Thank you Marisa,

We will review and send back any requested edits asap. Also, the DC Fire EMS is reaching out to your office to coordinate what's necessary for the burn permit, if you can help make sure that happens today we'd be most grateful.

Thank you,

Robert

Good morning Marisa!

Thank you so much for the quick turnaround for us on this and the opportunity to review today. I know Robert is reviewing and compiling some of the details, I noticed this and wanted to express appreciation on behalf of the artist for this exception!

"In addition, to allow for visual inspection and monitoring, all temporary structures must continue to have at least one open side with the exception of the Reflection: The Stars that Change Who Are Ourselves."

I had been thinking about the one open side requirement in regard to this piece so I'm grateful that you clarified it explicitly. In the spirit of "no good deed goes unpunished" (as my father likes to remind me, haha) I wanted to ask if we could get the same exception for one other piece by Farrah Abubaker, "Paradise Lies at the Feet of the Mother". This is the blacklit installation with the steel drums that I showed you the short video of on Wednesday. I spoke with Farrah briefly and she said she prefers to be able to have the entrance closed briefly while folks are inside so they can fully experience the blacklight, if possible. Having an immersive aspect is important to the vision of the piece since it intends to evoke her experience of the world and her soul. Her words below (and short video). I can ask her to make a sign or something that says "keep door open when not in use" or similar. Open to your thoughts.

"Paradise Lies at the Feet of the Mother brings to life an installation of my soul. Incorporating audio recorded from my handmade steel tongue-drums, paintings, and knitting activated by black-lights, my objective is to create an immersive space for the viewer to connect with. The periodic change in the lights represents the rhythm of the change in my life. I want you to feel that you have stepped inside my soul, and leave feeling like you have an understanding of how I cope and understand the world around me. See short video here.

Thank you!
Joshua

Hi Marisa,

Here is the list of our requested clarifications, additions, and corrections to the draft permit you sent. There are not too many and hopefully they are straightforward. We regret the necessity of you working over the weekend, however we greatly appreciate your cooperation in finalizing our permit tomorrow for our Monday morning 6:00am load-in start time.

Please do not hesitate to contact us.

Thank you,

Robert

Questions for clarification:

1) As discussed in our November 1, 2017 meeting, we do not yet wish to withdraw our permit
requested dates through March 3, 2018. In the next day or so we will be responding to Mr. Obernessor's letter seeking further clarity on what solutions exist for installing R-Evolution and commencing our planned extended vigil. Please amend the memo to include dates through March 3, 2018 with authorization for up to 3 shift pod tents, theme artwork and billboards, and heaters, cooking stove, tables, chairs.

2) The "Site Monitoring" section (Page 30, excerpted below), states that "The permittee is responsible for additional safety and crowd management and selecting a contract security company to provide 24-hr security of equipment for the event, from installation through load out. Be advised armed security is not permitted at any time." We will have 24-hour site monitoring provided by staff and volunteers of our organization and partner organizations, as in years past. Please confirm this plan.

3) In the general vigil schedule (page 7), it is written that on Sundown Thursday 11/9 "other temporary structures going on turf can begin setup at this time". We would like to begin loading in and setting up temporary structures such as the center camp prior to sundown on Thursday to make use of daylight hours. Please confirm that we may begin setting up temporary structures prior to sundown thursday, so long as we begin breakdown sunday afternoon and photosynthesis requirements are thus complies with.

Additions:

- Painted Thematic Billboards - We would like to include 1 or 2 additional plywood billboards, very similar to the Rainbow Portal boards, for mural painting. The materials would be plywood frame with a 2x4 base + Enkamat (see attached sample photo from last year). These could be simply added to the list of authorized structural equipment on Page 4 as "Additional painted theme boards." If you require any further information to add these into the permit please let us know.

- Additional names for Onsite Coordinators (Page 12, Paragraph F): Tim Clark, Natalie De Leon, Atticus Mooney, Chuck Moran,

Equipment Additions:

- 10 small consumer grade electric heaters (We think these are better option than propane because we can heat the some shift pods, domes with small electric heaters as intense warming stations.)
- 10 video projectors (not 3)
- 8 propane heaters (not 5 or 6)
- 15 6 ft. x 4 ft (approx) plywood seating loveseats
- 2-4 2ft-diameter x 4 ft tall (approx) round wooden tables
- 1 6 foot diameter (approx) round plywood desk
- 800’ of rubber coated LED light ropes (not 200’)
- 16 Metal Light Stands for night time lighting (I think these somehow may have been inserted out of order on the bottom of page 18. please move to equipment list as well.)
- 2 Honda 6500 watt generators (not 1)
- 2-4 plywood pallets (containing gifted cans of nonalcoholic juice or tea)

Corrections

There are some errors in the descriptions of the ceremonial burn and burn pad. Please make sure to use the current information that was provided in the Site Safety Plan & Vigil Burn Ceremony section of the updated memo, which is reattached here. For example,

- the temple and Fire Ceremony schedule (Page 5) states that the temple will be burned.
This is incorrect as we plan on burning just the 5x5x5 memorial wheels, not the temple itself.

- Burn pad is 10x10 (not 18' x 18) (Page 4, 33)

The name of the scaffolding banner tower is "Our Evolution Banner Tower" not "R-Evolution Banner Tower" (Page 6). Also, it is 26 feet, not 44'11" (Page 6, 7, etc.).

Abraxas (and hopefully Solarbeatz) will only be doing one lap around the Mall for the March

Thank you,

Robert

Questions for clarification:

1) As discussed in our November 1, 2017 meeting, we do not yet wish to withdraw our permit requested dates through March 3, 2018. In the next day or so we will be responding to Mr. Obernessor's letter seeking further clarity on what solutions exist for installing R-Evolution and commencing our planned extended vigil. Please amend the memo to include dates through March 3, 2018 with authorization for up to 3 shift pod tents, theme artwork and billboards, and heaters, cooking stove, tables, chairs.

2) The "Site Monitoring" section (Page 30, excerpted below), states that "The permittee is responsible for additional safety and crowd management and selecting a contract security company to provide 24-hr security of equipment for the event, from installation through load out. Be advised armed security is not permitted at any time." We will have 24-hour site monitoring provided by staff and volunteers of our organization and partner organizations, as in years past. Please confirm this plan.

3) In the general vigil schedule (page 7), it is written that on Sundown Thursday 11/9 "other temporary structures going on turf can begin setup at this time". We would like to begin loading in and setting up temporary structures such as the center camp prior to sundown on Thursday to make use of daylight hours. Please confirm that we may begin setting up temporary structures prior to sundown Thursday, so long as we begin breakdown Sunday afternoon and photosynthesis requirements are thus complies with.

Additions:

- Painted Thematic Billboards - We would like to include 1 or 2 additional plywood billboards, very similar to the Rainbow Portal boards, for mural painting. The materials would be plywood frame with a 2x4 base + Enkamat (see attached sample photo from last year). These could be simply added to the list of authorized structural equipment on Page 4 as "Additional painted theme boards." If you require any further information to add these into the permit please let us know.
Additional names for Onsite Coordinators (Page 12, Paragraph F): Tim Clark, Natalie De Leon, Atticus Mooney, Chuck Moran.

Equipment Additions:

- 10 small consumer grade electric heaters (We think these are better option than propane because we can heat the some shift pods, domes with small electric heaters as intense warming stations.)
- 10 video projectors (not 3)
- 8 propane heaters (not 5 or 6)
- 15 6 ft. x 4 ft (approx) plywood seating loveseats
- 2-4 2ft-diameter x 4 ft tall (approx) round wooden tables
- 1 6 foot diameter (approx) round plywood desk
- 800’ of rubber coated LED light ropes (not 200’)
- 16 Metal Light Stands for night time lighting (I think these somehow may have been inserted out of order on the bottom of page 18. please move to equipment list as well.)
- 2 Honda 6500 watt generators (not 1)
- 2-4 plywood pallets (containing gifted cans of nonalcoholic juice or tea)

Corrections

There are some errors in the descriptions of the ceremonial burn and burn pad. Please make sure to use the current information that was provided in the Site Safety Plan & Vigil Burn Ceremony section of the updated memo, which is reattached here. For example,

- the temple and Fire Ceremony schedule (Page 5) states that the temple will be burned. This is incorrect as we plan on burning just the 5x5x5 memorial wheels, not the temple itself.
- Burn pad is 10x10 (not 18’ x 18) (Page 4, 33)

The name of the scaffolding banner tower is "Our Evolution Banner Tower" not "R-Evolution Banner Tower" (Page 6). Also, it is 26 feet, not 44’11" (Page 6, 7, etc.).

Abraxas (and hopefully Solarbeatz) will only be doing one lap around the Mall for the March

Good morning Marisa!

Thank you so much for the quick turnaround for us on this and the opportunity to
review today. I know Robert is reviewing and compiling some of the details, I noticed this and wanted to express appreciation on behalf of the artist for this exception!

"In addition, to allow for visual inspection and monitoring, all temporary structures must continue to have at least one open side with the exception of the Reflection: The Stars that Change Who Are Ourselves."

I had been thinking about the one open side requirement in regard to this piece so I'm grateful that you clarified it explicitly. In the spirit of "no good deed goes unpunished" (as my father likes to remind me, haha) I wanted to ask if we could get the same exception for one other piece by Farrah Abubaker, "Paradise Lies at the Feet of the Mother". This is the blacklit installation with the steel drums that I showed you the short video of on Wednesday. I spoke with Farrah briefly and she said she prefers to be able to have the entrance closed briefly while folks are inside so they can fully experience the blacklight, if possible. Having an immersive aspect is important to the vision of the piece since it intends to evoke her experience of the world and her soul. Her words below (and short video). I can ask her to make a sign or something that says "keep door open when not in use" or similar. Open to your thoughts.

"Paradise Lies at the Feet of the Mother brings to life an installation of my soul. Incorporating audio recorded from my handmade steel tongue-drums, paintings, and knitting activated by black-lights, my objective is to create an immersive space for the viewer to connect with. The periodic change in the lights represents the rhythm of the change in my life. I want you to feel that you have stepped inside my soul, and leave feeling like you have an understanding of how I cope and understand the world around me. See short video here."

Thank you!
Joshua

Hello All,

I issued the permit for Catharsis to start tomorrow morning at 6:00 am. In addition to the
corrections or clarifications listed below I added the condition for donations. I also informed Mr. Haferd the additional equipment (not yet built) must meet the criteria and is subject to the turf requirements as other equipment. Also notable is Catharsis is planning to screen the 2016 Equal Means Equal documentary in one the tents or possibly on an outdoor screen.

And the march will have two vehicles Abraxas and Solarbeatz.

Please let me know if you have any questions.

Marisa

Hi Marisa,

Here is the list of our requested clarifications, additions, and corrections to the draft permit you sent. There are not too many and hopefully they are straightforward. We regret the necessity of you working over the weekend, however we greatly appreciate your cooperation in finalizing our permit tomorrow for our Monday morning 6:00am load-in start time.

Please do not hesitate to contact us.

Thank you,

Robert

Subject: Re: National Park Service Draft Permit 17-0389 Catharsis on the Mall LLC
Hi Marissa,

The memo dated October 25 (signed by acting RD) denies the variance for the R-Evolution structure due to violation of 1) the Turf management Guide and 2) the height restriction. Additionally, the Catharsis memo from 10/27/17 requested 5 variances for set-up on turf, all of which were denied. It is our understanding that the permit will be issued from 11/6-15/2017.

Thanks, Sean

To: Marisa Richardson <marisa_richardson@nps.gov>
Cc: Joshua Carroll <b (6), Adam Eidinger <b (6), "Nikolas R. Schiller" <b (6), Michael Verdon

Hi Marisa,

Here is the list of our requested clarifications, additions, and corrections to the draft permit
Questions for clarification:

1) As discussed in our November 1, 2017 meeting, we do not yet wish to withdraw our permit requested dates through March 3, 2018. In the next day or so we will be responding to Mr. Obernessor's letter seeking further clarity on what solutions exist for installing R-Evolution and commencing our planned extended vigil. Please amend the memo to include dates through March 3, 2018 with authorization for up to 3 shift pod tents, theme artwork and billboards, and heaters, cooking stove, tables, chairs.

2) The "Site Monitoring" section (Page 30, excerpted below), states that "The permittee is responsible for additional safety and crowd management and selecting a contract security company to provide 24-hr security of equipment for the event, from installation through load out. Be advised armed security is not permitted at any time." We will have 24-hour site monitoring provided by staff and volunteers of our organization and partner organizations, as in years past. Please confirm this plan.

