INTRODUCTION

The Lincoln Home National Historic Site was established in 1972 to further enable the visitor to more fully understand and appreciate Abraham Lincoln. This requires that the daily context in which Abraham Lincoln lived and developed as a father, friend and neighbor be made part of this educational experience.¹

The Lincoln Home is the most significant structure in the National Historic Site and the focal point of all activity. The preservation of the Lincoln Home is of primary importance for continued use as a national historic structure.

For assessment of the restoration required to keep the Lincoln Home a safe, stable, historic structure, the National Park Service commissioned Ferry and Henderson Architects, Inc. of Springfield, Illinois to prepare an Architectural Data Section of the Historic Structure Report. The scope of work requires documentation of historic development, detailed documentation of the existing as-is conditions, evaluation of existing conditions, recommendations for the historic restoration, and recommendations for the restoration of the structure to meet present day uses as defined by the National Park Service.²

¹Master Plan, Lincoln Home, National Historic Site, Illinois.

²Work Directive, Title I Services - Advanced Planning-
Package No. 196, Design Services Relating to Lincoln Home,
Lot 8, Block 10, Lincoln Home National Historic Site,
Springfield, Illinois.

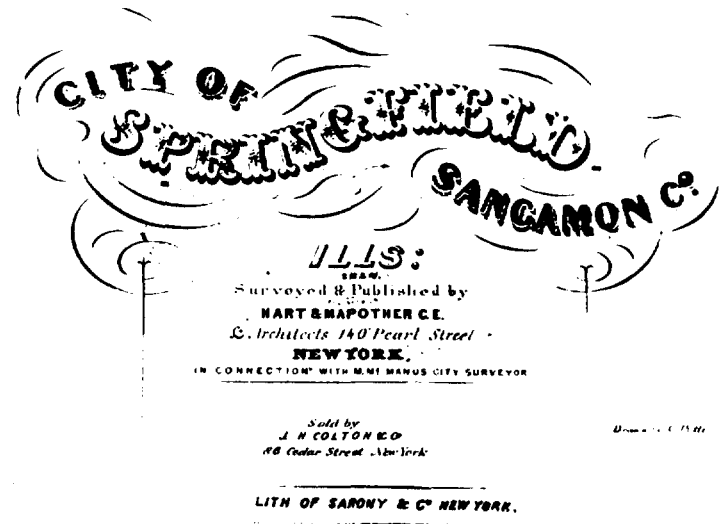

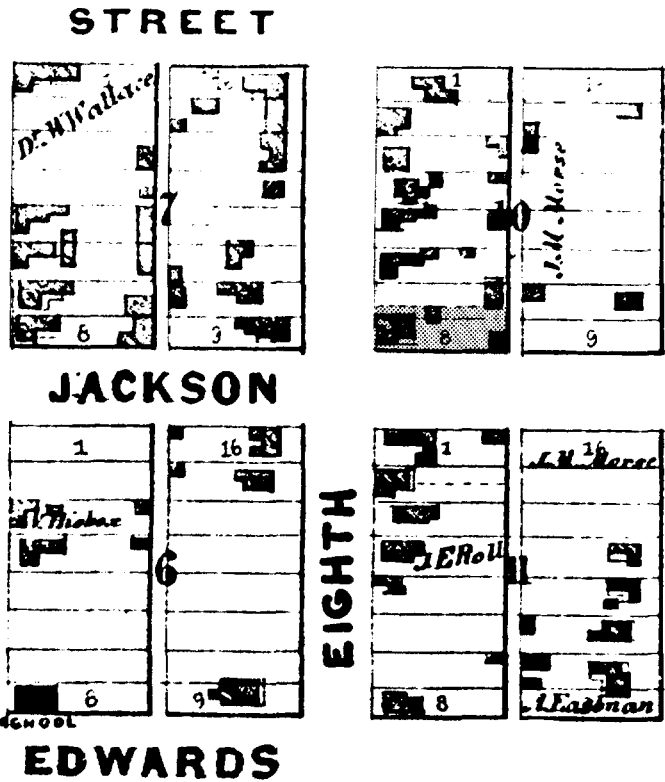

I. PRELIMINARY SURVEYS

A. Historical Data

1. Historical Maps

a. City of Springfield, Sangamon County.

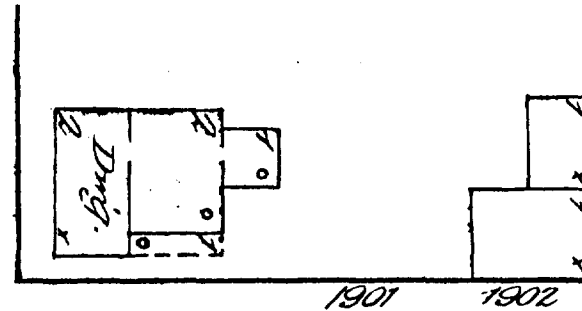

This map shows three improvements to Lot 8, Block 10; the house at the west end, an outbuilding at the southeast corner, and the southern portion of a structure on Lot 7.

Partial reproduction from City of Springfield, Sangamon County, 1854 Map, (courtesy of Illinois State Historical Library).

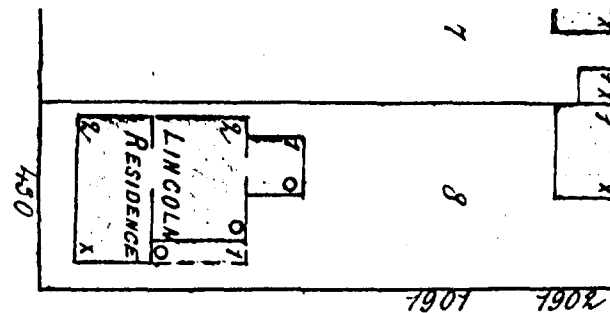

2. Sanborn Maps (courtesy of Illinois State Historical Library). Key to maps on page 8.

a. 1884 Map

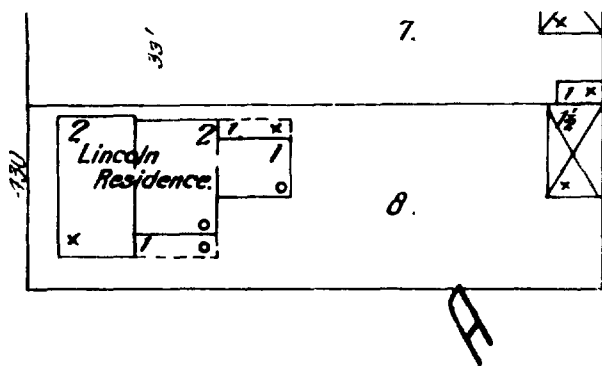

Note: Kitchen addition to the east side of Lincoln Home

b. 1890 Map

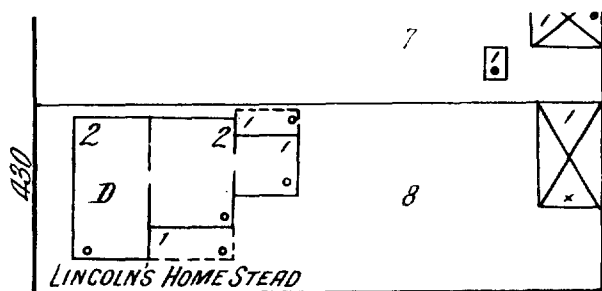

Note: Outbuildings on east end of the lot reduced to a single structure

c. 1896 Map

Note: Porch addition to north side of Lincoln Home at east end.

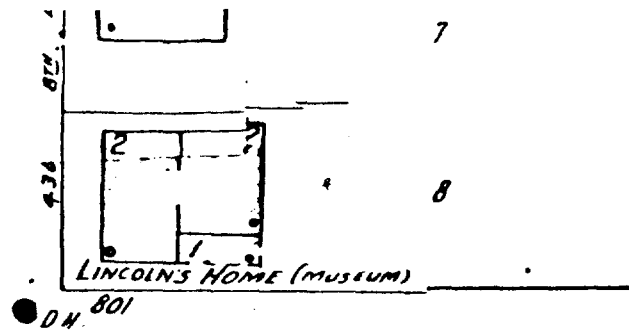

d. 1917 Map

● DH-807

Note: Northeast porch shown wider than in 1896 Map.

e. 1952 Map

Note: Kitchen and porch addition
removed

Key to Sanborn Maps

3. Panoramas

Three panoramas were drawn in the late Nineteenth Century, depicting the four-block Lincoln Home National Historic Site from different points of view. (Panoramas courtesy of the Illinois State Historical Library).

a. Ruger Panorama

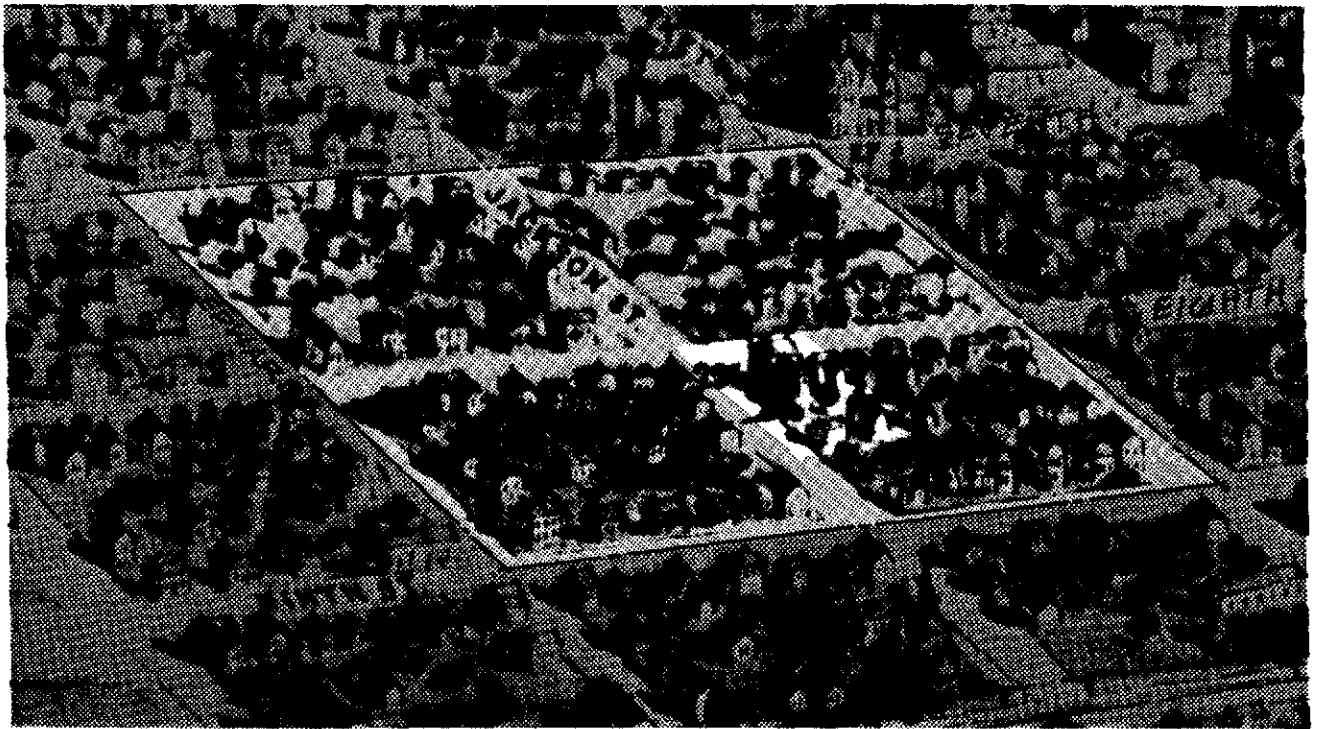

The first panorama (Circa 1867) "drawn from nature" by A. Ruger of the "Chicago Litho-graph Company" is an aerial view of Springfield (including Lincoln Home) from the southeast. Lincoln Home is shown reasonably accurately; however, only one outbuilding is shown at the east end of the lot.

3. Panoramas

Three panoramas were drawn in the late Nineteenth Century, depicting the four-block Lincoln Home National Historic Site from different points of view. (Panoramas courtesy of the Illinois State Historical Library).

a. Ruger Panorama

The first panorama (Circa 1867) "drawn from nature" by A. Ruger of the "Chicago Lithograph Company" is an aerial view of Springfield (including Lincoln Home) from the southeast. Lincoln Home is shown reasonably accurate; however, only one outbuilding is shown at the east end of the lot.

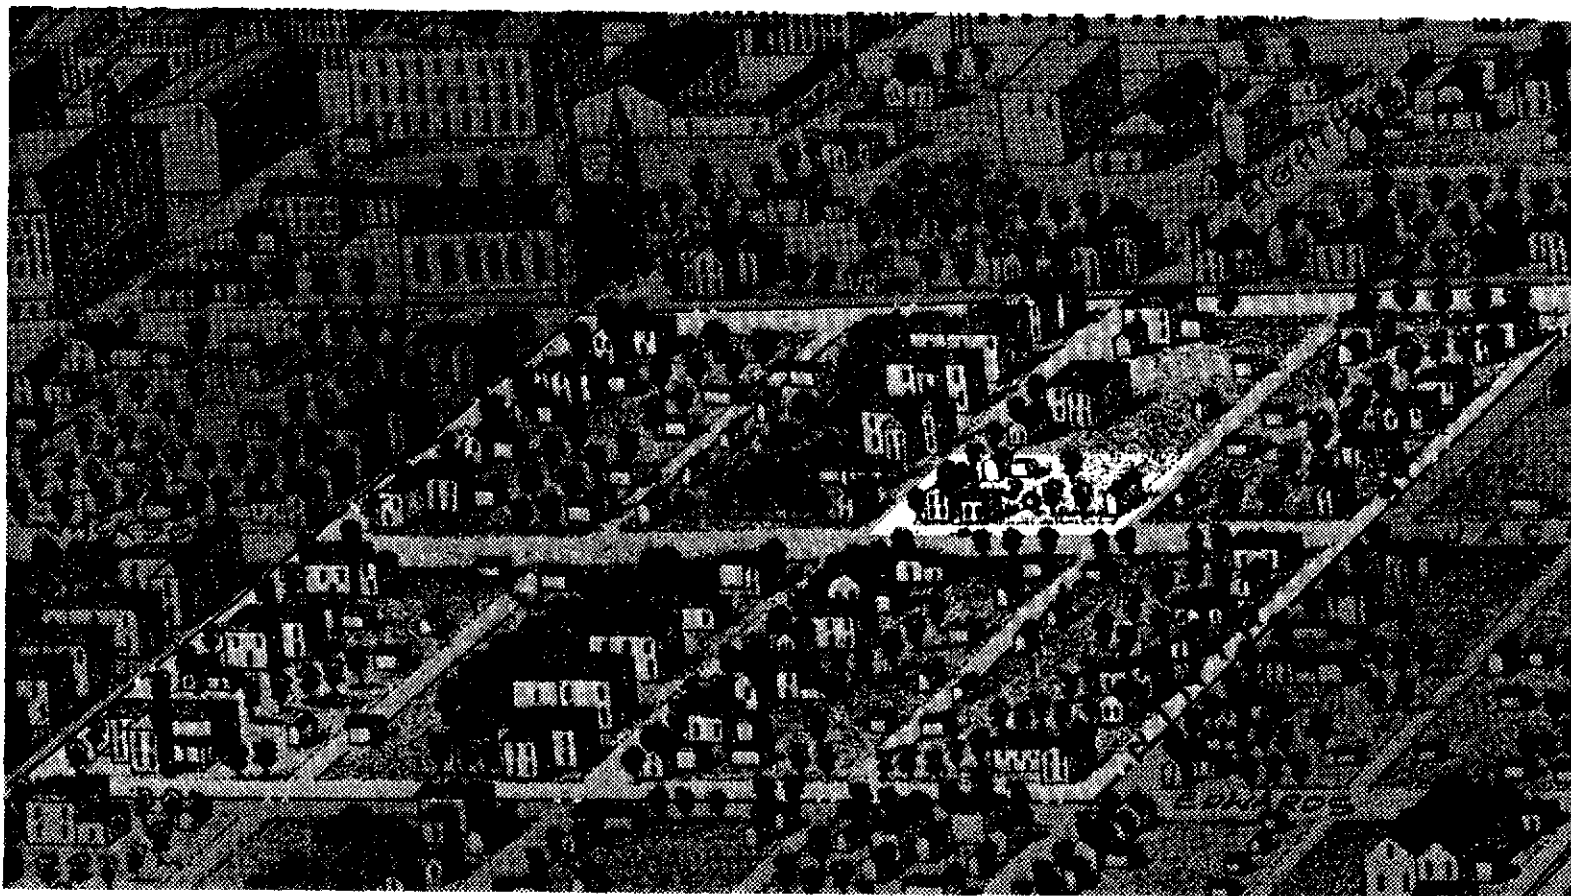

NORTH →

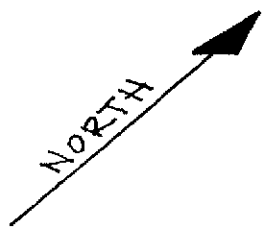

"Ruger" Panorama

b. Beck and Pauli Panorama

The second panorama by Beck and Pauli (Circa 1870) is also from the southeast but slightly more westward. Lincoln Home is shown inaccurately in that the eastern half of the building is one-story.

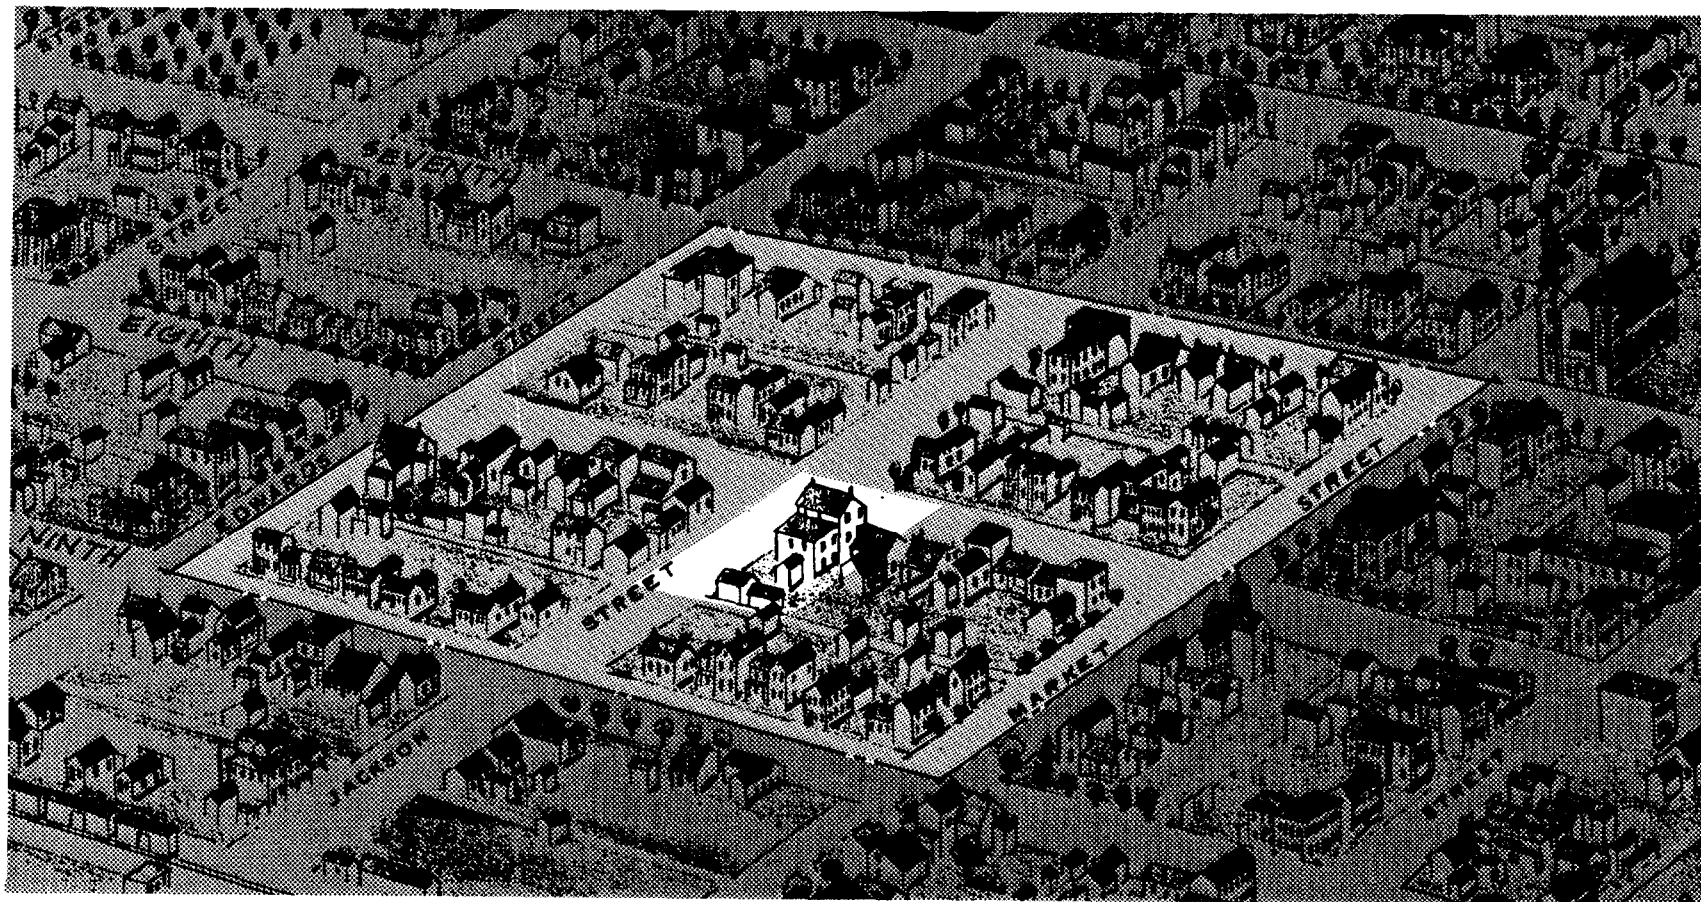

"Beck and Pauli" Panorama

Note: This panorama seems quite distorted, with large spaces between the buildings and noticeable errors in representation

c. Augustus Koch Panorama

The third panorama (Circa 1875) by Augustus Koch is a view from the northeast. Lincoln Home is shown quite accurately and the out-buildings correspond with those shown on the 1884 Sanborn Map to some degree of closeness.

"Augustus Koch" Panorama

Note: The accuracy of this panorama, in general, is quite good in that it conforms closely with the 1884 Sanborn Map

4. Historic Photographs

The historic photographs are divided into two parts, exterior and interior. More emphasis is placed on the exterior photographs since this information is directly related to this Report.

Historic illustrations, sketches and lithographs are included with the photographs and are noted as such.

This selection of photographs is not the entire known photographs of Lincoln Home but give a good understanding of the existing conditions at the time.

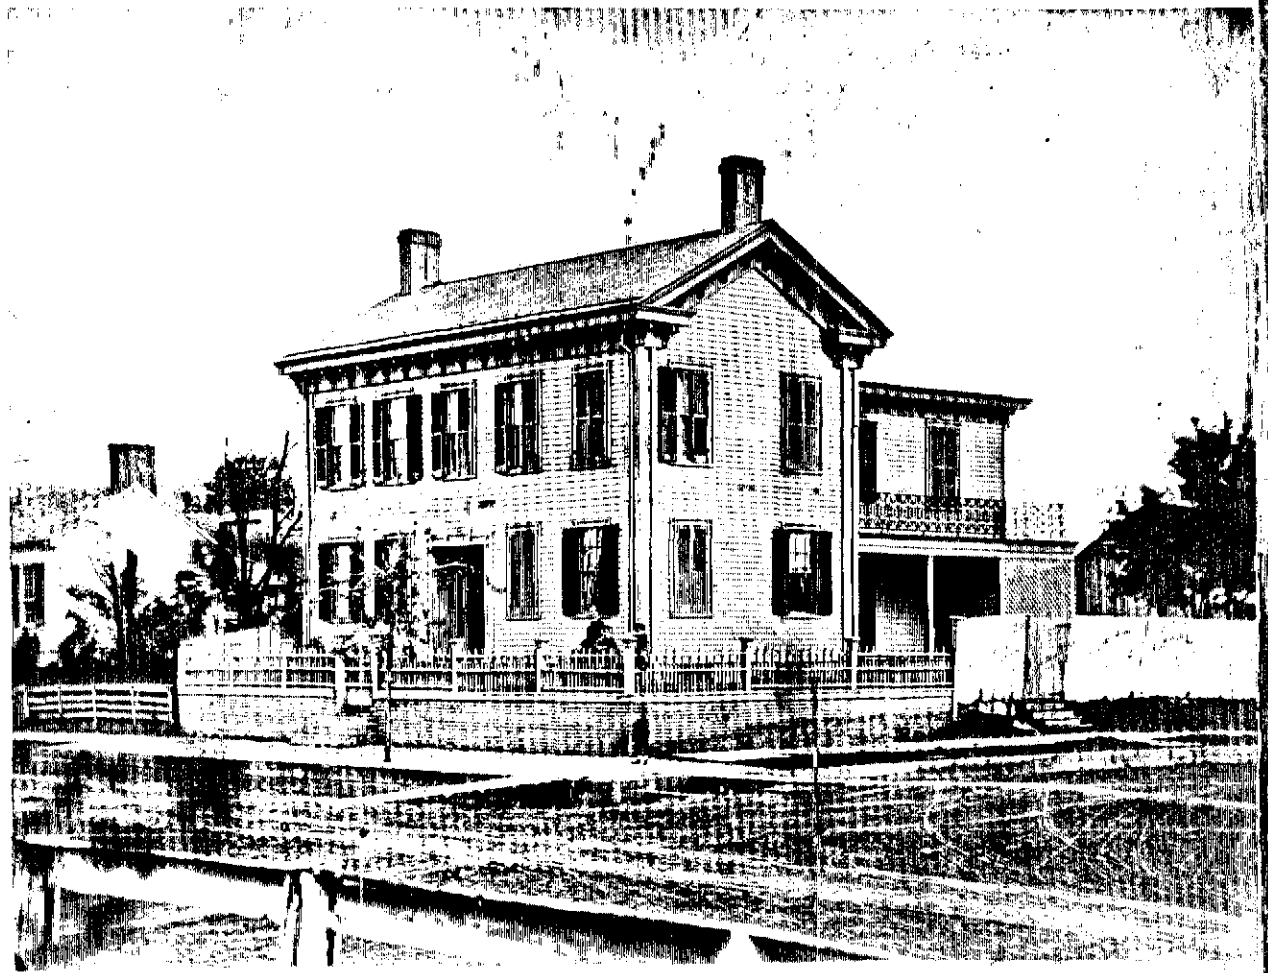

a. Exterior Historic Photographs

The photographs are in chronological order. A description of each photograph is given on the preceding page.

The earliest known photograph is by J. A. Whipple in 1860.

Piece of the Elm Tree, in front of the residence,
planted by Mr. Lincoln.

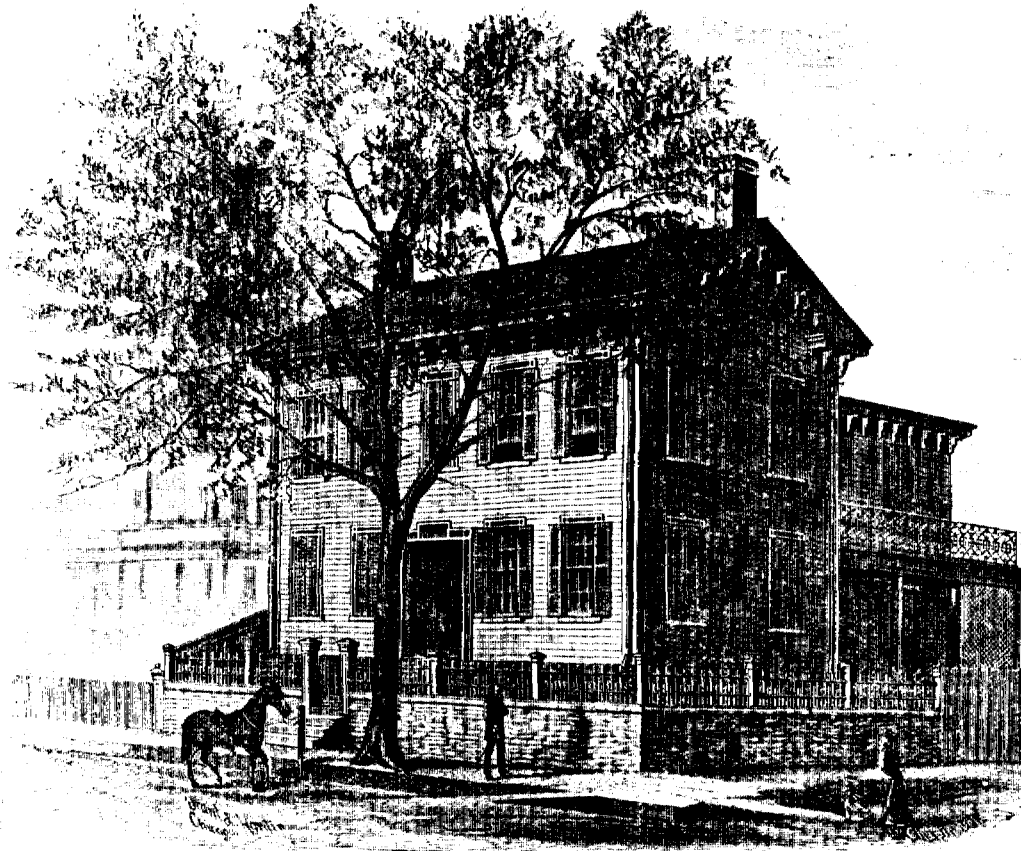

Piece of the Apple Tree in the back yard.

Piece of brick taken out of the wall in
front of the house, when repaired No-
vember, 1883.

Piece of Lath from the dining room.

Piece of shingle taken from the roof
in 1879.

Piece of Joist taken from the dining
room.

LINCOLN RESIDENCE—Springfield, Ill.

Having leased the former residence of ABRAHAM LINCOLN, and in repairing several of the rooms, I carefully saved the flooring, joist, lath, plaster and brick that were taken out and replaced by new. I also saved the branches trimmed from the apple tree in the back yard, and the tree in front of the residence, planted by Mr. LINCOLN, and have placed a piece of each of the above articles, with the cut of the house, in this box, which will be a valuable relic from the home of ABRAHAM LINCOLN.

This box of relics will be sent free, by express, upon receipt of 75 cents.

Plaster from the dining room ceiling.

Flooring from the dining room.

Diagram of Cardboard sheet containing Relics as above described from the
Lincoln Residence, and enclosed in a neat Glass-covered case. Sent free on
receipt of 75 cents. Send orders to

O. H. OLDROYD,

Years Ago and Before Mrs. Lincoln Had the
Second Story Added.

