COPYRIGHT AND RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted materials. The various state privacy acts govern the use of materials that document private individuals, groups, and corporations.

Under certain conditions specified in the law, libraries and archives are authorized to furnish a reproduction if the document does not infringe the privacy rights of an individual, group, or corporation. These specified conditions of authorized use include:

- non-commercial and non-profit study, scholarship, or research, or teaching
- criticism, commentary, or news reporting
- as a NPS preservation or security copy
- as a research copy for deposit in another institution

If a user later uses a copy or reproduction for purposes in excess of "fair use," the user may be personally liable for copyright, privacy, or publicity infringement. This institution's permission to obtain a photographic, xerographic, digital, or other copy of a document doesn't indicate permission to publish, exhibit, perform, reproduce, sell, distribute, or prepare derivative works from this document without first obtaining permission from the copyright holder and from any private individual, group, or corporation shown or otherwise recorded.

Permission to publish, exhibit, perform, reproduce, prepare derivative works from, sell, or otherwise distribute the item must be obtained by the user separately in writing from the holder of the original copyright (or if the creator is dead from his/her heirs) as well as from any individual(s), groups, or corporations whose name, image, recorded words, or private information (e.g., employment information) may be reproduced in the source material. The holder of the original copyright isn't necessarily the National Park Service. The National Park Service is not legally liable for copyright, privacy, or publicity infringement when materials are wrongfully used after being provided to researchers for "fair use."

This institution reserves the right to refuse to accept a copying order if fulfillment of the order is judged in violation of copyright or federal or state privacy or publicity law.

HISTORY

Thomas C. Windes devoted his over thirty year National Park Service career to the study of Chaco Canyon. Windes received his bachelor's degree in anthropology from the University of North Carolina, Chapel Hill (1965) and his Master's in Anthropology from the University of New Mexico (1967). Windes honed his field work skills under the supervision of esteemed anthropologist/archaeologist of Chaco Canyon, Florence Hawley Ellis. In 1969 Windes worked on a field crew for Dr. Ellis excavating Sapawe in the Chama country of New Mexico. He also served as Dr. Ellis' teaching assistant for the excavation of Tsama in the Chama region in 1970.

Tom Windes was employed as an archaeologist by the Chaco Center, from 1971-1985. He was a key staff member of the Chaco Project and authored many publications (including the Pueblo Alto and 29SJ 629 excavation reports), reports and manuscripts (see Collection 0002). When the Chaco Center disbanded, Windes transferred to the Southwest Regional Office, Cultural Resources Division. For the remainder of his NPS career, he worked on various surveys within and around Chaco Culture National Historical Park. In 1997 he chaired the Pecos Conference annual meeting held in Chaco Canyon, just south of the park's boundary.

Thomas Windes' areas of professional expertise are broad ranging (ceramic analyses, archeomagnetic dating and tree-ring dating, ant mound studies, turquoise craft activities, trading networks) and are extensively represented within this collection. This collection represents Tom Windes' research after the disbanding of the Chaco Project in 1986 and through his retirement in 2005. Windes continues to be an active researcher of the Chacoan region and generously devotes his time as a volunteer in Chaco Canyon.

History: SOUTH RIDGE SURVEY (FAJADA GAP): 1988-1989. This survey was conducted by Tom Windes and various volunteers to expand data on the Fajada Gap Community discussed in the Spadefoot Toad 29SJ 629 report. The area surveyed was outside the south boundary of the park, and was not inventoried during the 1972-1975 survey. This survey was undertaken to record all puebloan sites in the Fajada Gap area and to assess jewelry craft activities at small house sites. 21 sites were recorded. No artifact collections were made. Middens were sampled and ceramics and lithics tallied. All ant nests were search for the presence of turquoise. The records consist of site forms and maps. No photographs were taken.

History: EAST COMMUNITY SURVEY: 1987-1997. This survey was conducted as a counterpart to the Fajada Gap Community study reported by Thomas C. Windes in 1983. A 1987 hike by Windes re-discovered the community and greathouse. The survey of 89 sites was done in the summer from 1989-1997 using volunteers provided by the Sierra Club under the direction of Bonnie Sharp. The work was done under permit from the Navajo Nation Historic Preservation Office and with the assistance of the Navajo Nation Chaco Protection Sites Program. No artifacts were collected, although dendro samples were taken for tree-ring dating. Ceramics were sampled and tallied in the field.

History: PI VALLEY SURVEY: 1993-1999. This survey, by Tom Windes, expanded the 1975 survey of Fajada Wash, South Fork Valley. Also included in this survey was the Upper Kin Klizhin Wash. 117 sites were recorded. The survey was conducted to inventory all puebloan habitation structures in the South Fork valley, centered on 29Mc 184; to inventory PI sites in Upper Kin Klizhin Wash for comparison to the South Fork Valley sites; to assist the Navajo Nation Chaco Protection Sites Program with an inventory of cultural resources in the area; and to provide a context for 29Mc 184, which was tested by the Chaco Project. No artifact collections were made; ceramics and lithics were tallied in the field.

History: PUEBLO PINTADO SURVEY: 1999-2001. This survey was undertaken by Tom Windes to continue the documentation of Chacoan communities along Canyon Canyon, to provide an update on cultural resources within the newly surveyed NPS lands around Pueblo Pintado, and to assist the Navajo Nation Chaco Protection Sites Program with an inventory of cultural resources adjacent to the NPS lands. In 1998 the BLM resurveyed the lands around Pintado and designated tracts as the official land boundaries. Tracts 56-57 (south half), 62-66 (all), and 72-73 (north half) were surveyed during this project, and 64 sites were recorded. No artifacts were collected; ceramics and lithics were sampled and tallied in the field.

History: BASKETMAKER III-PUEBLO I SURVEY: 1990-2004. This survey was undertaken by Tom Windes to reassess early sites recorded during the 1972-75 survey, to look for new clusters of BMIII or PI sites and early greathouses along the Chaco River corridor, to reassess known greathouses and periods of occupation, and to expand the sample of obsidian from early sites. This project has been in preparation for his volume summarizing the Chaco Project's work on BM3-PI sites. This accession contains all post-Chaco Project artifacts and archives collected and created in the course of this research.

Series Title: SERIES XII: CAIRN INVENTORY

Accession: CHCU-00794 **Catalog Nbr:** CHCU 97282
Inclusive Dates: 2006

History: In April-May 2006, Jane Kolber, Donna Yoder & Thomas Windes led the Chaco Area Inventory of Resources on Navajolands (CAIRN) outside the boundaries of the CC NHP to document evidence of prior occupation that had been previously neglected. This survey was conducted under the auspices of the Navajo Nation Chaco Protection Sites Program directed by John Stein. In this project both the traditional archeology and the rock art was recorded simultaneously, a rare example of a site being studied at the same time instead of fractionally over a long period of time. Kolber and Yoder recorded all the rock-art while Windes and his team determined the limits of each site, assigned site field numbers, and mapped and recorded each site.
