Hawai'i Volcanoes National Park

Oasis in a Desert Sea:

Hawai'i's Resident Whales and Dolphins

After Dark In the Park

Tuesday, August 23rd at 7 p.m.
In the Kīlauea Visitor Center Auditorium

Join Robin Baird, book author and research biologist with Cascadia Research Collective as he presents an amazing look into the lives of Hawai'i's resident toothed whales and dolphins. Dr. Baird and his colleagues have spent the last 17 years using photo-identification, genetics and satellite tagging to present the clearest picture yet of these often misunderstood native mammals.

Co-sponsored by Friends of Hawai'i Volcanoes National Park
