Saturday April 4th. 1891

(7:5-D in cove) (Sompson's Palace Route 2 trips)

Father went to Hot Springs early this morning on business. at 7:30 a.m I started in the cove after specimens. at the North East Side of Milton's Study there is a passage leading to the North East, after I went on this passage about 15 feet I found a branch of the Sompson's Palace Route, with a good breeze in it but I did not follow it far because it was difficult traveling I got out with a good load of specimens at 11:00 a.m.

at 1:15 P.M. I started in the cove after specimens. I broke out the path in & near Miltons Study, near where I got my load. I got out of the cove with a load of box work at 4:35 P.M. M. A. Moore arrived from Hot Springs at 5:30 P.M. J. C. West came over from Beaver creek this evening but did not stay long. Father got home from Hot Springs while we were eating supper.

Sunday April 5th 1891

This is the warmest day that we have had since January. M. A. Moore & Elmer left this place Hot springs this morning & they will probaly start from there tomorrow morning for the Crystal Banks on the Cheyenne River. They will go to the same place that I & M. A. Moore went in January. I went over to J. C. West's place on beaver creek this afternoon & saw "Whiffle Tree Jim" & Bill Rae there visiting. Mr. West dug out a good spring yesterday
