## BacteriAlert Program

**NEW!** BacteriALERT information is also available via [phone](#) at [678-538-1201](tel:678-538-1201)

**Background:** How safe is it to swim, wade, and boat in the Chattahoochee River today? For a highly urbanized river such as the Chattahoochee, much of the answer depends on [bacteria](#) levels in the water. This website provides recent E. coli bacteria counts and National Park Service health advisories for two locations on the Chattahoochee River ([map](#)).

Information:  
[Medlock Bridge site](#)

### E. coli bacteria counts and National Park Service health advisories for the Chattahoochee River

#### Chattahoochee River at Medlock Bridge Road

Most recent turbidity		Esitimated E. coli count *	National Park Service health advisory statement *
Date	Turbidity, in NTU		
02/24 1:15 PM EST	3	33	Currently, there is not a National Park Service health advisory in effect

The last E.coli water sample was taken on Thursday 02/23 at 11:31 AM Eastern Standard Time. At that time, the measured E. coli count was 24

#### Chattahoochee River at Paces Ferry Road

Most recent turbidity		Esitimated E. coli count *	National Park Service health advisory statement *
Date	Turbidity, in NTU		
02/24 1:45 PM EST	10	117	Currently, there is not a National Park Service health advisory in effect

The last E.coli [water sample](#) was taken on Thursday 02/23 at 9:01 AM Eastern Standard Time. At that time, the measured E. coli count was 61
