I contacted Mr. Miller of International Housewares Association and colleague of Jeff Murphy's. Mr. Miller gave me what he believed to be the "universal" password for the laptop of Mr. Murphy. He said that he personally set up Mr. Murphy's laptop. He also gave me permission to look at the contents of the laptop in order to assist determining where Mr. Murphy may be hiking or exploring in the park. After talking with Mr. Miller, I received consent from (b)6, (b)7c, to look at Jeff's work laptop as well. {See supplemental for Mr. Miller's interview}

After receiving the password, we were able to open the contents of Mr. Murphy's work laptop. Tom Taylor took photographs of the screens and links that were open or recently viewed. There were quite a few online websites open about the Forest Fenn treasure hunt. One particular open website article, referenced the Rescue Creek

Trail. Murphy also had open screens of "Thrill of the Chase" (Forest Fenn blog site) as well as Chasecat.com. Murphy had done recent google searches of "Rescue Creek Trail and Rescue Creek Trail and Lava Creek hike 734." Murphy also had an open word doc that he recently accessed and modified on June 4, 2017 with notes and ideas he had about the Forest Fenn treasure hunt.

Soon after accessing Murphy's laptop, I went to report my findings to IC and was informed that they possibly located his body. I traveled down to the Mammoth helipad with Tim Townsend and stood by with the ambulance for the flight crew to deliver Murphy's body via helicopter. We placed the body in the ambulance and transported it to the Mammoth ambulance bay. Because of pending inclement weather, it was not a possibility for me to travel to the site where the body was sited and recovered. Collette Daigle-Berg was on scene as a part of a dog search team and it was reported to me that she photographed the location where Mr. Murphy's body was finally located.

At the ambulance bay, we met Ranger Matthew Chuvarsky, who said he would be taking the coroner responsibilities along with Collette Daigle-Berg. We opened the bag and I photographed the body and Murphy's belongings (from his backpack as well as on his person) with Chuvarsky's government issued camera. I was informed by Chuvarsky that the only item missing from Murphy was his wallet and that Daigle-Berg had retrieved that when she assisted with recovering the body.

{See attached coroner report for list of items that were given back to family on behalf of the park recovering Murphy's body, backpack and rental car. Also see coroner report for photographs of body and property recovered.}

When I saw Collette Daigle-Berg, I informed her that I needed Murphy's wallet in order to put in with the rest of his belongings. She stated that was a coroner duty and did not give me the wallet. Later that evening, Tim Townsend gathered all of Murphy's belongings including the wallet from Daigle-Berg, items from the rental car collected by Ranger John Ferguson and items recovered from Murphy's body and backpack and typed up DI1-05 (government property forms) . Daigle-Berg was to pick up all the items and property sheets that night at the Mammoth Pagoda in order to give them back to the family.

We met with the family when they arrived in the park: IC Phil Basak, Operations Joe Bueter, myself and all of the family liasons. Ms. Daigle-Berg showed up about an hour later and informed them of how she perceived Mr. Murphy died: cervical spine fracture.

I attended the after action review with all of the other involved management team and superintendent.

Around a week later on June 16th , I contacted Gardiner Market to ask if they had security camera video footage of Mr. Murphy coming into the store on June 7th morning. I contacted Gardiner Market because we found a Gardiner Market grocery bag in Mr. Murphy's backpack upon retrieval. There were also orange Gatorade bottles, water bottles and nuts that appeared to have been recently purchased (possibly items purchased at Gardiner Market) in both Murphy's rental car and backpack. After speaking with Market owner, Rebecca Demaree, she stated she was able to locate security camera footage of Joseph Murphy entering the Gardiner Market on June 7th morning.

I reviewed the security footage with her, where I saw Mr. Murphy enter the Gardiner Market, buy a few items, speak briefly with the checker, pay with cash and exit the Market to his rental vehicle. When he sat down in his rental vehicle, he made a phone call (around same time (b)6, (b)7c, said he called to tell her he was going to start his hike soon) and then he drove out of the parking lot, heading south on Hwy 89 towards the park entrance. Mr. Murphy appeared to be alone in all of the security camera footage: while in the store as well as when occupying the rental vehicle.

{see attached interview with store owner Rebecca Demaree}

CONCLUSION:

Joseph Jeff Murphy entered Yellowstone National Park on 07/07/17 morning with the intention to hike Turkey Penn Peak in order to locate the Forest Fenn treasure. His body was located on 07/09/17 and retrieved at the bottom of a hill in the Turkey Penn Peak area. It was determined that his death was caused by a large fall and coroner stated she believed cause of death was (b)6, (b)7c, Privacy Act in conjunction with the fall. It appeared as if he was traveling alone the entire time. All items located on Mr. Murphy at time of body recovery

indicate he was looking for treasure and appeared that he did not have intentions of suicide.

Screen shot photographs of Mr. Murphy's work laptop, photos of Mr. Murphy sent from family members, photographs and video (b)7e [redacted] of his visit to Gardiner Market are all downloaded and available in the V Drive; Ranger Reports Restricted; NP17075021 Murphy folder.

Remarks: Bouska interview with Derek Miller

Narrative:

Phone Interview with Derek Miller of International Housewares Association on 06/09/17

I contacted Derek Miller of International Housewares Association on June 9th while conducting investigations on the Murphy SAR. Mr. Miller was a co-worker of Jeff Murphy. His personal phone number had been given to me by (b)6, (b)7c, [redacted] but I had reached him at his office number after calling the phone numbers listed on Murphy's business cards that I located in Murphy's rental car. Mr. Miller stated that he had worked in an official capacity with Murphy since February 1, 2017. My main intention of contacting Mr. Miller was to ask if there was any way he would be able to give me access to Murphy's work laptop that we had seized from Murphy's rental vehicle a day earlier. When I contacted Mr. Miller, he was able to give me the passcode to Murphy's laptop which was successful in allowing us to gain access to view Murphy's recent search and user history on the laptop.

I asked Mr. Miller a few questions about Murphy and he was willing to talk with me.

Mr. Miller stated that he had lunch with Murphy on Tuesday, the 6th with other friends/co-workers and Murphy did not mention the trip to Yellowstone. He and another colleague noticed that Murphy was wearing his medical ID bracelet that all the company employees wear when they were traveling. They thought it was odd that he was wearing the ID bracelet as most employees wore it only when they were traveling internationally. He said that now he knows that he was wearing it because he was flying later that day to Montana.

Mr. Miller stated that Murphy texted someone at the office on Wednesday, June 7th stating that he was "ill" and would not be able to come into work. Mr. Miller said that it was an anomaly that Murphy would lie and skip coming into work. He also said it was very odd that Murphy would travel to Yellowstone that week because Murphy's assistant was already leaving to Mexico City on Friday for a work related trip and that Murphy was to join her on Saturday, the 10th. He said that Murphy knew that he had a lot of prep work to do prior to the Mexico City trip coming later that week.

Mr. Miller stated that he knew that Murphy was into "geo-caching" and that he knew he was searching for something. He said that he knew that Murphy had been searching for a treasure for many years. He knew he got close on Memorial Day (when Murphy was out here in Yellowstone with his wife (b)6, [redacted] He also knew that he kept this information very private and only shared that he had this hobby with close friends and a few family members. (b)7

Miller said that he did not know of any financial issues for Murphy. He did know that Murphy was laid off of his previous job in July of 2016 and started working as a consultant for the company on October 1st. Miller said that Murphy did not appear depressed nor have any signs of suicide. He said that he did seem a bit obsessive compulsive with his hobby of searching for the missing treasure. He stated that Murphy was not in the best shape and that he would often be "out of breath" just walking around the office.

Remarks: (b)6, (b)7c, Privacy Act summary of Interviews done on 6/8/17 and 6/9/17

Narrative:

(b)6, (b)7c, Privacy Act une 8th, 2017 summary of multiple interviews and conversations:

(b)6, (b)7c, Privacy Act and I were in contact on both June 8th and June 9th multiple times.

On the first initial phone call (b)6, (b)7c, Privacy Act she stated that Jeff Murphy was looking for the Forrest Fenn treasure nearTurkey Penn Peak and that he used his United Airlines miles to book a flight to Bozeman on June 6th. She stated that he rented a Hertz rental car, confirmation H3230309626 and that she had been in contact with Hertz rental car company to have them contact her if they heard from Jeff. She said that he stayed in the Belgrade Quality Inn hotel on the evening of the 6th. She said she had been accessing his credit card activity online and saw that he ate at a Taco Bell the night he arrived in Bozeman and withdrew $200 cash from an ATM.

She said that he had a direct flight booked from Bozeman to Chicago at 12:18pm on June 8th and when I spoke with her it was already after 12:18pm. She said she was frequently checking his United Airlines account online and saw that he never checked in for his flight, which he normally does the night prior to his flight. His United Airlines confirmation # was AEX40Y. She said that he had no known medical issues besides visiting a chiropractor pretty regularly. (b)6, (b)7c, Privacy Act [redacted] (b)6, (b)7c, Privacy Act [redacted] (b)6, (b)7c, Privacy Act [redacted] She said he would be wearing khaki pants (unknown brand, but ones he frequently wore while hiking), a navy blue "second skin" shirt, a bright yellow t-shirt, and carrying a gray Columbia jacket with royal blue shoulders. She said he wears a khaki colored backpack of some prominent brand that she could not recall. She was unsure what shoes he would be wearing, but said she would forward photos of his hiking "gear" in future emails to me and that he was a size 10.5 shoe. She said he often purchased his shoes abroad or on Amazon Prime, but that the shoes she thought he had brought along to hike in were still in his closet at home.

She said that they both had just returned from a treasure-hunting hike to campsite 1A2 around Memorial Day weekend. They had driven to and from Yellowstone National Park for that trip from May 25-May 29th, 2017.

She said that Jeff often takes a small shovel along in case he needs to scrape the dirt in order to assist with locating the hidden treasure. She informed me that the treasure is not buried, but is supposed to be on the surface of the ground, but

probably hidden from view. He always walks with a "hiking stick" (found out later this meant trekking pole) in his right hand and always carries bear spray.

(b)6, (b)7c said that Jeff is very friendly on the trail; he will talk with others he meets and greet them with a "hi." She says he very rarely goes off trails and if he does, it is not further than 50 feet or so. She said this is because he has been hunting for the treasure with his kids in the past and knows this is the safest thing to do. She said he is good with directions and he will be looking for something that may be a "clue" as to where the treasure may be; markers, stones, etc.

(b)6, (b)7c emailed and texted many pictures of Jeff in the hiking gear that he typically wears while fishing or recreating outdoors. These pictures are saved on V Drive/Ranger Reports-restricted/2017 Supporting Documents/NP17075021 Murphy SAR.

(b)6, (b)7c, stated a few things about Jeff's personality:

He is mild-mannered, easy going, loves NPS and outdoors, likes to fish and hike, he would ask for help if he needed it, very unlike him not to answer his cell phone, unlike him to be out of communication for so long, he is glued to phone, he is not a big risk-taker, hiking alone for him is odd and his parents reside (b)6, (b)7c, Privacy Act

I found out through talking with (b)6, (b)7c that Jeff was an owner and President of his own business at one point and that he currently works as Vice President of International Sales with the International Housewares Association. He started there in March of 2017. She gave me the name and phone number of Jeff's friend and colleague there: Derek Miller.

During other talks with (b)6, (b)7c she provided me text message strings between her and Jeff where Jeff states that he needs to come back to Yellowstone to search for the treasure. She said he was ADAMANT that the treasure was somewhere near the 1A2 campsite they had visited over Memorial Day weekend. She said that on Saturday (prior to him leaving for YELL) that he told her that he "thinks it is on the north side of the trail." She said he told her that is "exactly where it is." (b)6, (b)7c said that she was worried about him coming and hiking alone and that she expressed her concern to him. She also forwarded me emails that she sent to Forest Fenn as well as Forest Fenn's responses to her emails after she knew that Jeff was missing.

All of these correspondences are available to view at V Drive/Ranger Reports-restriced/2017 supporting documents/NP17075021 Murphy SAR.

When (b)6, (b)7c was alerted that we had Jeff's work laptop and wanted to open it to view possible google searches and websites he was reviewing the night before, she gave her approval for us to look at the contents of the laptop.

Remarks: Gardiner Market security camera review

Narrative:

Gardiner Market Interview and Security Tape Review on 06/16/17

Around a week later on June 16th , I contacted Gardiner Market to ask if they had security camera video footage of Mr. Murphy coming into the store on June 7th morning. I contacted Gardiner Market because we found a Gardiner Market grocery bag in Mr. Murphy's backpack upon retrieval. There were also orange Gatorade bottles, water bottles and nuts that appeared to have been recently purchased (possibly items purchased at Gardiner Market) in both Murphy's rental car and backpack. After speaking with Market owner, Rebecca Demaree, she stated she was able to locate security camera footage of Joseph Murphy entering the Gardiner Market on June 7th morning.

I reviewed the security footage from June 7th morning with her, where I saw Mr. Murphy enter the Gardiner Market, buy a six pack of Orange Gatorade, a couple bananas and some water bottles, speak briefly with the checker, pay with cash and exit the Market to his rental vehicle. When he sat down in his rental vehicle, he made a phone call (around same time [redacted] said he called to tell her he was going to start his hike soon). He then drove out of the parking lot, heading south on Hwy 89 towards the park entrance. Mr. Murphy appeared to be alone in all of the security camera footage: while in the store as well as when occupying the rental vehicle.

Ms. Demaree stated that she was standing underneath the security camera as Mr. Murphy was checking out at the register. She said he smiled and appeared to be in a "good mood". She said he spoke cordially with the checker and seemed like a happy person.

There are three total security camera videos from Gardiner Market and all are available on V Driver/Ranger Reports-Restricted/ 2017 Supporting Documents/ NP17075021 _Murphy SAR

Bouska investigation report

Report:

SUMMARY:

I, Sarah Bouska, US Park Ranger at Yellowstone National Park, was assigned as lead investigator for an overdue hiker the morning of June 8th, 2017. During interviews of friends and family and through reviewing emails and texts from the missing hiker, Joseph "Jeff" Murphy, it was determined that he was searching for the Forrest Fenn treasure in the Turkey Penn Peak area of Yellowstone National Park. Jeff Murphy's body was located by spotters in a helicopter the afternoon of June 9th, two days after he started out on his solo hike.

INITIAL:

Around 11:00am on June 8th, 2017, Ranger Phil Basak called me and asked if I would like to lead Investigations on a Search and Rescue incident involving an overdue hiker. I agreed. Ranger Basak informed me that he was Incident Commander and I would be working directly under him.

When I arrived at the ICP, I was informed that (b)6, (b)7c, Privacy Act [redacted] wife of Joseph Jeff Murphy, called Yellowstone's dispatch center the evening of June 7th stating that her husband had not returned from his solo hike to Turkey Penn Peak. He flew into Bozeman airport on the evening of the 6th, rented a Hertz rental car and stayed at the Quality Inn in Belgrade. He had called her around 8:00 am the morning of the 7th stating that he was about to start his hike and told her that he would call her when he was back to his car. I was also informed that the rental car of Joseph Jeff Murphy was still located at the Rescue Creek Trailhead the morning of June 8th and that rangers had put a "boot" on it so that Murphy could not drive away without contacting the rangers first for assistance. (b)6, (b)7c, Privacy Act [redacted] stated that Joseph Murphy had a direct flight from Bozeman Montana to Chicago, IL not much later that day around noon. (b)6, (b)7c, Privacy Act [redacted] had informed Phil Basak that Joseph "Jeff" Murphy was attempting to locate the Forrest Fenn treasure and he believed that the treasure would either be easily viewed or located at Turkey Penn Peak. She believed that he was going to "top out" Turkey Penn Peak. I was informed that (b)6, (b)7c [redacted] and Jeff Murphy had come to Yellowstone for a treasure hunting trip on Memorial Day weekend, May 28th and 29th. I was informed that they were planning to stay at the campsite 1A2 and believed that the treasure was located somewhere near this campsite. IC informed me that Tim Townsend was assigned to assist with investigations and that he was given the backcountry permit holders for the Rescue Creek Trail as well as those slotted to stay at campsite 1A2 around the current time period.

INVESTIGATION:

After being assigned investigations, I met with ASAC Les Seago and asked him to see if he could "ping" Jeff Murphy's cell phone to try to determine its location. I also asked him to run a TLO report. Not much later, I received word from Beth Dreyer in the Yellowstone NP Communications Center that there was no "ping" available for Murphy's phone as it was "turned off". I also received a "clear" report from ASAC Seago for Murphy's TLO. ASAC Seago also sent me an email link to Jeff Murphy's facebook page. I took a quick look at Murphy's facebook page and did not see anything posted recently. I

(b)7e [redacted]

(b)7e [redacted]

I contacted (b)6, (b)7c, Priva [redacted] ly after these emails to follow up with some items and to ask questions. {Please see supplemental on (b)6, (b)7c, Privacy Act [redacted] phone interview.}

Brief summary of what was discussed with (b)6, (b)7c, Privacy Act [redacted] on this first phone call:

(b)6, (b)7c [redacted] stated that Jeff Murphy was looking for the Forrest Fenn treasure to Turkey Penn Peak and that he used his United Airlines miles to book a flight to Bozeman on June 6th. She stated that he rented a Hertz rental car, confirmation H3230309626 and that she had been in contact with Hertz rental car company to have them contact her if they heard from Jeff. She said that he stayed in the Belgrade Quality Inn hotel on the evening of the 6th. She said she had been accessing his credit card activity online and saw that he ate at a Taco Bell the night he arrived in Bozeman and withdrew $200 cash from an ATM.

She said that he had a direct flight booked from Bozeman to Chicago at 12:18pm on June 8th and when I spoke with her it was already after 12:18pm. She said she was frequently checking his United Airlines account online and saw that he never checked in for his flight, which he normally does the night prior to his flight. His United Airlines confirmation # was AEX40Y. She said that he had no known medical issues besides visiting a chiropractor pretty regularly. (b)6, (b)7c, Privacy [redacted] She said he would be wearing khaki pants (unknown brand, but ones he frequently wore while hiking), a navy blue "second skin" shirt, a bright yellow t-shirt, and carrying a gray Columbia jacket with royal blue shoulders. She was unsure what shoes he would be wearing, but said she would forward photos of his hiking "gear" in future emails to me.

After speaking briefly with (b)6, (b)7c, Privacy Act [redacted] Tim Townsend called me to inform me that he was going to open the rental car and asked if I would like to be present. I drove down to meet him at the rental car parked at the Rescue Creek Trailhead. While looking through the contents in the rental car, we noticed a backpack sitting on the front passenger seat. There were also clothes, a pair of shoes and food in the very back of the vehicle, including a six pack of orange Gatorade with 2 bottles missing. While looking through the backpack on the front seat, we discovered an Apple MacBook Pro and various papers including one that seemed to have hand-written notations of Yellowstone locations and their elevations.

{See external document uploaded into IMARS labeled as "Hand Written notations of Yellowstone Location Elevations" for photo of this item}

On the front seat was also a receipt for entrance into the park. It showed that Murphy paid with $40 cash at kiosk #2 at 08:08 am on June 7th. The receipt showed "YELL-DBART" as the employee who worked the transaction.

{See external document uploaded into IMARS labeled as "Murphy 07-07-17 North Entrance Receipt" for photo of this item}

Ranger Tim Townsend secured the laptop and we departed the vehicle.

I went to the North Entrance Station kiosk to ask questions of the Entrance Station Ranger who interacted with Mr. Murphy when he paid and entered the park. I was informed that she was not working at the time and was given her phone number. I called her and asked her to call or email me if she remembered anything at all about her interaction with Mr. Murphy. I never received a phone call or was contacted by this Ranger. I was informed that she was working in kiosk #2 lane, so Mr. Murphy would have entered the park using the outside pay lane at the entrance station. (b)7e [redacted]

I contacted the Quality Inn hotel in Belgrade and asked if they had security cameras of their parking lots or front desk. I was looking to obtain documentation of what Mr. Murphy was wearing when he left the hotel and to confirm that he was alone. I was informed that they did, in fact, have multiple security cameras throughout the property and they could give me the security camera footage if I could get someone to their location to download it. I was informed by phone call later that day that they did not have video footage of Mr. Murphy checking out at the front desk on the 7th and they believed that he probably checked out by phone. They did confirm that he stayed with them the evening of the 6th and checked out

of the hotel the morning of the 7th. They said that I should contact them should I need video footage of the other areas outside of the front desk.

After contacting the North Entrance Station, I returned to the office and talked with (b)6, (b)7c, Pi Act a couple more times. (b)6, (b)7c, Pi Act and Jeff Murphy's sister, (b)6, (b)7c, Privacy Act both contacted me throughout the day explaining intentions of flying into Bozeman the next day, June 9th. I referred them to the assigned family liaison, Katy Anderson Wilkinson. Throughout the day, both (b)6, (b)7c, Privacy Act emailed me pictures of Jeff Murphy hiking or fishing to show what type of clothes and gear he normally took with him while doing these activities. I also received some via text from Katy Anderson Wilkinson that (b)6, (b)7c, Pi Act forwarded to her by phone.

{See supplementa (b)6, (b)7c, Privacy Act nterview report.}

June 9th:

After attending the briefing that took place with the search teams, I contacted Tom Taylor of Yellowstone's computer support services to try to look at the content on Mr. Murphy's laptop. I was informed by Tom that I needed a password in order to view the contents of the laptop. I contacted Mr. Miller of International Housewares Association and colleague of Jeff Murphy's. Mr. Miller gave me what he believed to be the "universal" password for the laptop of Mr. Murphy. He said that he personally set up Mr. Murphy's laptop. He also gave me permission to look at the contents of the laptop in order to assist determining where Mr. Murphy may be hiking or exploring in the park. After talking with Mr. Miller, I received consent from (b)6, (b)7c, Privacy Act to look at Jeff's work laptop as well. {See supplemental for Mr. Miller's interview}

After receiving the password, we were able to open the contents of Mr. Murphy's work laptop. Tom Taylor took photographs of the screens and links that were open or recently viewed. There were quite a few online websites open about the Forest Fenn treasure hunt. One particular open website article, referenced the Rescue Creek Trail. Murphy also had open screens of "Thrill of the Chase" (Forest Fenn blog site) as well as Chasecat.com. Murphy had done recent google searches of "Rescue Creek Trail and Rescue Creek Trail and Lava Creek hike 734." Murphy also had an open word doc that he recently accessed and modified on June 4, 2017 with notes and ideas he had about the Forest Fenn treasure hunt.

Soon after accessing Murphy's laptop, I went to report my findings to IC and was informed that they possibly located his body. I traveled down to the Mammoth helipad with Tim Townsend and stood by with the ambulance for the flight crew to deliver Murphy's body via helicopter. We placed the body in the ambulance and transported it to the Mammoth ambulance bay. Because of pending inclement weather, it was not a possibility for me to travel to the site where the body was sited and recovered. Collette Daigle-Berg was on scene as a part of a dog search team and it was reported to me that she photographed the location where Mr. Murphy's body was finally located.

At the ambulance bay, we met Ranger Matthew Chuvarsky, who said he would be taking the coroner responsibilities along with Collette Daigle-Berg. We opened the bag and I photographed the body and Murphy's belongings (from his backpack as well as on his person) with Chuvarsky's government issued camera. I was informed by Chuvarsky that the only item missing from Murphy was his wallet and that Daigle-Berg had retrieved that when she assisted with recovering the body.

{See attached coroner report for list of items that were given back to family on behalf of the park recovering Murphy's body, backpack and rental car. Also see coroner report for photographs of body and property recovered.}

When I saw Collette Daigle-Berg, I informed her that I needed Murphy's wallet in order to put in with the rest of his belongings. She stated that was a coroner duty and did not give me the wallet. Later that evening, Tim Townsend gathered all of Murphy's belongings including the wallet from Daigle-Berg, items from the rental car collected by Ranger John Ferguson and items recovered from Murphy's body and backpack and typed up DI1-05 (government property forms) . Daigle-Berg was to pick up all the items and property sheets that night at the Mammoth Pagoda in order to give them back to the family.

We met with the family when they arrived in the park: IC Phil Basak, Operations Joe Bueter, myself and all of the family liasons. Ms. Daigle-Berg showed up about an hour later and informed them of how she perceived Mr. Murphy died: (b)6, (b)7c, Privacy Act

I attended the after action review with all of the other involved management team and superintendent.

Around a week later on June 16th , I contacted Gardiner Market to ask if they had security camera video footage of Mr. Murphy coming into the store on June 7th morning. I contacted Gardiner Market because we found a Gardiner Market grocery bag in Mr. Murphy's backpack upon retrieval. There were also orange Gatorade bottles, water bottles and nuts that appeared to have been recently purchased (possibly items purchased at Gardiner Market) in both Murphy's rental car and backpack. After speaking with Market owner, Rebecca Demaree, she stated she was able to locate security camera footage of Joseph Murphy entering the Gardiner Market on June 7th morning.

I reviewed the security footage with her, where I saw Mr. Murphy enter the Gardiner Market, buy a few items, speak briefly with the checker, pay with cash and exit the Market to his rental vehicle. When he sat down in his rental vehicle, he made a phone call (around same time (b)6, (b)7c, P.I. A.I. said he called to tell her he was going to start his hike soon) and then he drove out of the parking lot, heading south on Hwy 89 towards the park entrance. Mr. Murphy appeared to be alone in all of the security camera footage: while in the store as well as when occupying the rental vehicle.

{see attached interview with store owner Rebecca Demaree}

CONCLUSION:

Joseph Jeff Murphy entered Yellowstone National Park on 07/07/17 morning with the intention to hike Turkey Penn Peak in order to locate the Forest Fenn treasure. His body was located on 07/09/17 and retrieved at the bottom of a hill in the Turkey Penn Peak area. It was determined that his death was caused by a large fall and coroner stated she believed cause of death (b)6, (b)7c, Privacy Act in conjunction with the fall. It appeared as if he was traveling alone the entire time. All items located on Mr. Murphy at time of body recovery indicate he was looking for treasure and appeared that he did not have intentions of suicide.

Screen shot photographs of Mr. Murphy's work laptop, photos of Mr. Murphy sent from family members, photographs and video (b)7e of his visit to Gardiner Market are all downloaded and available in the V Drive; Ranger Reports Restricted; NP17075021 Murphy folder.

(b)6, (b)7c, Privacy Act summary of Interviews done on 6/8/17 and 6/9/17

Report:

(b)6, (b)7c, Privacy Act June 8th, 2017 summary of multiple interviews and conversations:

(b)6, (b)7c, Privacy Act and I were in contact on both June 8th and June 9th multiple times.

On the first initial phone call with (b)6, (b)7c she stated that Jeff Murphy was looking for the Forrest Fenn treasure nearTurkey Penn Peak and that he used his United Airlines miles to book a flight to Bozeman on June 6th. She stated that he rented a Hertz rental car, confirmation H3230309626 and that she had been in contact with Hertz rental car company to have them contact her if they heard from Jeff. She said that he stayed in the Belgrade Quality Inn hotel on the evening of the 6th. She said she had been accessing his credit card activity online and saw that he ate at a Taco Bell the night he arrived in Bozeman and withdrew $200 cash from an ATM.

She said that he had a direct flight booked from Bozeman to Chicago at 12:18pm on June 8th and when I spoke with her it was already after 12:18pm. She said she was frequently checking his United Airlines account online and saw that he never checked in for his flight, which he normally does the night prior to his flight. His United Airlines confirmation # was AEX40Y. She said that he had no known medical issues besides visiting a chiropractor pretty regularly. (b)6, (b)7c, Privacy Act

(b)6, (b)7c, Privacy Act

(b)6, (b)7c She said he would be wearing khaki pants (unknown brand, but ones he frequently wore while hiking), a navy blue "second skin" shirt, a bright yellow t-shirt, and carrying a gray Columbia jacket with royal blue shoulders. She said he wears a khaki colored backpack of some prominent brand that she could not recall. She was unsure what shoes he would be wearing, but said she would forward photos of his hiking "gear" in future emails to me and that he was a size 10.5 shoe. She said he often purchased his shoes abroad or on Amazon Prime, but that the shoes she thought he had brought along to hike in were still in his closet at home.

She said that they both had just returned from a treasure-hunting hike to campsite 1A2 around Memorial Day weekend. They had driven to and from Yellowstone National Park for that trip from May 25-May 29th, 2017.

She said that Jeff often takes a small shovel along in case he needs to scrape the dirt in order to assist with locating the hidden treasure. She informed me that the treasure is not buried, but is supposed to be on the surface of the ground, but probably hidden from view. He always walks with a "hiking

stick" (found out later this meant trekking pole) in his right hand and always carries bear spray.

(b)6, (b)7c, said that Jeff is very friendly on the trail; he will talk with others he meets and greet them with a "hi." She says he very rarely goes off trails and if he does, it is not further than 50 feet or so. She said this is because he has been hunting for the treasure with his kids in the past and knows this is the safest thing to do. She said he is good with directions and he will be looking for something that may be a "clue" as to where the treasure may be; markers, stones, etc.

