

Figure 2. Relative changes in average densities (D =territories/ha) between pre-restoration (2005-07) and post-restoration (2009-11) for the six most common wetland-dependent passerines: SOSP (Song Sparrow), SASP (Savannah Sparrow), MAWR (Marsh Wren), COYE (Common Yellowthroat), RWBL (Red-winged Blackbird), and PSFL (Pacific-slope Flycatcher)