3) In the general vigil schedule (page 7), it is written that on Sundown Thursday 11/9 "other temporary structures going on turf can begin setup at this time". We would like to begin loading in and setting up temporary structures such as the center camp prior to sundown on Thursday to make use of daylight hours. Please confirm that we may begin setting up temporary structures prior to sundown thursday, so long as we begin breakdown sunday afternoon and photosynthesis requirements are thus complies with.

Additions:

- Painted Thematic Billboards - We would like to include 1 or 2 additional plywood billboards, very similar to the Rainbow Portal boards, for mural painting. The materials would be plywood frame with a 2x4 base + Enkamat (see attached sample photo from last year). These could be simply added to the list of authorized structural equipment on Page 4 as "Additional painted theme boards." If you require any further information to add these into the permit please let us know.

- Additional names for Onsite Coordinators (Page 12, Paragraph F): Tim Clark, Natalie De Leon, Atticus Mooney, Chuck Moran, , ,

Equipment Additions:

- 10 small consumer grade electric heaters (We think these are better option than propane because we can heat the some shift pods, domes with small electric heaters as intense warming stations.)
- 10 video projectors (not 3)
- 8 propane heaters (not 5 or 6)
- 15 6 ft. x 4 ft (approx) plywood seating loveseats
- 2-4 2ft-diameter x 4 ft tall (approx) round wooden tables
- 1 6 foot diameter (approx) round plywood desk
- 800' of rubber coated LED light ropes (not 200')
- 16 Metal Light Stands for night time lighting (I think these somehow may have been inserted out of order on the bottom of page 18. please move to equipment list as well.)
- 2 Honda 6500 watt generators (not 1)
- 2-4 plywood pallets (containing gifted cans of nonalcoholic juice or tea)

**Corrections**

There are some errors in the descriptions of the ceremonial burn and burn pad. Please make sure to use the current information that was provided in the Site Safety Plan & Vigil Burn Ceremony section of the updated memo, which is reattached here. For example,

- the temple and Fire Ceremony schedule (Page 5) states that the temple will be burned. This is incorrect as we plan on burning just the 5x5x5 memorial wheels, not the temple itself.
- Burn pad is 10x10 (not 18' x 18) (Page 4, 33)

The name of the scaffolding banner tower is "Our Evolution Banner Tower" not "R-Evolution Banner Tower" (Page 6). Also, it is 26 feet, not 44'11" (Page 6, 7, etc.).

Abraxas (and hopefully Solarbeatz) will only be doing one lap around the Mall for the March

In the spirit of "no good deed goes unpunished" (as my father likes to remind me, haha) I wanted to ask if we could get the same exception for one other piece by Farrah Abubaker, "Paradise Lies at the Feet of the Mother". This is the blacklit installation with the steel drums that I showed you the short video of on
Wednesday. I spoke with Farrah briefly and she said she prefers to be able to have the entrance closed briefly while folks are inside so they can fully experience the blacklight, if possible. Having an immersive aspect is important to the vision of the piece since it intends to evoke her experience of the world and her soul. Her words below (and short video). I can ask her to make a sign or something that says "keep door open when not in use" or similar. Open to your thoughts.

"Paradise Lies at the Feet of the Mother brings to life an installation of my soul. Incorporating audio recorded from my handmade steel tongue-drums, paintings, and knitting activated by black-lights, my objective is to create an immersive space for the viewer to connect with. The periodic change in the lights represents the rhythm of the change in my life. I want you to feel that you have stepped inside my soul, and leave feeling like you have an understanding of how I cope and understand the world around me. See short video here."

Thank you!
Joshua

Hi Roland,

(b) (5)

17-0389 Catharsis on the LLC - NW WAMO Grounds Amendment A.pdf2.pdf
Hi Marisa,

Here is the list of our requested clarifications, additions, and corrections to the draft permit you sent. There are not too many and hopefully they are straightforward. We regret the necessity of you working over the weekend, however we greatly appreciate your cooperation in finalizing our permit tomorrow for our Monday morning 6:00am load-in start time.

Please do not hesitate to contact us.