(b)6, (b)7c emailed and texted many pictures of Jeff in the hiking gear that he typically wears while fishing or recreating outdoors. These pictures are saved on V Drive/Ranger Reports-restricted/2017 Supporting Documents/NP17075021 Murphy SAR.

(b)6, (b)7c stated a few things about Jeff's personality:

He is mild-mannered, easy going, loves NPS and outdoors, likes to fish and hike, he would ask for help if he needed it, very unlike him not to answer his cell phone, unlike him to be out of communication for so long, he is glued to phone, he is not a big risk-taker, hiking alone for him is odd and his parents reside (b)6, (b)7c, Privacy Act

I found out through talking with (b)6, (b)7c hat Jeff was an owner and President of his own business at one point and that he currently works as Vice President of International Sales with the International Housewares Association. He started there in March of 2017. She gave me the name and phone number of Jeff's friend and colleague there: Derek Miller.

During other talks with (b)6, (b)7c she provided me text message strings between her and Jeff where Jeff states that he needs to come back to Yellowstone to search for the treasure. She said he was ADAMANT that the treasure was somewhere near the 1A2 campsite they had visited over Memorial Day weekend. She said that on Saturday (prior to him leaving for YELL) that he told her that he "thinks it is on the north side of the trail." She said he told her that is "exactly where it is." (b)6, (b)7c said that she was worried about him coming and hiking alone and that she expressed her concern to him. She also forwarded me emails that she sent to Forest Fenn as well as Forest Fenn's responses to her emails after she knew that Jeff was missing.

All of these correspondences are available to view at V Drive/Ranger Reports-restriced/2017 supporting documents/NP17075021 Murphy SAR.

When (b)6, (b)7c was alerted that we had Jeff's work laptop and wanted to open it to view possible google searches and websites he was reviewing the night before, she gave her approval for us to look at the contents of the laptop.

Bouska interview with Derek Miller

Report:

Phone Interview with Derek Miller of International Housewares Association on 06/09/17

I contacted Derek Miller of International Housewares Association on June 9th while conducting investigations on the Murphy SAR. Mr. Miller was a co-worker of Jeff Murphy. His personal phone number had been given to me by (b)6, (b)7 [redacted] but I had reached him at his office number after calling the phone numbers listed on Murphy's business cards that located in Murphy's rental car. Mr. Miller stated that he had worked in an official capacity with Murphy since February 1, 2017. My main intention of contacting Mr. Miller was to ask if there was any way he would be able to give me access to Murphy's work laptop that we had seized from Murphy's rental vehicle a day earlier. When I contacted Mr. Miller, he was able to give me the passcode to Murphy's laptop which was successful in allowing us to gain access to view Murphy's recent search and user history on the laptop.

I asked Mr. Miller a few questions about Murphy and he was willing to talk with me.

Mr. Miller stated that he had lunch with Murphy on Tuesday, the 6th with other friends/co-workers and Murphy did not mention the trip to Yellowstone. He and another colleague noticed that Murphy was wearing his medical ID bracelet that all the company employees wear when they were traveling. They thought it was odd that he was wearing the ID bracelet as most employees wore it only when they were traveling internationally. He said that now he knows that he was wearing it because he was flying later that day to Montana.

Mr. Miller stated that Murphy texted someone at the office on Wednesday, June 7th stating that he was "ill" and would not be able to come into work. Mr. Miller said that it was an anomaly that Murphy would lie and skip coming into work. He also said it was very odd that Murphy would travel to Yellowstone that week because Murphy's assistant was already leaving to Mexico City on Friday for a work related trip and that Murphy was to join her on Saturday, the 10th. He said that Murphy knew that he had a lot of prep work to do prior to the Mexico City trip coming later that week.

Mr. Miller stated that he knew that Murphy was into "geo-caching" and that he knew he was searching for something. He said that he knew that Murphy had been searching for a treasure for many years. He knew he got close on Memorial Day (when Murphy was out here in Yellowstone with his wife (b)6, (b)7 [redacted]. He also knew that he kept this information very private and only shared that he had this hobby with close friends and a few family members.

Miller said that he did not know of any financial issues for Murphy. He did know that Murphy was laid off of his previous job in July of 2016 and started working as a consultant for the company on October 1st. Miller said that Murphy did not appear depressed nor have any signs of suicide. He said that he did seem a bit obsessive compulsive with his hobby of searching for the missing treasure. He stated that Murphy was not in the best shape and that he would often be "out of breath" just walking around the office.

Report:

Gardiner Market Interview and Security Tape Review on 06/16/17

Around a week later on June 16th , I contacted Gardiner Market to ask if they had security camera video footage of Mr. Murphy coming into the store on June 7th morning. I contacted Gardiner Market because we found a Gardiner Market grocery bag in Mr. Murphy's backpack upon retrieval. There were also orange Gatorade bottles, water bottles and nuts that appeared to have been recently purchased (possibly items purchased at Gardiner Market) in both Murphy's rental car and backpack. After speaking with Market owner, Rebecca Demaree, she stated she was able to locate security camera footage of Joseph Murphy entering the Gardiner Market on June 7th morning.

I reviewed the security footage from June 7th morning with her, where I saw Mr. Murphy enter the Gardiner Market, buy a six pack of Orange Gatorade, a couple bananas and some water bottles, speak briefly with the checker, pay with cash and exit the Market to his rental vehicle. When he sat down in his rental vehicle, he made a phone call (around same time (b)6, (b)7c, [redacted] said he called to tell her he was going to start his hike soon). He then drove out of the parking lot, heading south on Hwy 89 towards the park entrance. Mr. Murphy appeared to be alone in all of the security camera footage: while in the store as well as when occupying the rental vehicle.

Ms. Demaree stated that she was standing underneath the security camera as Mr. Murphy was checking out at the register. She said he smiled and appeared to be in a "good mood". She said he spoke cordially with the checker and seemed like a happy person.

There are three total security camera videos from Gardiner Market and all are available on V Driver/Ranger Reports-Restricted/ 2017 Supporting Documents/ NP17075021 _Murphy SAR

SUPPLEMENTAL CASE/INCIDENT RECORD

ORGANIZATIONAL (PARK) NAME	CASE INCIDENT NUMBER
Yellowstone National Park	**CFS# Y060817-21** **IMARS: NP 17075021**
LOCATION OF INCIDENT **Turkey Pen Peak,Yellowstone National Park**	DATE OF INCIDENT **06/09/17**
NATURE OF INCIDENT **Coroner's Report--Fall Down Slope**	
COMPLAINANT'S NAME **Joseph Jeff Murphy** SSN: [redacted] DOB: 10/23/1963 **DOD: 06/07/17**	COMPLAINANT'S ADDRESS [redacted] Batavia, IL [redacted]

Summary of Incident:

On 06/07/17 at approximately 0830 hours Joseph "Jeff" Murphy began a hike up the Rescue Creek Trail with the intent of exploring the Turkey Pen Peak area of Yellowstone National Park. He did not return from the hike and a search was initiated by the National Park Service on 6/08/17. Mr. Murphy's body was seen from a search helicopter at approximately 1031 hours on 6/09/17. The body was located at the bottom of a talus slope at the southwest base of Turkey Pen Peak. Investigation revealed that Mr. Murphy had fallen from over five hundred feet upslope. Following the initial coroner's investigation, Mr. Murphy's body was taken by wheeled litter and then helicopter to the Mammoth Area.

Mr. Murphy's "Manner of Death" was recorded as "Accidental" His "Cause of Death" was recorded as "Blunt Force Trauma of the Head and Neck due to an approximate five hundred foot fall down a steep slope". Mr. Murphy's death certificate, #201734-004722, was recorded and filed by Montana Vital Records on 6/13/17.

I served as primary coroner on the case. Deputy Coroner, Ranger Matthew Chuvarsky, assisted.

ORGANIZATIONAL (PARK) NAME	CASE INCIDENT NUMBER
Yellowstone National Park	**CFS# Y060817-21** **IMARS: NP 17075021**
LOCATION OF INCIDENT **Turkey Pen Peak,Yellowstone National Park**	DATE OF INCIDENT **06/09/17**
NATURE OF INCIDENT **Coroner's Report--Fall Down Slope**	
COMPLAINANT'S NAME **Joseph Jeff Murphy** SSN: (b)6, (b)7c, [redacted] DOB: 10/23/1963 **DOD: 06/07/17**	COMPLAINANT'S ADDRESS (b)6, (b)7c, Privacy Act [redacted] Batavia, IL (b)6, (b)7c, [redacted]

Incident Investigation and Response:

At approximately 0753 hours on 6/08/17 Yellowstone National Park dispatch received a call from (b)6, (b)7c, Privacy Act [redacted] that her husband, Joseph "Jeff" Murphy, had not returned from a day hike the previous day. (b)6, (b)7c, Privacy Act [redacted] advised that her husband had intended to hike into the Turkey Pen area of Yellowstone Park starting at 0800 on 6/07/17. (b)6, (b)7c, Privacy Act [redacted] advised that "Jeff" Murphy intended to park at the Rescue Creek Trailhead, hike approximately four miles, and then return by 2000 hours.

Emergency personnel were dispatched to the incident. Yellowstone Acting Emergency Medical Services Coordinator, Phil Basak, assumed the role of Incident Commander. Law Enforcement Office Ranger,Sara Bouska, and Mammoth District Ranger, Timothy Townsend, were assigned Investigations.

Search efforts on 6/8/17 were inconclusive. On 6/09/17 a total of five dog teams, eight hiking teams, four horse teams and the Yellowstone's contract helicopter were fielded in the search for Mr. Murphy.

At approximately 1031 hours on 6/09/17 Dan Turck, flying as spotter in Helicopter N173BH, saw what he thought was possibly Murphy, at the base of a talus slope. Dog Team 1 (flanker Dylan Schneider, myself and canine "Chapter") was approximately 500 feet away. We descended the talus slope and located the body of Joseph "Jeff" Murphy. Murphy was preliminarily identified by an ID bracelet on his right wrist. I confirmed/pronounced that Murphy was deceased at 1040 hours. (See Yellowstone's SAR Report Summary.)

Incident Command requested that I assume coroner investigation duties of the fatality which had occurred in the State of Montana within the boundaries of Yellowstone National Park. Deputy Coroner, Ranger Matt Chuvarsky, would assist the investigation.

NATIONAL PARK SERVICE
SUPPLEMENTAL CASE/INCIDENT RECORD

ORGANIZATIONAL (PARK) NAME	CASE INCIDENT NUMBER
Yellowstone National Park	**CFS# Y060817-21** **IMARS: NP 17075021**
LOCATION OF INCIDENT **Turkey Pen Peak,Yellowstone National Park**	DATE OF INCIDENT **06/09/17**
NATURE OF INCIDENT **Coroner's Report--Fall Down Slope**	

COMPLAINANT'S NAME	COMPLAINANT'S ADDRESS
Joseph Jeff Murphy SSN: (b)6, (b)7c, [redacted] DOB: 10/23/1963 **DOD: 06/07/17**	(b)6, (b)7c, Privacy Act [redacted] Batavia, IL (b)6, (b)7c, [redacted]

Preliminary Exam of Body at Scene:

Mr. Murphy's fully-clothed body was in a reclined position on the slight slope at the base of the talus. His body was wedged in medium-sized talus boulders. An approximately five inch diameter, five foot long, dead log lay to the left side of his body. A slightly smaller dead log sat atop the first log at an approximately ninety-degree angle.

Mr. Murphy's head was uphill, face out. His chin was tucked to his chest and his head was angled to the right. His eyeglasses were on his face but slightly askew. His daypack was covering the top of his head. Both of his arms were through the arm straps. The waist strap was not fastened.

His left leg was bent at the knee. His right leg was straight on the ground. His right arm was palm down and extended approximately 10 inches to the side of his body. A trekking pole was under his right hand with the pointed end downslope. A brown ball cap was on the ground between the trekking pole and his right leg.

Mr. Murphy's left arm was extended, palm down and angled at about 45 degrees over his torso. His left hand grasped the upper one third of a can of bear spray. The bear spray was about three-quarters of the way out of the holster which was attached to his belt. The bear spray can was punctured in several places and completely empty. The trigger guard of the can of bear spray was in place over the trigger. The zip tie attaching the trigger guard to the can was still in place.

Mr. Murphy was wearing a long-sleeved blue tee-shirt; brown long-legged cargo pants; a blue and green webbing type belt; brown, high-topped Merrill hiking boots (both tied completely to the top); gray, crew-length hiking socks and blue men's briefs. The back of the cargo pants were ripped and torn. The cargo pants and blue shirt had what appeared to be bear spray on their fronts.

LOCATION OF INCIDENT **Turkey Pen Peak,Yellowstone National Park**	DATE OF INCIDENT **06/09/17**
NATURE OF INCIDENT **Coroner's Report--Fall Down Slope**	
COMPLAINANT'S NAME **Joseph Jeff Murphy** SSN: (b)6, (b)7c, [redacted] DOB: 10/23/1963 **DOD: 06/07/17**	COMPLAINANT'S ADDRESS (b)6, (b)7c, Privacy Act [redacted] Batavia, IL (b)6, (b)7c, Privacy Act [redacted]

Preliminary Exam of Body at Scene

Mr. Murphy was wearing a gold banded wedding ring on the ring finger of his left hand. He was wearing a black FitBit bracelet on his left wrist and an identification bracelet on his right wrist. Additionally a black and orange Gerber pocket tool was in a case attached to his belt.

A preliminary examination at the scene revealed that Mr. Murphy (b)6, (b)7c, Privacy Act [redacted] The body was in full rigor. Lividity was present posteriorly and was consistent with the position of the victim. Fly larvae were present in the body's nose, eyes, mouth and ears.

Following documentation of Mr. Murphy's final resting point, his body was loaded into a wheeled litter and transported to the helispot at the western base of Turkey Pen Peak. Fire Cache employee, Nicholas Plovanic, accompanied the body to the helispot. The body was flown by Helicopter N173BH to the Mammoth Helibase arriving at 1255 hours. Deputy Coroner Matthew Chuvarsky received the body and accompanied it by ambulance to the Mammoth ambulance bay.

Scene Investigation:

Mr. Murphy's body was located at the base of a talus slope at the southwestern base of Turkey Pen Peak. GPS coordinates of the body's location are: N 45.00949 degrees, W 110.64114 degrees. (Map Datum: WGS 84. Coordinates in latitude/longitude decimal degree units.) A water bottle was visible upslope of Murphy's final resting point. Initial impression was that Mr. Murphy had died as the result of a fall down the slope above.

SUPPLEMENTAL CASE/INCIDENT RECORD

ORGANIZATIONAL (PARK) NAME	CASE INCIDENT NUMBER
Yellowstone National Park	**CFS# Y060817-21** **IMARS: NP 17075021**
LOCATION OF INCIDENT **Turkey Pen Peak,Yellowstone National Park**	DATE OF INCIDENT **06/09/17**
NATURE OF INCIDENT **Coroner's Report--Fall Down Slope**	
COMPLAINANT'S NAME **Joseph Jeff Murphy** SSN: (b)6, (b)7c, Privacy Act DOB: 10/23/1963 **DOD: 06/07/17**	COMPLAINANT'S ADDRESS (b)6, (b)7c, Privacy Act Batavia, IL (b)6, (b)7c, Privacy Act

Scene Investigation Continued:

Starting at the location of Murphy's final resting point, Flanker Dylan Schneider, Dog Handler Ladean McKittrick and I documented a path of physical disturbance upslope approximately 520-550 feet. I documented the disturbance delineating the fall line on my Garmin GPS. A stick of chapstick and a water bottle were found in the fall line approximately twenty and fifty feet above the body respectively. Dried branches and rocks with fresh scuff marks identified the fall line along the talus slope above the body. The talus slope extended approximately 300 feet upslope of the body.

Grass and short vegetation extended above the talus slope. The grass and vegetation was recently disturbed and flattened in this section. Dried branches with fresh scuff marks were also noted in this section of the fall line.

Above the grass and vegetation the slope steepened further and bifurcated into two separate dirt and rock chutes. Recent disturbance was observed in the western-most chute. Near the top and center of the chute lay a brown wallet. The wallet was photographed and collected. It contained identification belonging to Joseph Jeff Murphy.

Projections of the fall line using the GPS waypoints and track recorded indicate a total fall distance of between 520 and 550 feet. The slope angle was measured in two different locations and was between 45 and 55 degrees.

Slope percent was calculated using the GPS track projection figures of 523 foot distance (horizontal distance—HD) and ascent distance of 372 feet (vertical distance—VD). Slope percent equals: (VD/HD) x 100 or (327'/523') x 100. Slope percent equals 71%.

NATURE OF INCIDENT **Coroner's Report--Fall Down Slope**	
COMPLAINANT'S NAME **Joseph Jeff Murphy** SSN: (b)6, (b)7c, Privacy Act DOB: 10/23/1963 **DOD: 06/07/17**	COMPLAINANT'S ADDRESS (b)6, (b)7c, Privacy Act Batavia, IL (b)6, (b)7c, Privacy Act

Scene Investigation Continued:

In documenting the slide path of the deceased it appeared that he stepped or hopped into the chute from the less steep slope above. It appeared that he landed on his buttocks and that his wallet came out of his pocket at this time. The ripped rear seat of his pants, the abrasions to his buttocks and the flattened grass section above the talus slope suggest that he slid on his buttocks through the grassy section. At some point, possibly the transition between the grassy section and the talus slope, he most likely started to tumble resulting in what was probably the fatal injury (b)6, (b)7c, Privacy Act (b)6, (b)7c, Privacy Act

Mr. Murphy may likely have had his left hand on his canister of bear spray during his slide and fall in order to protect it. (b)6, (b)7c, Privacy Act (b)6, (b)7c, Privacy Act (b)6, (b)7c, Privacy Act That the bear spray canister was still in the hand of the deceased suggests that his death occurred during the actual fall and was most likely the result (b)6, (b)7c, Privacy Act (b)6, (b)7c

There was no evidence at the scene, including the slide path, to suggest that a second person was involved and pushed the victim into the uppermost chute. All evidence points to this event being accidental.

Identification of the Decedent:

The identification bracelet on the decedent's right wrist read:

JOSEPH JEFF MURPHY / 1963
BATAVIA, IL USA
(b)6, (b)7c, Privacy Act
RBBB - NKA - A - POS

The wallet located at the top of the slide path of the victim contained an Illinois driver's license (b)6, (b)7c, Privacy Act belonging to Joseph Jeff Murphy. Numerous credit cards in the wallet were also issued to Joseph Jeff Murphy.

The victim's physical appearance, height, weight and age, matched both the lost person photo of Jeff Murphy supplied to searchers as well as the photo of Murphy on his Illinois driver's license.

At her request, the victim's sister, (b)6, (b)7c, Privacy viewed the body at the Mammoth Ambulance Bay. In addition, (b)6, (b)7c, Privacy Act wife of Jeff Murphy, viewed the decedent at the Franzen-Davis Funeral Home. Neither women expressed any doubt that the decedent was Joseph Jeff Murphy.

COMPLAINANT'S NAME	COMPLAINANT'S ADDRESS
Joseph Jeff Murphy SSN: [redacted] (b)6, (b)7c, Privacy Act DOB: 10/23/1963 **DOD: 06/07/17**	[redacted] (b)6, (b)7c, Privacy Act Batavia, IL [redacted] (b)6, (b)7c, Privacy Act

Notification of Family:

Deputy Chief Ranger Richard Moore notified Murphy's wife, [redacted] (b)6, (b)7c, Privacy Act and other family members of Mr. Murphy's death at the Bozeman Airport the afternoon of 6/9/2017.

Statement of Family:

At some point during the notification process [redacted] (b)6, (b)7c, Privacy Act commented to rangers that searching for the Forest Fenn treasure had been a family hobby for the past several years. She advised that her family never went more than twenty-five feet off-road or trail. She also advised that Mr. Murphy had wanted to check one more area and that she knew he was planning to hike up Turkey Pen Peak.

Physical Exam of Deceased:

Deputy Coroner Matt Chuvarsky assisted by National Park Service Paramedic John Ferguson and Gallatin County Deputy Coroner Mike Gavagan, performed a more comprehensive physical exam of Mr. Murphy's body at the Mammoth Ambulance Bay. Ranger Sarah Bouska took photos of the exam at Chuvarsky's request.

The physical exam is encompassed in Chuvarsky's Photo Log file with notes shown for all injuries. [redacted] (b)6, (b)7c, Privacy Act (b)6, (b)7c, Privacy Act Chuvarsky recorded that no other broken bones were noted, but rigor was still very present and made palpation/manipulation of his extremities less useful. Most injuries appeared to be peri-mortem due to the presence of bleeding and bruising."

Toxicology:

Deputy Coroner Chuvarsky took initial toxicology samples on 6/09/17 starting at approximately 1630 hours. These included 2 cc of right, femoral blood, 45 cc of urine from the deceased's bladder and .6 cc of vitreous fluid from the deceased's eyes. Attempts at withdrawing additional femoral blood were challenging. At my request, Franzen-Davis Funeral Director Colin Zehman performed a cut-down of the victim's right upper thigh on 6/10/17 in order to expose the femoral artery. The artery proved to be nearly devoid of blood. Approximately .3 cc of femoral blood and 1 cc of additional vitreous fluid were obtained and submitted for analysis.

The samples were packaged and sent to AXIS Forensic Toxicoloy Laboratory in Indianapolis, Illinois for analysis. The samples were sent via FedEx from the Yellowstone Supply Center on 6/13/17.

Disposition of Body:

At approximately 1845 hours on 6/9/17 I released Mr. Murphy's body to Colin Zehman of Franzen-Davis Funeral Home for transport to the funeral home in Livingston. At approximately 1545 hours on 6/10/17 I signed the Montana Cremation Authorization form for Mr. Murphy's body. It was the request of his wife, (b)6, (b)7c that his remains be cremated. Franzen-Davis Funeral Home director advised that he planned to cremate Mr. Murphy's remains later that evening.

Disposition of Property:

Mr. Murphy's wallet was collected by me at the scene of the accident and inventoried by Ranger Tim Townsend. Mr. Murphy's daypack and contents and his personal effects found on his body at the accident scene were transferred with his body to the Mammoth Ambulance Bay. They were inventoried by Rangers Townsend and Bouska.

Disposition of Property Continued:

The daypack, personal effects, wallet and contents, with the exception of Mr. Murphy's Illinois Drivers License (b)6, (b)7c, Privacy Act [redacted] were returned by me to (b)6, (b)7c, Privacy Act [redacted] on 6/10/17. The driver's license was retained for this file.

Mr. Murphy's belongings found in his Dollar Rent a Car vehicle located at the Rescue Creek Trailhead were recovered and inventoried by Rangers Townsend and Bouska. I returned those belongings to (b)6, (b)7c, Privacy Act [redacted] on 6/10/17. The Mammoth Rangers released Mr. Murphy's rental vehicle back to Dollar Rent a Car.

Toxicology Results:

The toxicology results were returned to the Chief Ranger's Office by Axis Forensic Toxicology Laboratory. The results were forwarded to Deputy Coroner Matt Chuvarsky at the Lake Ranger Station by the Chief Ranger's Office. At my request Axis Forensic Toxicology faxed the results to the Chief Ranger's Office on 7/27/17. Administrative Assistant Jennifer Morey scanned and emailed me the results on 7/27/17.

The results of the requested Comprehensive Drug Panel were negative for all analytes tested for both blood and urine. No volatile testing was conducted on the vitreous fluid. (See Laboratory Case # 3124408.)

8.WAS DECEDENT EVER IN US ARMED FORCES? ☐ Yes ☐ No

7a.RESIDENCE STATE:
7b.COUNTY:
7c.CITY, TOWN, OR LOCATION:
7d.STREET NUMBER:
7f.ZIP CODE:
7g.INSIDE CITY ☐ Yes ☐ No

51.DECEDENT'S EDUCATION (Specify only the highest diploma or degree received)
☐ 8th grade or less
☐ 9th-12th grade; No diploma
☐ High School graduate or GED completed
☐ Some college, but no degree
☐ Associates Degree (e.g. AA,AS)
☒ Bachelor's Degree (e.g. BA,AB,BS)
☐ Master's Degree (e.g. MA,MS,Meng,Med, MSW,MBA)
☐ Doctorate (e.g. PhD,EdD) or Professional degree (e.g. MD,DDS,DVM,LLB,JD)

52.DECEDENT OF HISPANIC ORIGIN? (Check the box that best describes whether the decedent is Spanish/Hispanic/Latino. Check the No box if the decedent is not Spanish/Hispanic/Latino.)
☒ No, not Spanish/Hispanic/Latino
☐ Yes, Mexican, Mexican American, Chicano
☐ Yes, Puerto Rican
☐ Yes, Cuban
☐ Yes, other Spanish/Hispanic/Latino (Specify)

53.DECEDENT'S RACE (Check one or more races to indicate what the decedent considers himself or herself to be.)
☒ White
☐ Black African American
☐ Native Hawaiian
☐ Asian Indian
☐ Chinese
☐ Filipino
☐ Japanese
☐ Guamanian or Chamorro
☐ Korean
☐ Vietnamese
☐ Samoan
☐ Other Asian (Specify)
☐ Other Pacific Islander (Specify)
☐ American Indian or Alaska Native (Name of the enrolled or principal tribe)
☐ Other (Specify)

11.FATHER'S NAME (First, Middle, Last):
12.MOTHER'S NAME (First, Middle, last name before first marriage):

13a.INFORMANT'S NAME: (b)6, (b)7c, Privacy Act
13b.RELATION TO DECEDENT: Wife
13c.MAILING ADDRESS (Street and Number or Rural Route Number, City or Town, State, Zip Code):

18.METHOD OF DISPOSITION: ☐ Burial ☒ Cremation ☐ Removal from State ☐ Entombment ☐ Donation ☐ Other
19.PLACE OF DISPOSITION: Franzen-Davis Crematory
20.LOCATION (City or Town, State): Livingston, Montana

22.SIGNATURE OF FUNERAL SERVICE LICENSEE OR OTHER PERSON IN CHARGE OF DISPOSITION: Colin M. Zeman
23.MONTANA LICENSE NO (of licensee if applicable): 1952
21.NAME AND ADDRESS OF FUNERAL FACILITY: Franzen-Davis Funeral Home, 118 N 3rd St, Livingston, Montana 59047

To Be Completed By: Medical Certifier

ITEMS 24-28 MUST BE COMPLETED BY PERSON WHO PRONOUNCES OR CERTIFIES DEATH
24.DATE PRONOUNCED DEAD (Month/Day/Year):
25.TIME PRONOUNCED DEAD:

26.SIGNATURE OF PERSON PRONOUNCING DEATH (only when applicable): Colette Daigle-Berg, Deputy Coroner
27.LICENSE NUMBER:

28.DATE SIGNED (Month/Day/Year):
30.ACTUAL OR PRESUMED TIME OF DEATH: Found
31.WAS MEDICAL EXAMINER OR CORONER CONTACTED? ☒ Yes ☐ No

CAUSE OF DEATH (See instructions and example)

32. PART I. Enter the chain of events - diseases, injuries, or complications - that directly caused the death. DO NOT enter terminal events such as cardiac arrest, respiratory arrest, or ventricular fibrillation without showing the etiology. DO NOT ABBREVIATE. Enter only one cause on a line. Add additional lines if necessary.

Approximate Interval: (Include Min, Hr, Day, Yrs, etc.)

IMMEDIATE CAUSE (Final disease or condition resulting in death) → a.
DUE TO (or as a consequence of):
Sequentially list conditions, if any, leading to the cause listed on line a. Enter the UNDERLYING CAUSE (disease or injury that initiated the events resulting in death) LAST.
b.
DUE TO (or as a consequence of):
c.
DUE TO (or as a consequence of):
d.

