Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish

and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

On visits to California, we have enjoyed our visits to the shore. The natural beauty and ecology are a huge draw and must be protected.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of

thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

We must NOT sacrifice the Drakes Estero for the greedy irresponsible big corporations who have no concerns except their profits!! This is America!! There is more to our nation than sacrificing our breeding population of harbor seals in California as well as shorebirds, waterfowl and dozens of species of native fish!!

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish

and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence:

As a lifetime resident of California, and one who has traveled extensively to our National and State Parks and wildlands, I am writing to urge the Park Service to honor the wilderness promise and protect Drakes Estero for our future generations.

Our wildlands and wildlife are treasured by Californians, and the many Americans and international community who travel to our beautiful and diverse state. Tens of thousands of shorebirds and waterfowl and dozens of species of native fish use Drake Estero, and it is home to 20 percent of the mainland breeding population of harbor seals in California. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

I strongly request that you select alternative "A" - no permit for commercial oyster operations. We do not need or want a commercial oyster operation - what we want is protection for our wildlands, harbor seals, birds, fish, and all other natural resources. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: None of the proposed alternatives are appropriate. I support a renewable Special Use Permit for Drakes Bay Oyster Company. NPS should support a renewable permit. Please support the issuance of a renewable permit for Drakes Bay Oyster Company. DBOC must be allowed to continue the existing uses pursuant to the existing California Department of Fish and Game leases in place since 1934.

NPS must fully address the economic impacts of the oyster farm - the draft study fails to provide a complete analysis. The draft EIS mentions that removing the oyster farm would cause "major, long-term, adverse effects to the California shellfish market" but does not provide a complete analysis of these impacts, nor does it include these impacts in the overall analysis. Further, it does not analyze the impacts of eliminating one of the largest employers in West Marin County and the last remaining oyster cannery in California. The EIS must address the economic impacts of eliminating the production of nearly 40% of California's oysters and the subsequent impact on the economy.

NPS must address the oyster farm's contributions to local habitat restoration and endangered bird restoration efforts - the draft study ignores these restoration services provided by the oyster farm. The oyster shell byproduct from the Drakes Bay Oyster Farm cannery is a critical resource for re-establishing native oyster beds and for restoring Least Tern and Snowy Plover habitat, both in the San Francisco Bay. The California Least Tern is a U.S. federally listed endangered species and the Snowy Plover is in decline due to habitat loss. These two restoration projects have relied very heavily on the philanthropic contributions of Drakes Bay Oyster Company and it is unlikely these projects would continue if shell were to be sourced out of state. The draft EIS does not address the impacts to wildlife or the environmental issues surrounding the loss of these restoration efforts.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of

thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Correspondence: i do not want a commercial oyster farm or any aquacultured in this area. aquaculture makes alot of mess, like pig farms. they are destroyers of an area, not a benefit. the money making crowd will destroy all wildlife for their zeal to put money in their pockets. we need to stop this destruction because it negatively impacts all of our lives. deny this permit of the money profiteers who ant to destroy this natural beauty.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

***** Oyster companies were grandfathered in at Drake's Estero, but ONLY for a period of 12 years. The time is up. They can grow their oysters elsewhere. And, it is not a necessity for people to eat oysters. There are plenty of other things to eat. National parks/monuments, etc., were designated as such because they are UNIQUE and SPECIAL! Continuing commercial operations in this area is contrary to the reasons Drakes Estero was set aside in the first place. Those companies have had their 12 years, and the time is UP!

Native Americans relied on foods such as oysters for their survival. AND, they knew how to live in harmony with nature, rather than exploiting it to destruction. Today's peoples have many more choices. We don't need to keep destroying our wildlife and wilderness to satisfy a desire for an adjunct product. Oysters are not a necessity. They can be grown commercially elsewhere than a national park. The native creatures--sea and other--that live in Drake's Estero have a right to exist in peace. We don't need to destroy them in order to satisfy human desire for an exotic product.

I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. I urge you to protect Drakes Estero oyster operations for future generations.

The Drakes Bay commercial oyster operation has been in continuous operation for almost 100 years and has caused no damage to Drakes Estero, the Seashore's beaches or wildlife.

I urge you to extend the lease of the Drakes Bay Oyster Company another 99 years so that all Americans can enjoy the bounties. It is time to protect the oyster operation as the original bills authors intended

Please Save The Oyster Operation!

I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

Correspondence: A few years ago, I visited Point Reyes for the first time with a friend. I spent the day hiking in awe. Beautiful grasses, coastline, the ocean, a herd of elk, seals, and even small whales just off the coast. I can't wait to take my family there when the kids are a little bit older. Please consider the negative consequences with allowing commercial interests to take away from this park.

I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: My family has enjoyed visiting Point Reyes Seashore and the surrounding area for generations. It is a special place and full of wildlife both on land and sea. This is the perfect kind of place that should be protected for all to enjoy but also to maintain and encourage the continuation of ecological diversity.

Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches,

and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Thank you!

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.