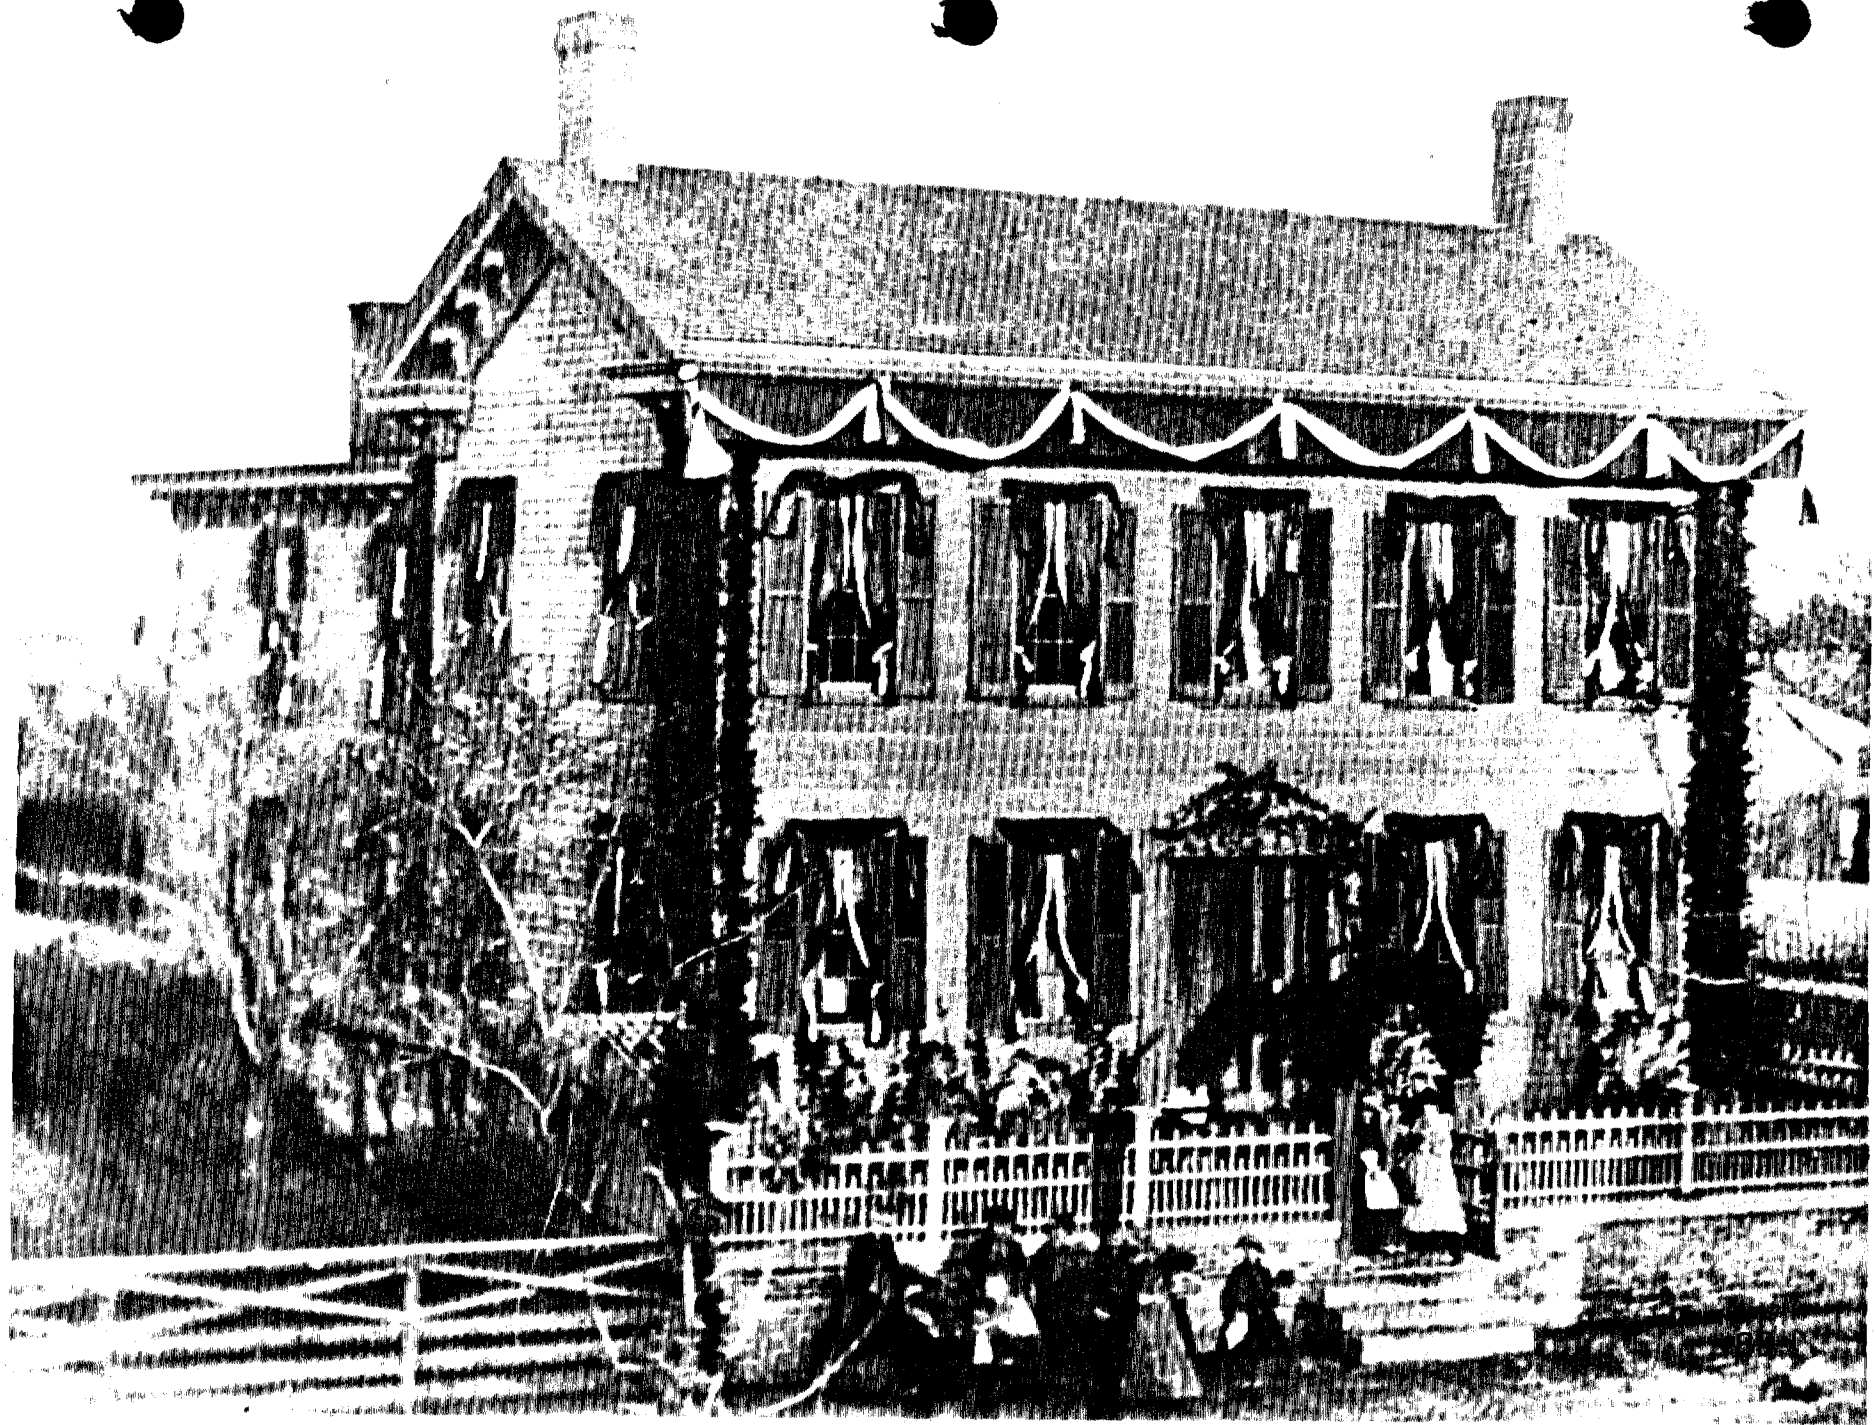

LINGOLN HOME 1848

The contribution of A. V. Arnold to The News on this anniversary is a picture from memory of the Lincoln home on South Eighth Street as it appeared in 1848, before it was remodeled by being raised a story. Biographers tell the story that the work of remodeling the house was done by order of Mrs. Lincoln during the absence of her husband who was out "riding the circuit." On his return the proprietor could hardly believe his eyes when he saw the transformation in his modest home. The incident appealed to his love of practical joking and so he strolled along the street

regarding the structure with great curiosity. At last he met one of his neighbors, of whom he inquired, "Can you tell me whereabouts the widow Lincoln lives?" Just then, it is said, his wife appeared on the porch and told him to 'quit his foolishness and come home.' Whether this story is true or not, as the historians have told it, with all the embellishments, it is nevertheless true that the house was remodeled and the picture by Mr. Arnold, whose home was just across the street is a very faithful reproduction of it in the earlier years, when in Mr. Lincoln's moderate circumstances it was considered a very comfortable and commodious cottage.

5. Historic Drawings

The historic drawings included in this section are all the available known existing drawings and sketches directly related to "Lincoln Home."

We are indebted to Mr. Connie Lelys of the Illinois Department of Conservation for his patience and assistance in the search for these documents within the Department of Conservation, the State Archives, and the Capital Development Board.

WEST ELEVATION
SOUTH ELEVATION
EAST ELEVATION

138

ARCHITECTURAL DRAWINGS showing the elevations of the Lincoln Home. The drawings include:

- WEST ELEVATION**: Shows the profile of the building from the west side, including the roofline and window placements.
- SOUTH ELEVATION**: Shows the profile of the building from the south side, highlighting the entrance and facade details.
- EAST ELEVATION**: Shows the profile of the building from the east side, including the chimney and roof structure.

LINCOLN HOME - HISTORIC DRAWINGS

THE PLAN
 A site plan showing the layout of Lincoln's Home and its surrounding grounds. The drawing includes a north arrow and a scale of 1/4" = 10'. The plan shows the building's footprint, a large lawn area, and various garden beds and paths.

THE ELEVATION
 A perspective drawing of the building's exterior, showing its two-story structure, gabled roof, and various windows and doors. The drawing is oriented to show the front facade of the house.

THE MODEL
 A detailed architectural model of the building, showing its three-dimensional form and the surrounding landscape. The model is shown from a perspective view, highlighting the building's placement on the site.

PLANTING NOTES
 A list of plants and trees recommended for the site, including their names and quantities. The list includes various species of trees, shrubs, and flowers, along with their respective planting locations and dates.

WORKS
 A list of construction and landscaping tasks to be completed, such as "Excavate", "Lay out", "Plant", and "Finish". The list includes details about the materials and methods to be used for each task.

GENERAL NOTES
 A collection of general instructions and observations related to the project, including information about the site conditions, the building's construction, and the landscaping plan.

BORDER PLANTING
 A list of plants and trees recommended for the border areas of the site, including their names and quantities. The list includes various species of trees, shrubs, and flowers, along with their respective planting locations and dates.

LINCOLN'S HOME
 A title block containing the project name, the architect's name (L. H. WOOD), and the date of the drawing (1907). It also includes the name of the client, the Department of the Interior, and the Division of Parks and Memorials.

FLOOR PLAN
 A detailed architectural floor plan of Lincoln's Home, showing the layout of the building's interior. The plan includes rooms such as the Parlor, Dining Room, Kitchen, and several Bedrooms. It also shows the location of the bathroom, staircase, and various closets. The drawing includes dimensions and annotations for each room and feature.

GENERAL NOTES
 A collection of general instructions and observations related to the floor plan, including information about the building's construction, the placement of furniture, and the landscaping plan.

PLANTING NOTES
 A list of plants and trees recommended for the site, including their names and quantities. The list includes various species of trees, shrubs, and flowers, along with their respective planting locations and dates.

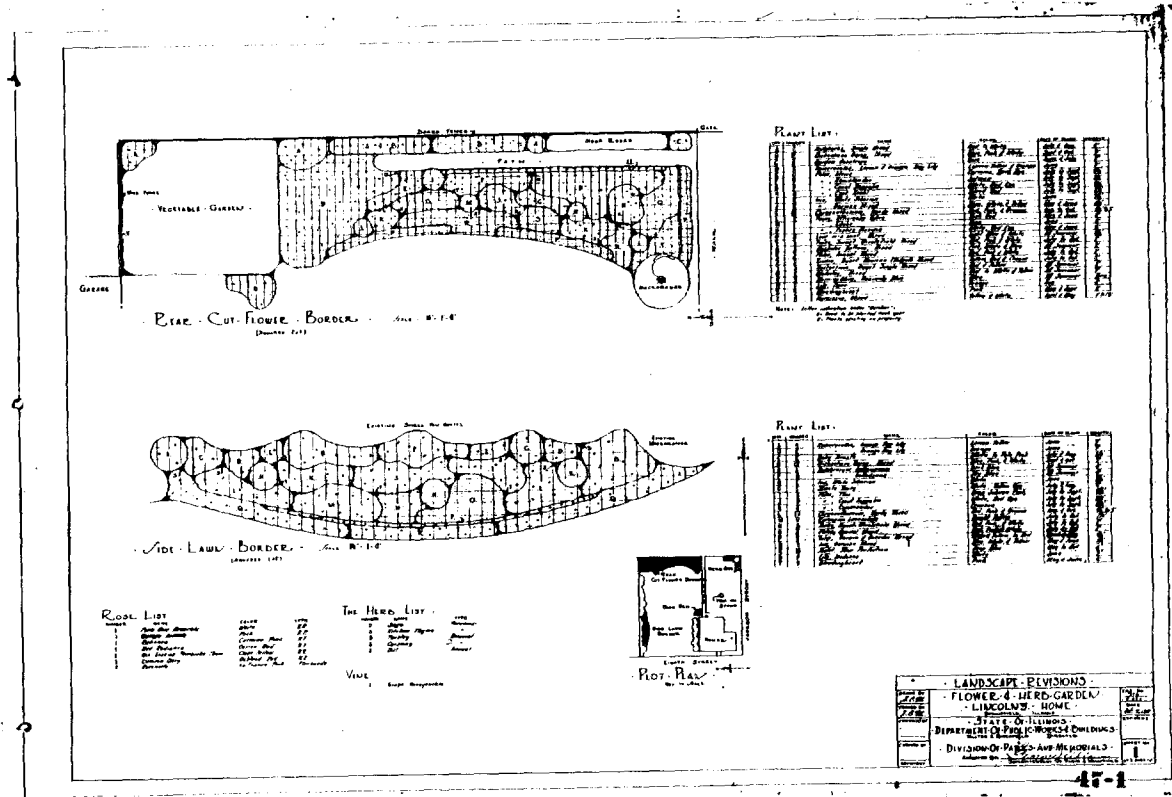

WORKS
 A list of construction and landscaping tasks to be completed, such as "Excavate", "Lay out", "Plant", and "Finish". The list includes details about the materials and methods to be used for each task.

GENERAL NOTES
 A collection of general instructions and observations related to the project, including information about the site conditions, the building's construction, and the landscaping plan.

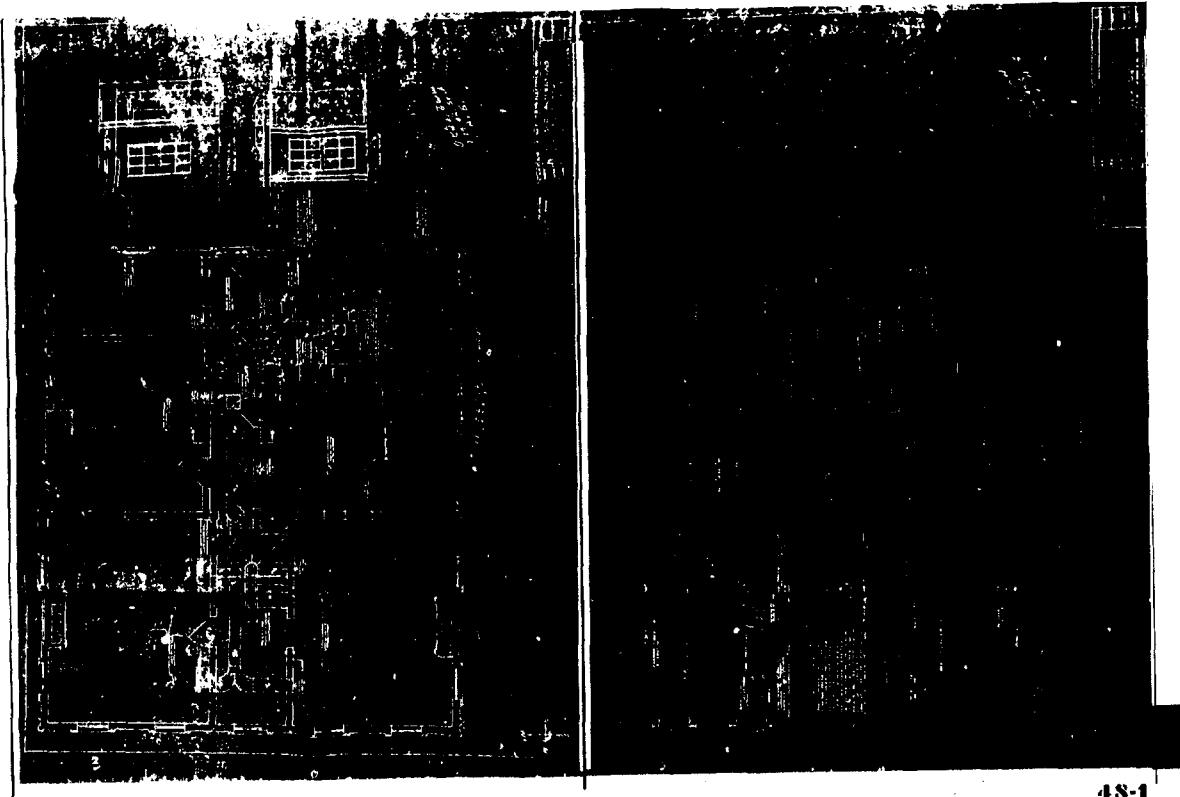

BORDER PLANTING
 A list of plants and trees recommended for the border areas of the site, including their names and quantities. The list includes various species of trees, shrubs, and flowers, along with their respective planting locations and dates.

LINCOLN'S HOME
 A title block containing the project name, the architect's name (L. H. WOOD), and the date of the drawing (1907). It also includes the name of the client, the Department of the Interior, and the Division of Parks and Memorials.

SPECIFICATION NOTES

1. The drawings are to be read in conjunction with the specifications and notes.

2. The dimensions shown on the drawings shall govern over any discrepancy between the same and the specifications.

3. The work shall be done in accordance with the latest editions of the specifications of the American Institute of Architects.

4. The contractor shall be responsible for obtaining all necessary permits and licenses.

5. The contractor shall be responsible for the safety of the workmen and the public.

6. The contractor shall be responsible for the protection of the existing structures and utilities.

7. The contractor shall be responsible for the disposal of all waste materials.

8. The contractor shall be responsible for the cleanup of the site.

9. The contractor shall be responsible for the completion of the work within the specified time.

10. The contractor shall be responsible for the payment of all bills and taxes.

11. The contractor shall be responsible for the maintenance of the site during the construction.

12. The contractor shall be responsible for the insurance of the work.

13. The contractor shall be responsible for the bonding of the work.

14. The contractor shall be responsible for the coordination of the work with other trades.

15. The contractor shall be responsible for the communication with the architect and the owner.

16. The contractor shall be responsible for the submission of progress reports.

17. The contractor shall be responsible for the submission of cost reports.

18. The contractor shall be responsible for the submission of change orders.

19. The contractor shall be responsible for the submission of requests for information.

20. The contractor shall be responsible for the submission of requests for payment.

21. The contractor shall be responsible for the submission of requests for extension of time.

22. The contractor shall be responsible for the submission of requests for clarification.

23. The contractor shall be responsible for the submission of requests for approval.

24. The contractor shall be responsible for the submission of requests for instructions.

25. The contractor shall be responsible for the submission of requests for decisions.

26. The contractor shall be responsible for the submission of requests for orders.

27. The contractor shall be responsible for the submission of requests for notices.

28. The contractor shall be responsible for the submission of requests for certificates.

29. The contractor shall be responsible for the submission of requests for approvals.

30. The contractor shall be responsible for the submission of requests for permits.

31. The contractor shall be responsible for the submission of requests for licenses.

32. The contractor shall be responsible for the submission of requests for registrations.

33. The contractor shall be responsible for the submission of requests for certifications.

34. The contractor shall be responsible for the submission of requests for qualifications.

35. The contractor shall be responsible for the submission of requests for references.

36. The contractor shall be responsible for the submission of requests for resumes.

37. The contractor shall be responsible for the submission of requests for portfolios.

38. The contractor shall be responsible for the submission of requests for samples.

39. The contractor shall be responsible for the submission of requests for test results.

40. The contractor shall be responsible for the submission of requests for inspection reports.

41. The contractor shall be responsible for the submission of requests for completion reports.

42. The contractor shall be responsible for the submission of requests for final accounts.

43. The contractor shall be responsible for the submission of requests for final certificates.

44. The contractor shall be responsible for the submission of requests for final approvals.

45. The contractor shall be responsible for the submission of requests for final permits.

46. The contractor shall be responsible for the submission of requests for final licenses.

47. The contractor shall be responsible for the submission of requests for final registrations.

48. The contractor shall be responsible for the submission of requests for final certifications.

49. The contractor shall be responsible for the submission of requests for final qualifications.

50. The contractor shall be responsible for the submission of requests for final references.

51. The contractor shall be responsible for the submission of requests for final resumes.

52. The contractor shall be responsible for the submission of requests for final portfolios.

53. The contractor shall be responsible for the submission of requests for final samples.

54. The contractor shall be responsible for the submission of requests for final test results.

55. The contractor shall be responsible for the submission of requests for final inspection reports.

56. The contractor shall be responsible for the submission of requests for final completion reports.

57. The contractor shall be responsible for the submission of requests for final final accounts.

NO. 645	UNIVERSITY OF CALIFORNIA LIBRARY
DATE	APR 15 1964
BY	
STATE OF CALIFORNIA	
UNIVERSITY OF CALIFORNIA LIBRARY	
405 HURON STREET	
BERKELEY, CALIF. 947 20	

This architectural drawing shows a detailed plan of a building, likely a residence, with various rooms and structural elements. The drawing is heavily annotated with handwritten notes and lines. A table is located in the upper right quadrant of the drawing area. The drawing is enclosed in a rectangular border.

B. Physical Investigation

Photography, field measurement, fabric removal, X-ray analysis, paint/color analysis, observation and other research consist of the physical investigation of Lincoln Home begun in August of 1978.

The Lincoln Home has been well preserved, relative to other structures of the same age, due to its historical significance as having been the only house owned by President Abraham Lincoln. Even though the Lincoln Home is, for the most part, historically correct, physical investigation is required to understand the existing conditions in order to accurately restore and preserve the structure.

1. Measured Drawings

Detailed evaluation of the "As-Is" conditions of Lincoln Home by Ferry and Henderson Architects, Inc. and Ralph Hahn & Associates, Inc. Consulting and Design Engineers, Inc. produced the following drawings. (All original drawings have been photo-reduced 28.25%).

Architectural

2. Fabric Investigation

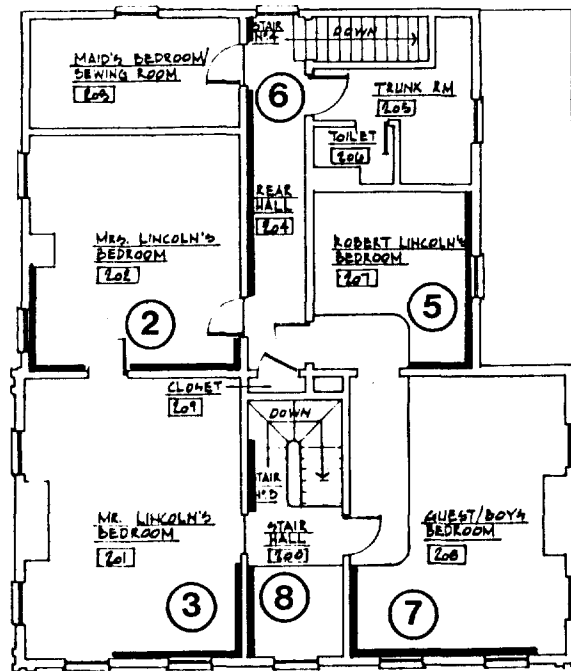

The removal of fabric in the Lincoln Home was necessary to investigate the existing conditions without damage to the structure. Several areas were selected for baseboard and trim removal, documentation by measurements and photographs, replacement and touch-up refinishing to match existing conditions.

The Fabric Investigation photographs were taken by Robert Swenson.

LOCATIONS OF FABRIC INVESTIGATION

FIRST FLOOR PLAN

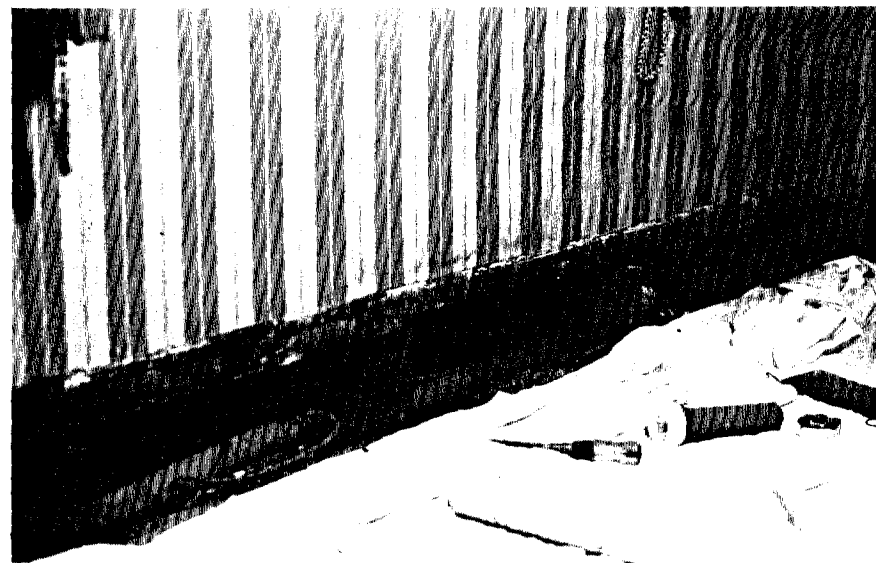

SECOND FLOOR PLAN

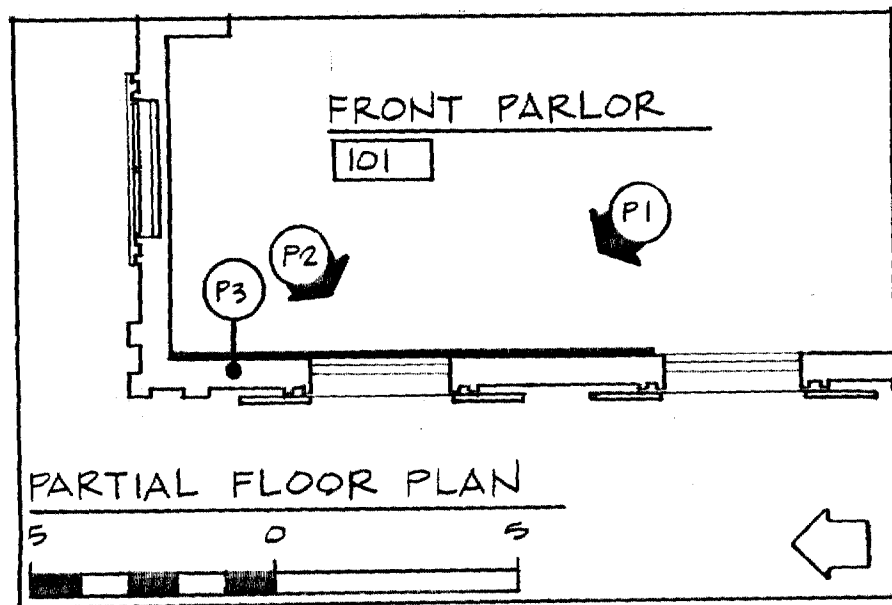

Refer to following page for index of locations of fabric investigation

Index

Location No. 1	Front Parlor, 101	p. 194-195
2	Mrs. Lincoln's Bedroom, 202	p. 196-203
3	Mr. Lincoln's Bedroom, 201	p. 204-209
4	Sitting Room, 108	p. 210-211
5	Robert Lincoln's Bedroom, 207	p. 212-219
6	Rear Hall, 204	p. 220-223
7	Guest/Boys Bedroom, 208	p. 224-229
8	Stair Hall, 200	p. 230-233
9	Back Parlor, 102	p. 234-237

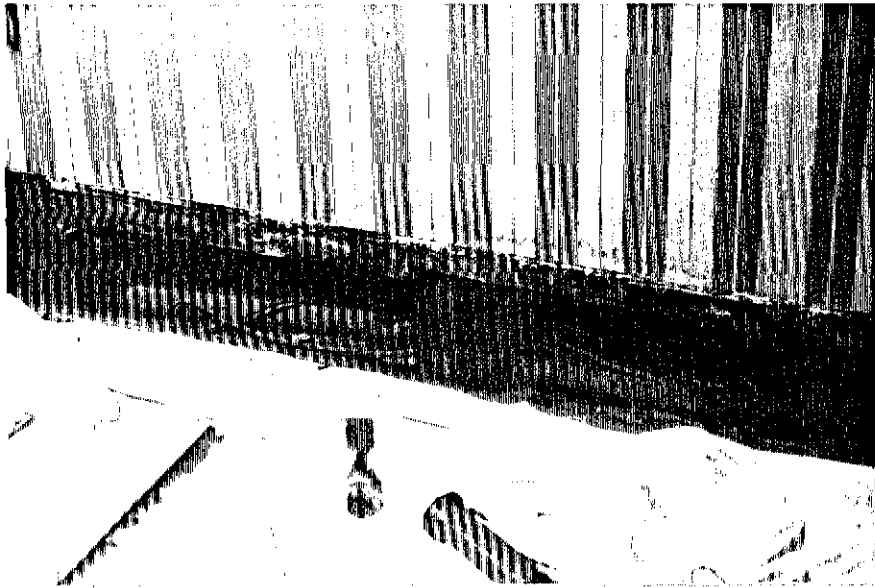

101 - P1

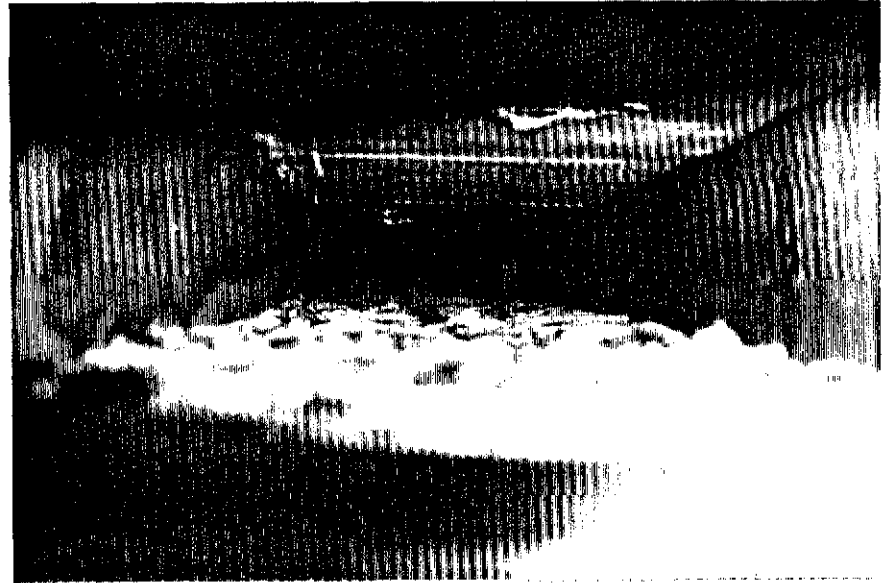

NOTE:

- 1) wood blocks (shims) on stud face for furring base-board
- 2) window weight laying on sill plate (retained by L.H.N.H.S. staff)
- 3) studs bear directly on sill plate - do not appear to be morticed and tenoned into sill
- 4) exterior sheathing is subsheathing ("boxing") + 3/4 inch thick boards
- 5) no nogging in voids.

101 - P2

101 - P3

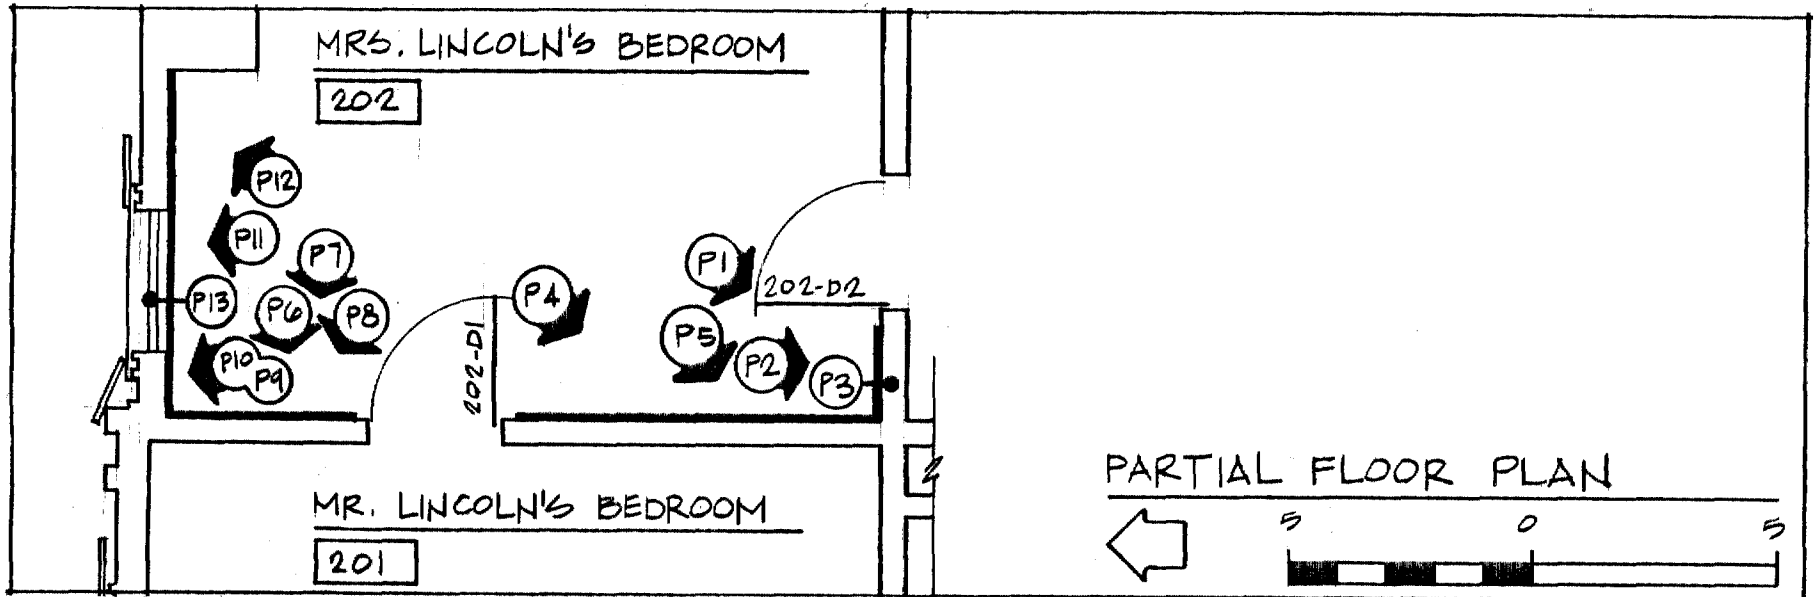

NOTE:

(By using a mirror, viewing up wall between studs)

- 1) vertically sawn studs
- 2) stains due to water damage
- 3) end of Second Floor joist extending into wall cavity (typical balloon framing detail)

202 - P1

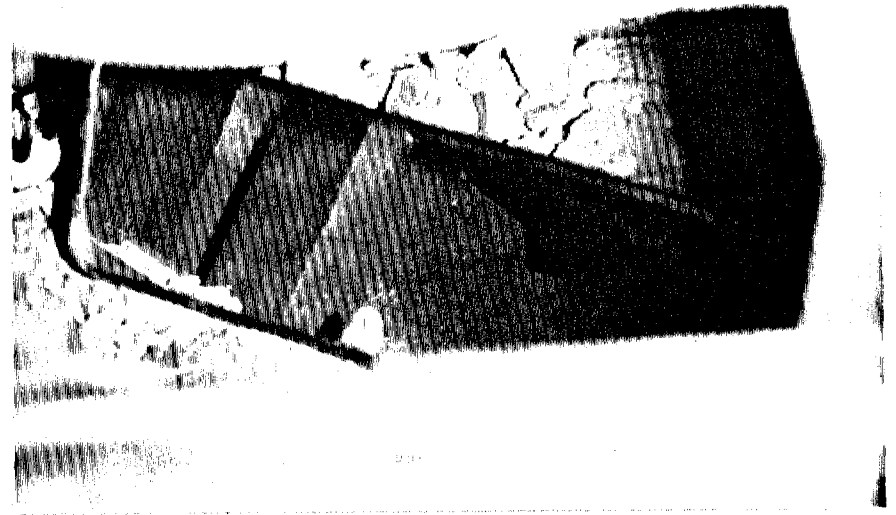

202 - P2

NOTE:

- 1) joists approximately 3" from west wall
- 2) joists spanning north/south in Mrs. Lincoln's Bedroom are single (instead of double); see shadow line
- 3) newer joists were added to original joists across to south, Robert's Bedroom, 207
- 4) small 2 x 4 ledges attached to lower west side of joists to north through Mrs. Lincoln's Bedroom

202 - P3

NOTE:

By using a mirror, this allows a view (between the joist looking north) of the original 2 x 6 ceiling/attic joists

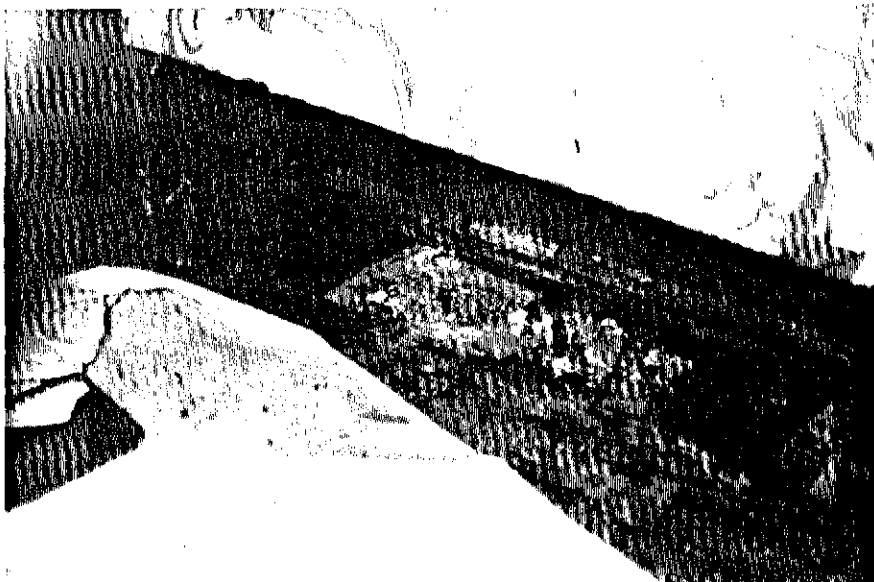

202 - P4

202 - P5

NOTE:

- 1) wiring for alarm system
- 2) joists in Mr. Lincoln's Bedroom spanning east/west
- 3) east/west joists and studs bearing on beam over Doors 101-D1 at First Floor
- 4) larger of east/west joists appear original
- 5) joists added later are located next to each larger joist and in between the larger joist
- 6) newer joists are nailed to older joists or bear on beam or blocking.

