What JFK Means to Me

John Fitzgerald Kennedy was the 35th president of the United States. He was born on May 29th, 1917. His childhood was hard because he had many challenges to face.

For instance, when JFK was little, he was often sick, so instead of playing outside, he would lay in bed and read. Thats how he got his big imagination. But he didn't know that it would help him become president later on in life. And his parents thought that JFK should look up to his older brother Joe jr. and be more competitive and aggresive like he was. But sometimes JFK couldn't be those things because his back

would bother him. JFK's back was a problem. It would keep him from doing energetic things like playing football and swimming, which he loved to do, though he would always go back and do them. JFK's childhood was hard for many reasons. Some of those challenges, and the lessons he learned from them, helped him in the Presidential debates because when he was little he learned how to be competitive and a winner.

I think JFK was the best president of the United States. If somebody hadn't shot him, he would've been re-elected and done another great job. I want to change the world like he did. JFK was an awsome president, partly because of the challenges he faced as a boy. Thats what John Fitzgerald Kennedy means to me.
