ENVI New License Pricing:

ENVI is state-of-the-art, image processing software designed for analyzing remotely sensed data. ENVI provides comprehensive tools for converting your imagery to information, including image registration, orthorectification, mosaicking, image classification, target detection, feature extraction, integrated GIS features, topographic analysis, and map composition, all within an intuitive, easy-to-use interface. The ENVI + IDL option adds ITT Visual Information Solutions' structured, array-based programming language, IDL, to all the functionality of ENVI allowing you to add customized functionality to your image processing applications. Prices below include Software License and 12 months of Software Maintenance and Technical Support.

License Descriptions:

Single Node Licenses allow users to access ENVI on a single machine. This method of licensing uses a machine's unique host ID that is incorporated into a license file. After a license request is sent to ITT Visual Information Solutions or your local distributor, a license file is returned.

Network Floating Licenses (also known as client/server licenses) allow multiple users to concurrently access ENVI from multiple networked machines.

For more information on our licensing please see <http://www.itvis.com/services/techtip.asp?ttid=3828>