202 - P6

202 - P7

NOTE:

- 1) subfloor from Mrs. Lincoln's Bedroom extends over void between studs (covered with plaster debris)
- 2) discontinuous 2 x 2 attached to side of stud at door frame
- 3) underside of wall plate \pm 24" above floor line (visible with mirror)

NOTE:

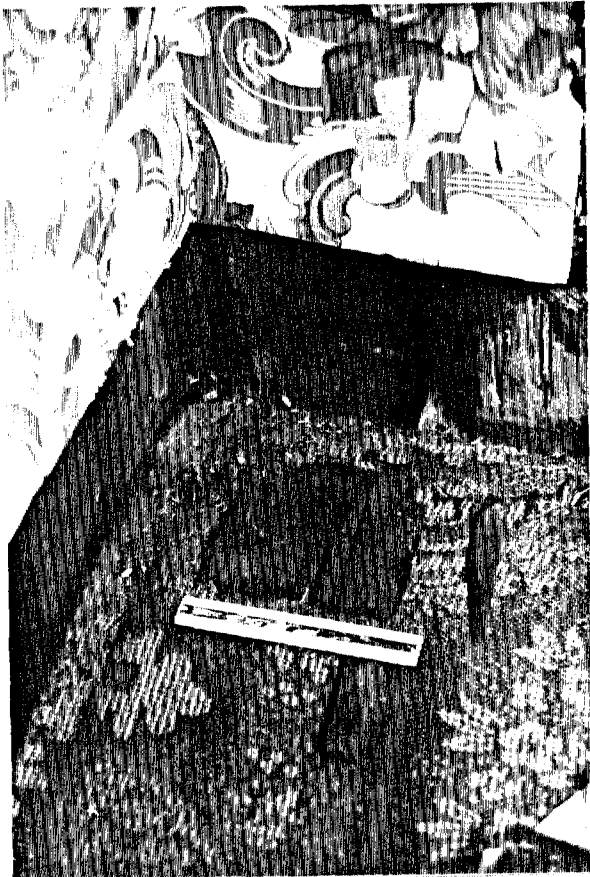

- 1) studs with original joists are "let" in on the south side - typical
- 2) newer joists are on the right side - typical
- 3) newest joists in center between studs bearing on blocking on top of beam over Doors 101-D1

202 - P8

NOTE:

- 1) stud notched for joist - typical balloon frame detail
- 2) new joist in center between studs
- 3) stud turned sideways
- 4) corner stud larger than typical ones and is not continuous

202 - P9

NOTE:

- 1) pieces of original siding or boxing removed from inside wall
- 2) decayed 4 x 4 next to window
- 3) discontinuous stud

202 - P10

NOTE:

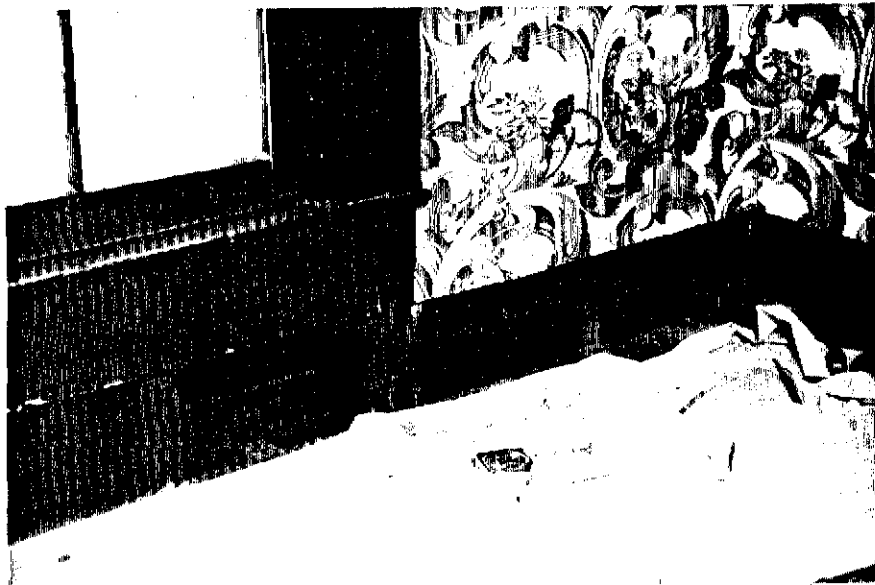

- 1) 4 x 4 stud along each side of window (same at south window of Robert's Bedroom, 207)
- 2) clapboards directly on studs with no "boxing"
- 3) strip below window sill apron is paper painted brown
- 4) air infiltration through wall very noticeable

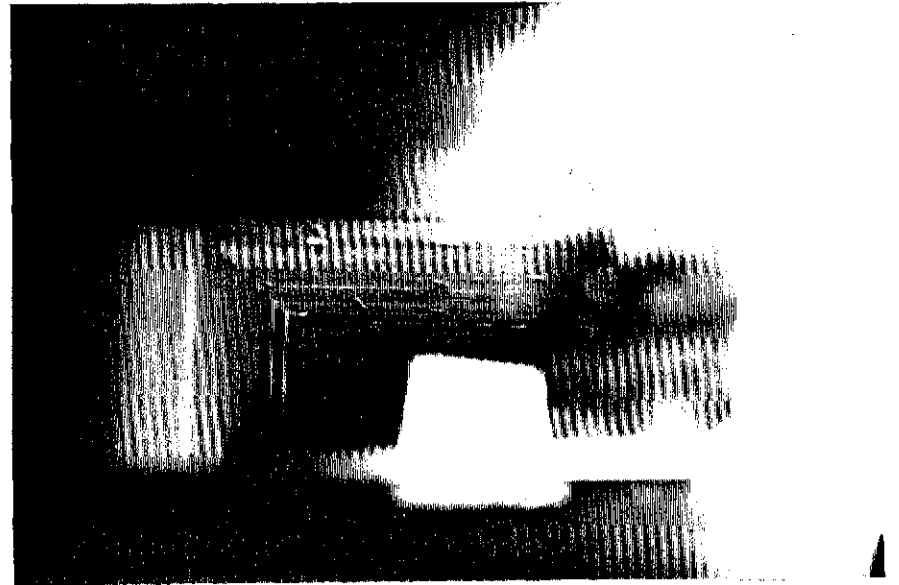

202 - P11

NOTE:

- 1) newer joists next to stud
- 2) tip end of lower 2 x 6 joists with notched ends visible - bearing on wall plate

202 - P12

202 - P13

NOTE:

(By using a mirror, looking back south between floor joists)

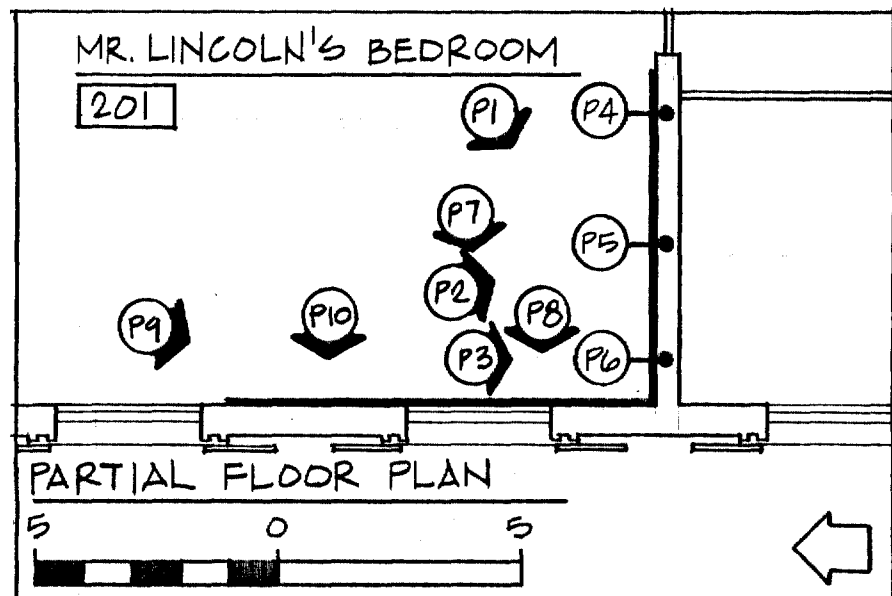

- 1) bright face (spot) in photograph is the sloped cut on 2 x 6 former attic joist
- 2) lines on joist to left in photo seem to be dusting through the floor

201 - P1

201 - P2

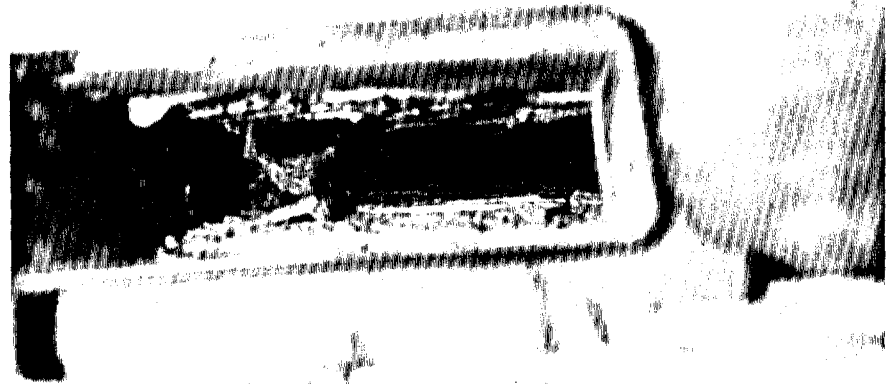

NOTE:

- 1) subfloor continuous through wall (between studs) from Mr. Lincoln's Bedroom to Stair Hall
- 2) studs bear on subfloor
- 3) plaster debris was found in between studs (still visible in two stud spaces) up 2 to 3 feet above floor

201 - P3

NOTE:
1) Closeup of corner

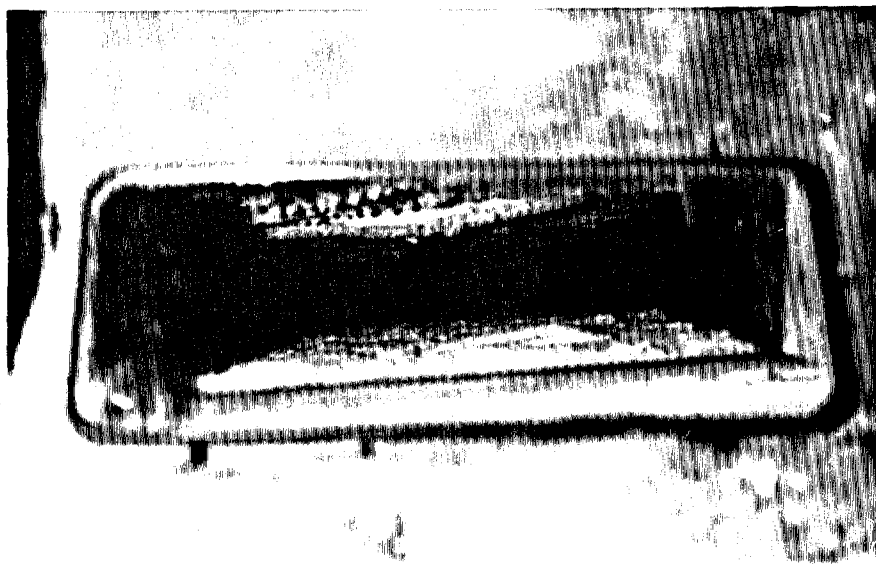

201 - P4

NOTE:

(By using a mirror, view up stud space next to door opening)

- 1) sloping member which represents line of original roof

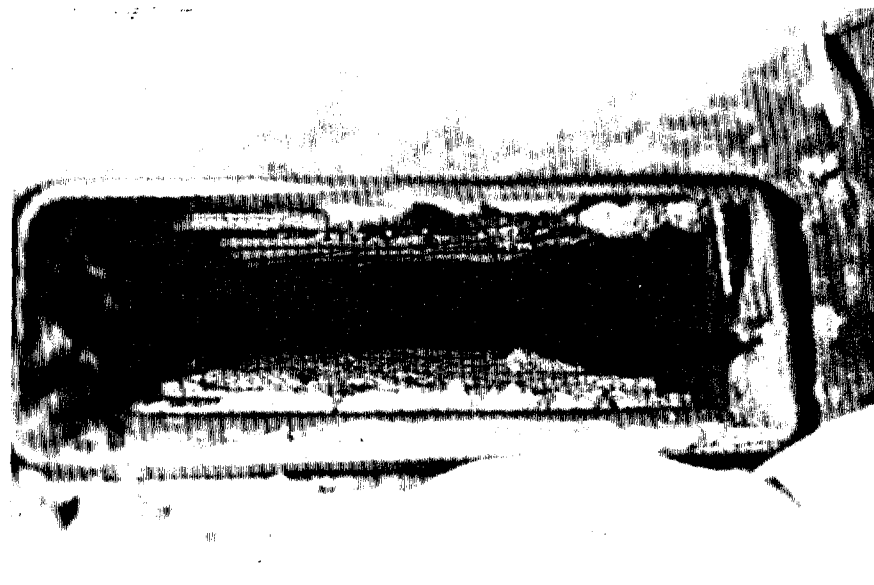

201 - P5

NOTE:

(By using a mirror, view up third stud space - over from door opening)

1) sloping member

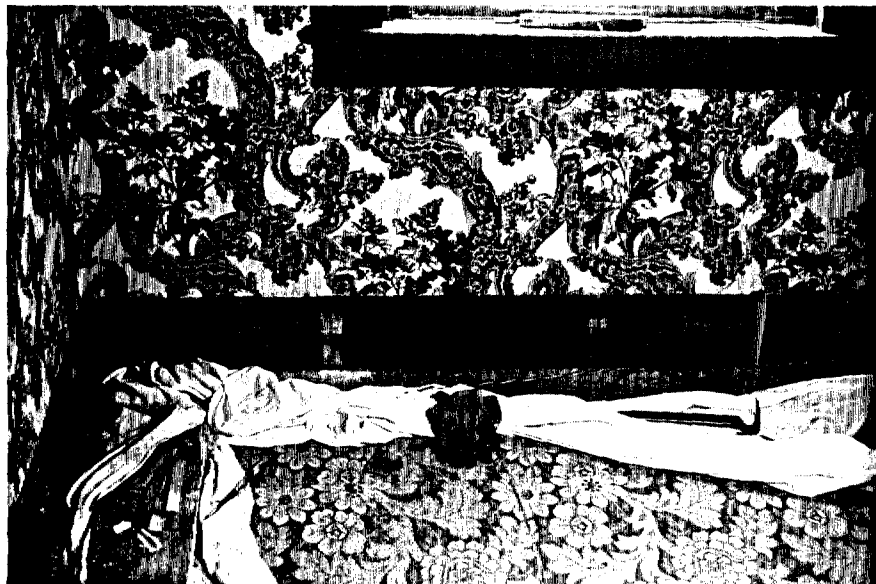

201 - P6

NOTE:

(By using a mirror, view up stud space at southwest corner)

1) sloping member

201 - P7

NOTE:

- 1) large studs with furring strip backing for baseboards
- 2) "boxing" subsheathing visible
- 3) no brick "nogging"
- 4) continuous top plate (visible with mirror) at + 24" above floor line which is approximately the window apron height

201 - P8

NOTE:

- 1) closeup of studs and joists

201 - P9

NOTE:

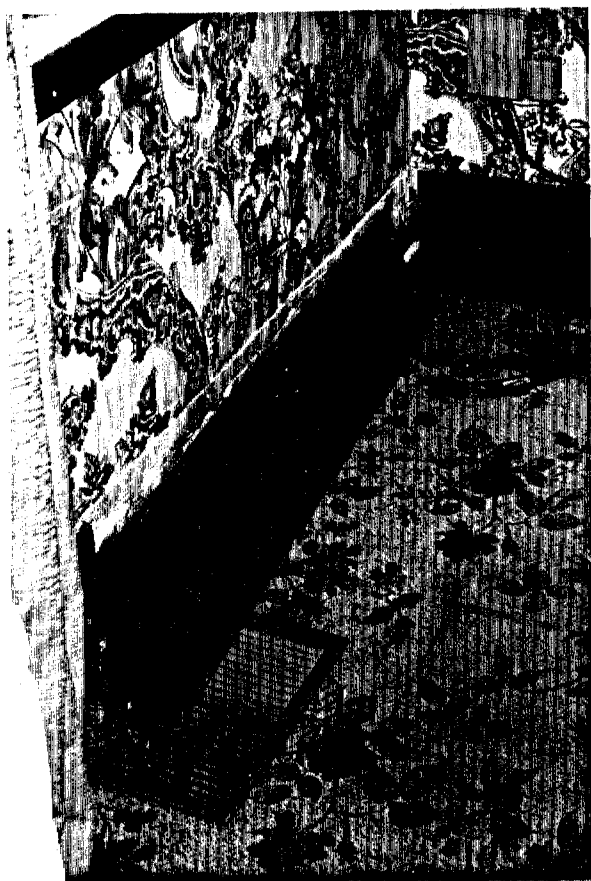

- 1) floor joists in Mr. Lincoln's Bedroom visible
- 2) original joists let into studs - typical balloon framing detail
- 3) Additional joists nailed to original joists or bearing on blocking added between the studs

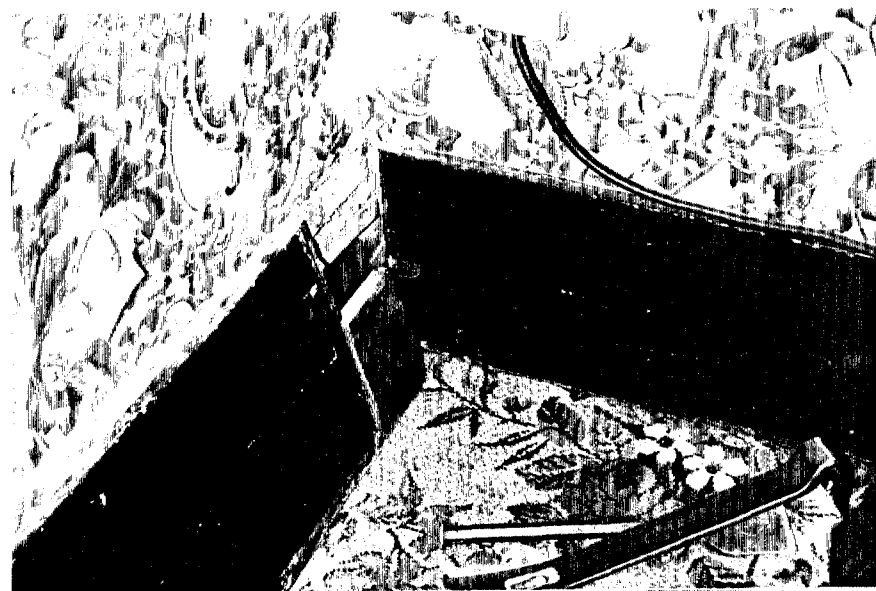

201 - P10

NOTE:

- 1) Closeup of studs and joists

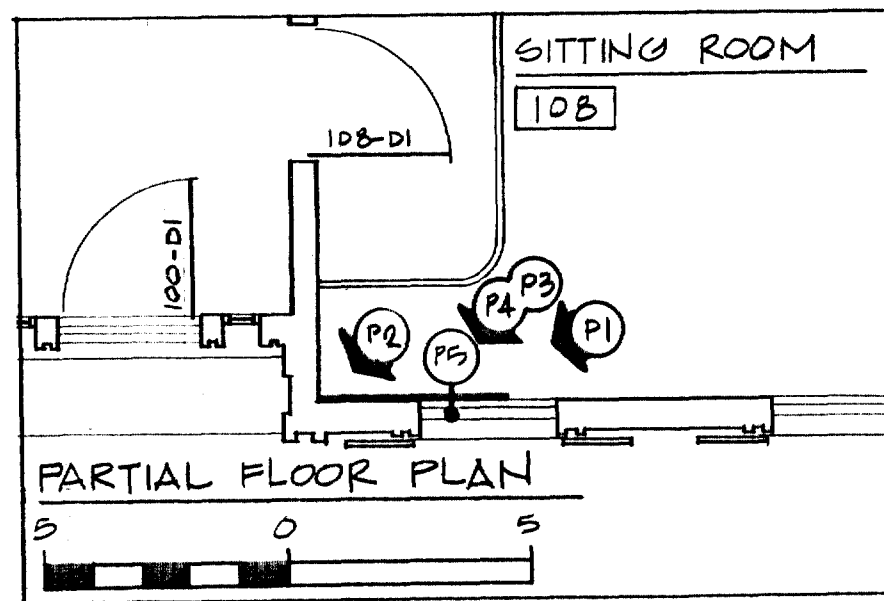

108 - P1

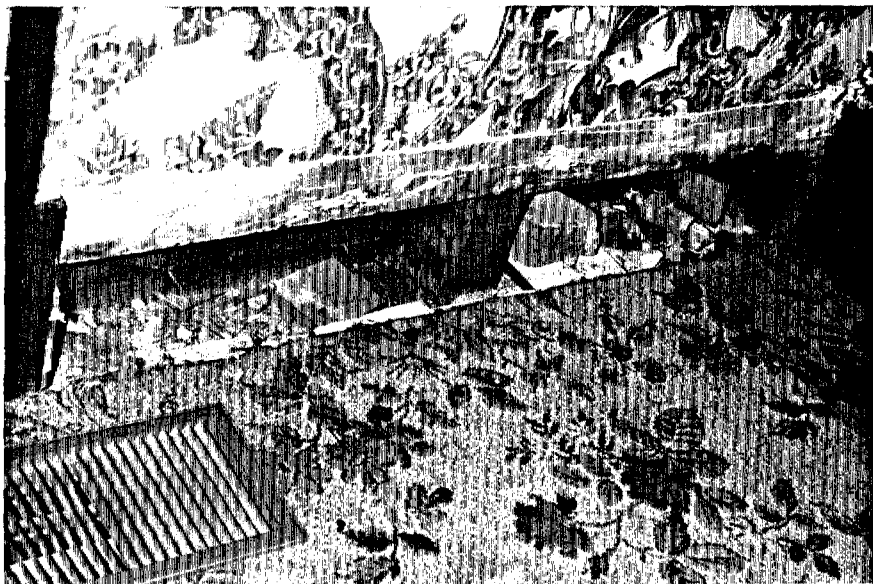

108 - P2

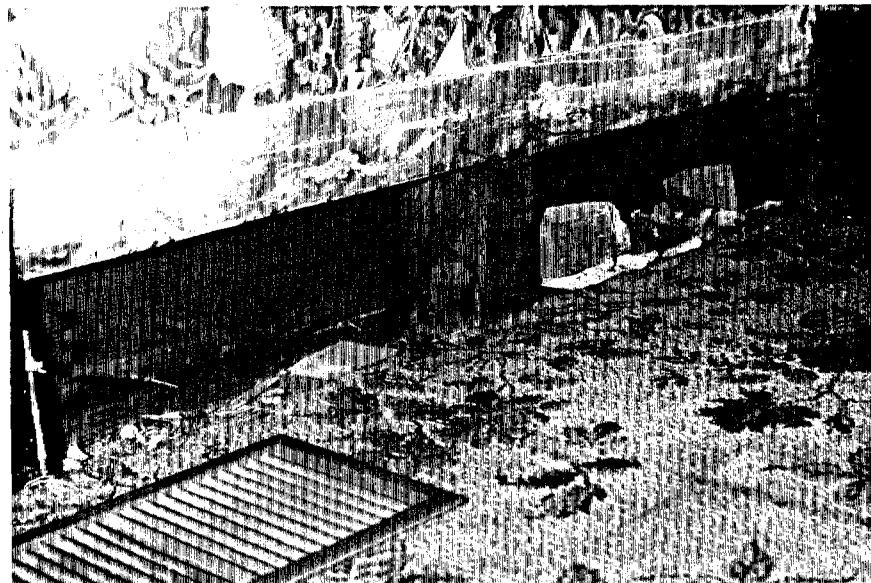

NOTE:

- 1) brick "nogging" starting $\pm 8"$ above floor on up to second floor
- 2) the bottom 2 or 3 courses may have been removed when wood sill plates were replaced in the 1950's (no record of brick "nogging" at that time)
- 3) baseboard extension into south wall was cut off during Fabric Removal in order to reinstall baseboard (LHNHS staff has walnut piece)

108 - P3

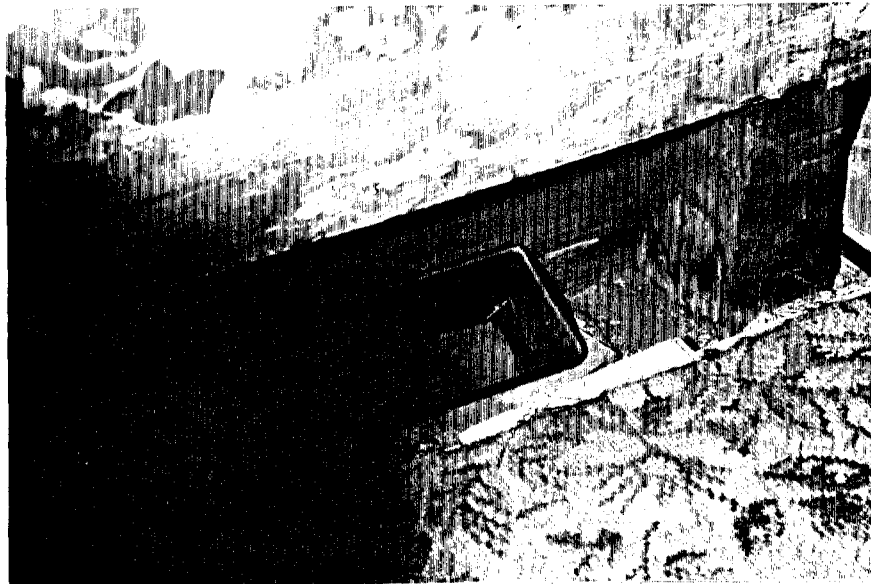

108 - P4

NOTE:

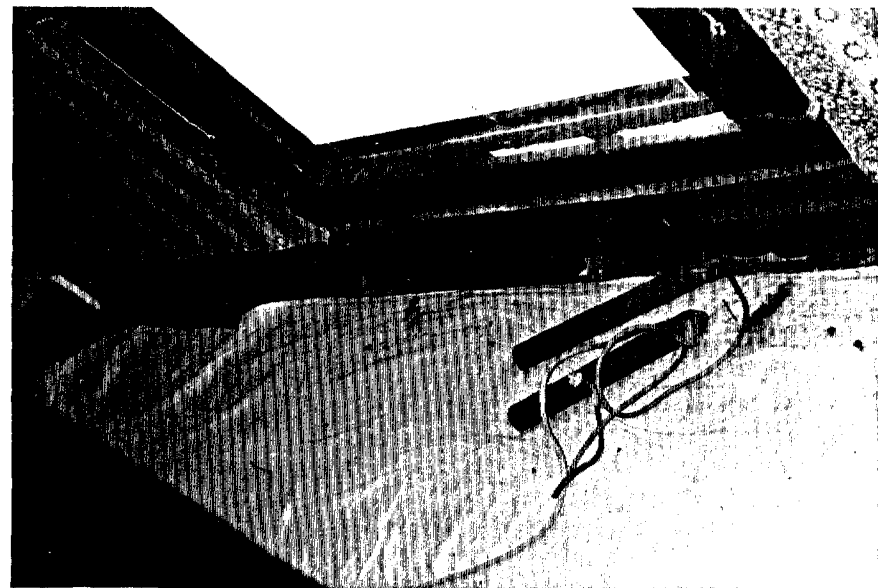

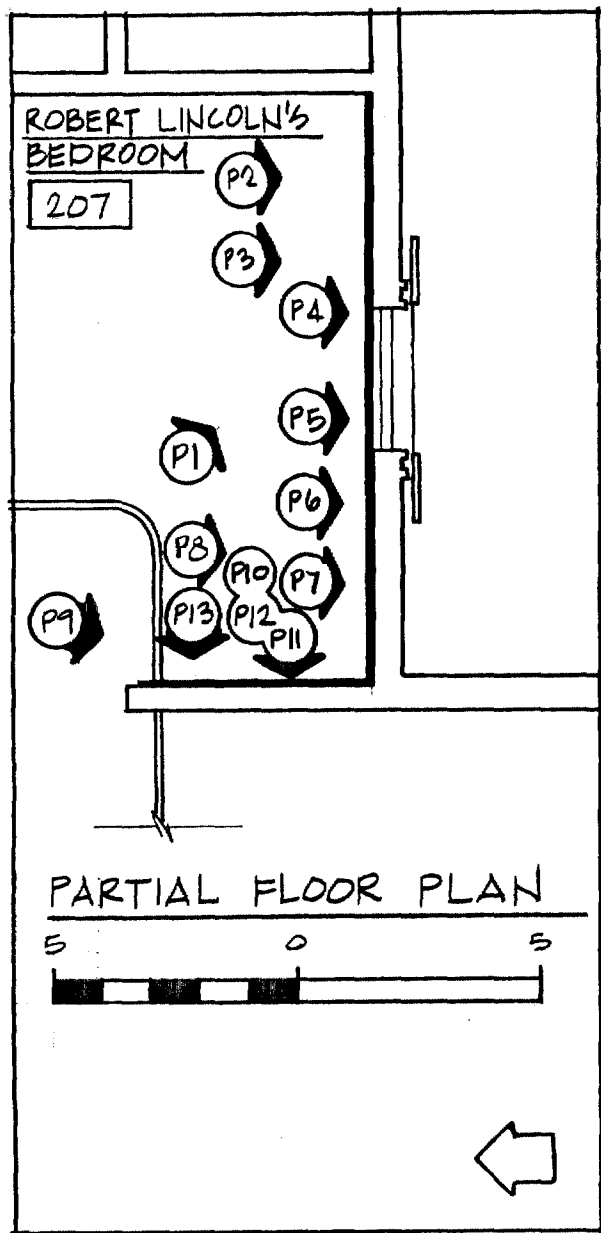

1) larger size stud visible

(By using a mirror, view up stud space)

2) brick "nogging" visible \pm 8" above sill plate

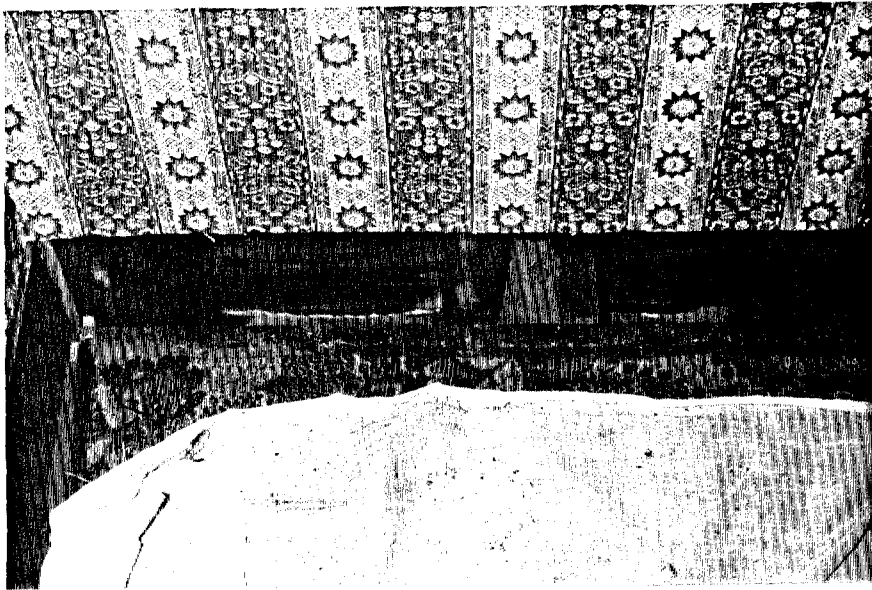

108 - P5

207 - P1

NOTE:

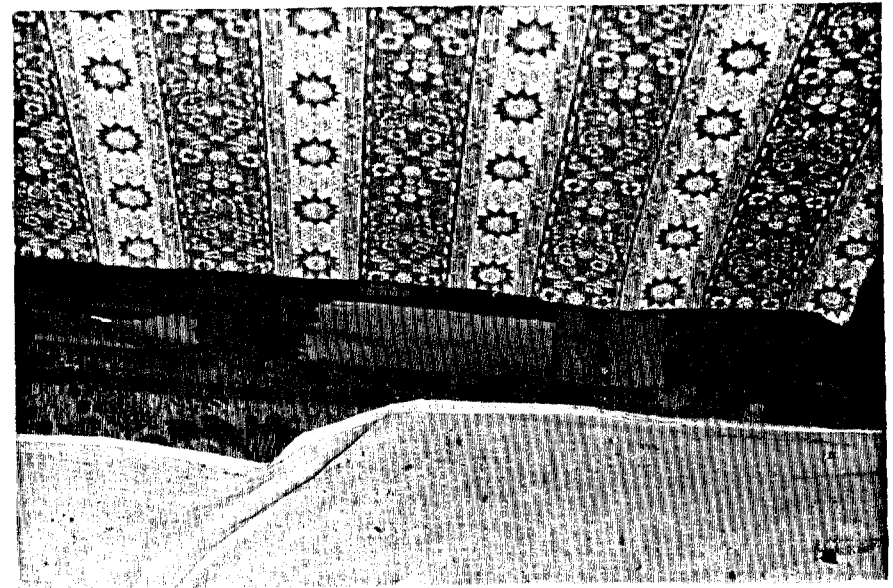

- 1) floor joists run north/south and bear on wall plate
- 2) window weights not in use - different style from ones found in Front Parlor on First Floor (LHNHS staff has the weights)

207 - P2

NOTE:

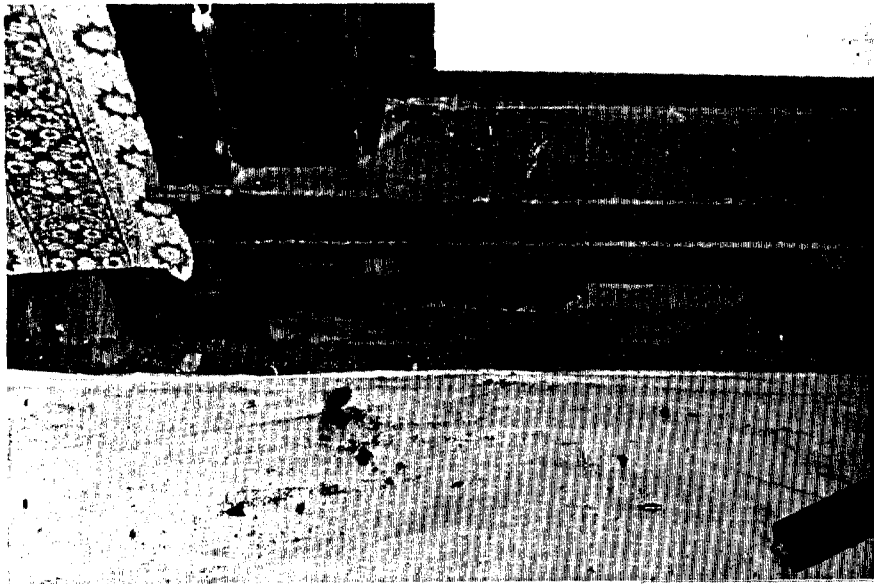

- 1) additional joists visible
- 2) larger stud (4 x 6) at corner

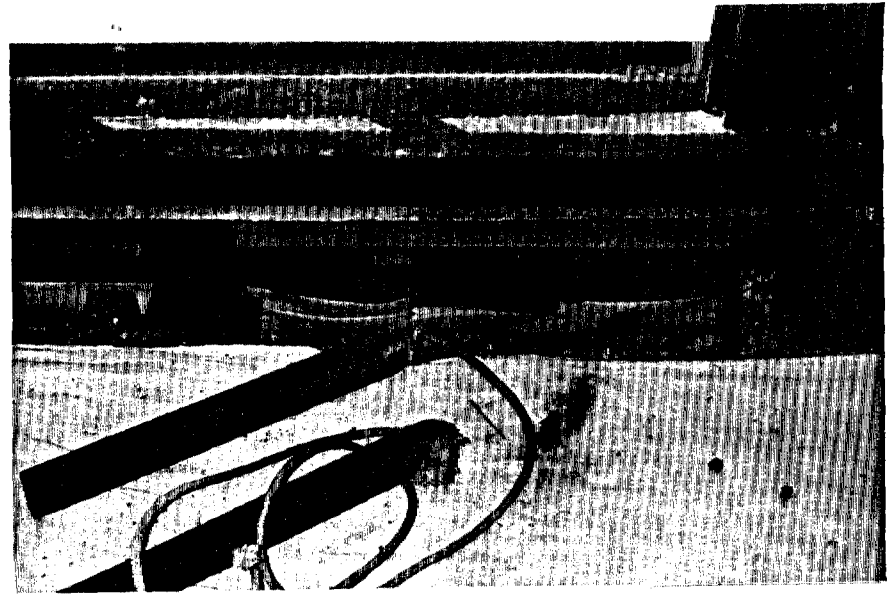

207 - P3

NOTE:

- 1) additional joists visible
- 2) studs and joists bear on wall plate

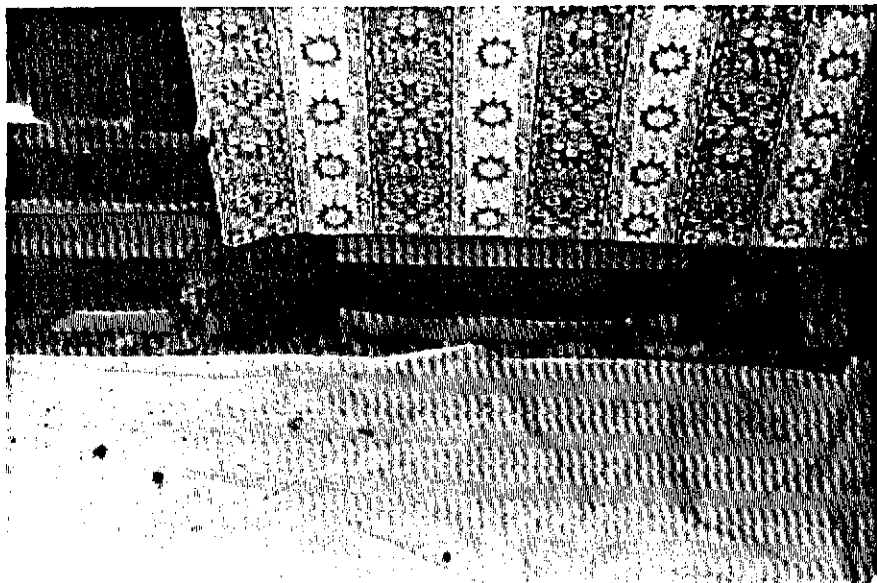

207 - P4

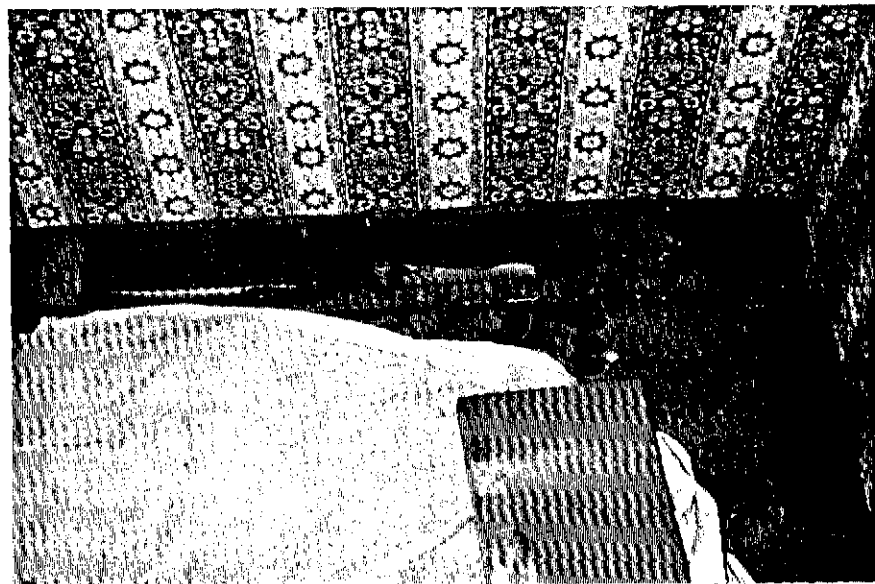

207 - P5

NOTE:

- 1) vertical saw marks on studs
- 2) 4 x 4 stud next to window

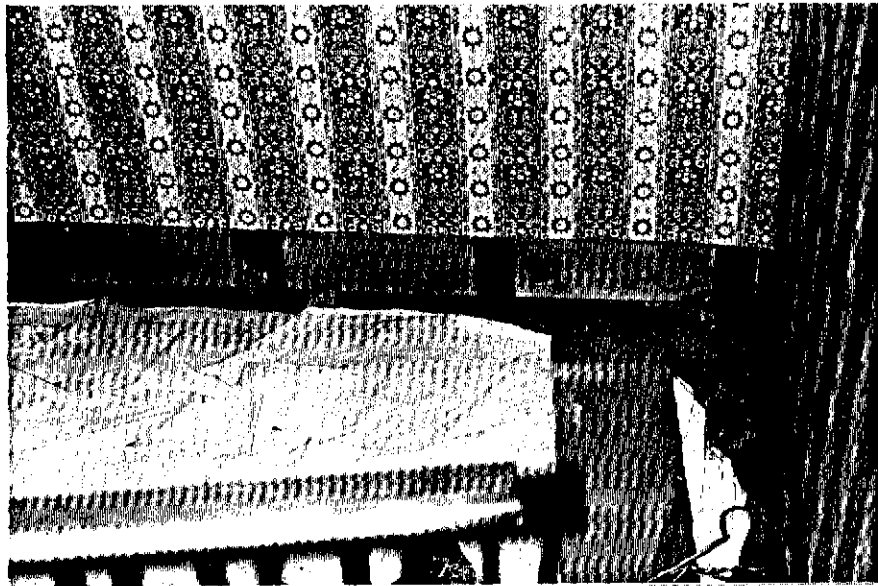

207 - P6

207 - P7

NOTE:

- 1) 4 x 4 stud next to window
- 2) additional joists visible next to older ones
- 3) paper backing on inside face of clapboards

207 - P8

NOTE:

- 1) newer clapboard siding (light color of inside face)

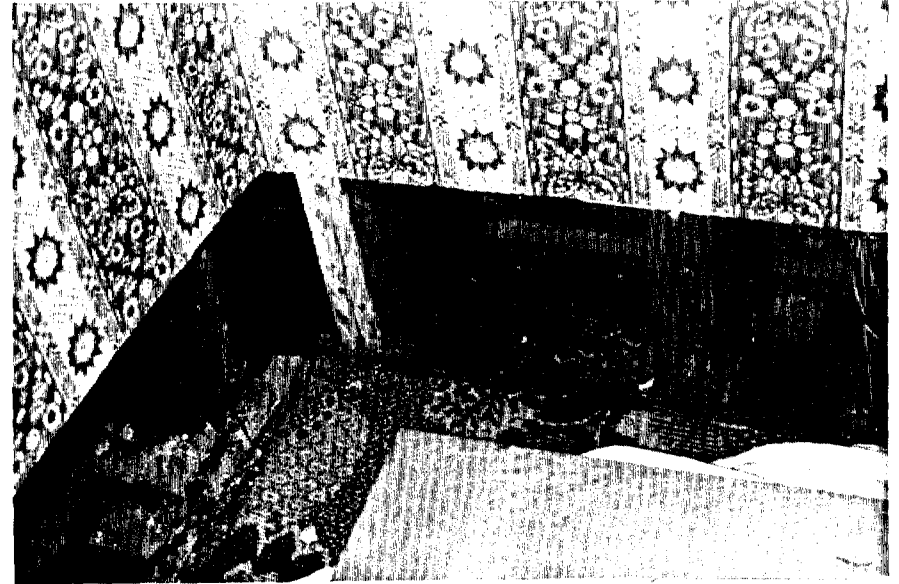

207 - P9

NOTE:

- 1) revision of studs (three) when door opening between Robert's Bedroom and Guest/Boys Bedroom was moved north
- 2) all studs are not continuous
- 3) one stud turned sideways (lines of plaster lath and plaster visible)

207 - P10

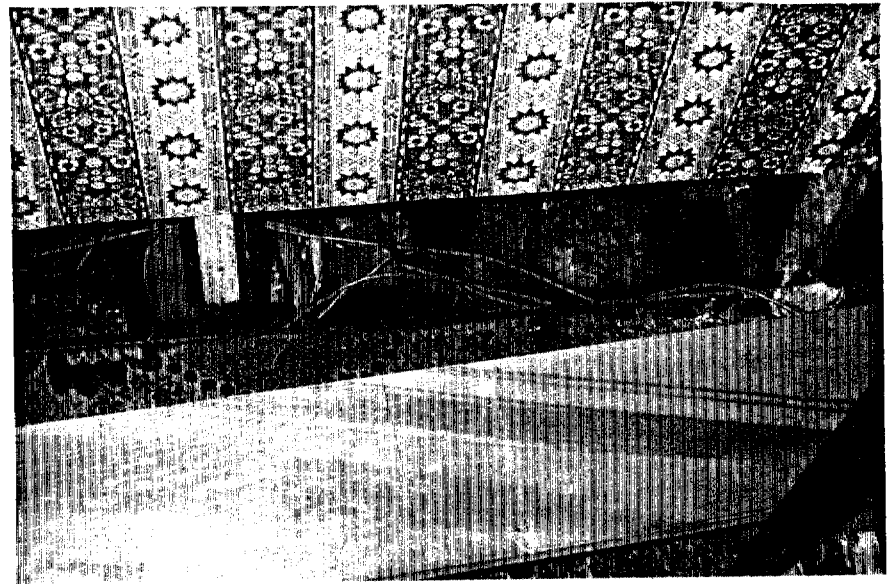

207 - P11

NOTE:

- 1) in the void between studs is a notched 2 x 8 turned sideways
- 2) discontinuity of studs

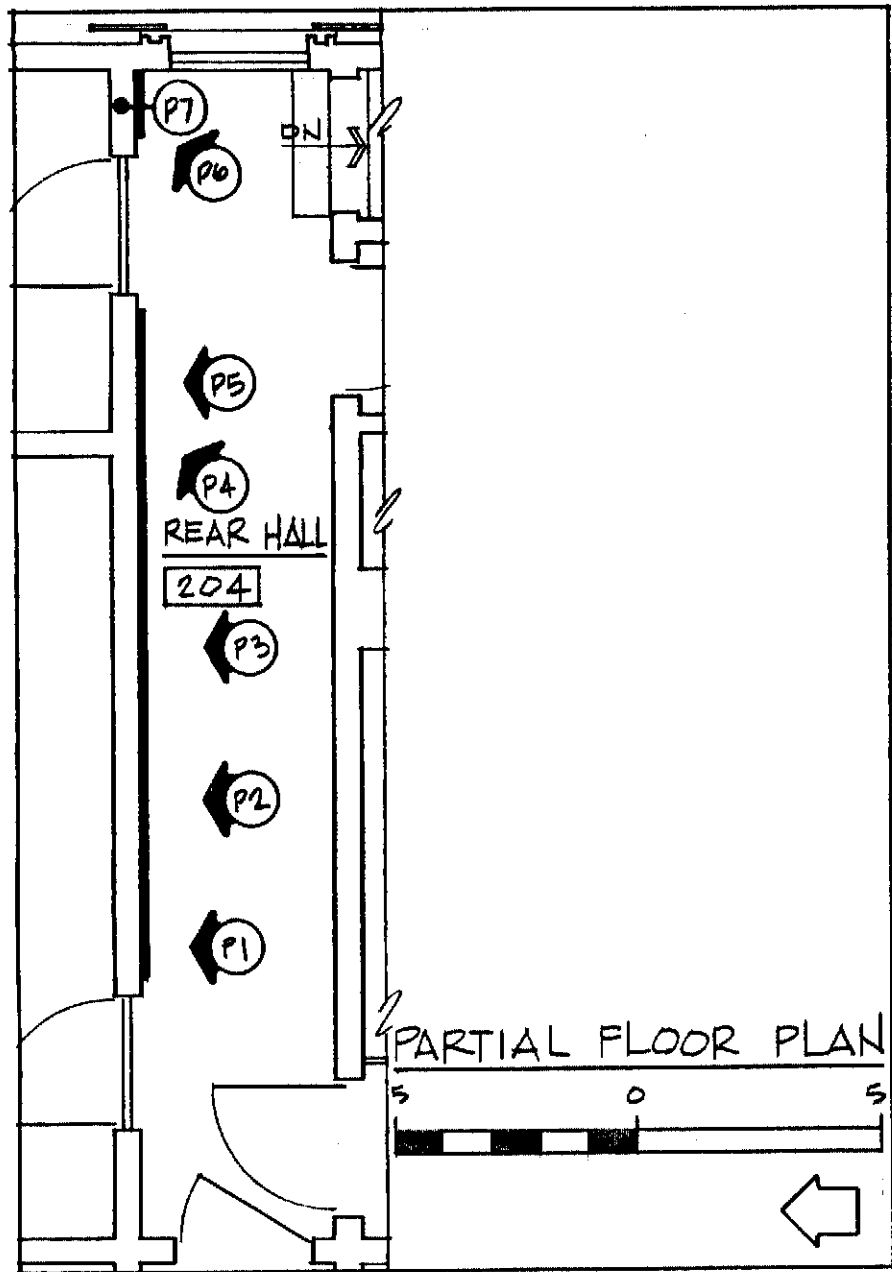

207 - P12

207 - P13

NOTE:

- 1) joist bearing from Guest/Boys Bedroom not well defined - exact condition undetermined

204 - P1

NOTE:
1) vertically sawn baseboard

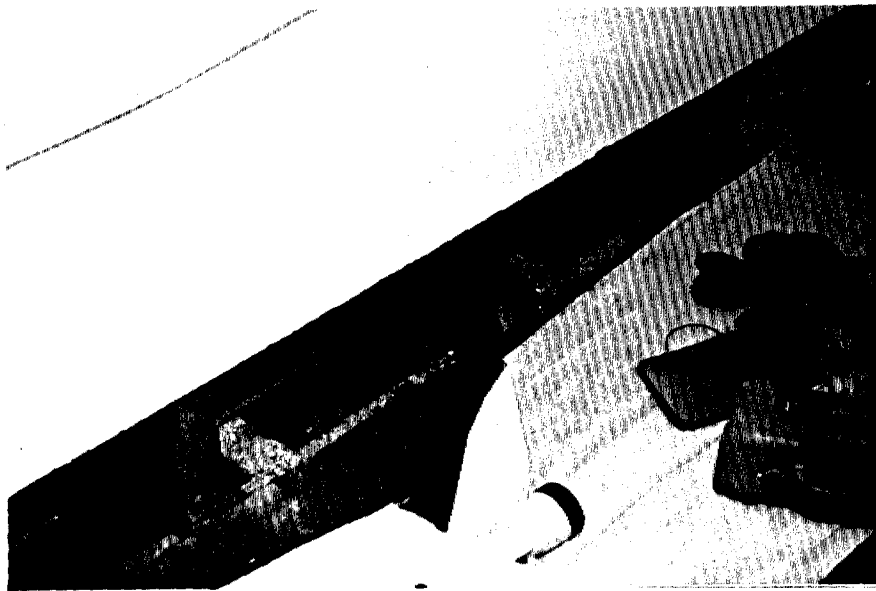

204 - P2

NOTE:

- 1) newer joists "let" into studs which bear on wall plate
- 2) older 2 x 6 ceiling joists are visible to north

204 - P3

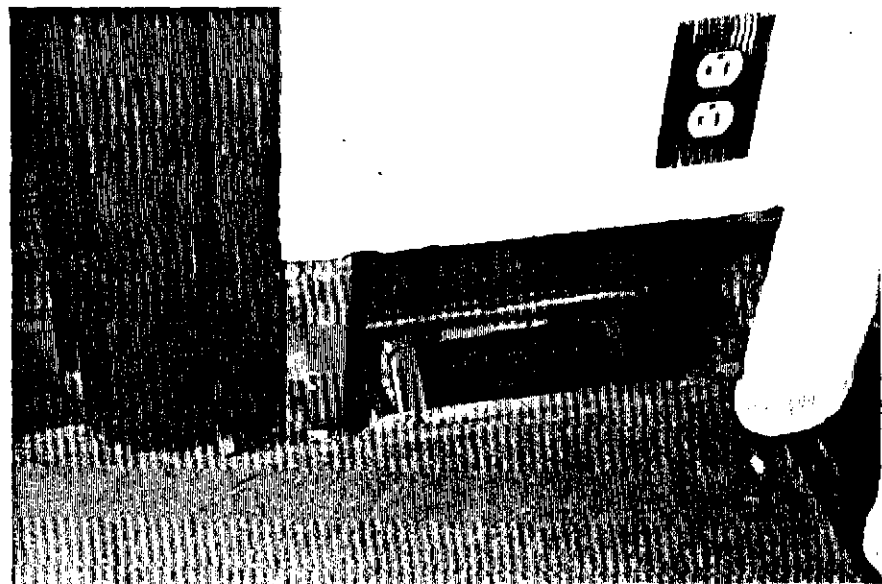

204 - P4

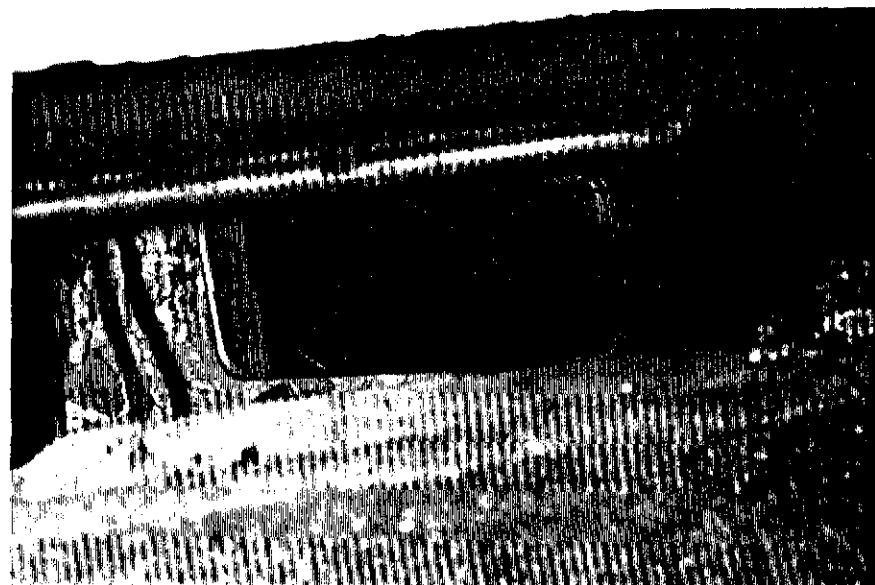

204 - P5

NOTE:

- 1) two large studs are at intersection of this wall and the north/south wall between Mrs. Lincoln's Bedroom and Maid's Bedroom/Sewing Room
- 2) new 2 x 9 and old 2 x 6 joists visible to north
- 3) 2 x 9 joists only visible to south

204 - P6

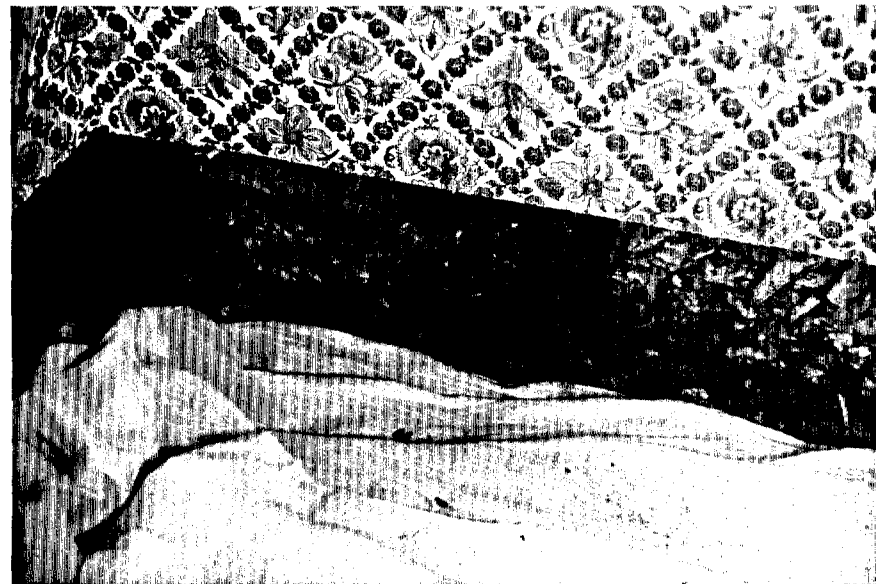

204 - P7

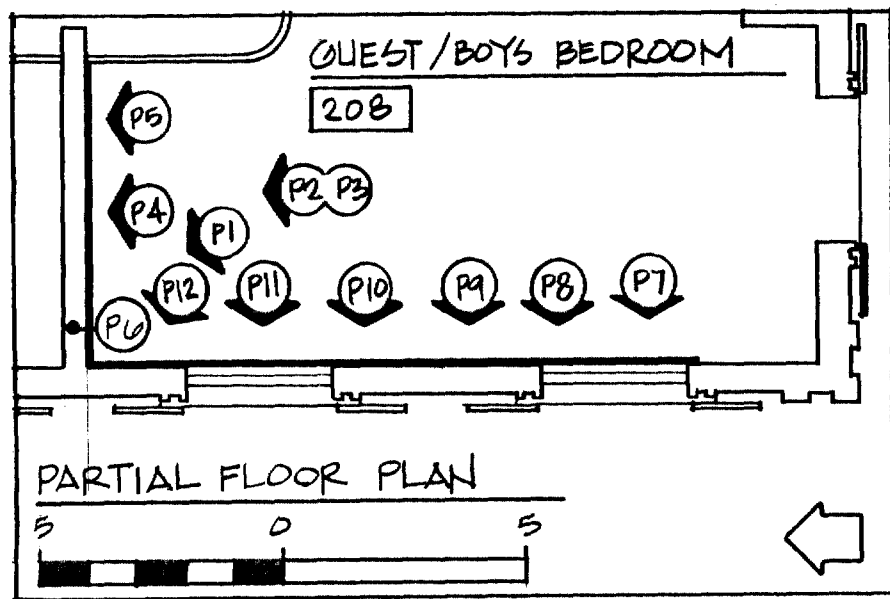

NOTE:

(East of Door 203-D1, using a mirror, viewing up
stud space)

- 1) stud notched for joist
- 2) curved line in mirror is a crack in the mirror

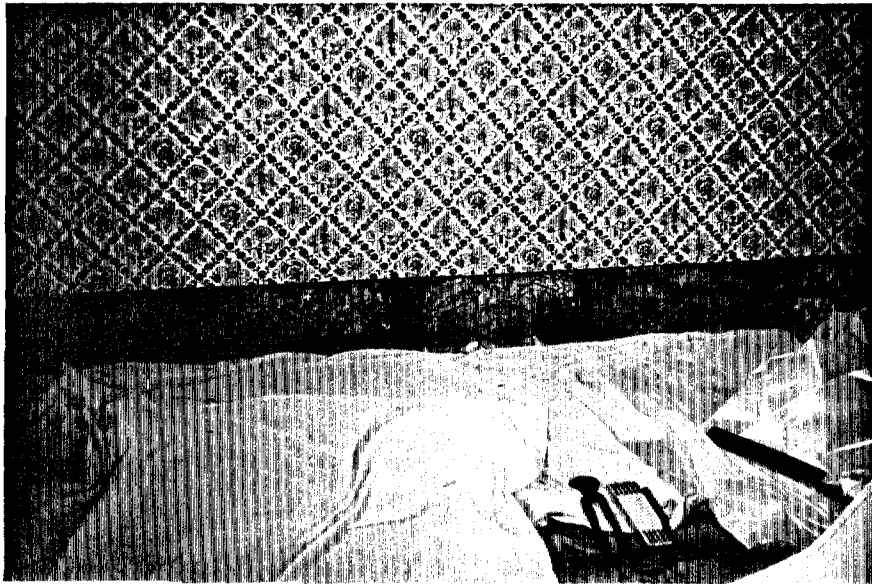

208 - P1

NOTE:

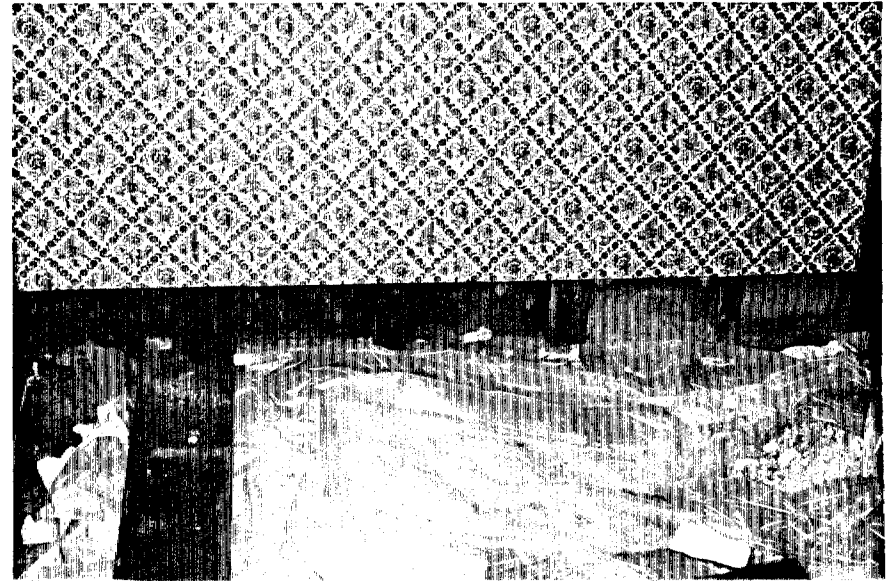

- 1) Closeup of northwest corner showing plaster debris

208 - P2

NOTE:

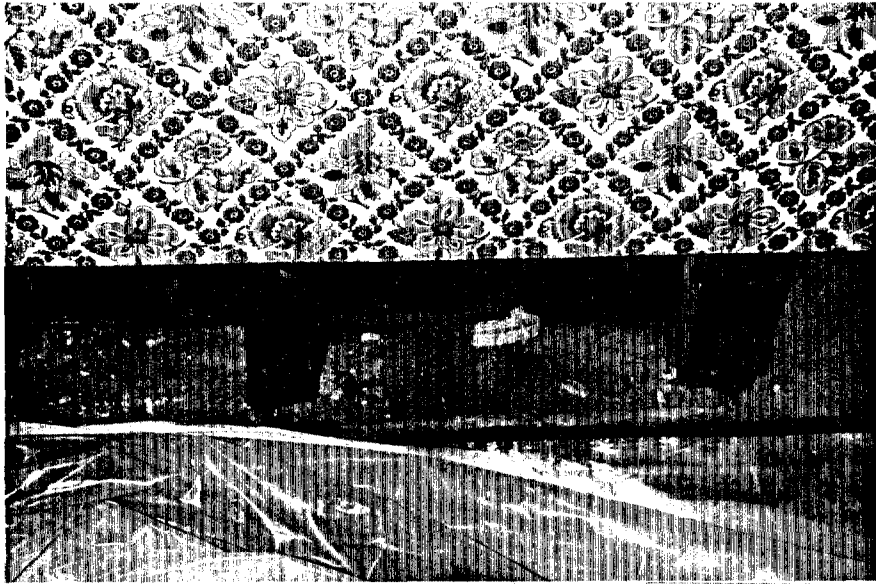

- 1) space between studs filled with plaster debris - similar to south wall of Mr. Lincoln's Bedroom.

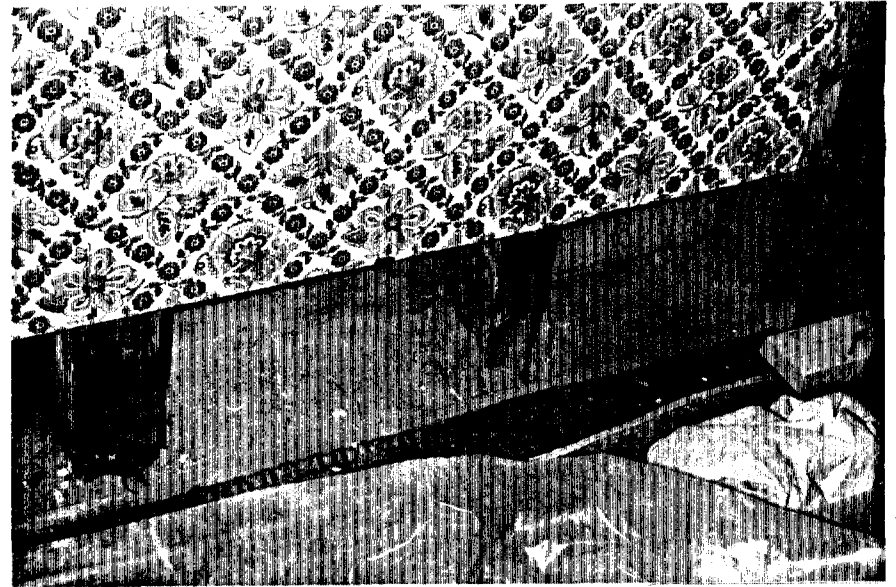

208 - P3

NOTE:

- 1) space between studs cleared of debris

208 - P4

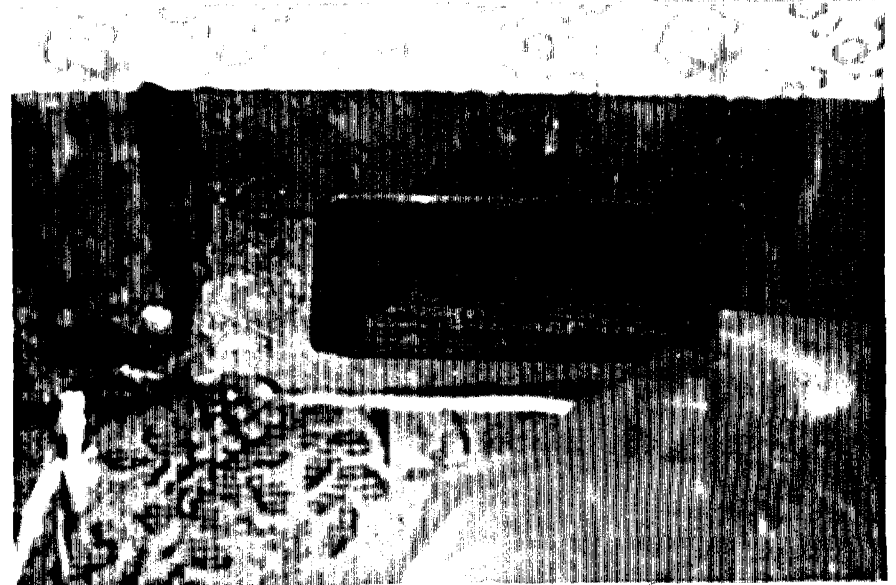

208 - P5

NOTE:

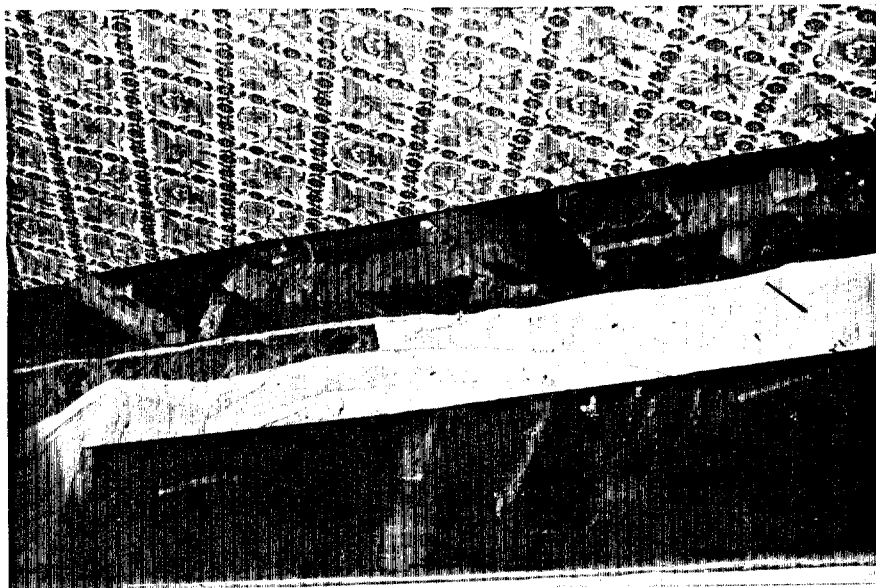

- 1) subfloor continuous under north wall - similar to southwest wall of Mr. Lincoln's Bedroom
- 2) studs bear on subfloor
- 3) space above entry door inset below
- 4) furring strips on studs
- 5) plaster debris cleared from between studs - debris was up 2 to 3 feet above floor - similar to southwest wall of Mr. Lincoln's Bedroom

(By use of a mirror)

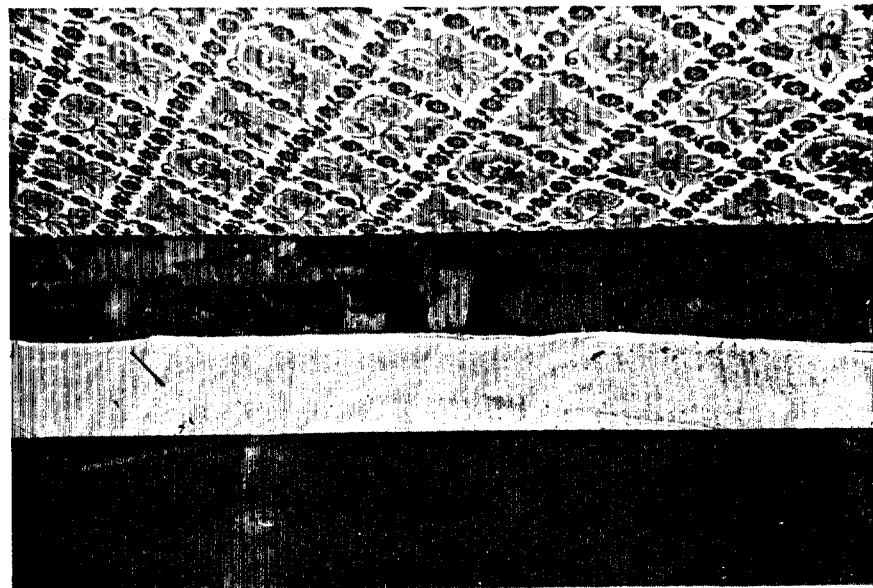

- 6) sloped member - similar to southwest wall of Mr. Lincoln's Bedroom

208 - P6

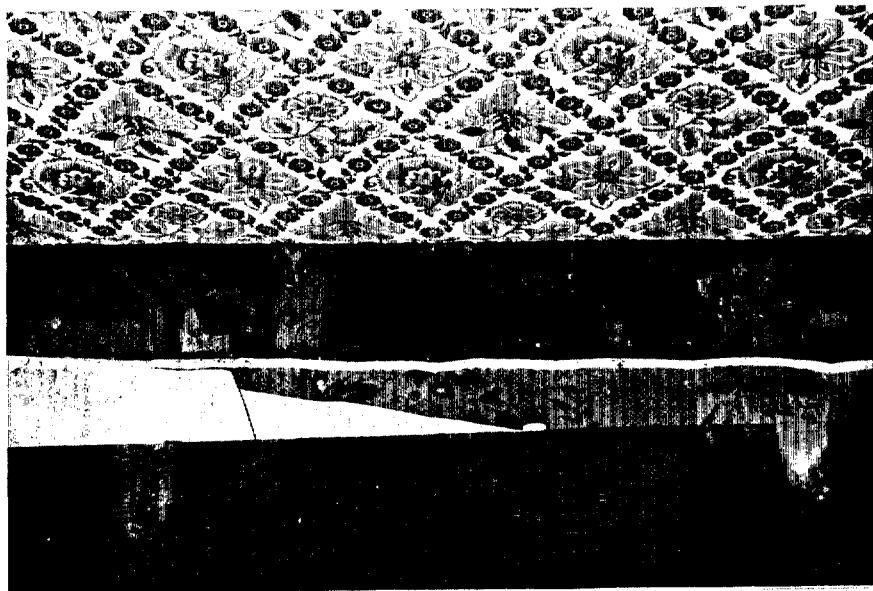

208 - P7

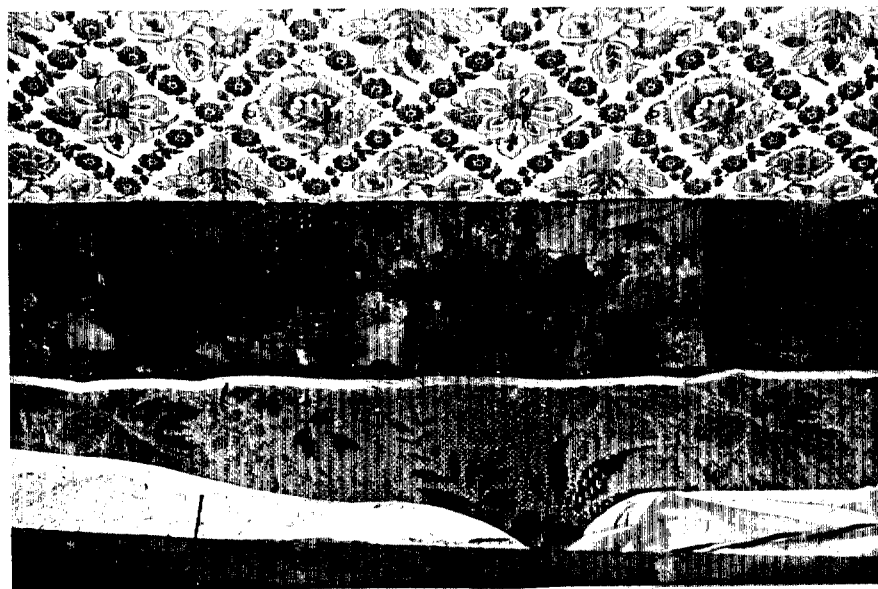

208 - P8

NOTE:

- 1) brick "nogging" between studs
- 2) bricks on edge, in smooth trowelled lime mortar and extend down to first floor
- 3) additional joists next to original joists

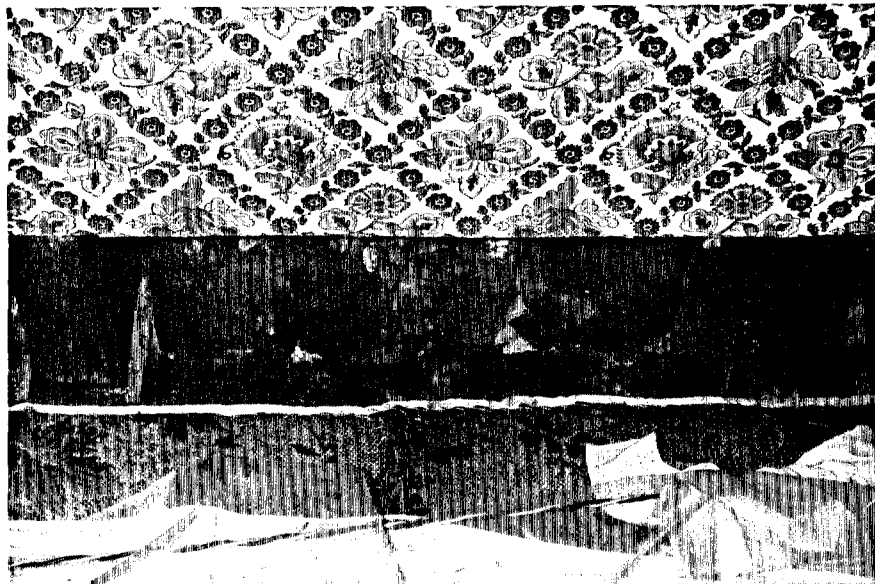

208 - P9

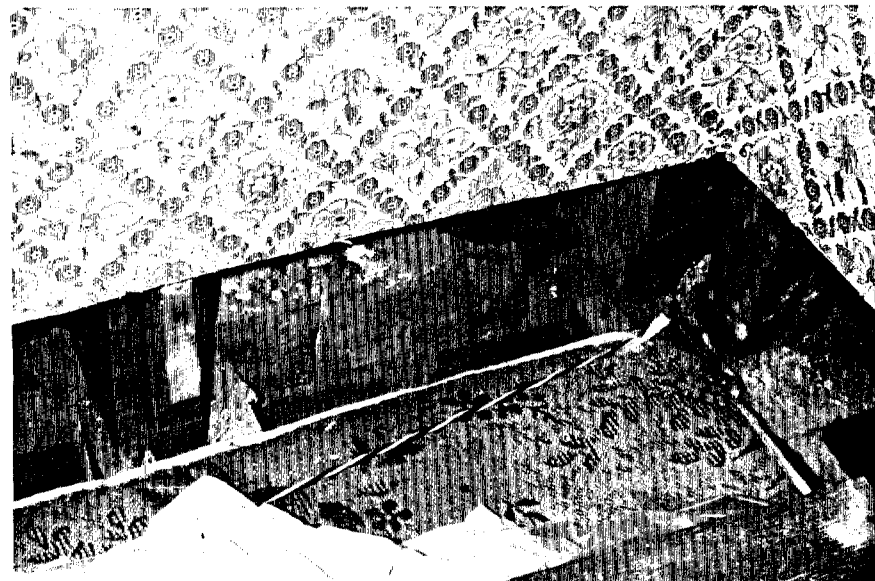

208 - P10

NOTE:

- 1) additional joists next to and in between original joists

208 - P11

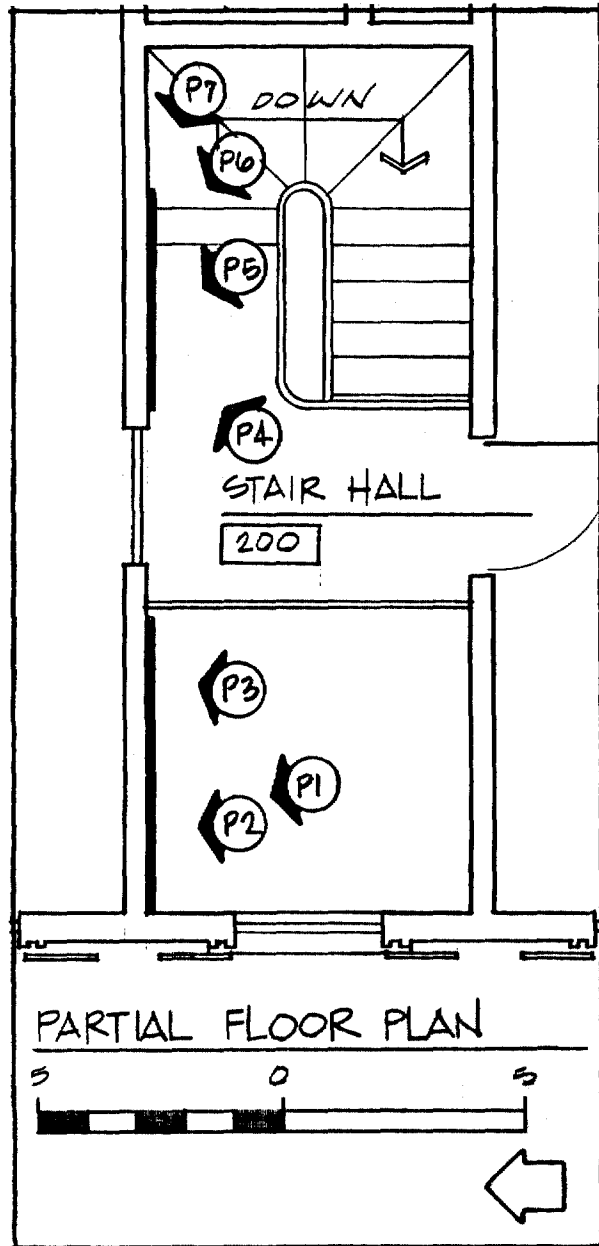

208 - P12

NOTE:

- 1) quality mortar joints on inside face of "nogging"
- 2) joists "let" into side of studs

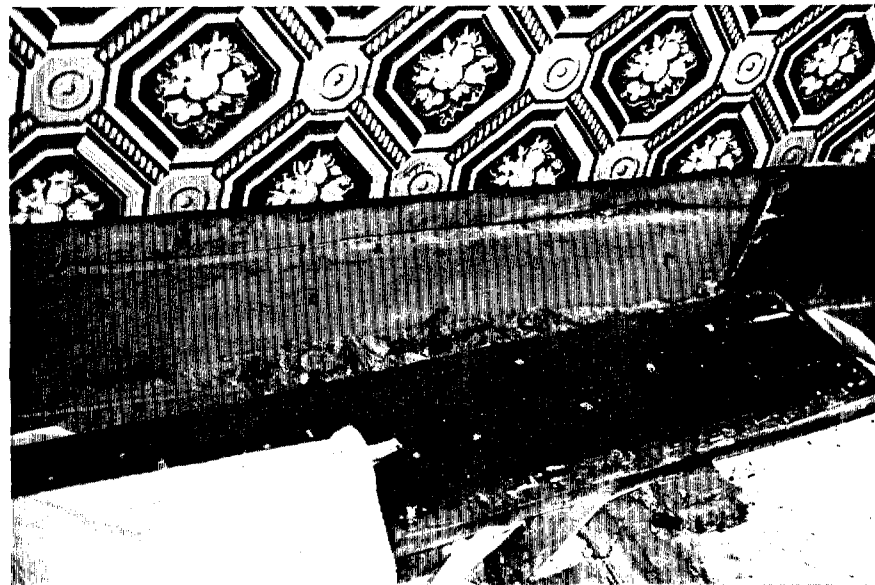

Stair Hall 200 - North Wall - West End Between West Wall and Door Opening

200 - P1

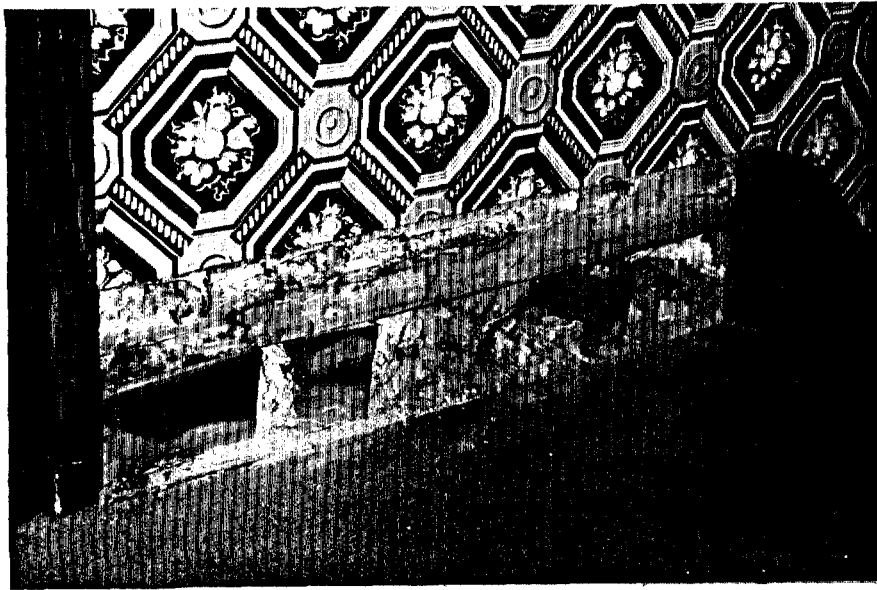

200 - P2

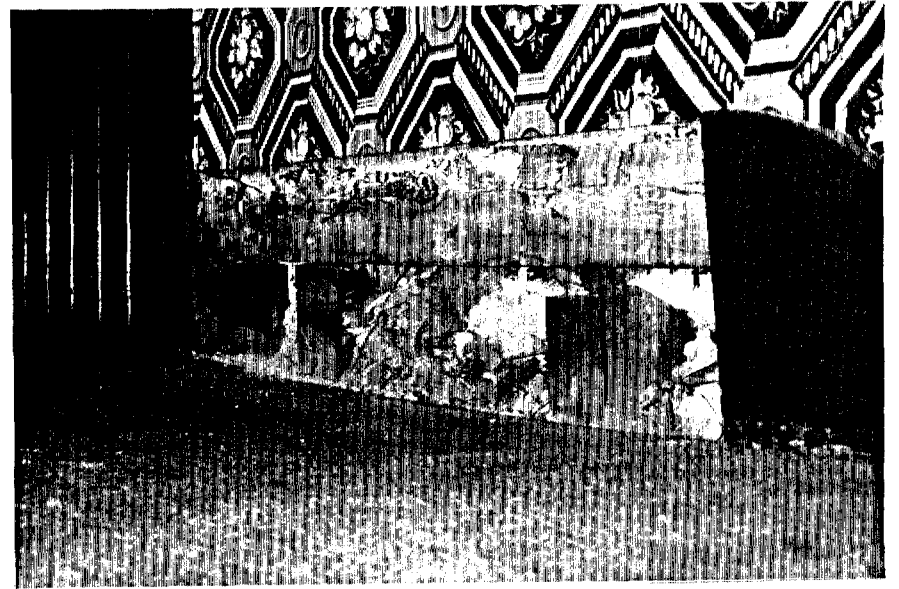

200 - P3

NOTE:

- 1) Sub-baseboard visible - only location this detail found (both sides of Stair Hall)

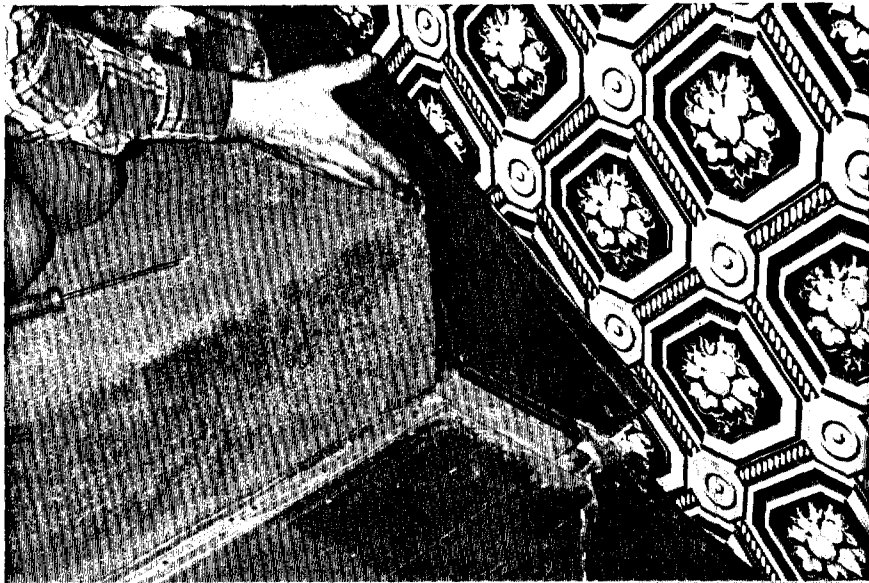

200 - P4

200 - P5

NOTE:

- 1) debris in between studs - similar to north wall of Guest/Boys Bedroom, west end
- 2) studs bear on subfloor
- 3) no sub-baseboard found
- 4) furring on studs

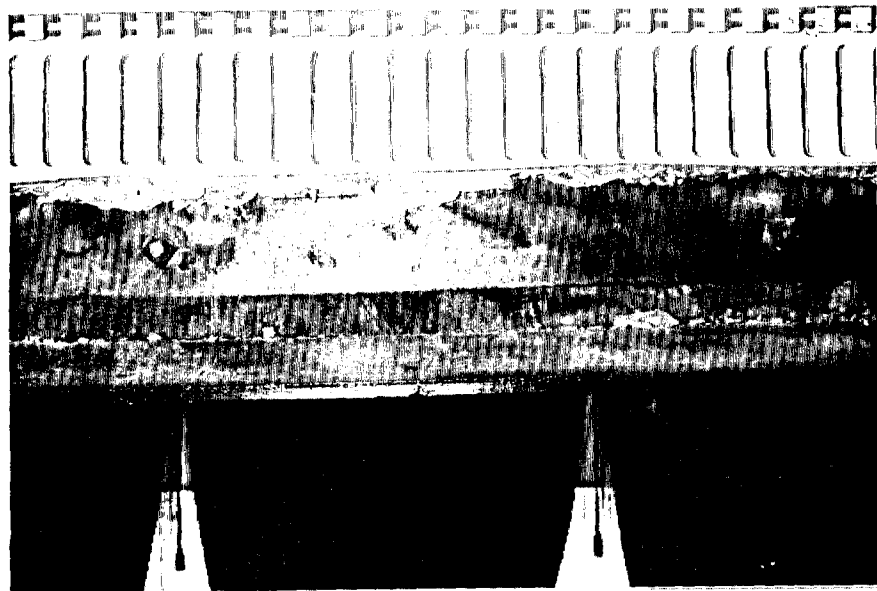

200 - P6

NOTE:

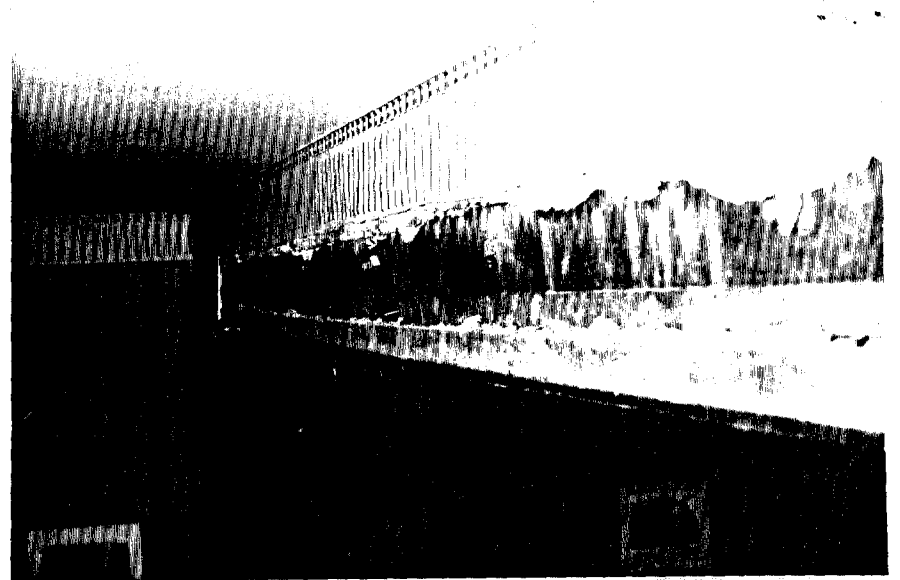

- 1) riser face at top step is a two-piece member and extends into the wall (possibly nailed to stud)
- 2) baseboard bottom edge is dadoed into stair tread, finish flooring
- 3) barely visible down through hole is a diagonal member "let" into studs (unable to determine function) - possibly a member on which stair tread framing members could bear as stair curves down and around

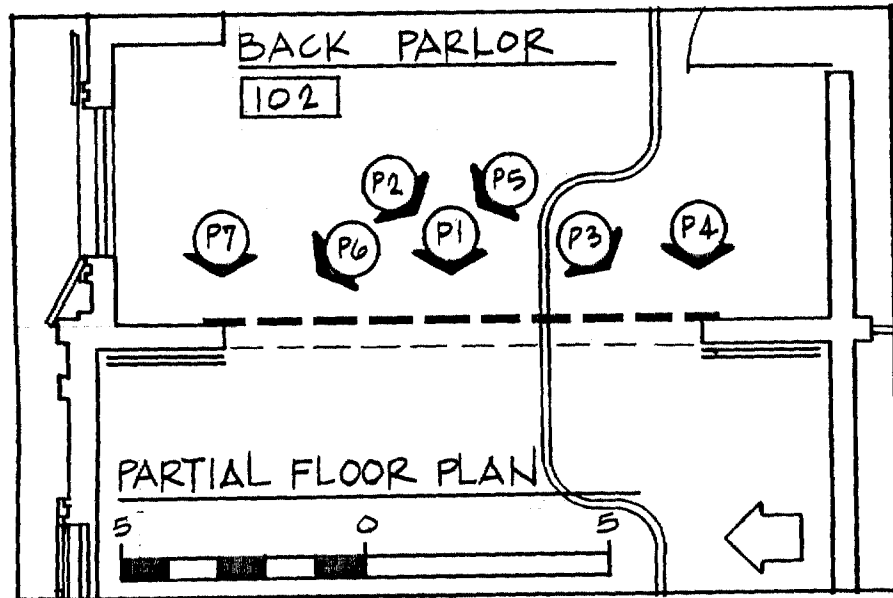

200 - P7

102 - P1

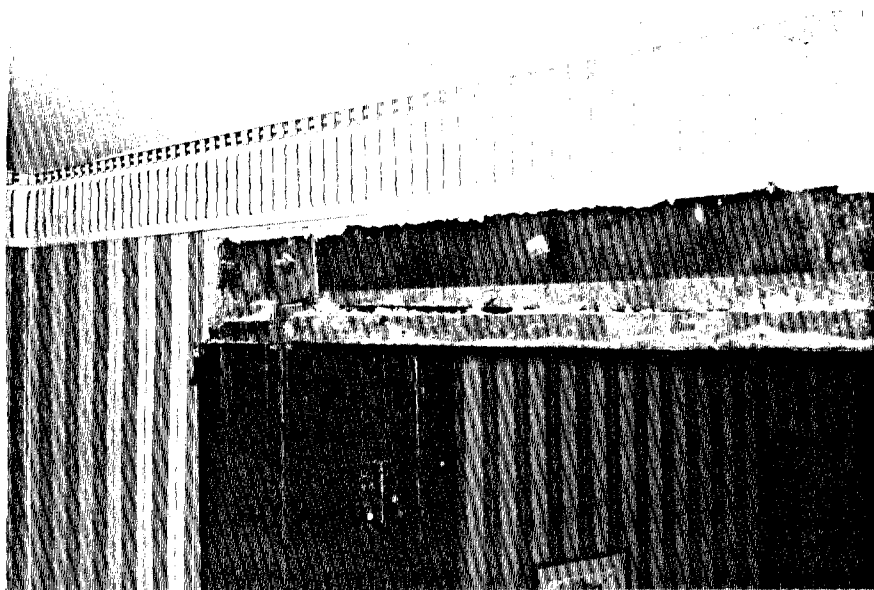

102 - P2

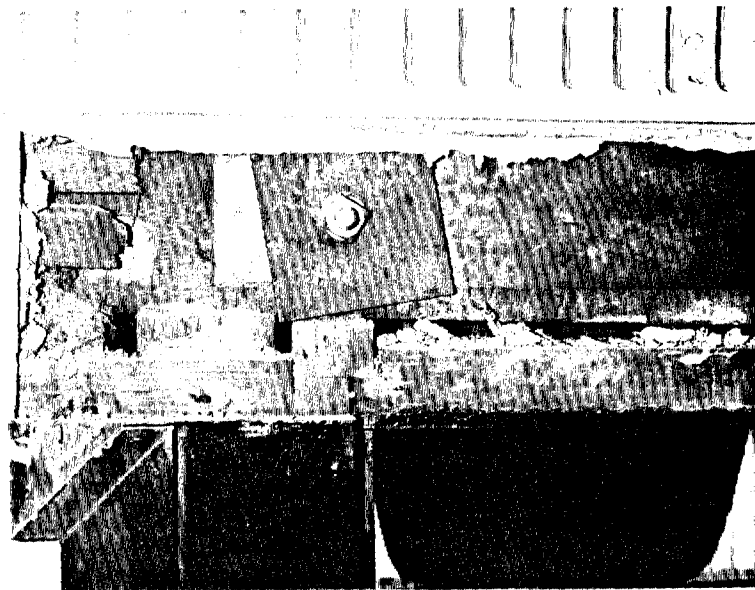

NOTE:

- 1) steel plates on each side of wood beam
- 2) bolts at + 1'- 7" o.c. hold the steel plates to the wood beam
- 3) steel plates taper to larger depth at center of beam

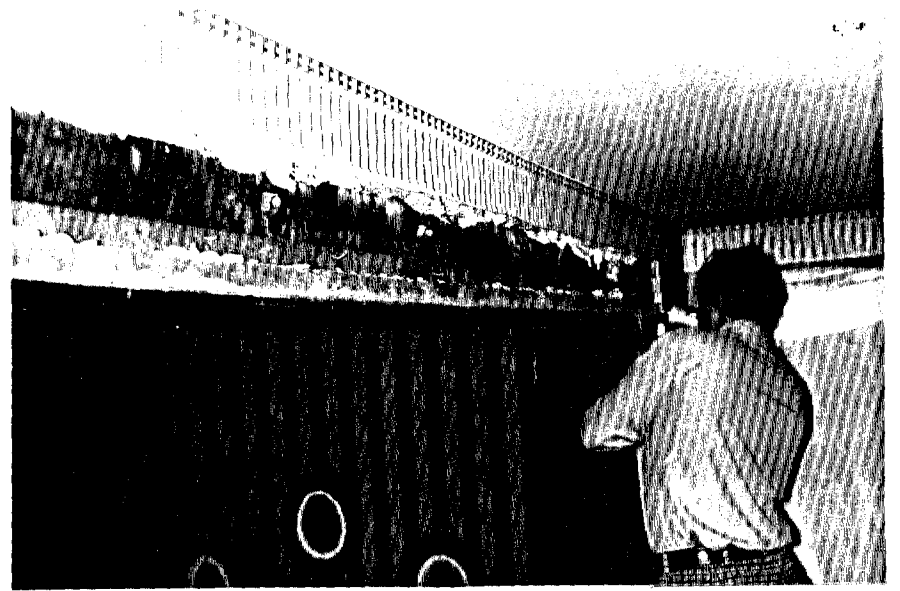

102 - P3

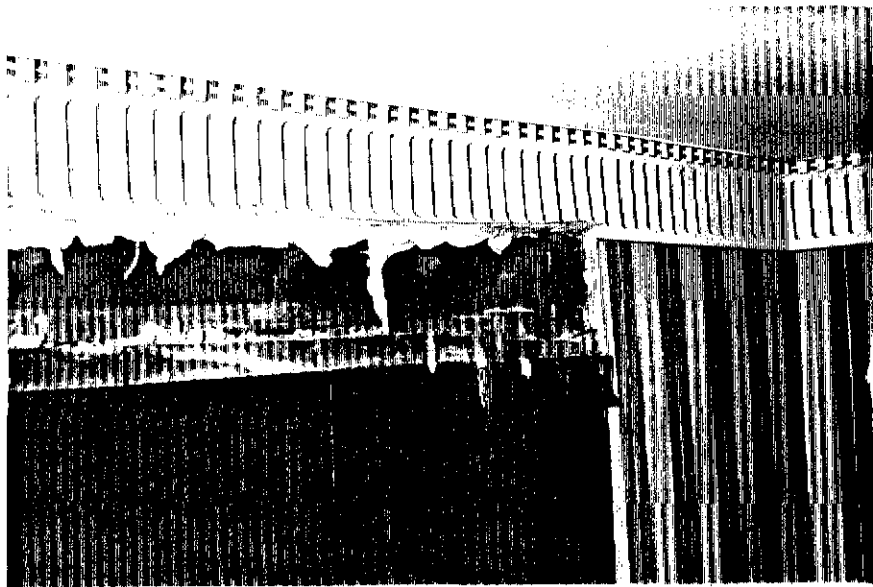

102 - P4

NOTE:

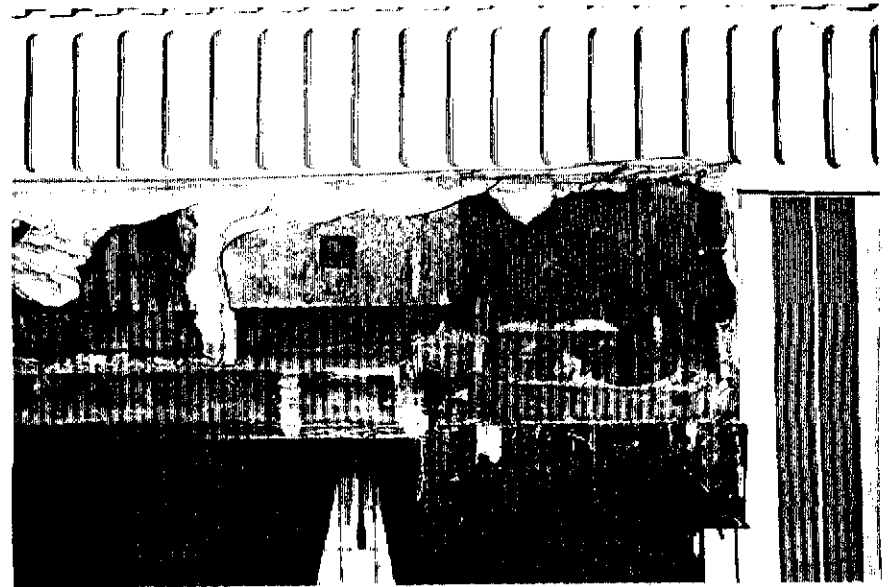

- 1) use of a square steel plate as a washer between the nut and the tapered steel plate
- 2) wood post (column) is tenoned into beam (morticed) with a wood peg which is barely visible
- 3) wood beam continues over post to the south for several inches

102 - P5

102 - P6

102 - P7

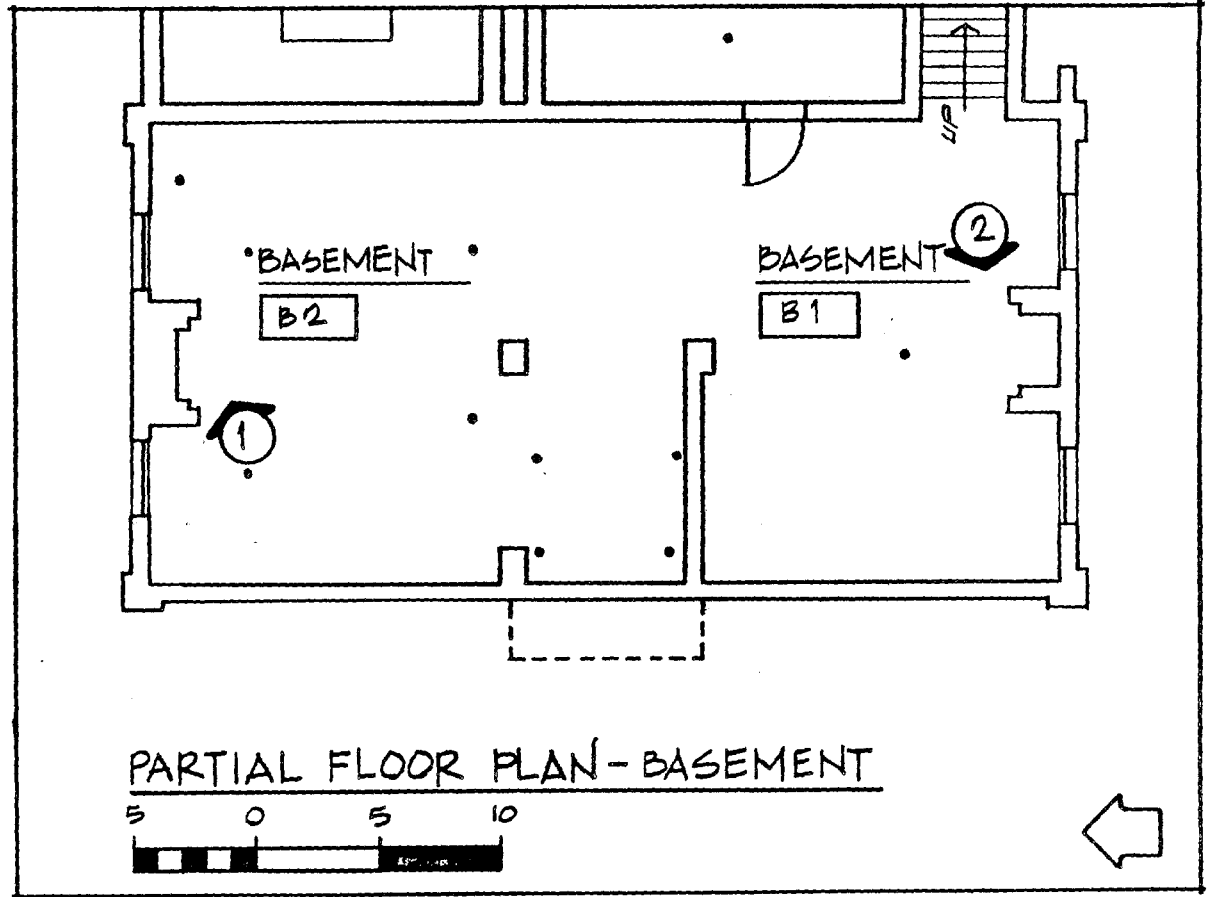

NOTE:

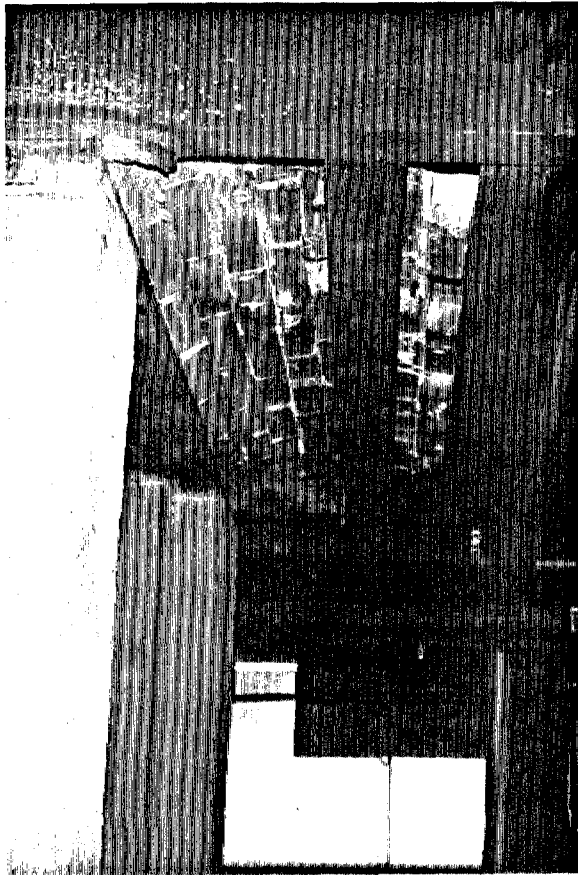

- 1) wood post (column) is a soft wood - not oak
- 2) clear view of tenoned column/morticed beam and peg
- 3) wood beam does not continue over post to north

3. Basement/Crawl Space Investigation

Investigation of existing conditions in the basement and crawl space produced the following photographs.

