Activity 2

Senses Hike

Take a hike on a trail and use only your senses to discover the area around you. Listed below are four of your five senses. Use each one listed below to learn something about the area you are hiking in. Write a sentence to describe what you discover with your senses. Please do not use your sense of taste. Many items in nature are harmful if eaten.

Sight _____

Smell _____

Sound _____

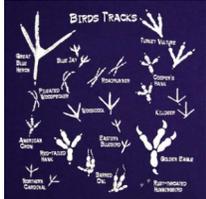

Touch _____

Activity 3

Wildlife Detective

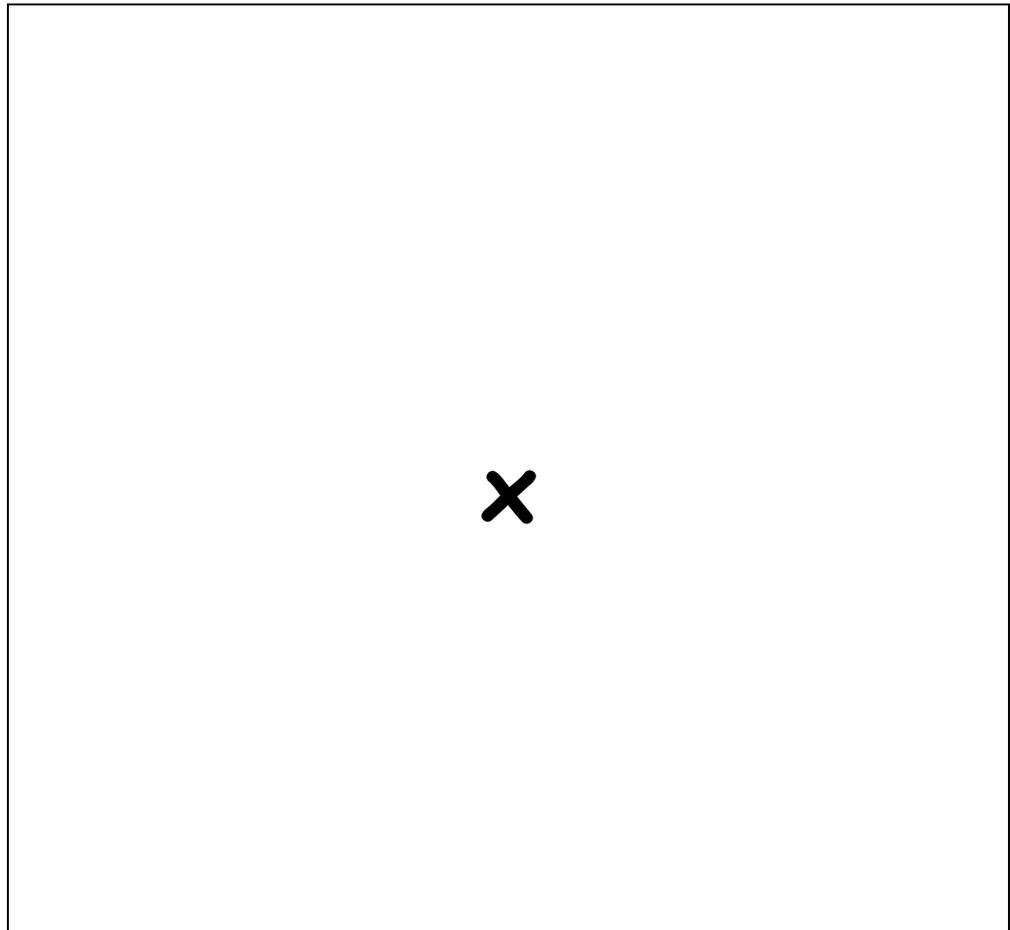

Walk along a trail and explore the area to see kind of wildlife is in the area. Many animals are shy and you will not see them but you may see signs that they have been in the area. Check off as many clues as you can find. Walk quietly, listen closely and stay alert. You never know what you will see or hear. Carefully look under logs, and be sure to put them back in the same place. Early morning and dusk are great times to see wildlife. Good luck being a detective.

<input type="checkbox"/>	 <p>Spider Web</p>	<input type="checkbox"/>	<p>Your Choice</p>

Activity 4

Sound Map

Find a comfortable and quiet place to sit outdoors. The X in the center of the map is you! Listen carefully to the sounds around you. Listen for birds, animals, blowing trees and even sounds made by people. Now draw pictures on the map showing the sounds you heard and where you heard them

Did you hear sounds coming from all directions?

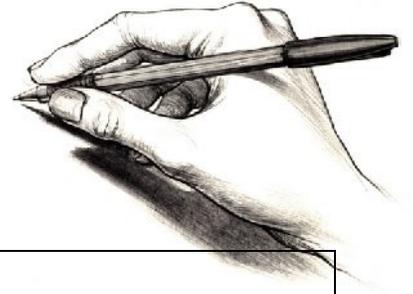

Did you know all of the sounds, or were there some sounds you could not identify?

Would your map look different if you sat here at night or very early in the morning?

Activity 5

Be A Nature Artist

In this activity you can sketch pictures of nature's beauty. You can also use a camera to take pictures and then paste some of your pictures to make a collage. Sketch or paste at least one picture of an animal and at least one picture of a plant up close. Look for interesting shapes and interesting colors.

Activity 6

Birds are fun to watch!

They sing. They soar. Some of them hunt. Some of them even dance! More than 800 different kinds of birds can be found in the United States! National and State parks are some of the best places to look for birds because they protect so many of their habitats. Each type of plant or animal is a unique species. There are many ways that we can tell different species of birds apart. We can look at the colors of their feathers. We can notice the shape of their bill. We can listen for their different songs. Go outside and look for two different species of birds. Keep notes to help you tell them apart.

Bird 1

Bird 2

Location Where did you see it? Beach, forest, parking lot?		
Bill Long, curved, short, black?		
Size and Shape Tall, skinny, larger than a crow, smaller than a robin?		
Colors on Head Brown all over, white throat, Black cap, white eye strip?		
Color on Chest		
Color on Back		
Behavior What was it doing? Soaring, perching, swimming?		
Identify the Species (Optional) Try to learn what type of bird it is.		
Other notes Were there more than one? Was it making noise? When did you see it?		

Activity 7

Symbol Challenge

Parks and recreation areas use these signs and symbols to help people find their way and stay safe in the park. Do you know what these signs mean? Take the challenge!

Draw a line to connect the sign or symbol with its description.

Tent/Campground

Exhibits

Equestrian Trail

Wheelchair Accessible

Dogs Allowed On Leash

Recycling

Hiking Trail

Picnic Area

Campfire Center

Ranger Station

Spelunking

Restroom

Activity 8

Word Match

Read the words and definitions below. Draw a line to match the words with the correct definitions..

1. Habitat

Changes that help plants and animals better survive in their environments

2. Ecology

Stories, places and property that are passed to us from our ancestors.

3. Adaptation

Variety in nature or culture

4. Diversity

A record of the past.

5. Culture

When a group of people share a language, music, type of food and a special way of doing things.

6. Heritage

The study of the relationship between living things and their environment.

7. History

The arrangement of food, water, shelter and space suitable to a plant or animal's needs.
