

Saguaro National Park - Saguaro Census Plot #5
 November 28, 2009 – Public Volunteers Day

Saguaro Plot#5

In this figure, green columns are the number of saguaros counted in 1990, red are the number counted in 2006, and blue columns are the ones we counted in 2009. Each column represents a size range, with small ones (less than 1 meter tall) on the far left side and large ones to the right, with the total number on the far right. There were only a few less saguaros found in 2009 than there were in 2000.

The groups get ready to measure saguaros.

Flagging after measuring
