

Saguaro National Park - Saguaro Census Plot #1  
 December 26, 2009 – Public Volunteer Day

In this figure, light green columns are the number of saguaros counted in 1990, yellow are the saguaros counted in 2006, and blue columns are the ones we counted in 2009. Each column represents a size range, with small ones (less than 1 meter tall) on the far left side and large ones to the right, with the total number on the far right. The number of saguaros in 2009 is slightly less than that found in 2006 but is 60 more than that found in 1990.
