*FISH FOR TOMORROW: PROMOTING
SUSTAINABLE FISHERIES*

Produced by Kaltenbach Productions and Viking Village, the 60 minute program presents a compelling story of fishermen working cooperatively with research scientists to ensure fish for future generations. The camera journeys out to sea on scallopers, gillnetters and a longliner to provide a first hand glimpse of daily life for commercial fishermen.

UPCOMING PROGRAMS

August 19 - TBA

September 16 - TBA