PART II Other significant conditions contributing to death but not resulting in the underlying cause given in Part I

33.WAS AN AUTOPSY PERFORMED? ☐ Yes ☒ No
34.WERE AUTOPSY FINDINGS AVAILABLE PRIOR TO COMPLETION OF CAUSE OF DEATH ☐ Yes ☐ No

37.MANNER OF DEATH: ☐ Natural ☐ Homicide ☐ Accident ☐ Pending Investigation ☐ Suicide ☐ Could not be Determined
35.DID TOBACCO USE CONTRIBUTE TO DEATH? ☐ Yes ☐ Probably ☐ No ☐ Unknown
36.IF FEMALE: ☐ Not pregnant within past year ☐ Not pregnant, but pregnant within 42 days of death ☐ Not pregnant, but pregnant 43 days to 1 year before death ☐ Pregnant at time of death ☐ Unknown if pregnant within past year

DATE OF INJURY (Month,Day,Year) 38.
TIME OF INJURY 39.
INJURED AT WORK 41. ☐ Yes ☐ No
40.PLACE OF INJURY (e.g. Decedent's Home, Construction Site, Restaurant, Wooded Area):
44.IF TRAFFIC ACCIDENT SPECIFY: ☐ Driver/Operator ☐ Passenger ☐ Pedestrian ☐ Other

43.DESCRIBE HOW INJURY OCCURRED:
42.LOCATION (Street and Number or Rural Route, City, Town, State, Zip Code):

45.TO BE COMPLETED BY CERTIFIER: (A certifier can be a MD, PA, APRN, or coroner)
☐ Certifying Physician: To the best of my knowledge death occurred at the time, date, and place, and due to the cause(s) and manner stated.
☐ Pronouncing & Certifying physician: To the best of my knowledge death occurred at the time, date, and place, and due to the cause(s) and manner stated.
☒ Medical Examiner/Coroner: On the basis of examination and/or investigation, in my opinion, death occurred at the time, date, and place, and due to the cause(s) and manner stated.
SIGNATURE: Colette Daigle-Berg

49.DATE CERTIFIED (Month,Day,Year):
48.LICENSE NO:
47.TITLE: Deputy Coroner

46.NAME AND ADDRESS OF CERTIFIER (PHYSICIAN OR CORONER): Colette Daigle-Berg, 414 E Callender St, Livingston, MT 59047
LOCAL REGISTRAR'S NAME:
50.DATE FILED (Mo/Day/Yr):

Section 2: Collection / Chain of Custody Information

Specimens obtained / sent to laboratory by: Matthew Chuvarsky & Colette Daigle-Berg
(Signature) (Must be signed to process.)
Colette Daigle-Berg
(Printed Name)

Investigator: Colette Daigle-Berg

Pathologist: Ø

Submitting Official: Colette Daigle-Berg

Section 3: Test Request Information

(Requested tests must be indicated below.)

- [x] 70510: Comprehensive Drug Panel (formerly 550) (Includes Drugs of Abuse and Alcohol Panel)
- [ ] 70530: Drugs of Abuse Panel (formerly 900) (Includes Alcohol Panel)
- [ ] 45620: Alcohol Panel (formerly 451) (Includes Methanol, Ethanol, Isopropanol, Acetone)
- [ ] 44060: Carbon Monoxide (formerly 1660)
- [ ] 32400: Electrolytes Panel (formerly 910)
- [ ] 20000: Trace Analysis [Pill/Syringe, etc.]
- [ ] 31200: Hepatitis C Antibody (formerly 5650)
- [ ] 31320: Hepatitis B Antibody
- [ ] 31300: HIV (formerly 3700)

Additional/Specific Drugs to be Tested For:

Section 4: Subject Information

Last Name: MURPHY First Name: JOSEPH Middle Initial: J.

Sex: X Male Female Date of Death: 06-07-2017 Age: 53 Days / Months / Years (circle one)

Agency Case #: VP17075021 CFS Y060817-21

Section 5: Specimens Submitted

(Please check each type of specimen submitted and list the source, date collected, and volume.)

Type	Source	Date Collected	Volume	Type	Source	Date Collected	Volume
[x] Blood	Femoral	6/9/17	3 cc	[ ] Bile			
[x] Blood	Femoral	6/10/17	3 cc	[ ] Tissue (Specify)	Liver	6/10/17	
[ ] Blood				[ ] Tissue (Specify)			
[x] Urine	Bladder	6/9/17	45cc	[x] Other	Vitreous	6/10/17	1cc
[x] Vitreous				[ ] Other			

Specimen Labels: Place one label on each specimen container.

Section 6: Brief Case History

(Please identify the manner of death, if known, and drugs the subject may have had access to.)

Subject was hiking, lost footing and slid and tumbled down steep, rocky slope for approximately 500 feet. Subject died on 6/9/2017. Subject found 2 days later on 6/10/17. Only small amounts of blood & vitreous were able to be obtained on 6/10. Tried again on 6/12 & similar results.

Section 7: Laboratory Use Only

Received at Laboratory by: _____ Date: _____

Specimen Notes:

Complete all sections 1 through 6. COPY 1: Original must accompany specimen to the laboratory. COPY 2: Retain for your records.

Batavia, IL (b)6, (b)7c,

DOB: 10/23/1963

Phone: (b)6, (b)7c, Privacy Act

Summary:

Yellowstone National Park Dispatch received a call from the Albright Visitor Center on June 8, 2017 regarding an overdue hiker. The visitor center had retrieved a message from the night before from a hiker's wife, who stated that her husband failed to check in with her from a hike the day prior. Shortly thereafter, the wife called dispatch, reporting the same thing. A ranger was dispatched to look for his vehicle at the Rescue Creek Trailhead, the area where the wife said her husband was going. The vehicle was located at the Rescue Creek Trailhead. A subsequent search was conducted to find the overdue hiker. The hiker was located deceased approximately a day and a half later, near the base of Turkey Pen Peak.

Narrative:

On June 8, 2017, at approximately 0815 hours, I, US Park Ranger Phil Basak, was asked by Yellowstone National Park Dispatch to head to the Rescue Creek Trailhead, near the North Entrance of Yellowstone, to see if a vehicle belonging to a reported overdue hiker was still there. Just prior to being called, Park Dispatch received a call from (b)6, (b)7c, stating that her husband Jeff MURPHY failed to check in from a hike the day prior. (b)6, (b)7c, gave details of MURPHY'S plans and the rental vehicle (WA License Plate: BEL9606) he was driving. (b)6, (b)7c, had also called the night before (June 7th) and left a message at the Albright Visitor Center reporting her husband being overdue, but it was after hours.

At approximately 0829 hours, I arrived at the trailhead and located MURPHY'S vehicle. The vehicle was empty beside a few items in the cargo area. The vehicle also appeared to have been parked there overnight as a light film of dust covered it. I reported my finding to dispatch.

After discovering MURPHEY'S vehicle, I got (b)6, (b)7c, phone number and called her to ask questions to get details about her husband's plan while in the park. Once I got the basic information, I called for additional resources to assist in locating MURPHY.

I took Incident Command of the search once MURPHY'S vehicle was located at the trailhead. I returned to Mammoth to establish a command center.

Ops Period 1

The initial plan was for US Park Ranger Dan Kowalski and Park Intern (b)6, (b)7c, to come to the trailhead and hasty search the Rescue Creek Trail, towards Turkey Pen, the area MURPHY told his wife he was going. I also requested Ranger Dan Kowalski to bring down the vehicle boot to place on MURPHY'S vehicle, so that if he happened to return while people were looking for him, he would have to ask for assistance in getting it removed.

After returning to Mammoth, I asked for resources. An additional hasty team was put together to hike in from the Blacktail Trailhead to the Rescue Creek trail and meet up with the other hasty team of Kowalski and (b)6, The park helicopter was also requested and approved to search from overhead with 2 spotters on board. Lastly, two other teams of two were asked to

drive into Gardiner and towards Jardine and search via binoculars the north and east side of Turkey Pen Peak.

By 1100 hours on June 8th, the additional teams were in the field or being mobilized and I stood up additional Incident Management positions for the search. They indluded:

Joe Bueter - Operations

Becky Smith, Jessica Korhut- Plans

Gary Shelton, Chris Glenn - Logistics

Sarah Bouska, Tim Townsend - Investigations

Morgan Warthin - Public Information

Judy Knuth-Folts - Family Liaison

Wendy Hafer - Safety

Agency Liaison - Richard Moore

Once Operations was stood up, additional resources were again requested. A dog team was called in to assist. The dog team was going to be flown into the area of Turkey Pen and search going from the trail to the peak. Additional ground searchers were called into help with containment of the area.

At approximately 1339 hours, both hasty teams met up on the Rescue Creek Trail. Hasty Team 1, led by Ranger Dan Kowalski, saw some tracks that left the trail towards the peak and relayed the coordinates to Operations.

At approximately 1415 hours, the dog team was flown to the area of Turkey Pen. They met up with Hasty Team 1 (Kowalski) and searched the area of Turkey Pen Peak. Hasty Team 2 was sent back to look around campsite 1A2, a location MURPHY was supposed to camp at the last time in the park. A black bear was seen at 1A2 and Hasty Team 2 left the area for safety.

At approximately 1705 hours, all field units were requested to start making their way out of the field and back to the Command Center. Plans was working on resources needed for the next day's operation.

Ops Period 2

On June 9, 2017, morning briefing was held at 0600 hours for dog teams and 0700 hours for ground searchers. The plan for the day was to have 5 dog teams (team = 2 searchers plus dog) go into the search area and search the assigned areas of high probability where MURPHY may be during in the morning hours, when it is cooler for the dogs to search. While the dog teams were searching their assigned areas, 8 hiking teams of 2-4 people and 4 horse teams (team = 2 people on horseback) were going to be searching less probable areas. At around midday, the dog teams were to come out of the field and the ground searchers would move into their assigned areas of high probability, some of them being the same areas the dog teams were in, to continue searching. The park helicopter was going to be used to take in crews and gear as needed and weather would allow. They also would search requested areas by air.

After the briefings were completed, the respective teams carried out their assignments.

The family liaison team was tasked with going to the Bozeman Airport to meet MURPHY's wife, sister, sister-in-law and friend, who were flying in at various times of the morning.

At approximately 1031 hours on June 9h, the park helicopter spotted a blue object on the bottom of the scree field as they were flying overhead to drop off supplies. Dog Team 1 was nearby and went to the area as described.

At approximately 1040 hours, Dog Team 1 confirmed they located a deceased individual, MURPHY.

After locating MURPHY, field resources were recalled and told to report back to the Command Center. Dog Team 1, led by Collette Daigle-Berg, remained in the area and started coroner duties. Park Ranger Matthew Chuvarsky was also requested for coroner duties. I authorized the moving of MURPHY once photos and the coroner on-scene investigation was completed. MURPHY was flown from the scene to the Mammoth Helispot. He then was moved via a park ambulance to the ambulance bay.

After the confirmation of finding MURPHY, the family liaison team and agency liaison was notified as they still had not yet made contact with the family. Both liaisons were at the airport and informed the family of the outcome of the search. The family then drove down to the park and met with Operations, the Coroner (Daigle-Berg), Investigations and the IC.

At approximately 1715 hours, all field resources had returned from the field.

Incident Command continued into the morning of June 10th, when the family left the park.

-End of report-

YELLOWSTONE NATIONAL PARK NEWS RELEASE

Fatality near North Entrance

Search for Missing Person ends

MAMMOTH HOT SPRINGS, WY – Today, park search crews located the body of Jeff Murphy who was missing near the park's North Entrance. Mr. Murphy's death appears to have resulted from a fall on Turkey Pen Peak.

Mr. Murphy, 53, from Batavia, Illinois went for a day hike on the Rescue Creek Trail on June 7. The park initiated the search on June 8 when Mr. Murphy's wife reported that he failed to check in.

"All of us at Yellowstone extend our sympathy to the Murphy family for their tragic loss," said Superintendent Dan Wenk.

At its peak, the search involved eight hiking teams, five dog teams, four horse teams, and a helicopter.

The Rescue Creek Trail, which had been closed due to this search, is open. However, visitors should anticipate temporary closures in the area until the investigation is complete.

Bouska, Sarah <sarah_bouska@nps.gov>

Apple ID for Murphy

Bouska, Sarah <sarah_bouska@nps.gov> Thu, Jun 8, 2017 at 7:02 PM
To: Lester Seago <les_seago@nps.gov>

Les,

Jeff Murphy's apple ID is: (b)6, (b)7c, Privacy Act
password: (b)6, (b)7c, Privacy Act

Please call me on my personal cell if you need anything else. I am going home for the night. I'll be in at 7, even though I know you are off, I may call quick for guidance on a couple small things, if that is okay. Thanks again for all of your help today!

MISSING: Jeff Murphy

3 messages

Bouska, Sarah <sarah_bouska@nps.gov> Thu, Jun 8, 2017 at 7:00 PM
To: (b)6, (b)7c, Privacy Act

Dear Mr. Fenn,
I am leading investigations on the search for Mr. Murphy here in Yellowstone National Park. At this time we have over 5 dog teams, 8 mounted horses, 24 ground pounders and over 18 people organizing the search. Many people are vested in finding Mr. Murphy alive. We are mostly in need of understanding WHERE Mr. Murphy may have been trekking while looking for buried treasure that seems to have been prompted by a poem written by you.

He left the trailhead yesterday (08/07/17) morning around 0815 am on the Rescue Creek Trailhead with the destination of Turkey Penn Peak. He told his wife that he wanted to look on the north side of the trail and in the email to you sent on June 03, I see that he states "Since I now know that 2 trips in 1 afternoon is not a reference to a campsite, I am planning to circle back to my blaze." He also wrote an email to you referencing the trip that he and his wife took in late May to the 1A2 campsite. If you were Mr. Murphy and were looking for buried treasure related to the poem that you wrote, where would you be walking/wandering/looking? If you need a copy of a map, I would be happy to provide one. Any assistance you can provide at this point would be more than helpful. Thank you.

Sincerely,
Sarah Bouska

Dear Sarah,

The two emails you quoted are the only ones I received from Mr. Murphy. I am not familiar with the area in which he was looking, and have never been in that part of the park. I would happily pay for some helicopter time if that would assist you in the search. Please let me know what to do. I am copying (b)6, (b)7c, Privacy Act

(b)6, (b)7c, [redacted] have you notified the rangers in Yellowstone that Jeff is missing? Do you know where he was searching? When did you have last contact with him and do you know where he was staying? Sorry to pepper you with questions, but maybe there is something I can do if I know more about the situation. f

Interpreting Call Detail Records

Your response includes Call Detail Records (CDR) either with or without location. Our query results in an Excel file with multiple columns. Each row represents one call on the T-Mobile network. Some fields only appear in reports with location information.

Multimedia Messages (MMS) and text messages sent as MMS **do not** appear as part of a call record. Standard text messages **do** appear on this report. Calls made while roaming also **do not** appear on this report.

Entries with outgoing calls to 8056377249 indicate incoming calls that are forwarded (out) to the voicemail system. Entries with outgoing calls to 8056377243 = 805-MESSAGE indicate voicemail retrieval.

Please remember that T-Mobile CDR systems natively use Coordinated Universal Time (UTC). By default, that means a day of call detail records are taken from 00:00:01 to 23:59:59 UTC which may differ from your intended time range due to your time zone. If specific times other than our default are important to your inquiry, please submit legal demands with the date range/time frame adjusted for UTC to avoid delay or confusion. We are unable to convert the time displayed in the records to the local time of the handset.