Location and direction of each photograph is recorded on a Partial Floor Plan for reader clarification.

Base - 1

NOTE:

- 1) arch form of the "original" brick hearth support

Base - 2

NOTE:

- 1) arch brick hearth support removed
- 2) joist and header with mortice/tenon and peg connection still visible

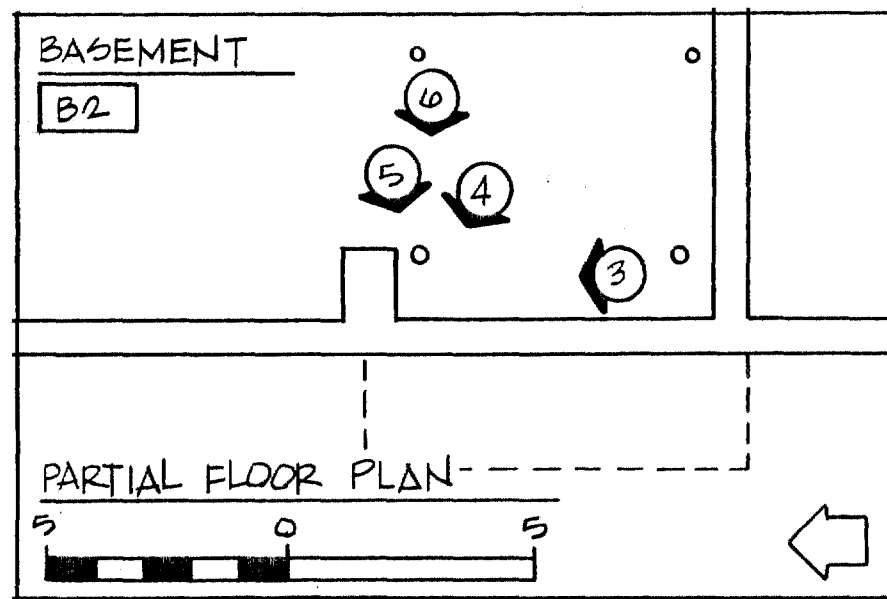

Base - 3

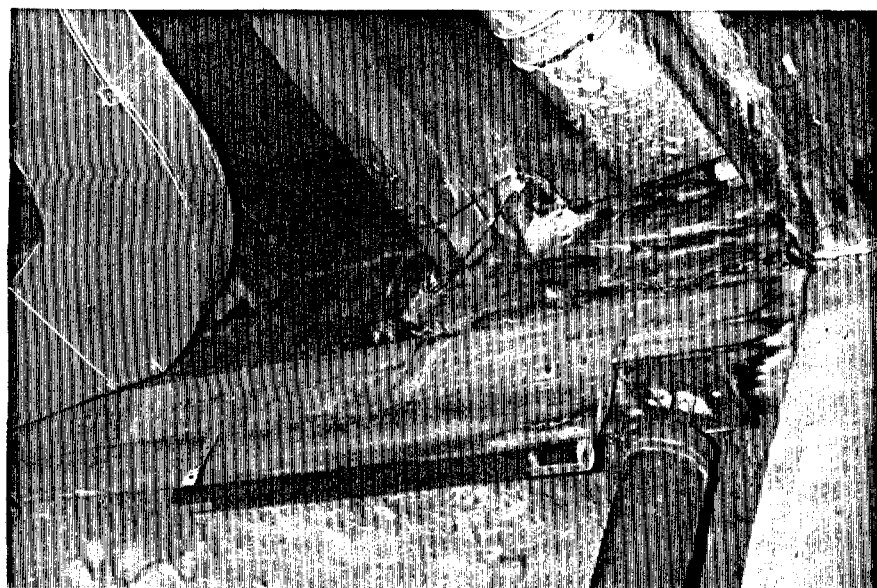

Base - 4

NOTE:

- 1) serious crack in beam below entry door
- 2) at this time, water infiltration is not a problem
- 3) concrete under entry steps
- 4) hewn beam supported by newer beam below

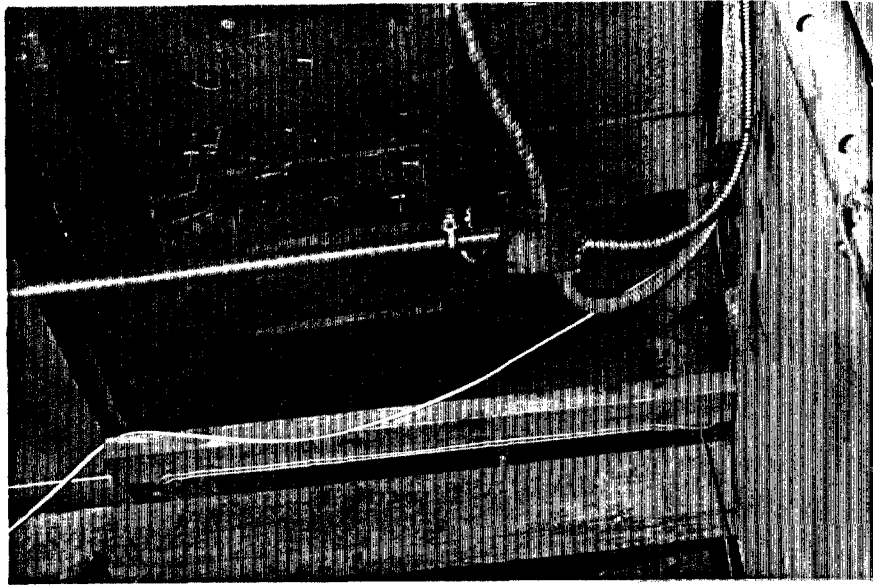

Base - 5

NOTE:

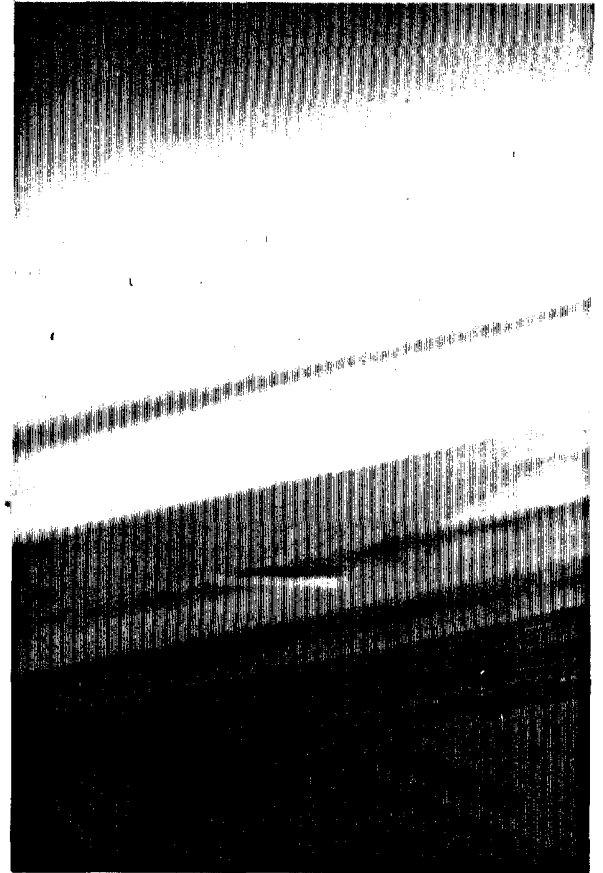

- 1) steel column supports newer wood beam with original beam above
- 2) joists run east/west
- 3) joists notched into hewn beam
- 4) north/south beam and east/west beam are hewn
- 5) joists under Front Parlor run north/south and are notched into beam
- 6) large width floor boards (subflooring) appear original

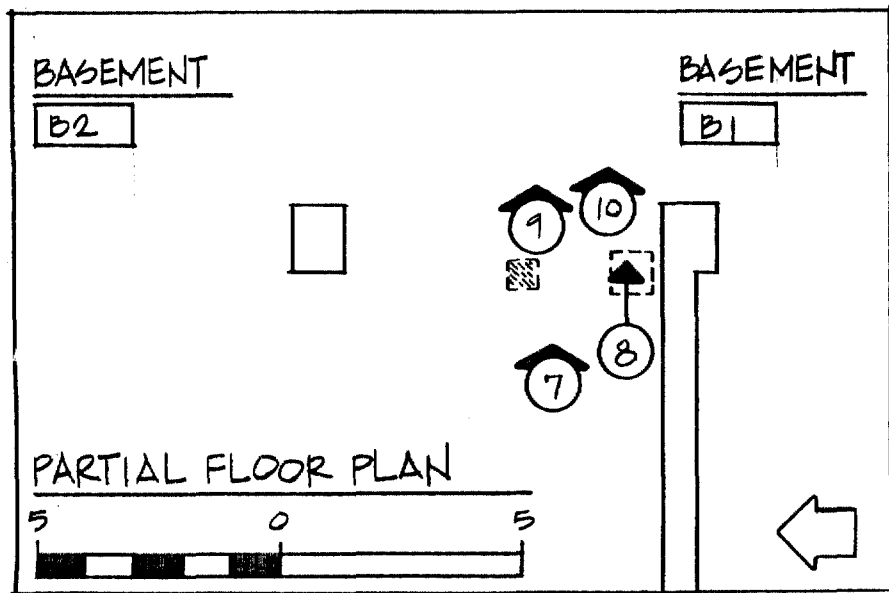

Base - 6

Base - 7

Base - 8

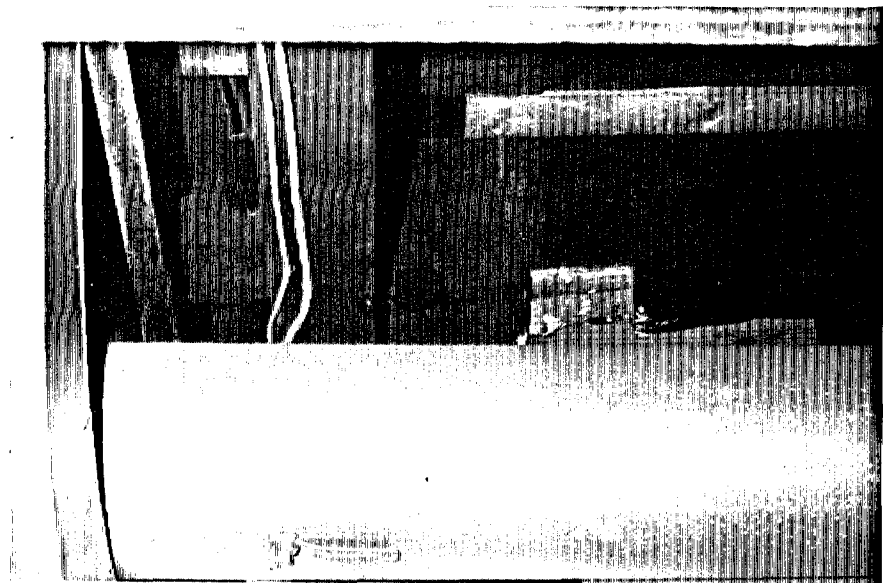

NOTE:

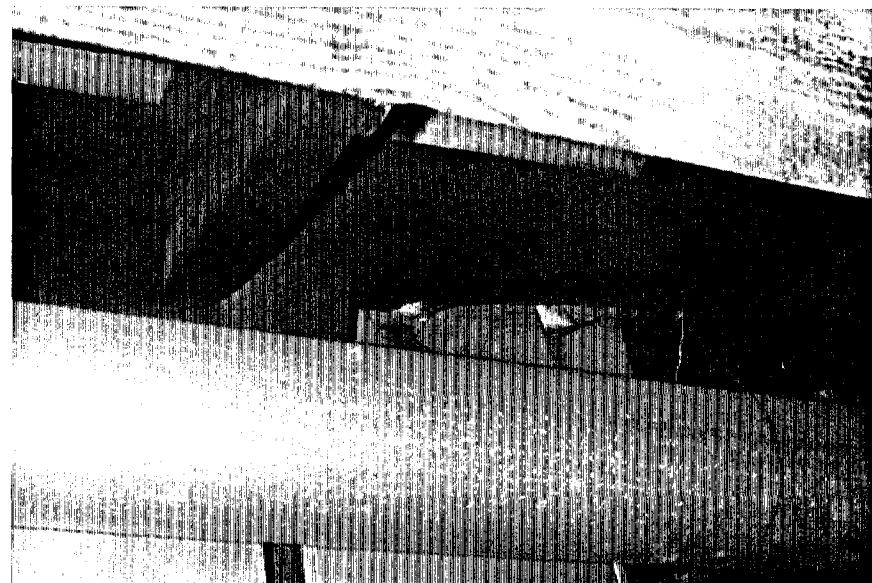

- 1) bottom of newel post visible
- 2) newel post "let" into joist to north
- 3) similar square hole in floor to south of other hole

(photograph on right side of page taken up through hole at underside of stairs)

- 4) bottom edges of each tread and riser are visible
- 5) beyond is underneath side of framing for stair winders

Base - 9

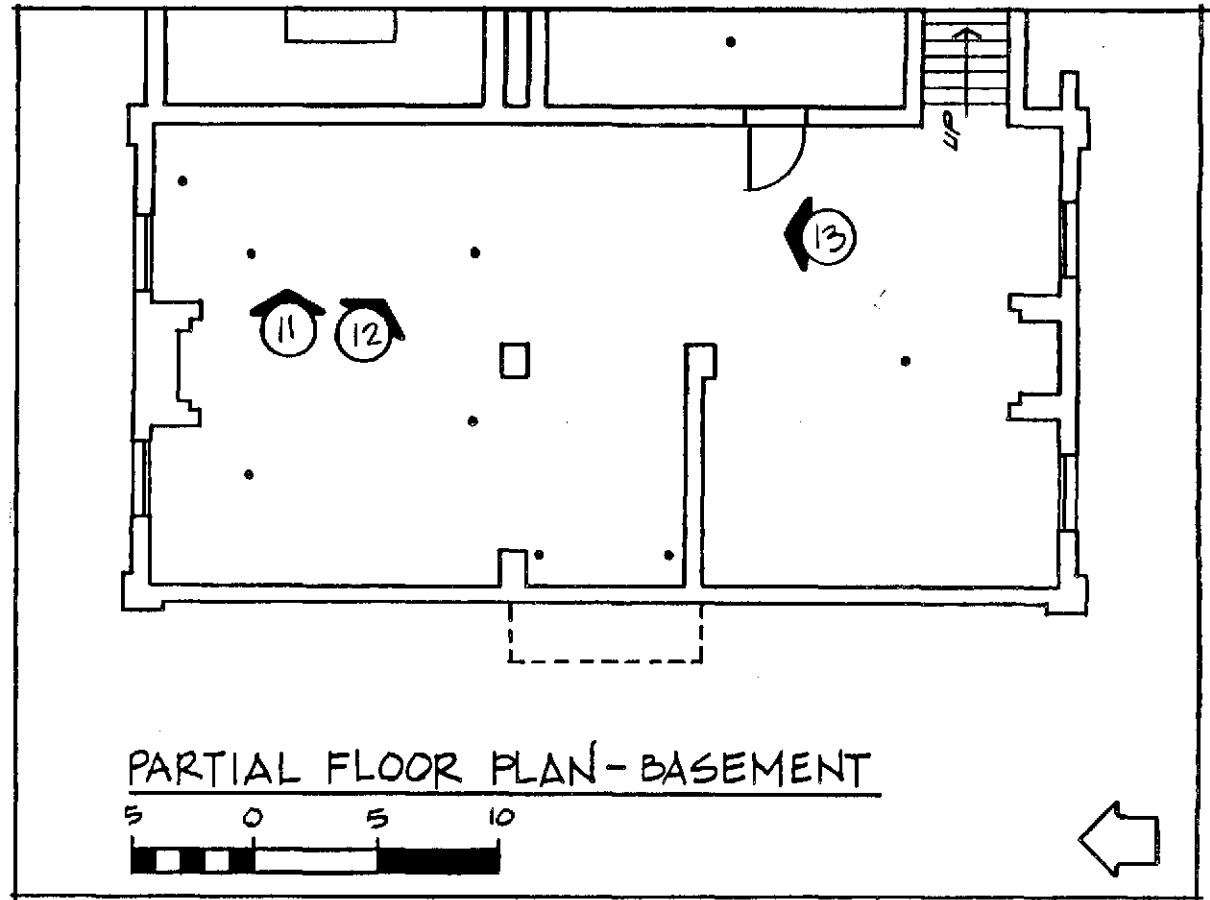

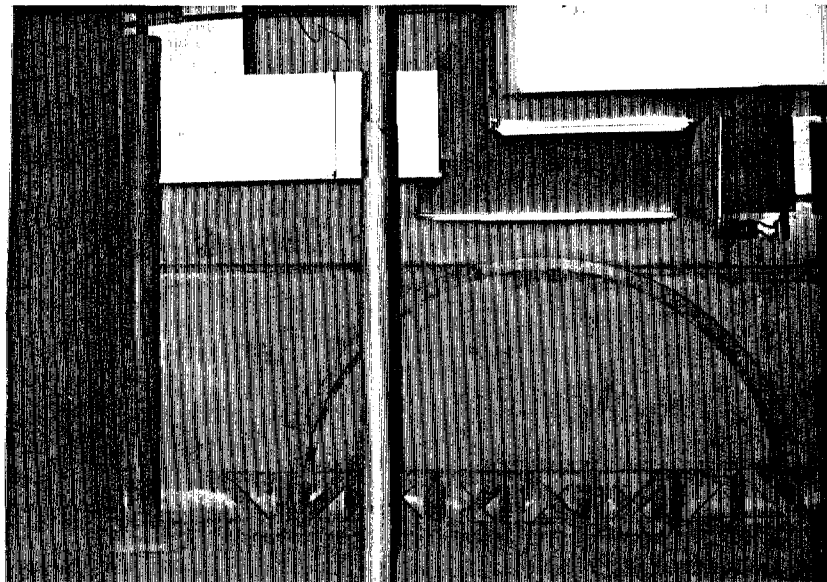

Base - 10

NOTE:

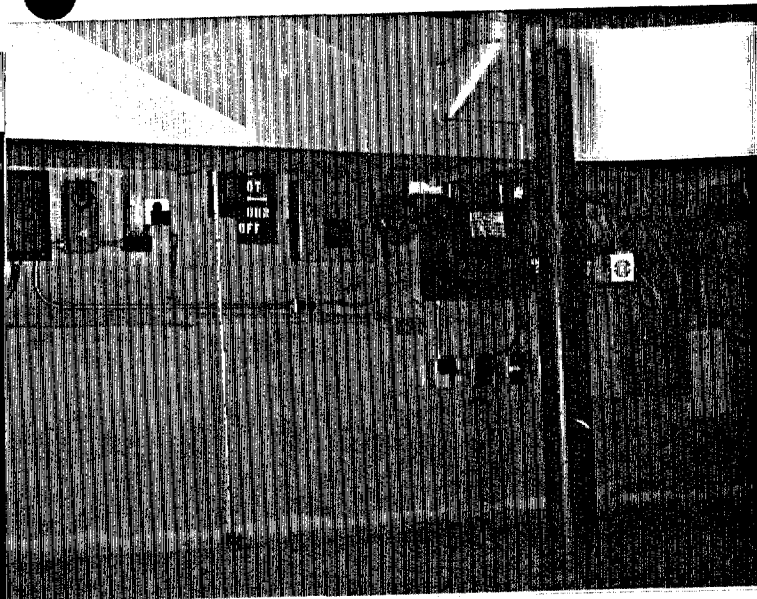

(View up at north/south header of former opening)

- 1) header 6'- 11-3/4" to east basement wall
- 2) mortice/tenon and peg connection (typical of original framing indicating stairs to basement or access panel part of original house)
- 3) notch on both ends of header (appears to be early modification but reason not apparent)

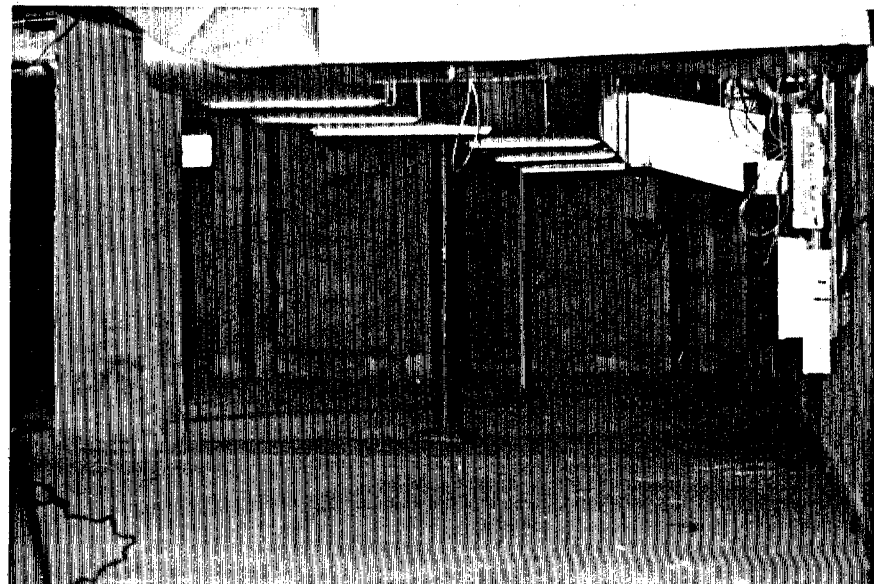

Base - 11

Base - 12

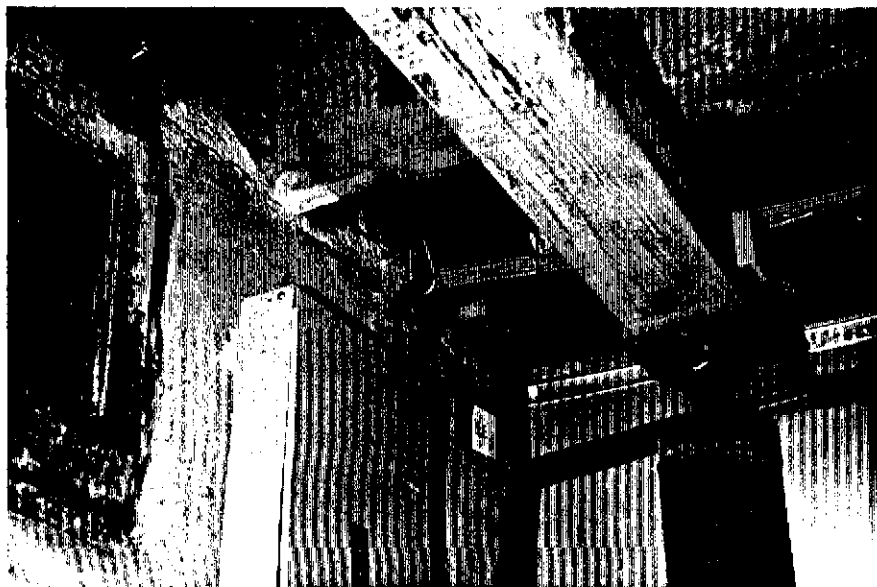

NOTE:

- 1) original brick has been covered with "gunite - spray-on"
- 2) alarm systems layout on wall

Base - 13

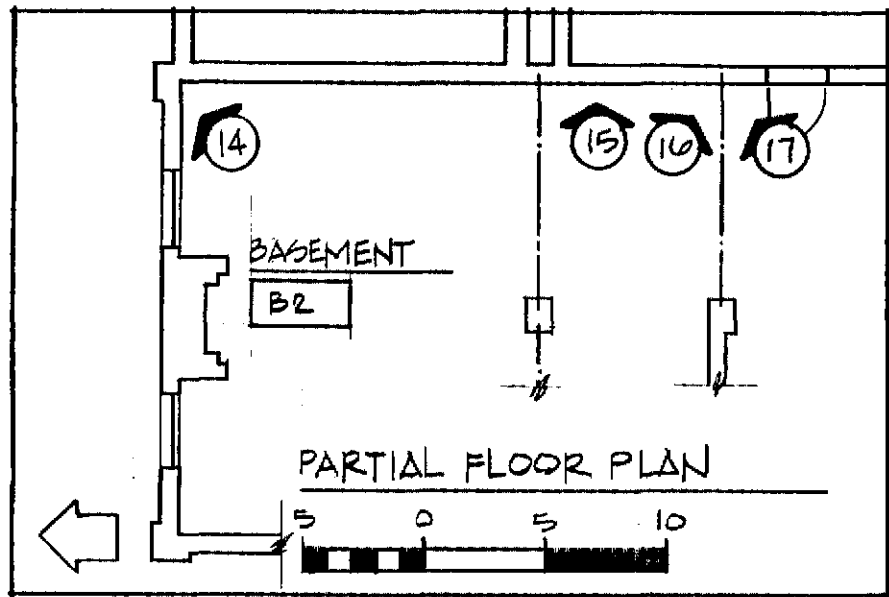

Basement - Perimeter Sill Plate

Base - 14

Base - 15

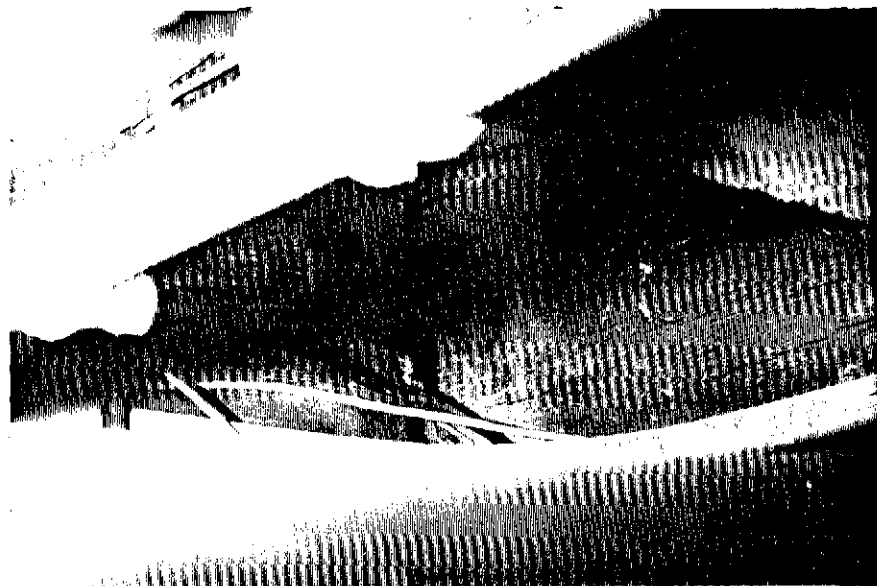

NOTE:

(above left)

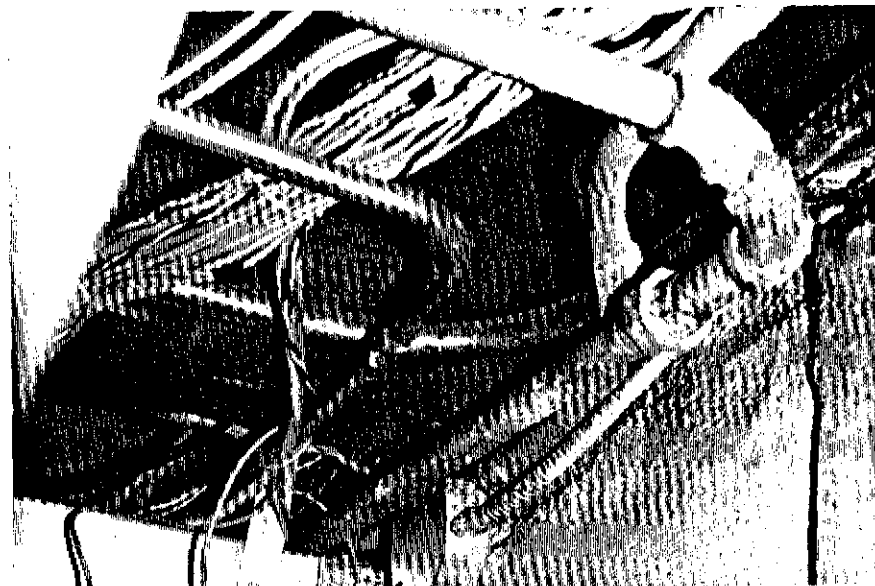

1) original floor joist connection to newer sill plate poorly done - reason for added support from extra wood beam and steel column

(above)

2) "overlap" joint in sill plate visible

Base - 16

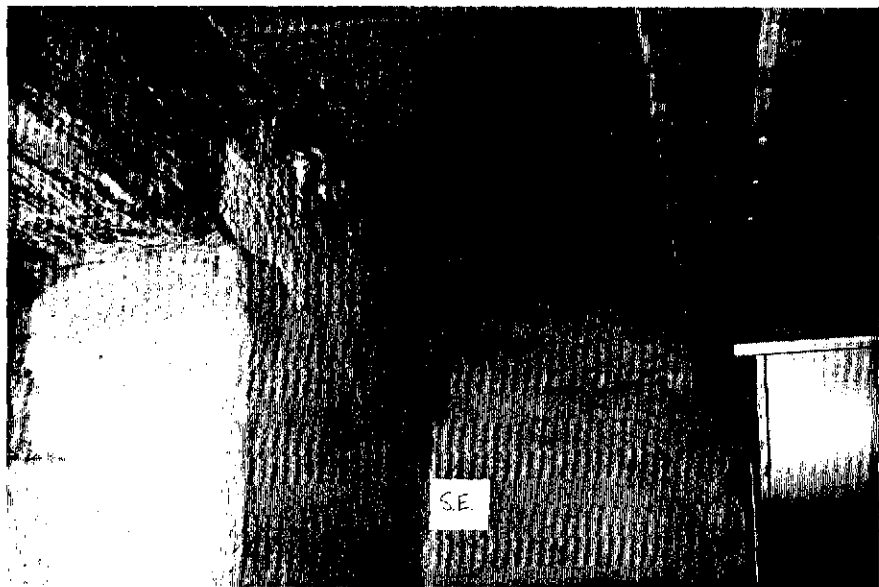

Base - 17

NOTE:

- 1) intersection of north/south sill plate and east/west beam
- 2) beam notched to fit into slot in sill plate
- 3) ledger is attached to sill plate - may have been bearing for original stairs
- 4) sill plate is hewn

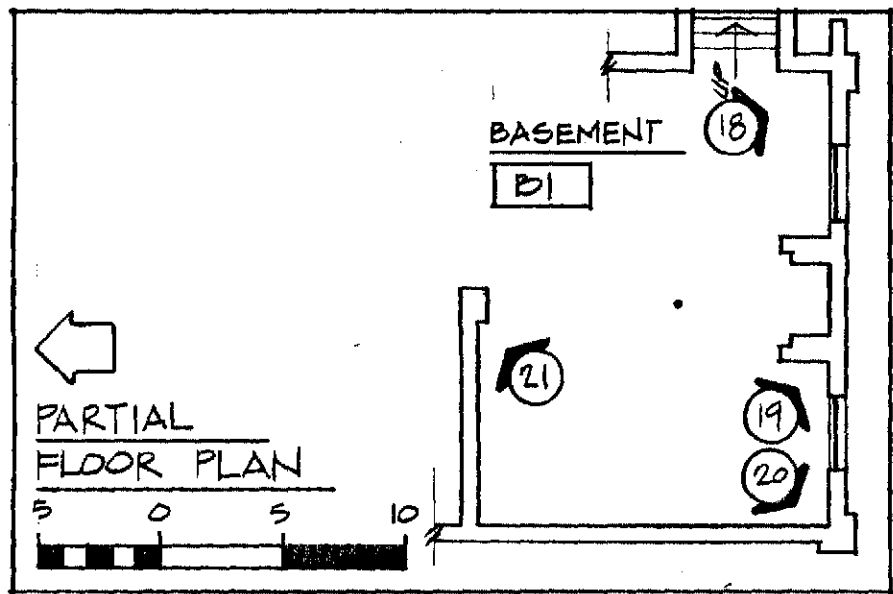

Basement - Perimeter Sill Plate

Base - 18

Base - 19

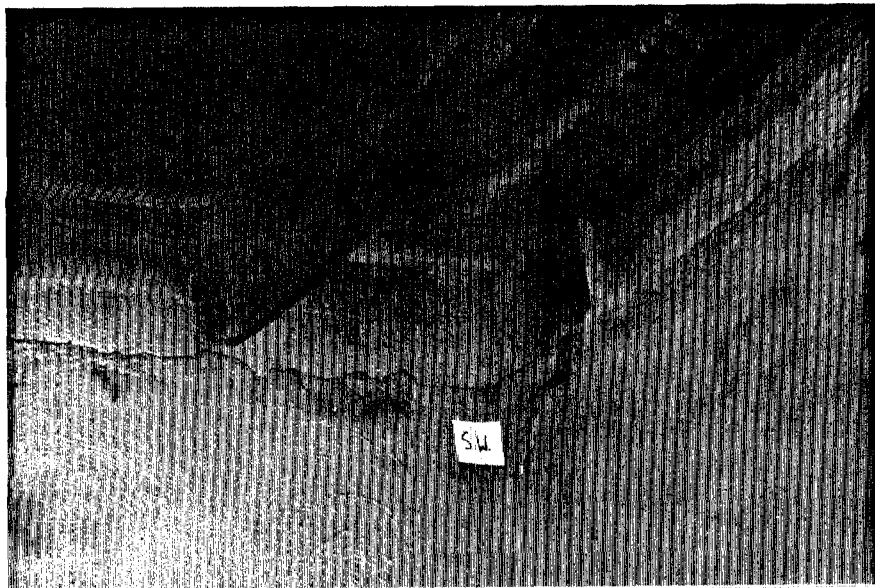

NOTE:

- (above left)
- 1) original north/south 8" x 8" hewn sill plate
 - 2) east/west sill plate (covered by "gunite"); not original - circular sawn; added in 1950's
 - 3) subfloor is not the same as on north side of house

(above)

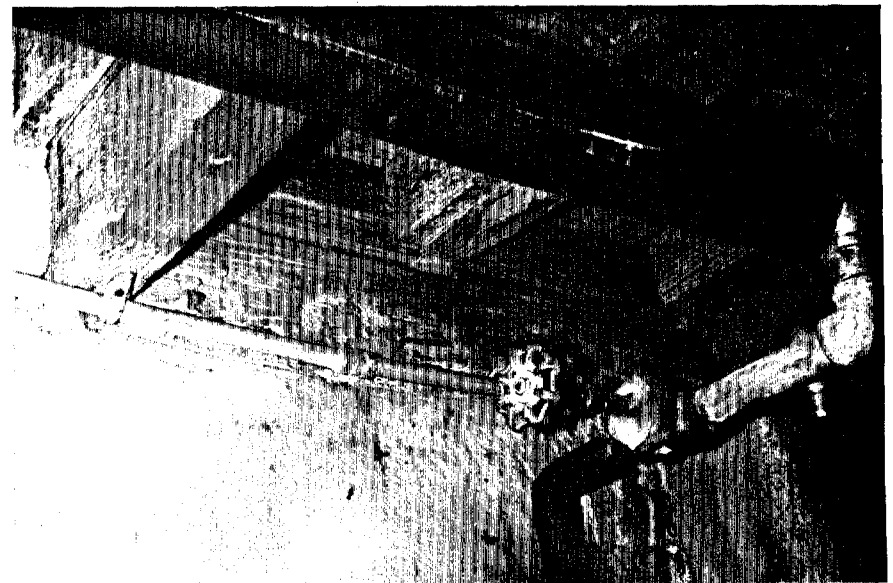

- 4) sill plate not original - circular sawn
- 5) wood members under chimney masonry

Base - 20

NOTE:

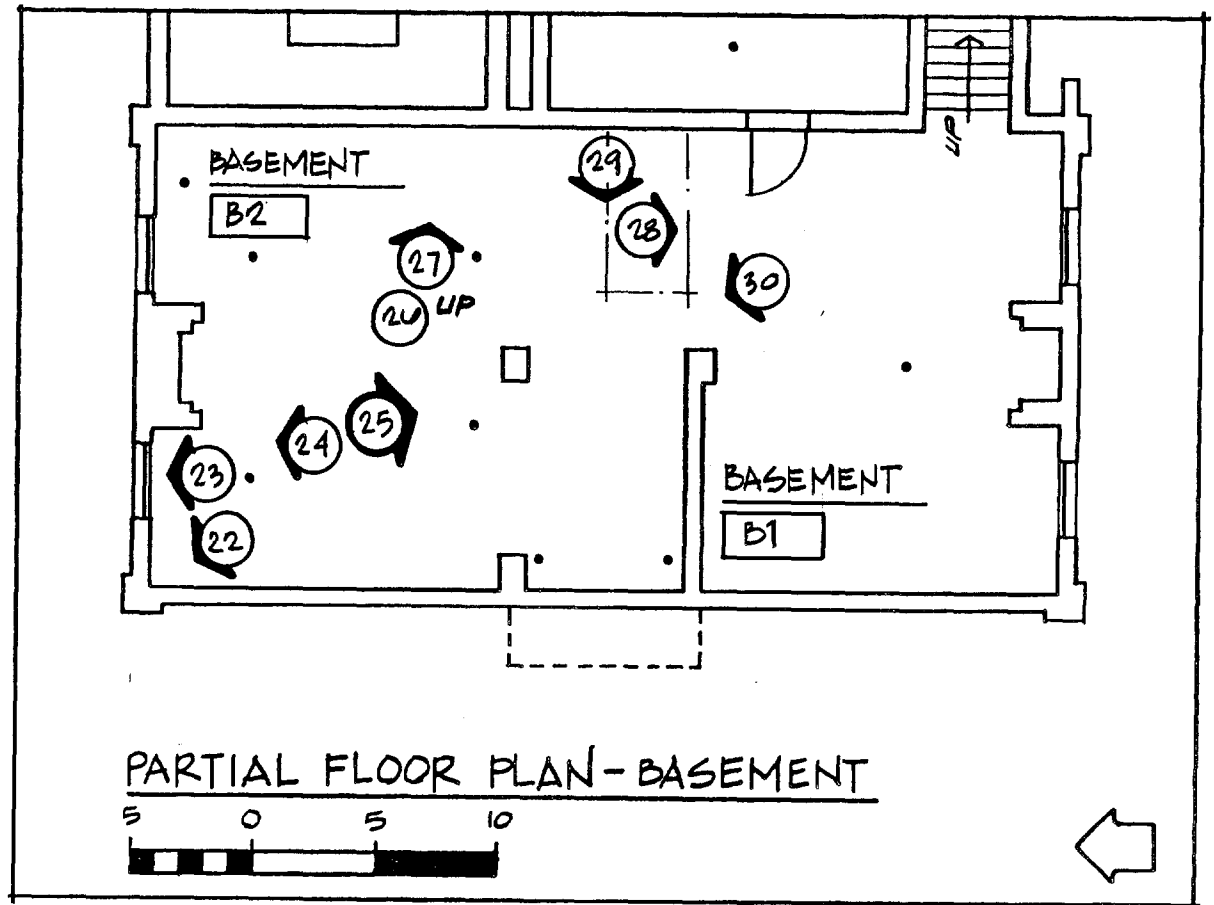

- 1) both sill plates are not original
- 2) notched sill plates for joist bearing

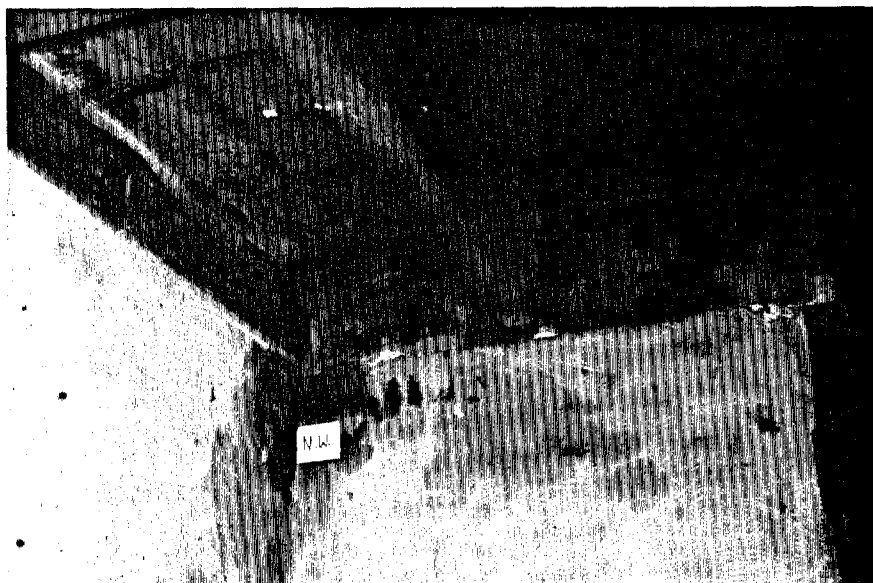

Base - 21

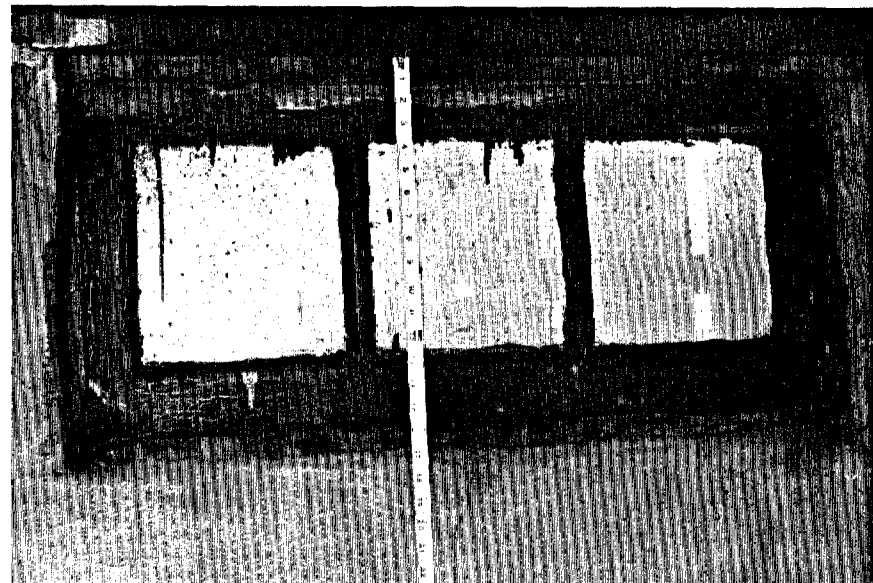

NOTE:

- 1) east/west sill plate is under south wall of Entrance Hall
- 2) sill plate hewn
- 3) extra small joist between regular joists

Base - 22

Base - 23

NOTE:

(above)

- 1) sill plates are not original
- 2) original subfloor members - vertically sawn
- 3) ledger at left on north/south sill plate

(above right)

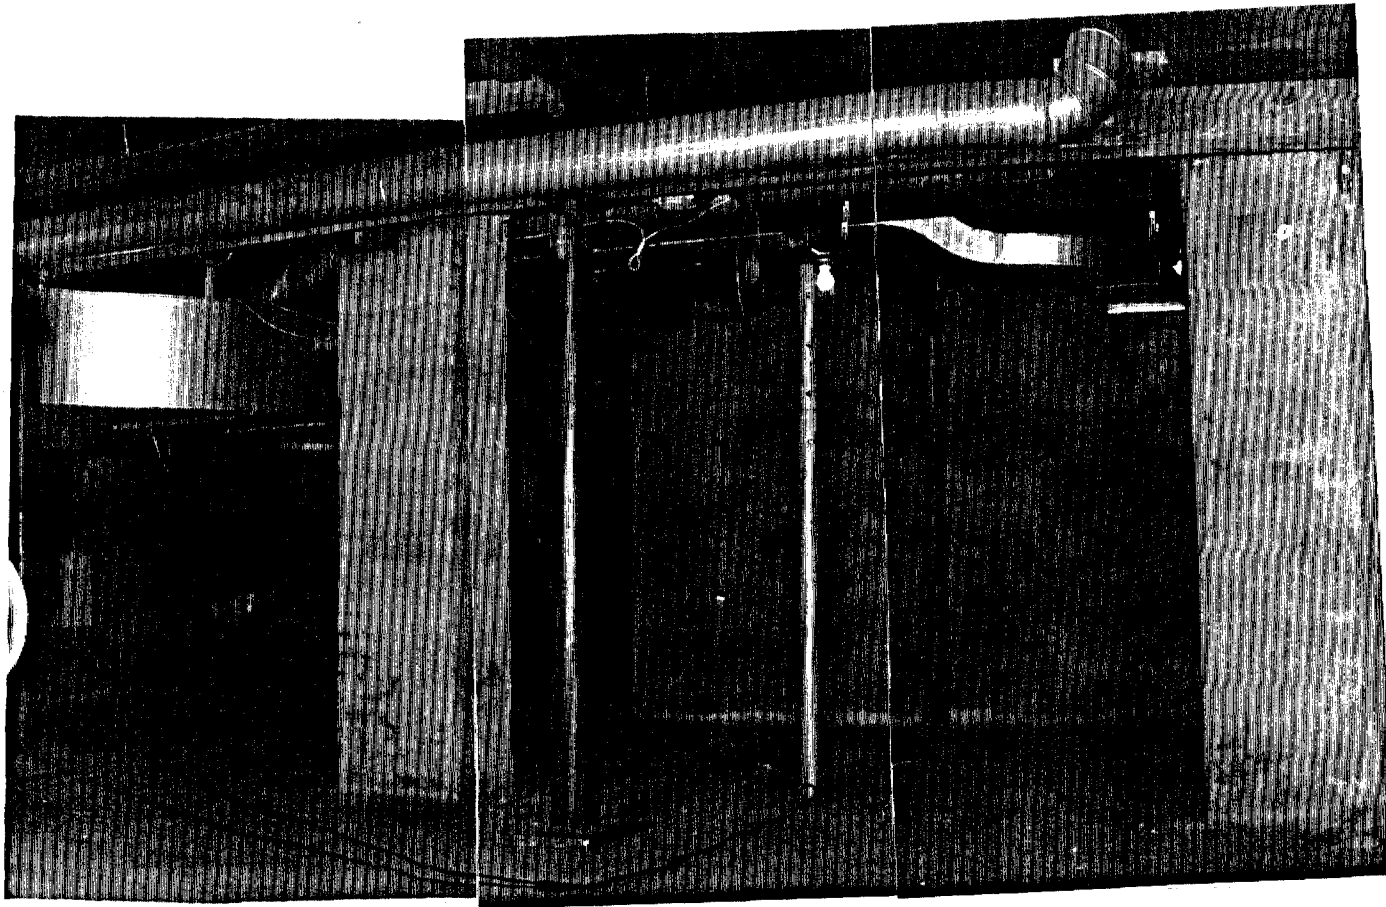

- 4) sill beam above window not original
- 5) circular saw marks

(right)

- 6) tenon and peg of hearth support header visible
- 7) large subfloor boards

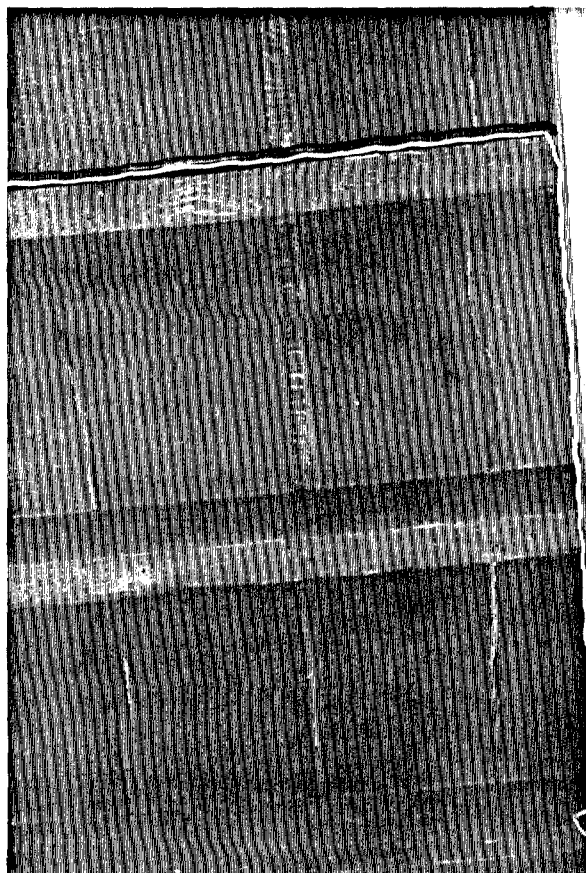

Base - 24

Base - 25

NOTE:

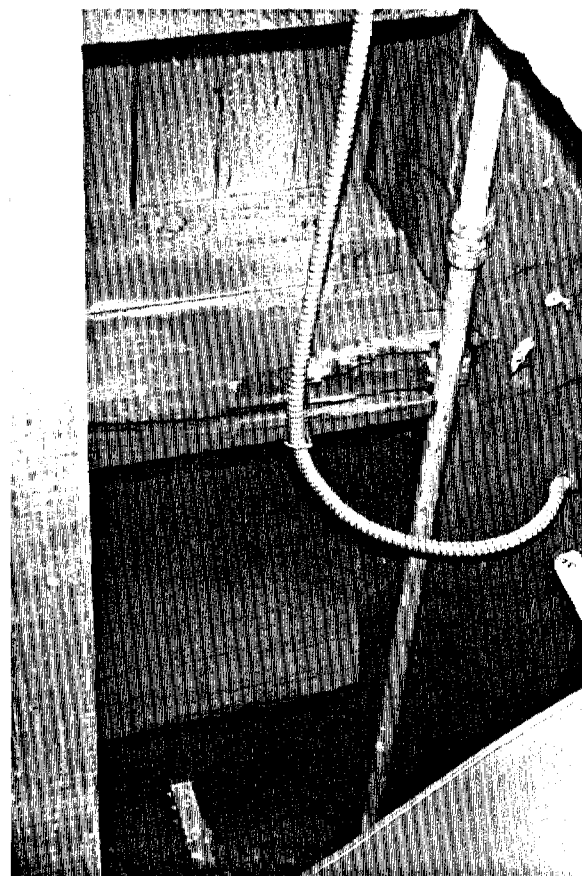

- 1) large steel post supports new beam under joist ends along main beam running east/west
- 2) pilaster under entry at night
- 3) wing wall under south wall of Entrance Hall beyond

Base - 26

NOTE:

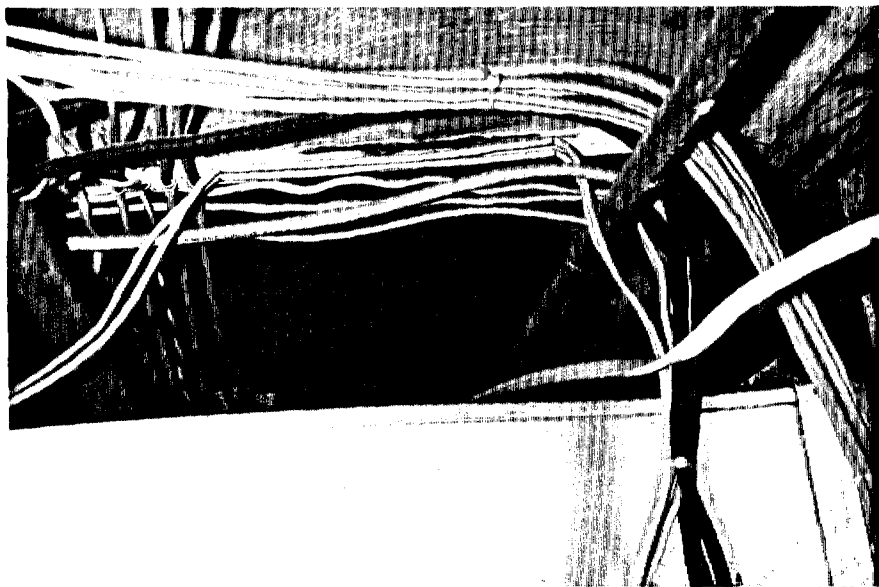

- 1) + 14" subflooring
- 2) additional subflooring seen through cracks
- 3) large subflooring vertically sawn

Base - 27

NOTE:

- 1) original hewn beam under north wall of Entrance Hall
- 2) original hewn joists deteriorated
- 3) joist ends supported by new beam and column

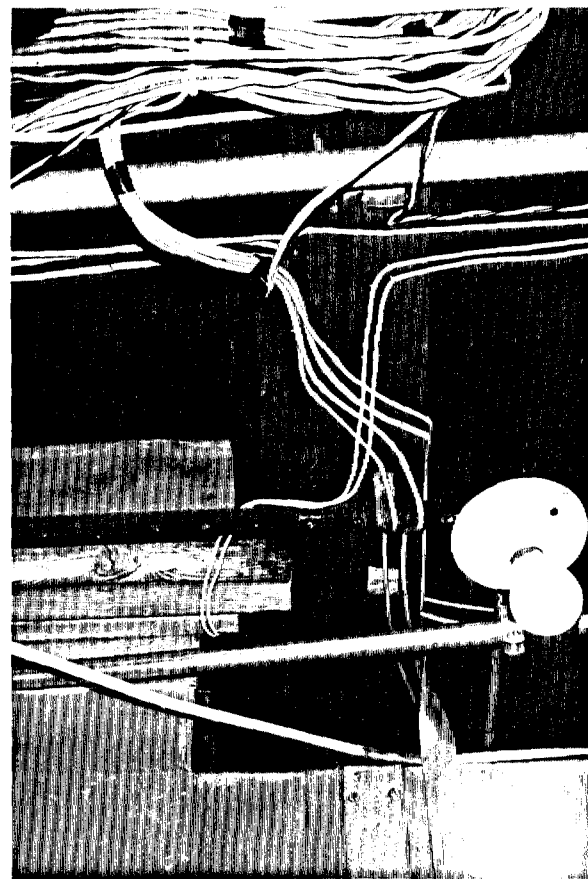

Base - 28

NOTE:

(Looking south at east/west beam)

- 1) notch cut into side of beam for a wood hanger - similar to detail at back stairs

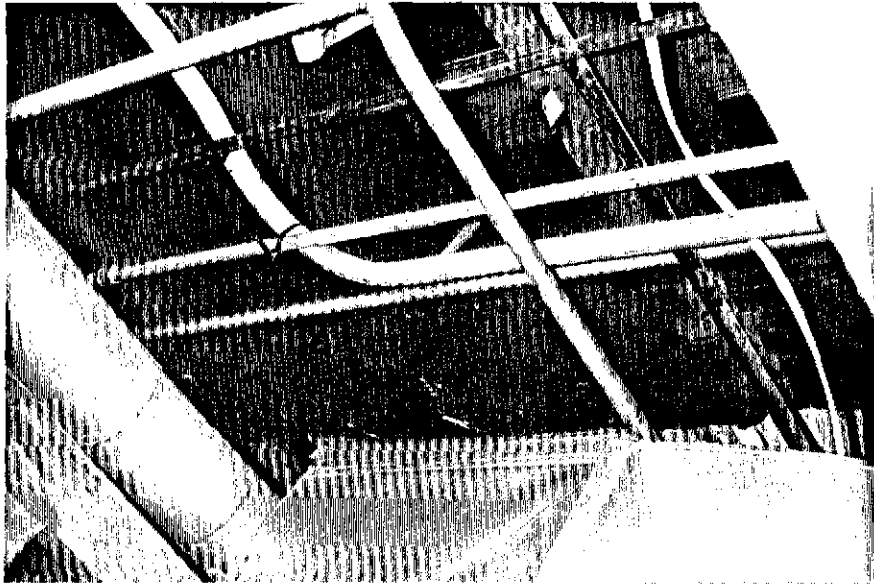

Base - 29

NOTE:

(Looking at east/west header of former opening in floor)

- 1) 1 x 4 vertical member (now cut off at bottom of joist) let into side of joist

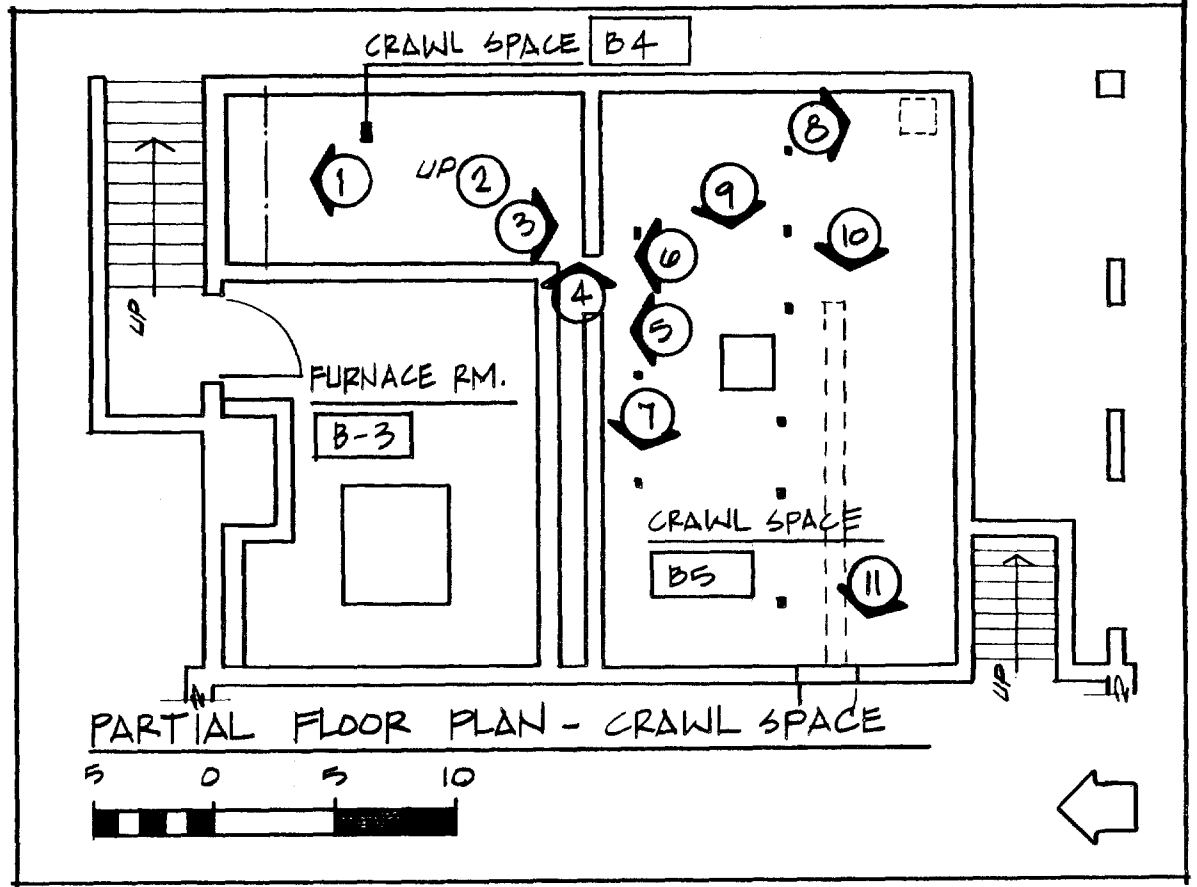

Basement - East/West Beam - Under South Wall of Entrance Hall

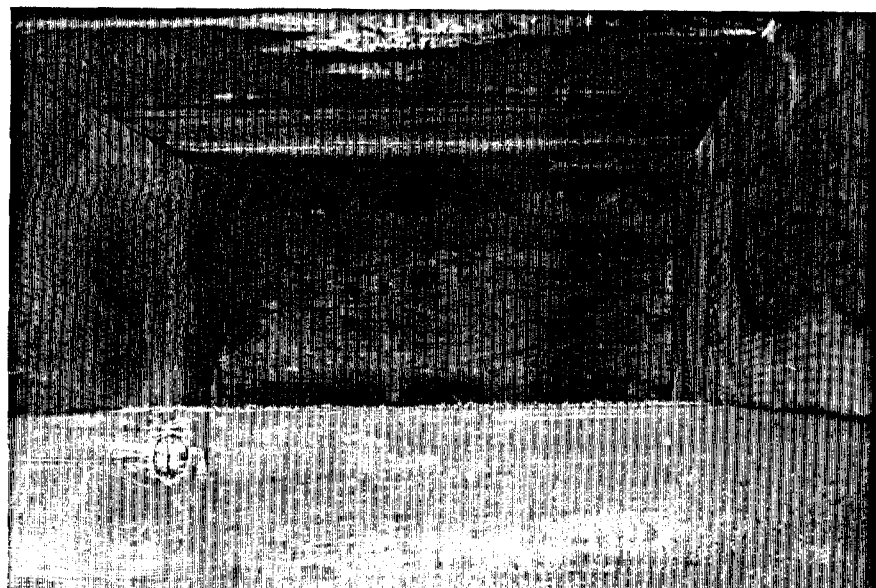

Base - 30

NOTE:

- 1) original hewn beam and joists
- 2) notch in bottom of beam for pipe

Crawl - 1

NOTE:

(View above support beam to north sill plate)

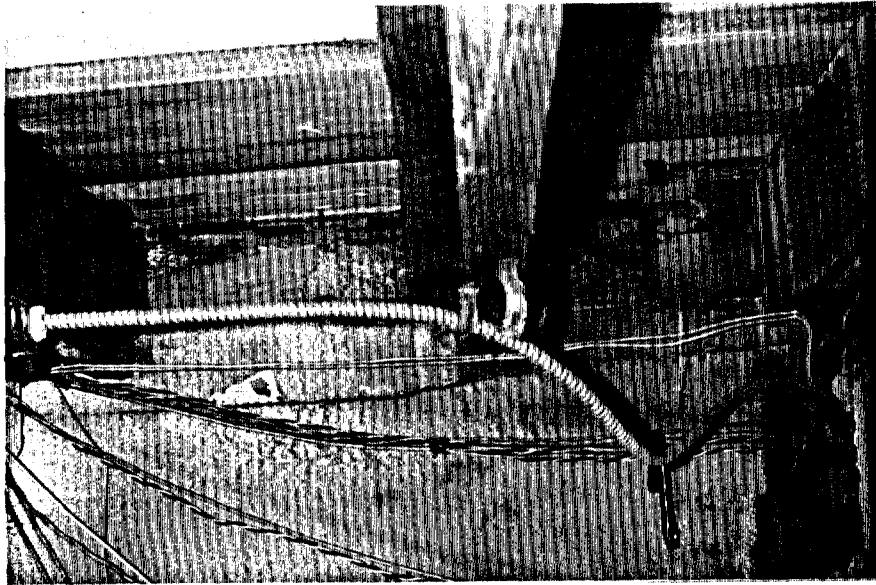

- 1) studs visible in gap between top of sill plate and subfloor
- 2) joists notched into sill plate - same joists notched into ledger on south end

Crawl - 2

NOTE:

- 1) old and new joists
- 2) new flooring ± 1975

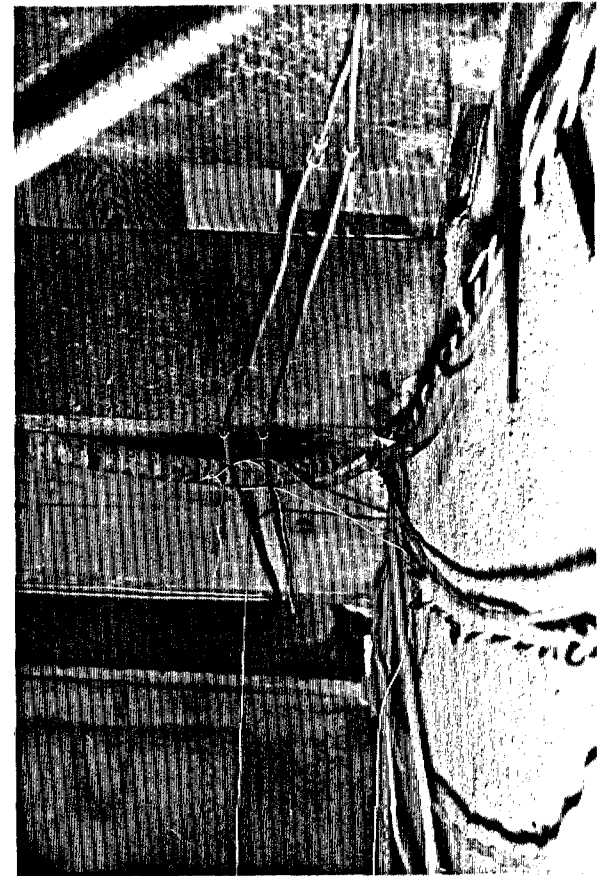

Crawl - 3

NOTE:

(View to south along west wall)

- 1) complete, straight joint in hewn sill plate running east/west on center wall
- 2) joists are double
- 3) new flooring \pm 1975

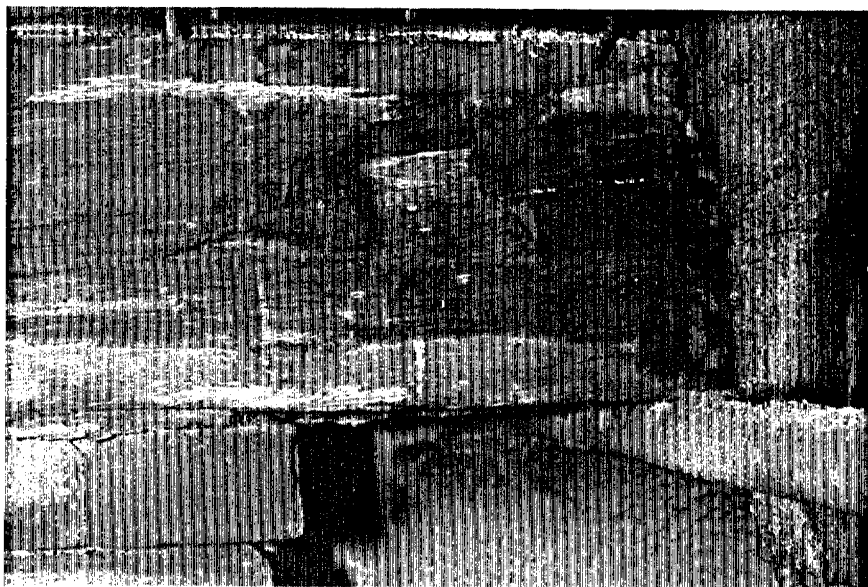

Crawl - 4

NOTE:

(View to east, along center wall, north side)

- 1) joists notched and bearing on ledger nailed to sill plate
- 2) some original joists with new members nailed to side of original
- 3) new flooring visible

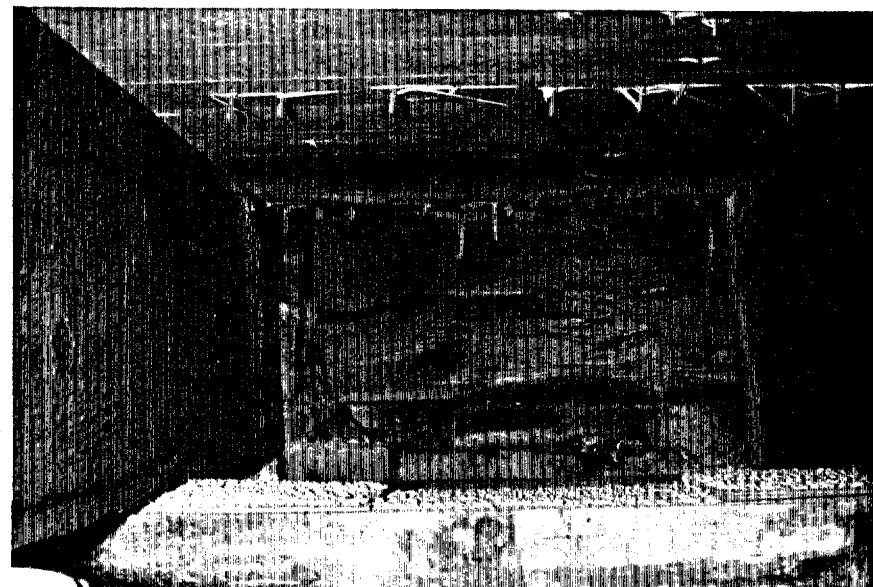

Crawl - 5

NOTE:

(East/west center wall at opening, west side)

- 1) hewn beam with notch for joist
- 2) beam and joist deteriorating
- 3) cut nails extending down through floor above

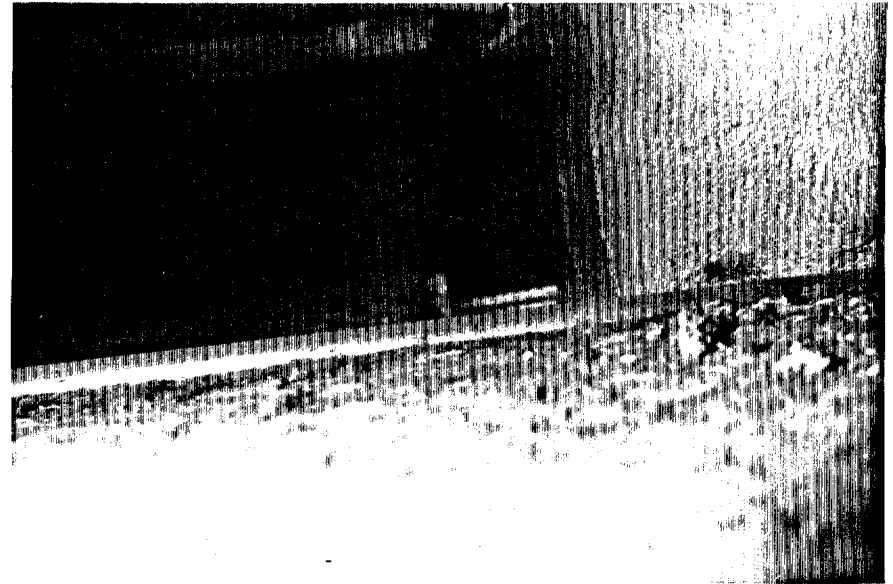

Crawl - 6

NOTE:

(Under kitchen, looking north at east/west center wall - just east of opening)

- 1) complete joint in sill plate
- 2) to west of joist over opening, sill plate badly deteriorated

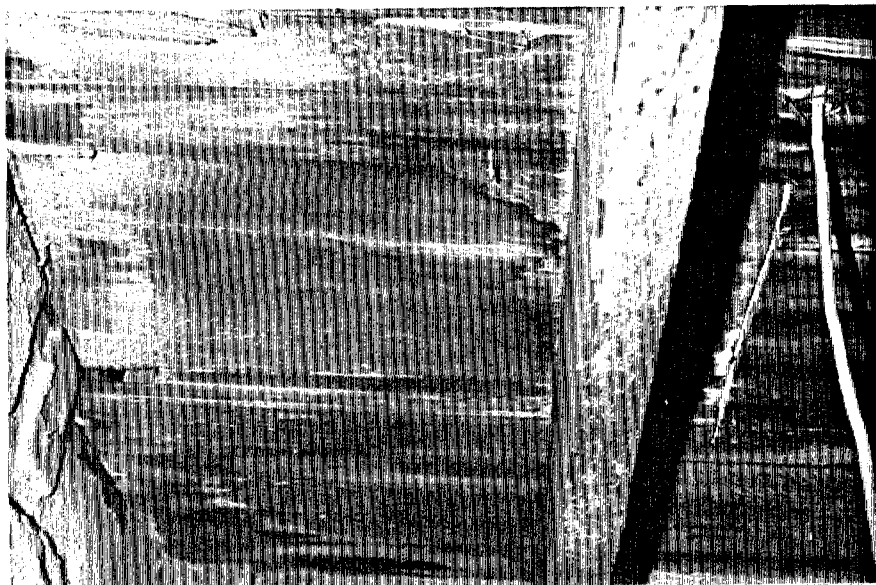

Crawl - 7

NOTE:

(Looking west along south side of east/west
center wall)

- 1) large gaps between joist ends and sill
plate

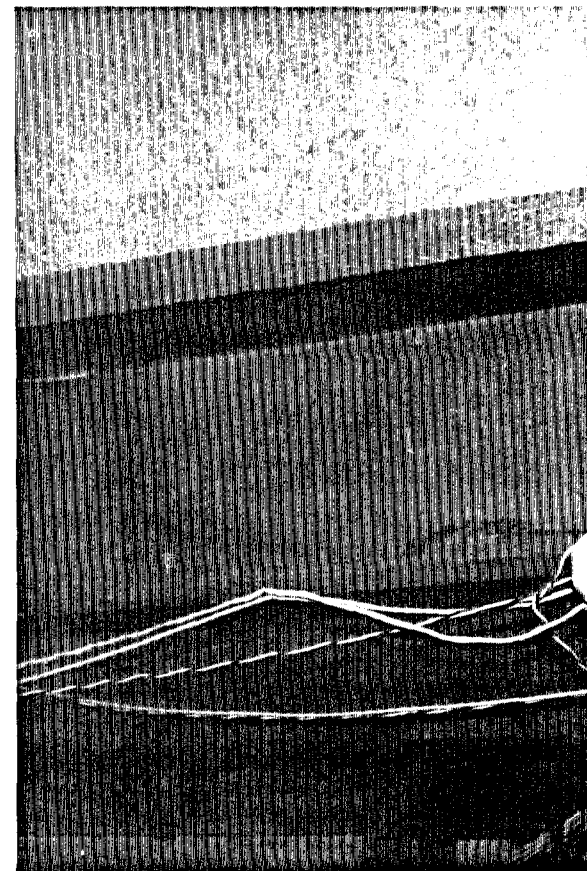

Crawl - 8

NOTE:

(Looking across joists to southwest)

- 1) circular sawn marks on joists - under kitchen area are the only joists in basement/crawl space that are circular sawn

Crawl - 9

NOTE:

- 1) cut out/fill in area below back stair landing

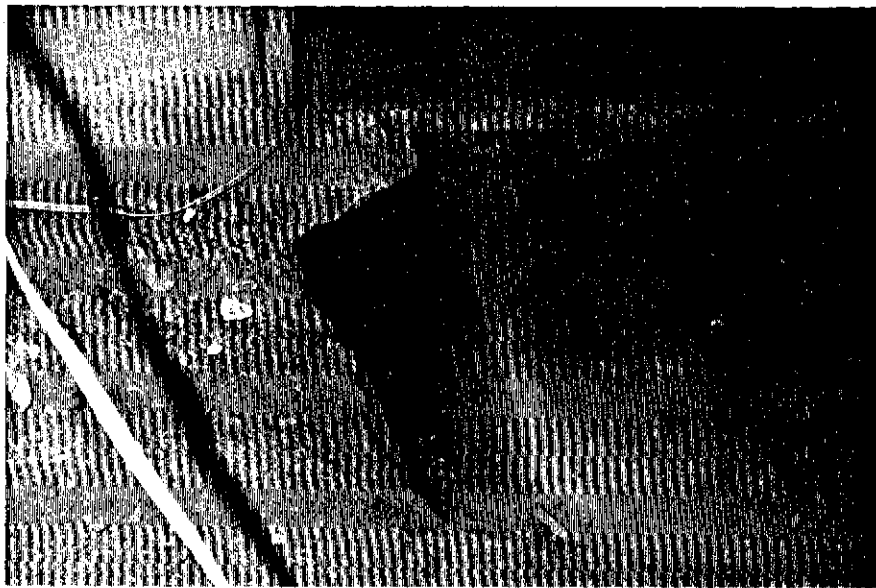

Crawl - 10

NOTE:

(Looking due west)

- 1) outline of former brick foundation wall
- 2) brick foundation wall ends approximately two feet further east of where it stops in photograph

Crawl - 11

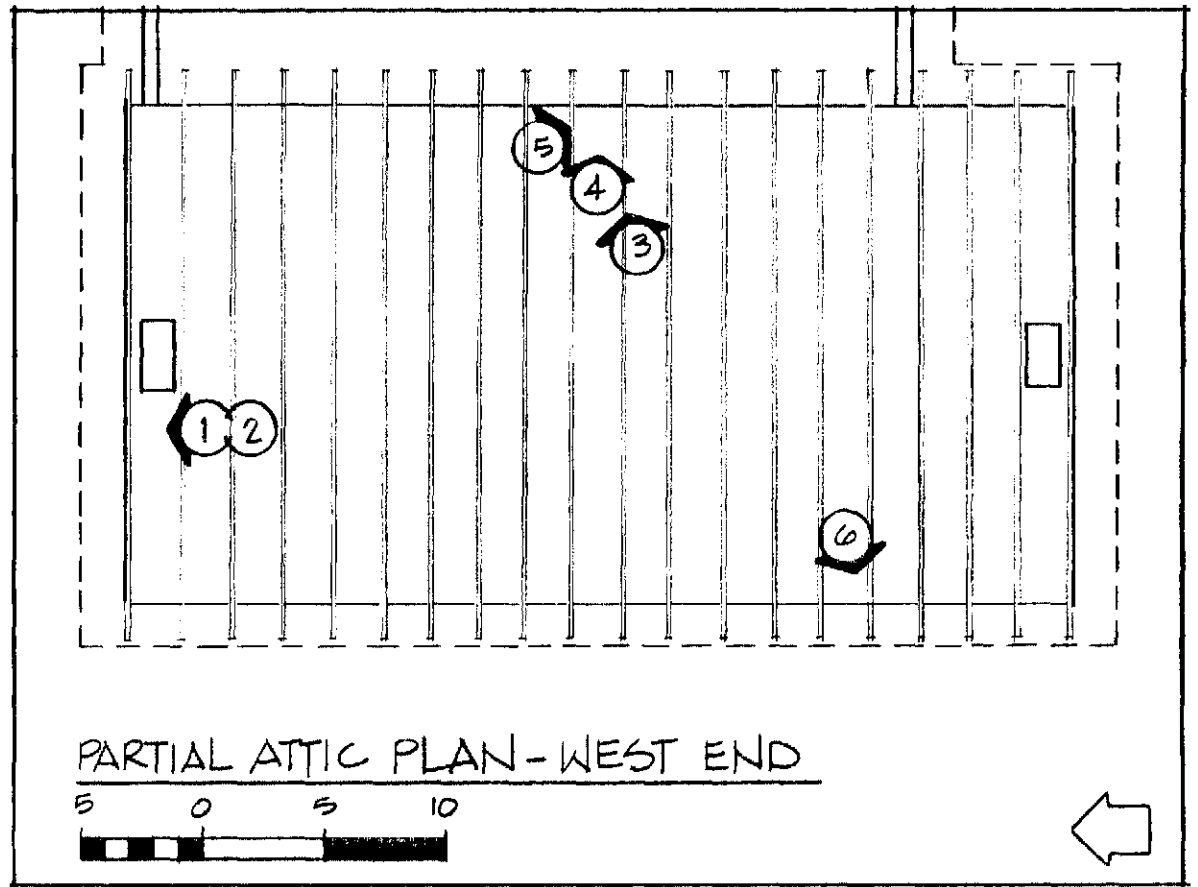

NOTE:

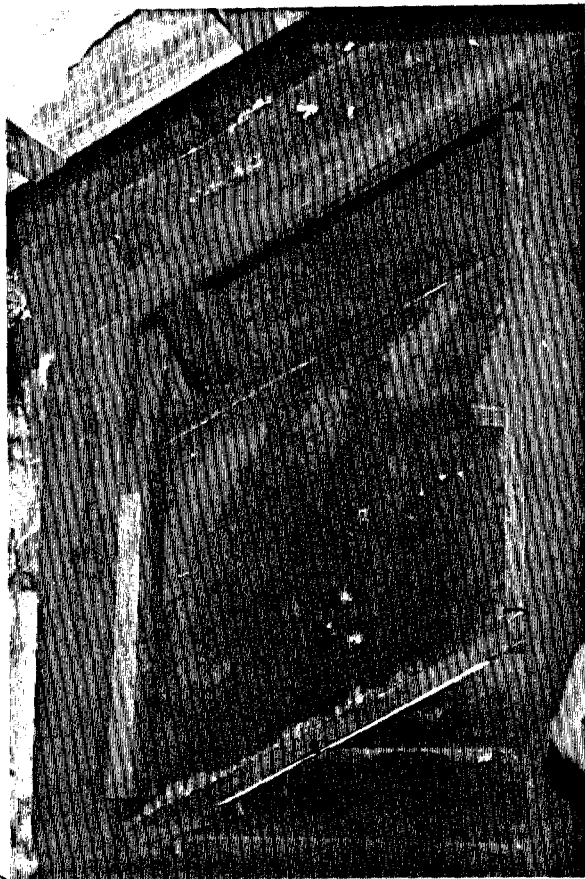

- 1) old brick foundation wall only four courses deep
- 2) old foundation wall toothed into main basement wall running north/south

4. Attic Investigation

Investigation of existing conditions in the attic produced the following photographs.

Location and direction of each photograph is recorded on a Partial Floor Plan for reader clarification.

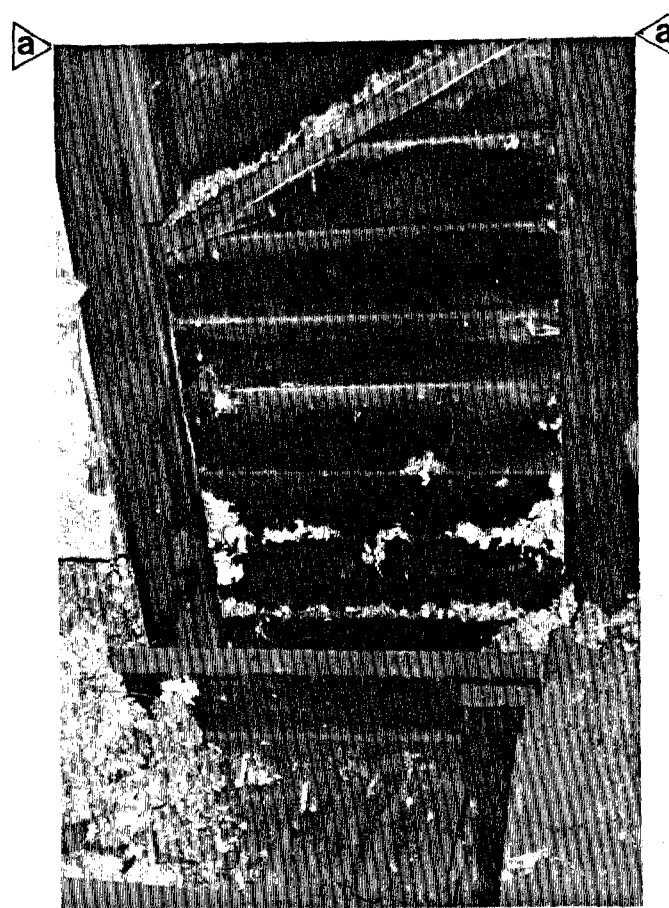

Attic - 1

NOTE:

- 1) back side of exterior siding
- 2) insulation brushed away to expose lath and plaster ceiling

Attic - 2

Attic - 3

Attic - 4

NOTE:

- 1) closeup of rafter sill plate
- 2) insulation on top of ceiling and between rafters

Attic - 5

Attic - 6

NOTE:

- 1) closeup of rafter sill plate
- 2) lath strip on rafter to hold up insulation

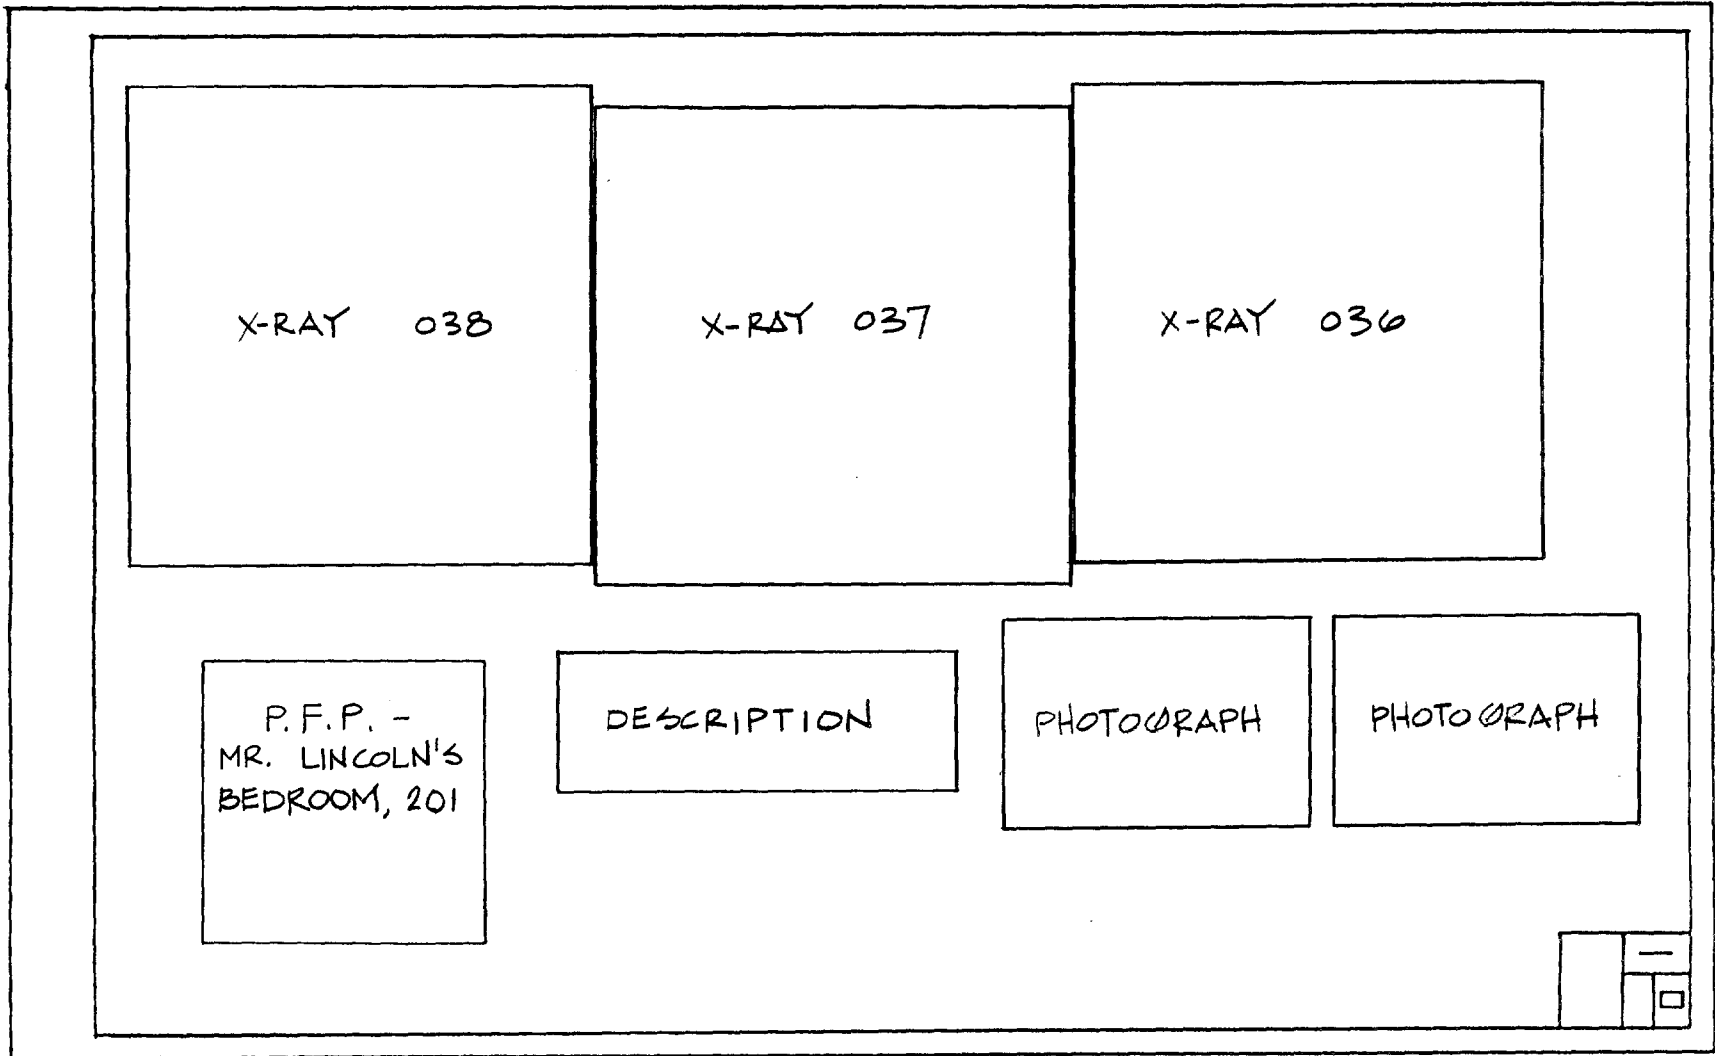

5. X-Ray Analysis

In July 1979 and in April 1980, X-Ray Examinations were performed on the Lincoln Home to non-destructively determine concealed existing conditions.

The firm of David McLaren Hart and Associates of Boston, Massachusetts conducted the X-Ray Examinations and Analysis. Their Report is included in the Appendix, Section C.

The following pages represent a proposed method of presenting the X-Rays, Report, photographs and other pertinent data. The originals would be on 22" x 36" mylar sheets. (The sheets on the following pages are reduced 25%.)

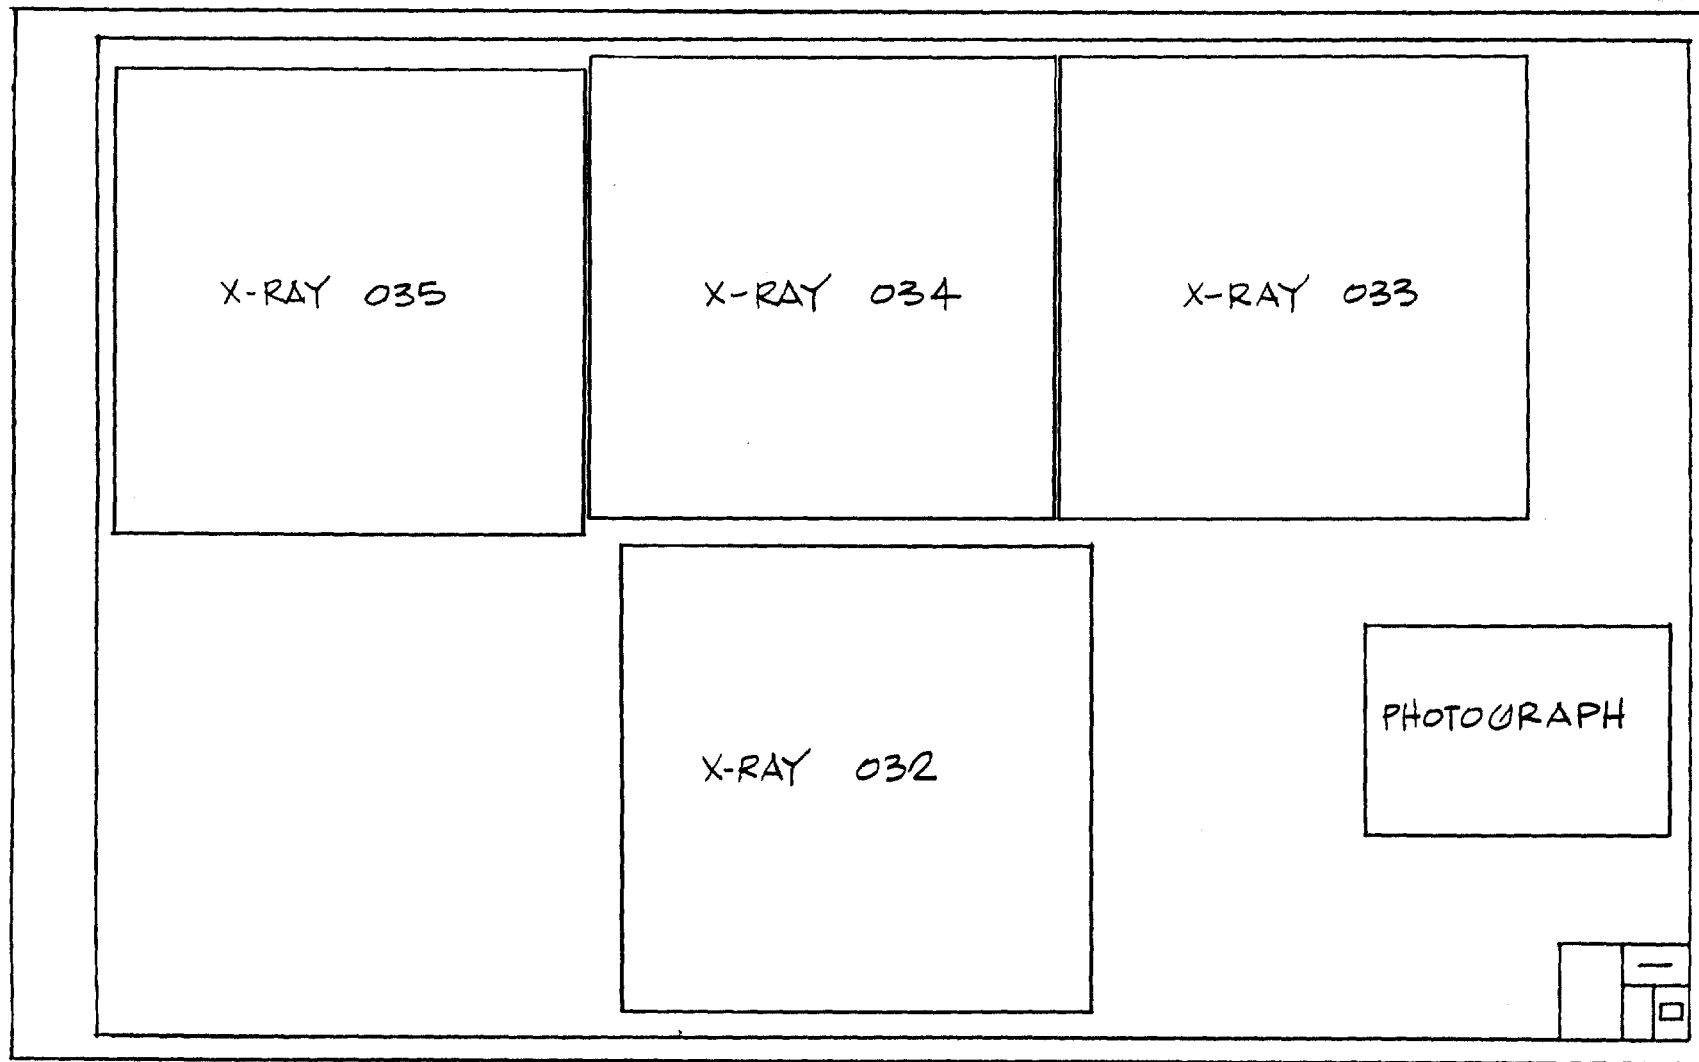

X-RAY ANALYSIS

6. Paint Analysis

Research for the historic paint and color of the Lincoln Home was conducted at two different times.

In June 1976, a paint study was conducted on the exterior of the Lincoln Home by Richard Wolfe prior to the Exterior Restoration Work in the Fall of 1976 and in the Spring of 1977. Refer to the Appendix, Section A for a copy of this study.

In August 1978, a paint study was performed on the interior of the Lincoln Home by Frank Welsh. Refer to the Appendix, Section B for a copy of this study.

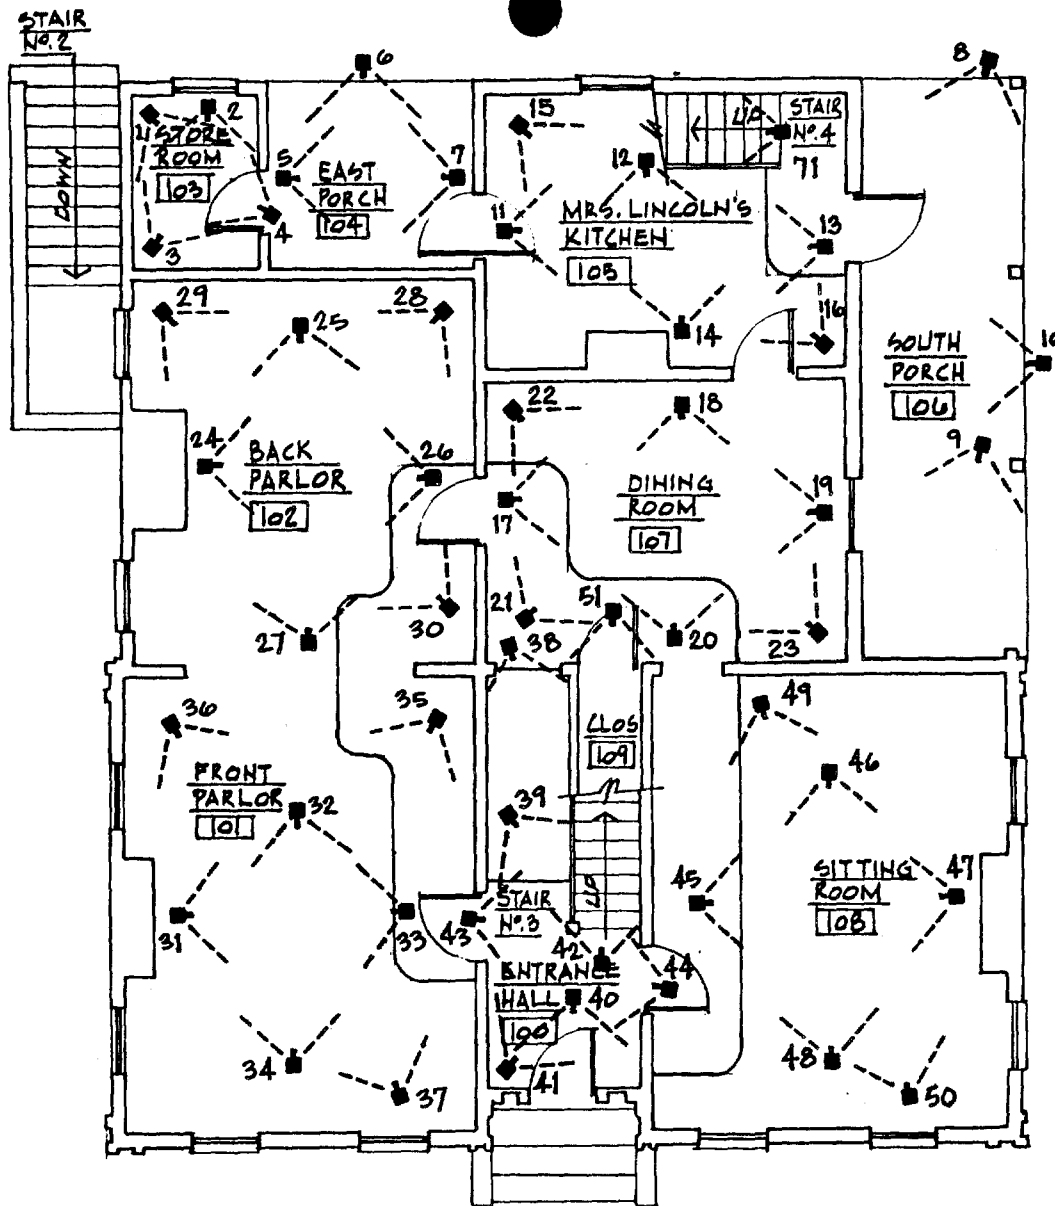

7. Photographs

Interior and Exterior photographs have been taken to visually record the existing conditions at the Lincoln Home.

a. Interior Photographs

The Interior photographs were taken by Bill Hagen. Photographs from various angles in the same room are needed to ensure all areas of the room are recorded.

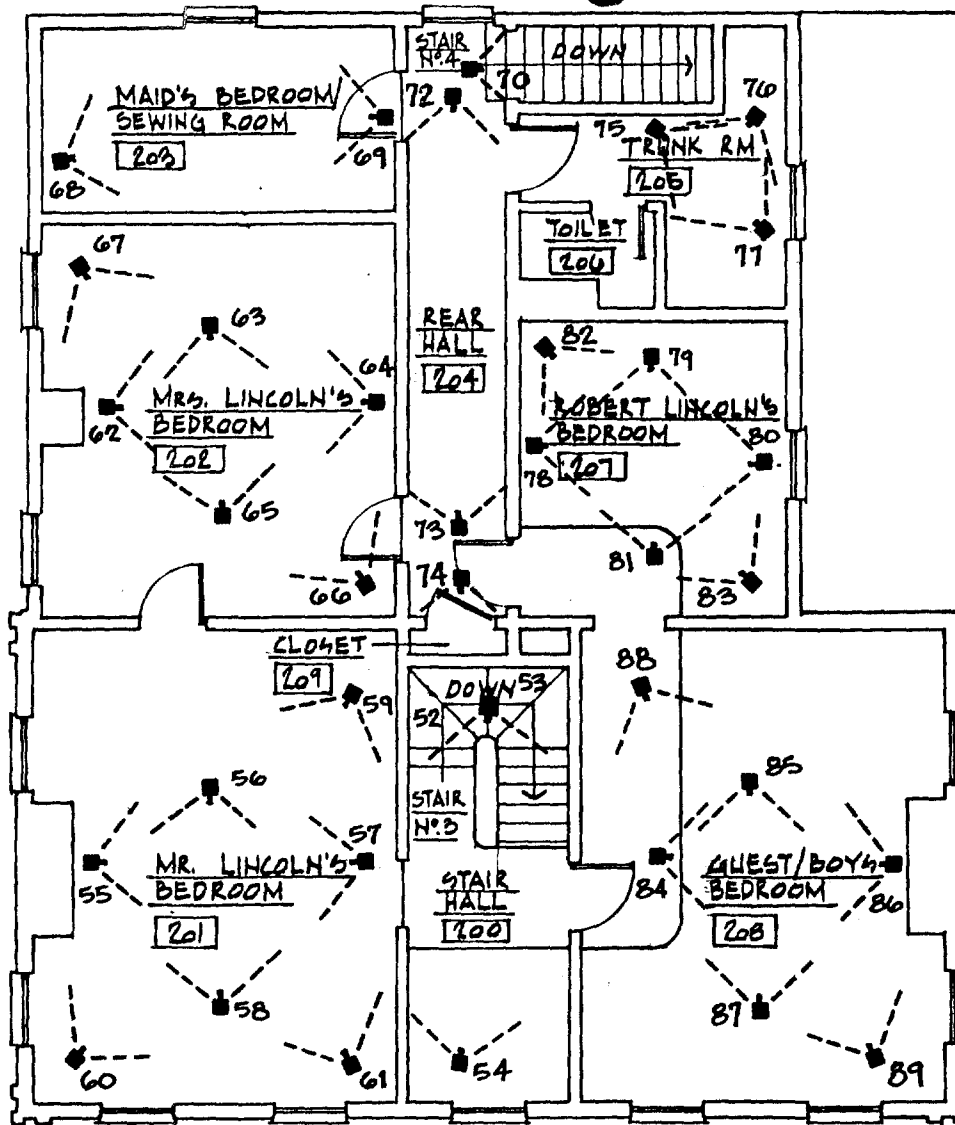

A key to the location and direction of each photograph is given in the First and Second Floor Plans on the following pages.
