

Public Boating Access Area at Hatteras

The National Park Service (NPS) and the North Carolina Wildlife Resources Commission (NCWRC) propose to construct a new public boating access area within Cape Hatteras National Seashore, adjacent to the US Coast Guard Station Hatteras Inlet.

Public boating access area in Carteret County, NC, which is similar to the design of the facility proposed at Hatteras, NC. (Photo credit: NCWRC)

Proposed Design

The NPS and NCWRC are preparing an Environmental Assessment for the proposed construction of a facility which would include two boat ramps, docks, approximately 40-60 parking spaces, and dredging to provide access into the Hatteras Ferry Channel. The facility would be designed for the launching and recovery of trailerable boats drawing up to five feet of water, and use of the facility would be free to the public. The design of the proposed facility would be shaped by existing environmental constraints in the project vicinity.

Public Scoping Period

The public scoping period opens on **June 15, 2010** and closes on **July 15, 2010**. During the public scoping period, all interested persons will be given the opportunity to provide comments on the proposed action. A 30-day public scoping period is part of the process to prepare an Environmental Assessment pursuant to the National Environmental Policy Act of 1969.

Comment Submission

Written comments may be submitted by mail and by submission through the NPS' Planning, Environment, and Public Comment (PEPC) website at <http://parkplanning.nps.gov/caha>. Click on the "Public Boating Access Area at Hatteras" link to view the scoping documents.

Comments can also be mailed to:
