Friday February 20th 1891

not in the cave

It has been a quiet day with no visitors & a great deal of snow has drifted with the North West winds. Father got home from Custer City and reported all well in that place and at Nuss City. He said Samuel J. Lovell of New York City was at Nuss City on business

Saturday February 21st 91

not in cave

J. M. Moore & Father started for Hot Springs this morning & Father has not got home yet (7.50 P.M) I have not been in the Cave today, on account of not feeling well, more than anything else. I started an itemized map of the Sampson's Palace Route today & got the most of the Guide Hall Branch finished in good colors. The day has been cold but I guess tomorrow will be warmer, because the wheel is giving us music. Often getting home sick after staying out of the cave so long

Sunday February 22nd

not in cave

The warmest day we have had since the 26th day of January 1891. at 8.10 A.M. George McManus come on a visit & left at 2.00 P.M. at 11.30 A.M. J. West came on a visit and left at 1.30 P.M at 1.00 P.M Father returned from Hot Springs and reported all well in that place. I got an answer to the note that I sent Melvin A. Moore yesterday but not satisfactory as I wished him to answer it in person. I wrote a letter to grandmother today but will not get a chance to send it until Tuesday as father is going to town Tuesday if all is well
