Red Rock Lake 2009/2010 Ducks & Geese Totals

	Sep 28	Oct 5	Oct 12	Oct 19	Oct 26	Nov 2	Nov 9	Nov 16	Nov 23	Nov 30
2009	205	319	436	313	348	673	1320	950	563	368
2010	221	81	190	382	546	174	251	356	552	800

The difference in migratory peaks seen here is mainly influenced by numbers of Canada Geese and Mallards. All other diving and dabbling/ puddle duck species are included in these numbers as well. Weather conditions and food supplies, which become increasingly important with the approach of cold weather, can change the timing of migration seasonally or from year to year. Long term continuation of studies like these can provide important information about population and habitat health.