The columns present on your CDR may be:

COLUMN NAME	DESCRIPTION	LOCATION RPT ONLY?	NOTES
Date	Date format mm/dd/yyyy	NO	
(UTC) Time	24 hour time format - hh:mm:ss in UTC	NO	In UTC time
Duration	Duration hh:mm:ss	NO	
Call Type	Type of call: callForwarding = Forwarded Call; mSOriginating = Outgoing Voice Call; mSTerminating = Incoming Voice; mSOriginatingSMSinMSC = Outgoing SMS; mSTerminatingSMSinMSC = Incoming SMS; moc=Mobile Originating Call; mtc= Mobile Terminating Call	NO	
Direction	Outgoing or Incoming to the target telephone number	NO	
Calling Number	Phone number that initiated the call	NO	
Dialed Number	Dialed digits	NO	
Called Number	Phone number that received the call	NO	
Destination Number	The final destination number to which the network has connected the call (might be different from the one dialed by subscriber if network translation was applied)	NO	
IMSI	International Mobile Subscriber Identity of the target number, if present	NO	
IMEI	International Mobile Equipment Identity of the target number, if present	NO	
Completion Code	Completed successfully or Abnormal Completion (network interruption). Abnormal completion calls display on this report but may or may not show on a customer's bill.	NO	
Answered?	Answered or Unanswered. Unanswered calls display on this report but may or may not show on a customer's bill.	NO	
Service Code	11 Calling line identification presentation 12 Calling line identification restriction 13 Connected Line ID Presentation 20 All Call Forwarding Services 21 Call Forwarding Unconditional (CFU) 28 All Cond Call Forwarding Services 29 Call Forwarding on Mobile Subscriber Busy (CFB) 2A Call Forwarding on No Reply (CFNRy) 2B Call Forwarding on Not Reachable (CFNRc) 31 Explicit Call Transfer (ECT) 42 Call Hold 41 Call waiting 51 Multi-Party (MPTY)	NO	
Disconnecting Party	Calling Party; Called Party or Network	NO	

Service Indicator	If populated, then the call was originated on WIFI/VoLTE, and has continued on GSM (expect 2 CDRs for same call leg)	NO	
SMS Deliv Status	SMS delivery result	NO	
Switch Name	Name of the switch which was used to deliver the call to the target number.	NO	This is NOT an indication of the location of the device.
1st LTE Site ID	EnodeBid value in decimal	YES	Only present if the call was over LTE
1st LAC	1st LAC value in decimal	YES	Not present if the call was over LTE
1st Cell ID	1st Cell Site ID value in decimal	YES	Not present if the call was over LTE
1st Tower Azimuth	Location: Azimuth orientation of antenna serving user if available (see note below)	YES	
1st Tower LAT	Latitude of 1st cell tower used.	YES	
1st Tower LONG	Longitude of 1st cell tower used.	YES	
1st Tower Address	Street Address of the 1st serving tower if available	YES	
1st Tower City	City of the 1st serving tower if available	YES	
1st Tower State	State of the 1st serving tower if available	YES	
1st Tower Zip	ZIP of the 1st serving tower if available	YES	
Last LTE Site ID	EnodeBid value in decimal	YES	Only present if the call was over LTE
Last LAC ID	Last LAC value in decimal	YES	Not present if the call was over LTE
Last Cell ID	Last Cell Site ID value in decimal	YES	Not present if the call was over LTE
Last Tower Azimuth	Azimuth orientation of antenna serving user if available (see note below)	YES	
Last Tower LAT	Latitude of last cell tower used.	YES	
Last Tower LONG	Longitude of last cell tower used.	YES	
Last Tower Address	Street Address of the last serving tower if available	YES	
Last Tower City	City of the last serving tower if available	YES	
Last Tower State	State of the last serving tower if available	YES	
Last Tower Zip	ZIP of the last serving tower if available	YES	

A NOTE ON AZIMUTH: The azimuth listed is the center compass degree facing of the identified sector of the tower. Generally, the coverage of a tower is circular and divided in three equal pieces (each 120 degrees wide). Due north is 0, due south is 180. However, not every tower is aligned with the first sector starting at 0. Using the listed azimuth, rough direction from the tower can be calculated for a call. The center degree of the sector's facing is indicated in this field. For example, if a facing has a listed orientation of 90, the center of the coverage is pointed at 90 degrees but the sector will cover traffic from roughly 60 degrees on either side (thus 30 to 150 degrees in this example).

For more information on UTC, please visit: http://www.timeanddate.com/time/aboututc.html. To convert records to your local time, you will need to use a converter such as http://www.worldtimeserver.com/convert_time_in_UTC.aspx.

Interpreting Subscriber Information

Your response includes subscriber information. Our query results in an Excel file with multiple rows. Not all rows appear on every report depending on the type of subscriber, their dates of service and the nature of your request.

The rows present **may** be:

Subscriber Details:	
Subscriber Name	Name associated with billing for this phone number
Subscriber Address	Address associated with this phone number
Subscriber Status	Status of the account
Subscriber Name Effective Date	Date this name became associated with this phone number

Account Details:	
Activation Date	Account Activation Date
Termination Date	Cancellation/Termination Date, if it has been terminated
Account Name	Primary Accountholder's Name
Account No	Billing Account Number (BAN)
Account Effective Date	Current Account Status Effective Date
Account Expiration Date	Account Expiration Date, if it has been terminated

Device Details:	
Phone Model	Phone Model
ICCID	Integrated Circuit Card Identifier for the SIM card
IMSI	International Mobile Subscriber Identity
MDN Effective Date	Phone number begin date
MDN Expiration Date	Phone number end date
MSISDN No	Target number
MSISDN Status	Current status of this telephone number
MSISDN Market	Home market of this telephone number
MSISDN Name	Name associated with this telephone number
SIM	Subscriber Identity Module number associated with this phone number
IMEI	International Mobile Equipment Identity
Begin Service Date	N/A
Device Network Type	GSM or CDMA (only displays for legacy MetroPCS customers

Billing Details:	
Bill Name	Name associated with billing for this phone number
Bill Birth Date	Subscriber birth date
Bill SSN	Subscriber Social Security Number
Bill Cycle	Bill cycle for postpaid subscribers
Bill Address	Subscriber address
Company Name	Business Name
Rate Plan	Subscriber Plan
Rate Plan Desc	Description of major features under the plan
Contact 1	Primary contact phone number

Contact 2	Secondary contact phone number
Brand	TMUS brand or MVNO providing service
Coupon	Prepaid Coupon Serial Number
Last Refilled	Last Prepaid Refill Date

Ported Details:

Ported Carrier	Company to which the number has been ported, if known

PLEASE NOTE: You may receive multiple subscriber information files if the target has used their SIM card with multiple devices or if the subscriber's line has been suspended multiple times within your target timeframe.

IMPORTANT NOTICE REGARDING TIMESTAMP ON CALL RECORDS

T-Mobile US, Inc. (which includes T-Mobile USA and Metro PCS) delivers historical call detail records in Coordinated Universal Time ("UTC"). UTC is not a time zone, but a time standard that is the basis for civil time and time zones worldwide. UTC operates independently of country specific time zones and/or seasonal adjustments, such as Daylight Savings Time.

If time zones other than UTC are important to your inquiry, please submit a legal demand with the date range/time frame adjusted for UTC. T-Mobile/ MetroPCS is unable to convert UTC records to any particular time zone. Conversely, T-Mobile/Metro PCS is unable to convert any particular time zone (which may be identified on a legal demand) into UTC.

If you received records, they are timestamped in UTC. Should you determine that additional records are required for your inquiry, please serve a supplemental legal demand. T-Mobile/MetroPCS compliance specialists are not able to release additional or "converted" records based on a phone call, email or other informal request.

For more information on UTC, you may visit:
http://www.timeanddate.com/time/aboututc.html

To convert records to your local time, you will need to use a converter, such as: http://www.worldtimeserver.com/convert_time_in_UTC.aspx

Subject: Re: Apple ID for Murphy

Copy - thanks.

I was able to access the account. *Sometimes* we can get a historical location from the device from the icloud account. In this case, there is no historical (or last known) location available. There's several devices on the account, all of which that are powered on are in the (b)6, (b)7 [redacted] area. There's several "Jeff Murphy's iPhone" listed, but they are all offline and no last known location.

I can confirm via the "Devices" page that "Jeff Murphy's iPhone" has the same IMEI (serial number on the cell network) as T-Mobile reported. So this tells us we're looking at the right account. But still, we have no location data to work with.

Also in the Devices page, it is reported that the last backup was at "Yesterday at 01:18am" - which I would interpret to be last contact with Apple as of 1:18am (timezone unknown, possibly Pacific time because the

account is configured for that) on the 7th. Again, well before the hike started.

Jeff Murphy's iPhone

Latest Backup: Yesterday at 01:18 AM

Apple Pay: (b)6, (b)7c, Privacy Act [redacted]

Remove...

Serial Number: (b)6, (b)7c, Privacy Act [redacted]

IMEI:

If we get an indication the phone turns on later (through our tools), this Apple account access may be critical to getting a good location.

Good work obtaining this info - thank you.

Outline

Export Processing Zones

To encourage and facilitate international trade, countries all over the world have established export processing zones (EPZs) of many types, including free trade zones, special economic zones, bonded warehouses, free ports, and customs zones. EPZs have evolved from initial assembly and simple processing activities to encompass high-tech and science parks, finance zones, logistics centers, and even tourist resorts. They now include not only general-type zones but also single-industry zones and single-commodity zones. Both the number of EPZs and the number of countries hosting them have expanded rapidly. There are now more than 600 EPZs in more

Peak 5 and 6: Rattlesnake Butte (6,735) and Turkey Pen Peak (7,001)

Posted on December 12, 2012 by Greg

With temperatures in the 70s, and National Park Week free admission, we went for a double peak day in Yellowstone on Saturday April 21. The forecast was for highs in the 50s, but we had blue skies and near 70° weather. Northern Yellowstone around the Mammoth area is often more dry than other areas. However we were not expecting to have basically no snow at all!

This was a trail I had always wanted to hike (Rescue Creek trail just inside the north entrance at Gardiner). At this time of year, the plains on either side of the first mile or so of the trail are heavily populated. We had to leave the trail to traverse around a herd of bison and then started up Rattlesnake Butte sooner than we planned due to the pair of bull bison standing on the trail ahead of us. At times it seemed as if we were hiking through a wildlife feed lot as we stepped over, around, and in various droppings and bones of older denizens.

Stats	
Distance:	7 miles
Gain:	2,224 feet

Peak 5 and 6: Rattlesnake Butte (6,735) and Turkey Pen Peak (7,001)

Posted on December 12, 2012 by Greg

With temperatures in the 70s, and National Park Week free admission, we went for a double peak day in Yellowstone on Saturday April 21. The forecast was for highs in the 50s, but we had blue skies and near 70° weather. Northern Yellowstone around the Mammoth area is often more dry than other areas. However we were not expecting to have basically no snow at all!

This was a trail I had always wanted to hike (Rescue Creek trail just inside the north entrance at Gardiner). At this time of year, the plains on either side of the first mile or so of the trail are heavily populated. We had to leave the trail to traverse around a herd of bison and then started up Rattlesnake Butte sooner than we planned due to the pair of bull bison standing on the trail ahead of us. At times it seemed as if we were hiking through a wildlife feed lot as we stepped over, around, and in various droppings and bones of older denizens.

Stats	
Distance:	7 miles
Gain:	2,224 feet
Time:	6:20
When:	4/21/12
With:	Cecelia

After climbing Rattlesnake Butte, we dropped to the pass between the two peaks where a mostly dry lake bed was occupied by our two friendly bull bison. As we circled around that area and took the camera out for a shot or two, a wolf suddenly trots down on the other

side and stands still, staring at the bison. It was a bit too far for my zoom, but I took several shots anyway as you can see below. After the wolf wandered off, we traversed further and started up the unusual-named Turkey Pen Peak. But first we hit a hillside above the bison that had several elk antlers laying around and then of all oddities we came across three pieces of a coconut husk. We're off-trail and an infrequently visited part of Yellowstone. Did some crow carry the coconut shells from Gardiner or Mammoth and just drop it here or did some other climber bring a tropical snack for lunch?

Once we got to the top of Turkey Pen, we ate our turkey sandwiches (we thought it appropriate!) and tried to figure out where the actual high point of the peak was. With trees on the relatively flat top, it was hard to tell, but eventually we climbed what we thought was the highest rock.

On the way out, as we came out across the last footbridge – trying to step over the bison droppings – a herd of bison was crossing the Gardiner River and the road, creating a traffic jam. Shortly after that we passed a camera jam; a multitude of long and short lens were aimed at the lone white wolf just across the river. And I think we saw a nice big horn ram perched on the cliffs that day too. A fun day in the "other" park!

Rescue Creek Trail

The bridge going over Gardner River appeared almost immediately as I stepped onto the trail. This playful section of the river ripples over the rocks and was a great start to the day. On the other side of the bridge, I climbed up the bank and out onto a wide, grassy shelf. From there, the river flowed below me and my gaze was drawn to Electric Peak to the west with a fresh coat of new snow. The town of Gardiner was faintly visible to the north. I began heading east across the flat plain. Up on a hillside numerous dots looked like bighorn sheep, but were too small to make out.

As I set out, a juvenile Horned Lark hopped down the trail in front of me while an American Kestrel took a break on a rock. Some movement caught my eye. A coyote was running in the distance. As I watched, a female pronghorn antelope was right behind it. Not sure if it was coincidence or not, but the coyote dove and laid low while the antelope ran up into the hillside and began grazing.

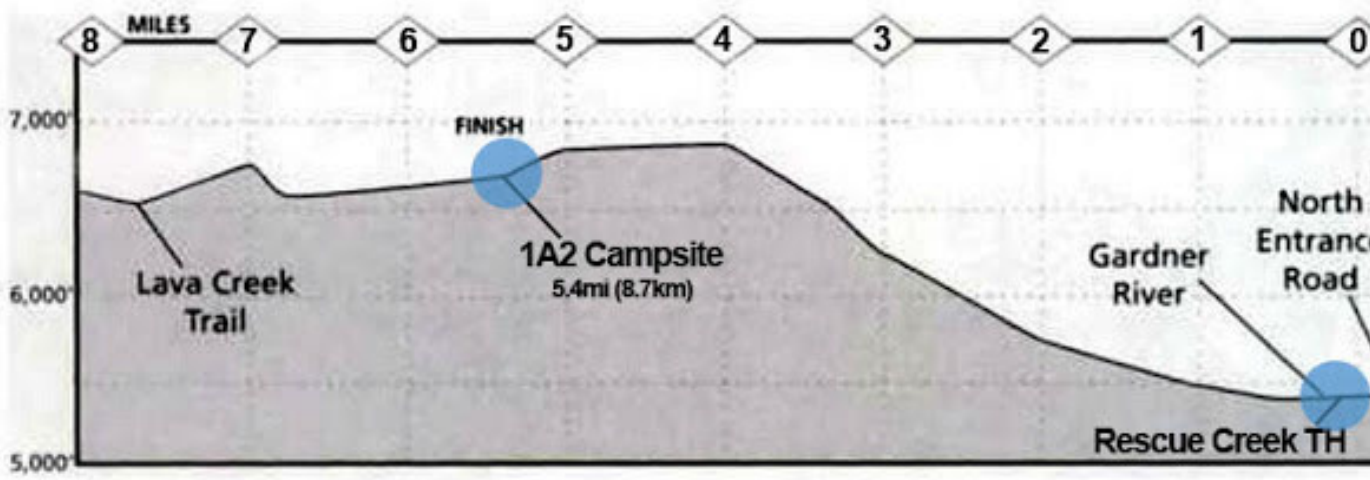
I followed the trail towards the Yellowstone River and climbed up on the hillside to a nice overlook. Below me, a bison grazed in the sagebrush below me and a herd of antelope were laying in the golden grass. I got a brief glimpse of the Yellowstone River. While the trail goes relatively close to the river, it's obscured for the most part as it is recessed just enough. I dropped down into the sagebrush meadow; the trail heading straight for the bison.

Up in a dead tree, a Peregrine Falcon was cleaning its beak. I continued on, avoiding some wet spots on the trail as evidence of a bit of hydrothermal activity and the huge bull bison. The trail began to climb up the dried creek bed of Turkey Pen Creek (which has to be one of the funnier names in Yellowstone). The trail went up the narrow gorge and got steep for a bit until it entered a lovely valley with narrow, grassy meadows. The grass extended up the western slopes and were dotted by trees, while the eastern slopes were rocky sagebrush and trees.

The terrain began to open up to wider meadows and the trail traversed the edge. Some sections went through trees while others were through the meadows. Eventually, it dropped into a darker, wetter forest where I followed wolf tracks in the soft trail. The trail finally came up to the higher grasslands. As I entered these grasslands, I was met by another large bull

bison sauntering towards me on the same trail. I got off the trail and gave him wide berth as he worked down the trail I'd just ascended.

According to the guidebook, most people start this hike from the closer (and easier) Lava Creek trailhead. But we started from the Rescue Creek trailhead. The trailhead (TH) is indicated by a blue circle near the top left of the map here. The backcountry site we reserved is the other blue circle, labeled 1A2. Distance is 5.4mi (8.7km) from trailhead to campsite, with an elevation rise of about 1,000 ft (305m).



Rescue Creek Trail altitude chart.

The change in climate was sudden and obvious on the drive to the Rescue Creek trailhead. The sun was hotter, the ground drier, the vegetation more suited to arid climates. It became clear to us why the trail is used mostly in the early spring: this trail is one of the first trails clear of snow.

After crossing a wooden bridge spanning the Gardner River, we climbed a slight hill to the left (avoiding a trail going up toward Everts) and found ourselves in an open scrub prairie between Black Canyon and the Yellowstone River and Mount Everts with dramatic views all around.

The trail meandered through a large, flat expanse of field, following a 4x4 path. Eventually, the trail curved to the right, around Everts, and the trail became a single path. It soon met up with a stream bed to the north side, which in early September 2012 was bone dry.

We hiked along at a good clip as to allow ourselves time at the campsite to set up and prepare dinner before dark. Soon enough, the trail started to make its turn southeast along Rattlesnake Butte.

1.) Although this trail may be popular in early spring, it has not been "popular" in a number of months, which was made obvious by the overgrown condition on the trails.

2.) Our hiking progress slowed as we trekked through heavy brush sections.

3.) This trail was used by animals for migration, due to the large number of animal skeletons and large animal trails along the route. This was later verified by research. This corridor was especially popular by animals during autumn migration, hence the multiple paths up the hill and the skeletons.
--

What I hadn't realized at this point was that due to the hot summer, the drought and the time of the season made the environment perfect for deadly western prairie rattlesnakes to thrive not just on the warm, sunny southern face of Rattlesnake Butte but up onto the north side of the Rescue Creek trail. So, of course as we hiked along, a huge, fat rattlesnake lurched towards me on the trail from the stream bed, rattling and showing me its most defensive posture. I jumped back, "whoa!!!" That's never happened to me before... I've seen snakes before, but it's rare that we'd surprise each other simultaneously. I felt like I just escaped a strike.

"Rattlesnake!" I called out to Alex, who clearly heard the rattle and was standing motionless several feet behind me. She needed no further explanation.

At this point, I felt like we had wandered into a minefield. If this snake could be living in a den so far up the hill toward Everts, could they be everywhere? Should we turn back or proceed?

After a few minutes of deliberation, we decided to go on (if we didn't stay at 1A2, where the hell *would we stay?*), albeit very carefully. Avoiding all possible rattler dens, we notched

ourselves up the side of Everts hoping to be northerly enough to be safe. It turned out that we made the right decision, and by the time the trail started to rise into the forest around from Turkey Pen Peak, we were rattler free and able to move faster and enjoy the beautiful scenery around us.

Here, we start our 1,000 ft. ascent from Rattlesnake Butte by Turkey Pen Peak. I'd never been so happy to climb a hill:

Soon, the trail turned away from the arid northern section of the park to a more arboreal zone

Turkey Pen Creek ascends along the flanks of Rattlesnake Butte, eventually reaching near a saddle between Rattlesnake Butte and Turkey Pen Peak. I never saw any climbers' trails on this side, but I didn't go all the way to the point of the Butte.

As a result, the climb entails picking a spot and scrambling up. If you go farther up the trail you can turn more of the "climb" into a "traverse," but you still cover a lot of scree no matter which route you pick. There are three outcroppings on the top of the butte, and the middle outcropping is the summit. I'd recommend aiming for the second "saddle" between the summit

and the last outcropping that you see. (This would be the first outcropping you see if you're descending from Blacktail.)

The trail crosses the Gardiner River on a footbridge and ascends briefly the opposite bank. There's what looks like a climber's trail up Mount Everts to the right, but you want to stay left on the main trail. It crosses a pretty barren dirt flat for 500 yards or more - - a good illustration of how an overly-large elk herd has beat up parts of their winter range by overgrazing.

After that, you turn a corner at the south end of Mount Everts and the terrain grows much more lush. There are numerous washes coming down the flanks of the mountain that water the next stretch of the trail. In late September, I saw a bighorn ram and several pronghorns feeding in this area.

Appropriately enough, I also saw a western rattlesnake on the way to Rattlesnake Butte. This is prime rattlesnake country, and it's about the only part of YNP low enough to support rattlers - -

so be aware.

As you get near the foot of Rattlesnake Butte, the trail turns to the south and ascends up Turkey Pen Creek. I saw a lot of skeletons and scattered bones here, which is a natural travel corridor for ungulates. During migration periods in fall and spring, I'd keep a close eye out for carcasses and any grizzlies that might be defending them.

Turkey Pen Creek ascends along the flanks of Rattlesnake Butte, eventually reaching near a saddle between Rattlesnake Butte and Turkey Pen Peak. I never saw any climbers' trails on this side, but I didn't go all the way to the point of the Butte.

As a result, the climb entails picking a spot and scrambling up. If you go farther up the trail you can turn more of the "climb" into a "traverse," but you still cover a lot of scree no matter which route you pick. There are three outcroppings on the top of the butte, and the middle outcropping is the summit. I'd recommend aiming for the second "saddle" between the summit and the last outcropping that you see. (This would be the first outcropping you see if you're descending from Blacktail.)

Technically speaking there would be a Class 3 move to stand on the true summit, but you could touch the summit with your hand and keep it at Class 2.

Because of the woods on top of the butte, there aren't many views to the east. To the north there is a nice view of Turkey Pen Peak, and there are good views of Gardiner back behind you.

This was a trail I had always wanted to hike (Rescue Creek trail just inside the north entrance at Gardiner). At this time of year, the plains on either side of the first mile or so of the trail are heavily populated. We had to leave the trail to traverse around a herd of bison and then started up Rattlesnake Butte sooner than we planned due to the pair of bull bison standing on the trail ahead of us. At times it seemed as if we were hiking through a wildlife feed lot as we stepped over, around, and in various droppings and bones of older denizens.

After climbing Rattlesnake Butte, we dropped to the pass between the two peaks where a mostly dry lake bed was occupied by our two friendly bull bison. As we circled around that area and took the camera out for a shot or two, a wolf suddenly trots down on the other side and stands still, staring at the bison. It was a bit too far for my zoom, but I took several shots anyway as you can see below. After the wolf wandered off, we traversed further and started up the unusual-named Turkey Pen Peak. But first we hit a hillside above the bison that had several elk antlers laying around and then of all oddities we came across three pieces of a coconut husk. We're off-trail and an infrequently visited part of Yellowstone. Did some crow carry the coconut shells from Gardiner or Mammoth and just drop it here or did some other climber bring a tropical snack for lunch?

Once we got to the top of Turkey Pen, we ate our turkey sandwiches (we thought it appropriate!) and tried to figure out where the actual high point of the peak was. With trees on the relatively flat top, it was hard to tell, but eventually we climbed what we thought was the highest rock.

On the way out, as we came out across the last footbridge – trying to step over the bison droppings – a herd of bison was crossing the Gardiner River and the road, creating a traffic jam. Shortly after that we passed a camera jam; a multitude of long and short lens were aimed at the lone white wolf just across the river. And I think we saw a nice big horn ram perched on the cliffs that day too. A fun day in the "other" park!

Earth, Air, Fire and Water – four elements and show in Ambigram form in Dan Brown's "Angels & Demons". The "Illuminati Diamond" mentioned in the book is an ambigram of the four elements that are arranged in the shape of a diamond.

Could be affected by air/wind = lungs. Chest piece?
Anagram of lungs is slung. Past tense of sling – Blackbeard wore a sling.

Turkey chest piece = "beard", scientists call the hairs "bristles".

Chest piece = heart, Heart Lake where Everts laid while lost.

Chest piece = sternum or keel (of birds):
A **keel** or **carina** (plural carinae) in bird anatomy is an extension of the sternum (breastbone) which runs axially along the midline of the sternum and extends outward, perpendicular to the plane of the ribs. The keel provides an anchor to which a bird's wing muscles attach, thereby providing adequate leverage for flight. Keels do not exist on all birds; in particular, some flightless birds lack a keel structure.

Carina - A keel-
shaped ridge or structure, such as that on the breastbone of a bird or of the fused lower two petals of flow ers of many members of the pea family. a keel-
like anatomical or botanical ridge, as the ridge on the breastbone of a bird or along the edge of two conjoi ned petals.
Keel (botanical) - a prominent longitudinal ridge like the keel of a boat, e.g. the structure of the corolla formed by the fusion of the lower edge of the two abaxial anterior petals of a flower in the Fabaceae **(legumes or peas).**

The flowers often have five generally fused sepals and five free petals. They are generally hermaphrodite, and have a short hypanthium, usually cup shaped. There are normally ten stamens and one elongated superior ovary, with a curved style.

http://www.yellowstonenationalpark.com/pea.htm

At approximately 1.6 miles the trail enters a notch at the base of Rattlesnake Butte and rises steeply for about 0.3 of a mile and 200 ft. before easing. The trail is tucked into this narrow canyon for the next .07 of a mile until you reach a meadow at the base of Turkey Pen Peak. NOTE: There are game trails that will lead you directly into this small meadow but the main trail climbs the hillside on the right. Look for the orange blazes. If you should lose site of the main trail and find yourself in the meadow just head to the right on the southeast side of this open area and you'll pick up the main trail again with very little effort.

Cercis (Redbud)

The **Judas tree** (*Cercis siliquastrum*) is a small tree to 10–15 m tall native to the south of Europe and southwest Asia, in Iberia, southern France, Italy, Bulgaria, Greece and Asia Minor, which forms a handsome low tree with a flat spreading head. In early spring it is covered with a profusion of magenta pink flowers, which appear before the leaves. The flowers have an agreeably acidic bite,

and are eaten in mixed salad or made into fritters. The tree frequently figured in the 16th and 17th century herbals.

This small, sparsely branched tree is said to be the one from which Judas Iscariot hanged himself after betraying Christ, but the name may derive from "Judea's tree", after the region encompassing Israel and Palestine where the tree is commonplace.

A smaller Eastern American woodland understory tree, the **eastern redbud**, *Cercis canadensis*, is common from southernmost Canada to Piedmont, Alabama and East Texas. It differs from *C. siliquastrum* in its pointed leaves and slightly smaller size (rarely over 12 m tall). The flowers are also used in salads and for making pickled relish, while the inner bark of twigs gives a mustard-yellow dye.

The wood is medium weight, somewhat brittle, of light tan color with a noticeably large heartwood area of darker brown, tinged with red. The wood has attractive figuring and is used in wood turning, for making decorative items and in the production of wood veneer.

In the Faboideae, the flowers are zygomorphic, and have a specialized structure. The upper petal, called the banner, is large and envelops the rest of the petals in bud, often reflexing when the flower blooms. The two adjacent petals, the wings, surround the two bottom petals. The two bottom petals are fused together at the apex (remaining free at the base), forming a boat-like structure called the keel. The stamens are always ten in number, and their filaments can be fused in various configurations, often in a group of nine stamens plus one separate stamen. Various genes in the *CYCLOIDEA (CYC)/DICHOTOMA (DICH)* family are expressed in the upper (also called dorsal or adaxial) petal; in some species, such as *Cadia*, these genes are expressed throughout the flower, producing a radially symmetrical flower.[18]

Wisteria is a type of legume, and is toxic so requires gloves to handle!!!
https://en.wikipedia.org/wiki/Wisteria#Description

As its blossom reveals (top and above right), **Chinese Wisteria,** Wisteria sinensis, **is in the five-petalled Pea Family (Fabaceae); members of the subfamily that contains wisterias have flowers in which one petal forms a hood over four others; two of these form "wings," and two others are fused to form a pouch or keel.**

In wisterias--named for American anatomy professor Caspar Wistar--there are multiple one-inch flowers that form a pendulous raceme (cluster) at the end of new growth. In spring, the flower cluster emerges first, followed soon after by a spray of pinnately compound leaves with 9-11 leaflets. These start out purplish- red but turn dark yellow-green at maturity. As legumes, wisterias apparently do host nitrogen-fixing bacteria that enrich the soil--NOT an attribute that offsets their tree-killing tendencies. (Oh, and by the way, wisteria seeds cause mild to severe gastic distress when ingested by humans, and as few as 2-3 may be toxic to children.)

