Naked Eye Astronomy

Program Descriptions

Patio Talks:

Wild About Bears! 

Intelligent and opportunistic, the American black bear may be found at a variety of elevations throughout Sequoia and Kings Canyon National Parks. Meet near the flagpole at the Foothills Visitor Center to learn more about the bears that make their home throughout the parks. 20 minutes.

Investigation Station 

What can skulls, scat, and skin tell us about the lives of the animals that call these parks home? Drop in at the Foothills Visitor Center to discover the answers to these and other interesting questions and learn more about life in the park. 1 hour.

Hospital Rock:

People, Places, and the Past: Discover Hospital Rock

Step back in time and learn more about the people who called this area home. Meet near the bear box in the Hospital Rock Picnic Area for this 30 minute walk.

Campfire Talk:

Naked Eye Astronomy 

Humans have relied on the night sky for navigation, beauty, entertainment and a sense of home. Explore what our ancestors saw in the stars. Enjoy their sagas and realize your own connection to the sky as a brilliant tapestry. Bring a flash light. 1 hour.