Chinese Wisteria has been planted in North America as an ornamental since first imported in 1816, and it almost seems plausible that some of those

original lianas could still be around. A mature Chinese Wisteria--whose vine is as hard and woody as many trees--can be 65 feet tall and 15" or more in diameter. (Such large growth usually occurs on cliffs or human-made structures, since a wisteria of this size likely would have killed its supportive plant host years ago.) Wisteria often branches at or near the surface of the ground, sending out runners in all directions and propagating vegetatively, but the prolific blooms also produce copious pollen--visible on the flower in the top photo--that fertilizes a neighboring blossom and results in distinctive velvety green pods containing shiny brown seeds (below). **These seeds can be carried far downstream until entire watersheds are sometimes lined by native trees infested with Chinese Wisteria.**

Wisteria is also a deciduous twining shrub, that is both native to North America and Asia, belonging to the pea family. Wisterias rank among the best of the ornamental vines for temperate regions, and often attain a good old age and large size. Speaking of large size, the among oldest of wisterias known to exist is one in the California Sierra Madres. It covers over one acre, is estimated to weigh over 250 tons, and has been alive and blooming since 1894, when it was planted from a single Chinese lavender wisteria slip.

Wisteria is not only a human favorite for its beauty, it is also a favorite host plant to the silver-spotted skipper butterfly and the long-tailed skipper butterfly. Found especially along the Atlantic coast and other portions of the Southeast, they are among the snowbirds of the butterfly world who winter in Florida each year. They are also a welcome addition to the overall beauty of having Wisteria.

Lupine (Lupinus Sp.) – Pea Family (Fabaceae) – blue spikes of pealike flowers, 5-7 leaflets on a fan shaped leaf. 4-35", June thru August.

Silky Lupine:

Royal Palm – a breed of domestic turkey, ornamental (largely white with bands of metallic black). Kind of relates to a Cold Follie, something constructed primarily for decoration, with no practical purpose. Since a Royal Palm turkey is not consumed, not really practical!

Royal – relates to face cards (royalty) and a chess piece (king, queen, etc.).

Mountain Goldenbanner

This perennial's slender, 16-32 in. stems, purplish with a white coating, are slightly branched above and bear three-parted leaves. Yellow, lupine-like flowers occur in dense to interrupted clusters 4-12 in. long. Flowers are followed by velvety pods. A number of varieties are separated largely on the amount of pubescence present on the foliage. A plant with one or several hollow stems, slightly or not at all hairy, and yellow pea flowers in long racemes in upper leaf axils.

This genus resembles the Lupines, but *Thermopsis* has only 3 leaflets on each leaf; *Lupinus* has more. Yellow Peas, while handsome plants, are suspected of being poisonous. Among the several western species, some quite hairy, Prairie Thermopsis (*T. rhombifolia*), which grows on the eastern slopes of the Rocky Mountains and on the northwestern plains, has pods that spread outward from the curve or coil.

2) QUEEN ELIZABETH'S RUFFLE
The ash flow tuff cap on Mount Everts.

Tare – (rare) vetch (fodder). Vetch - The main usage of the common vetch is as forage for ruminant animals, both as fodder and legume, but there are other uses, as tufted vetch, *V. cracca* is grown as a mid-summer pollen source for honeybees.

Tar – used to make Yellow #5.

scant

1. (*masonry*) A block of stone sawn on two sides down to the bed level.
2. **(*masonry*) A sheet of stone.**
3. (*wood*) A slightly thinner measurement of a standard wood size.

Sheet

1. **(*geology*) An extensive bed of an eruptive rock intruded between, or overlying, other strata.**

Synonyms for Sheet include "rope" or "blanket"

Quick:
Chiefly British.

a. a line of shrubs or plants, especially of hawthorn, forming a hedge.
b. a single shrub or plant in such a hedge.
c. Of persons, "mentally active," from late 15c. Also in Middle English used of soft soils, gravel pits, etc. where the ground is shifting and yielding (mid-14c., cf. quicksand).

Gaze – Gaw:

noun, *Chiefly Scot.*
1.
a narrow, trenchlike depression, especially a furrow in the earth or a worn or thin area in cloth. A furrow or trench.

Me All = meall:

Meall (*mheall*, *mill*, *mhill*), is very common, describing a bare rounded lumpy hill.

Rattlesnake Butte:

http://www.yellowstone.co/tripreports/2012/042112a.htm

Turkey Pen Peak:
http://www.notess.com/fifty/peak-5-and-6/

This was a trail I had always wanted to hike (Rescue Creek trail just inside the north entrance at Gardiner). At this time of year, the plains on either side of the first mile or so of the trail are heavily populated. We had to leave the trail to traverse around a herd of bison and then started up Rattlesnake Butte sooner than we planned due to the pair of bull bison standing on the trail ahead of us. At times it seemed as if we were hiking through a wildlife feed lot as we stepped over, around, and in various droppings and bones of older denizens.

After climbing Rattlesnake Butte, we dropped to the pass between the two peaks where a mostly dry lake bed was occupied by our two friendly bull bison. As we circled around that area and took the camera out for a shot or two, a wolf suddenly trots down on the other side and stands still, staring at the bison. It was a bit too far for my zoom, but I took several shots anyway as you can see below. After the wolf wandered off, we traversed further and started up the unusual-named Turkey Pen Peak. But first we hit a hillside above the bison that had several elk antlers laying around and then of all oddities we came across three pieces of a coconut husk. We're off-trail and an infrequently visited part of Yellowstone. Did some crow carry the coconut shells from Gardiner or Mammoth and just drop it here or did some other climber bring a tropical snack for lunch?

Once we got to the top of Turkey Pen, we ate our turkey sandwiches (we thought it appropriate!) and tried to figure out where the actual high point of the peak was. With trees on the relatively flat top, it was hard to tell, but eventually we climbed what we thought was the highest rock.

Gold = 79, Mercury = 80

Mercury is found in Cinnabar. Cinnabar is a scarlet to brick red mineral, that exhibits twinning. Associated modern precautions for use and handling of cinnabar arise from the toxicity of the mercury component, which was recognized as early as ancient Rome. USE GLOVES!

There is also a plant based cinnabar named “Dragon’s Blood” which can come from Rattan Palms. Relates to the palm trees in the rocks shown on p.99 of TTOTC and the Royal Palm Turkey!
Dragon's blood of both *Dracaena draco* (commonly referred to as the Draconis Palm) and *Dracaena cinnabari* were used as a source of varnish for 18th century Italian violinmakers

The Lamp and the Bell – by Millay:
https://www.gutenberg.org/files/3768/3768-h/3768-h.htm

The Pope of Fools - Quasimodo was a bell ringer! His relatives were gypsies. There may have been a real life Quasimodo who was a stone carver.

Crosier - a staff resembling a shephard's crook, carried by bishops.

To crook, to cradle

The Latins cremated their dead and deposited their ashes in urns of Villanovan type as well as in hut-shaped urns that were faithful imitations of the huts of the living. The decoration of these funerary containers is of a simple geometric type, similar to that engraved on bronze objects found in these tombs, such as razors, spindles, weapons, and brooches. The material used for the tombs in the Alban Hills resembles the material found in contemporary tombs in Romebut is occasionally rougher and coarser in appearance.

This system originated during the Middle Ages, and was perfected in the 19th century. It is a form of full circle ringing which requires the bell ringers to manually swing the bells whilst standing beside them in the bell chamber. It was originally designed for an ensemble of four or five bells, nowadays it is also sometimes used for a set of six bells. The bells are never counterbalanced. They are mounted on a wooden structure called *the castle*, and flanked by a wooden support called *the goat*. The bells are not very heavy, as the rotation has to be fast. Generally, every bell that weighs less than 800 kg (16 cwt) is rung by one person. The heaviest bell used with this system is in Bologna Cathedral, and is called *la Nonna* ("the Granny") and weighs 3.3 tonnes. Thirteen people are needed to ring a *scappata* or a *calata* with it. The bell ringers have to be in contact with the bells and mechanical devices are not allowed.

As I have gone alone in there And with my treasures bold, I can keep my secret where, And hint of riches new and old.	Gemini
Begin it where warm waters halt And take it in the canyon down, No far, but too far to walk. Put in below the home of Brown.	Sepulcher mountain Gardner Canyon Beaver Ponds
From there it's no place for the meek The end is ever drawing nigh; They'll be no paddle up your creek, Just heavy loads and water high	Rattlesnake Butte (on the left) Turkey Pen Creek Turkey Pen Peak
If you've been wise and found the blaze Look quickly down, your quest to cease, But tarry scant with marvel gaze, Just take the chest and go in peace.	Regulus and TPPeak Look down at the base Quick = gravel, sand Vetch, fodder on the rock Keel / royal palm / beard
So why is it that I must go And leave my trove for all to seek? The answer I already know, I've done it tired, and now I'm weak.	Cancer, Yellowstone Cancer, thermopsis Empty = MT (Montana)

If you are brave and in the wood

I give you title to the gold.

Red not afraid of the big, bad wolf – Lupine! goldenbanner

Lupines / pea flowers are slightly toxic, so should use gloves to handle them (Forrest suggested gloves)
There is a meadow right in front of the Turkey Pen Peak on the trail
Some variations of the goldenbanner are hairy ("beard of the Turkey peak"?)
Laburnum – golden chain (Forrest referenced "chains"), small tree with yellow leaves, part of the pea family.
Laburnum has historically been used for cabinetmaking and inlay, as well as for musical instruments. In addition to such wind instruments as recorders and flutes, it was a popular wood for Great Highland Bagpipes[5] . The heart-wood of a laburnum may be used as a substitute for ebony or rosewood. It is very hard and a dark chocolate brown, with a butter-yellow sapwood.

Butterfiies and bees love these plants! (Forrest mentioned both)

Little Red Riding Hood:
In Little Red Riding Hood – her mother advises her to "stay on the path". Also, a woodcutter saves her (reference to the woodcutter photo in TTOTC). Reference also to the safe world of the village versus the dangers of the forest (just like Young Goodman Brown). In a version, the wolf lets her go outside to use the bathroom, but tied to a piece of string so she does not get away. In other tellings of the story, the wolf chases after Little Red Riding Hood. She escapes with the help of some laundresses, who spread a sheet taut over a river so she may escape. When the wolf follows Red over the bridge of cloth, the sheet is released and the wolf drowns in the river.

Andrew Lang included a variant called "The True History of Little Goldenhood"[26] in *The Red Fairy Book* (1890). He derived it from the works of Charles Marelles,[27] in *Contes of Charles Marelles*. This version explicitly states that the story had been mistold earlier. The girl is saved, but not by the huntsman; when the wolf tries to eat her, its mouth is burned by the golden hood she wears, which is enchanted.

Forrest, You said you made two trips from your car to hide the treasure. Besides walking, did you use any other methods of transportation to get back and forth between the car and the hide? Thanks, Edgar

Edgar, your wording of the question prompts me to pause and wonder if I can answer it candidly, yet correctly. Were all the evidence truly known, and I answered in the positive, you might say I was prevaricating, by some definitions of the word. And if I answered in the negative, you may claim that I was quibbling. So I will stay quiet on that subject. Thanks for the question anyway. f"

To answer in the negative, ie, to quibble, is to "neigh"(nay).

"Equivocate" is similar to "prevaricate," but it generally implies that someone is deliberately using words that have more than one meaning as a way to conceal the truth. Prevaricate also means to “straddle”.

So what Forrest is saying is that he also traveled by horse!!!

The question was posed by “Edgar”. Edgar Allen Poe (initials spell PEA), possibly died of “cooping” (turkey pen).

At Moby Dickens video - Mr. Fenn says:
"They're contiguous. I knew where I wanted to hide the treasure chest. So it was easy for me to put one foot down and then step on it to get to the next foot. "

Contiguous means next to but not touching, and used to describe borders (between states or countries).

Trips – etymology is from trappe, also meaning stairs. (could also mean “trap door”)

stairs *pl* (*plural only*)

1. A contiguous set of steps connecting two floors.

Mountain Iris and Golden Banner together in a field (Morain Park, Colorado).

Golden Bough to gain entrance to Elysium (Elysian Fields)

https://en.wikipedia.org/wiki/The_Golden_Bough_(mythology)

Aenis went on a quest to see the “shade” or breath of his deceased father. Before entering Hades, Deiphobe told Aeneas he must obtain the bough of gold which grew nearby in the woods around her cave. In the woods, Aeneas's mother, the goddess Venus, sent two doves to aid him in this difficult task, and these helped him to find the tree. When Aeneas tore off the bough, a

second golden one immediately sprang up, which was a good omen, as the sibyl had said that if this did not happen the coming endeavor would fail.

Lupine -- These are in the genus *Lupinus*, which is derived from the Latin word "lupus," which means little wolf. They have bacteria living in their nodules which convert atmospheric nitrogen into ammonia and other nitrogen compounds. Thus, lupines enrich the soil.

Golden banner -- This yellow pea is also called false lupine.

My favorite is "A Field Guide to Rocky Mountain Wildflowers" by John and Frank Craighead and Ray Davis. The Craighead brothers were the first modern-day researchers to study grizzly bears in Yellowstone and Grand Teton National Parks. They also published a plant field guide. That guide was my constant companion while I learned the plants of the Rockies. I love their book because it not only identifies plants; it adds interesting tidbits about them. I just randomly opened my copy and found blue flax. Under "Interesting facts" it adds, "Named for Captain Meriwether Lewis. ... Try twisting the stems. ... It should behave like a piece of string and not readily break."

They also relate blooming times to other activities. For example, under “American Vetch” they add, “First appears about the time cow moose are dropping their calves.” I love how they link blooming plants with animal activities.

©Tom Arbour

Let's continue exploring the Rocky Mountains, shall we? At 8000 feet up, spring comes much later than it does in Ohio. It was awesome to be there in late June but to see many "spring" wildflowers. Perhaps the flower I photographed the most was the mountain goldenbanner, a member of the pea family. It was everywhere in meadows at lower elevations. At the time, I wondered why this species was so prevalent even though the park has a large elk population that has grazed many areas to the point where they need to be fenced off to exclude the elk. After a little research tonight, however, I learned that several members of the genus *Thermopsis,* including this species, contain toxic alkaloids. The elk don't touch it.