Thank you,

Robert

Questions for clarification:

1) As discussed in our November 1, 2017 meeting, we do not yet wish to withdraw our permit requested dates through March 3, 2018. In the next day or so we will be responding to Mr. Obernessor’s letter seeking further clarity on what solutions exist for installing R-Evolution and commencing our planned extended vigil. Please amend the memo to include dates through March 3, 2018 with authorization for up to 3 shift pod tents, theme artwork and billboards, and heaters, cooking stove, tables, chairs.

2) The “Site Monitoring” section (Page 30, excerpted below), states that “The permittee is responsible for additional safety and crowd management and selecting a contract security company to provide 24-hr security of equipment for the event, from installation through load out. Be advised armed security is not permitted at any time.” We will have 24-hour site monitoring provided by staff and volunteers of our organization and partner organizations, as in years past. Please confirm this plan.
3) In the general vigil schedule (page 7), it is written that on Sundown Thursday 11/9 "other temporary structures going on turf can begin setup at this time". We would like to begin loading in and setting up temporary structures such as the center camp prior to sundown on Thursday to make use of daylight hours. Please confirm that we may begin setting up temporary structures prior to sundown Thursday, so long as we begin breakdown Sunday afternoon and photosynthesis requirements are thus complies with.

Additions:

- Painted Thematic Billboards - We would like to include 1 or 2 additional plywood billboards, very similar to the Rainbow Portal boards, for mural painting. The materials would be plywood frame with a 2x4 base + Enkamat (see attached sample photo from last year). These could be simply added to the list of authorized structural equipment on Page 4 as "Additional painted theme boards." If you require any further information to add these into the permit please let us know.

- Additional names for Onsite Coordinators (Page 12, Paragraph F): Tim Clark, Natalie De Leon, Atticus Mooney, Chuck Moran, 

Equipment Additions:

- 10 small consumer grade electric heaters (We think these are better option than propane because we can heat the some shift pods, domes with small electric heaters as intense warming stations.)
- 10 video projectors (not 3)
- 8 propane heaters (not 5 or 6)
- 15 6 ft. x 4 ft (approx) plywood seating loveseats
- 2-4 2ft-diameter x 4 ft tall (approx) round wooden tables
- 1 6 foot diameter (approx) round plywood desk
- 800' of rubber coated LED light ropes (not 200')
- 16 Metal Light Stands for night time lighting (I think these somehow may have been inserted out of order on the bottom of page 18. please move to equipment list as well.)
- 2 Honda 6500 watt generators (not 1)
- 2-4 plywood pallets (containing gifted cans of nonalcoholic juice or tea)

Corrections

There are some errors in the descriptions of the ceremonial burn and burn pad. Please make sure to use the current information that was provided in the Site Safety Plan & Vigil Burn Ceremony section of the updated memo, which is reattached here. For example,

- the temple and Fire Ceremony schedule (Page 5) states that the temple will be burned. This is incorrect as we plan on burning just the 5x5x5 memorial wheels, not the temple itself.
- Burn pad is 10x10 (not 18' x 18) (Page 4, 33)

The name of the scaffolding banner tower is "Our Evolution Banner Tower" not "R-Evolution Banner Tower" (Page 6). Also, it is 26 feet, not 44'11" (Page 6, 7, etc.).

Abraxas (and hopefully Solarbeatz) will only be doing one lap around the Mall for the March

Good morning Marisa!

Thank you so much for the quick turnaround for us on this and the opportunity to review today. I know Robert is reviewing and compiling some of the details, I noticed this and wanted to express appreciation on behalf of the artist for this exception!

"In addition, to allow for visual inspection and monitoring, all temporary structures must continue to have at least one open side with the exception of the Reflection: The Stars that Change Who Are Ourselves."

I had been thinking about the one open side requirement in regard to this piece so I'm grateful that you clarified it explicitly. In the spirit of "no good deed goes unpunished" (as my father likes to remind me, haha) I wanted to ask if we could get the same exception for one other piece by Farrah Abubaker, "Paradise Lies at the Feet of the Mother". Hello Mr. King,

They were awaiting our approval regarding the DC Fire Unit. I thought DC Fire was coordinating directly with Raul until I received a call from Lt Hazel today. Do you DC to have the brush unit on site since you all are the AHJ? I just want to make sure. They've had it the last two years so I would recommend it.

I am available tomorrow. They won't have a lot set up until Wednesday and Thursday but I can show you the site. Just let me know what time.

Marisa

Hi Marisa,

Here is the list of our requested clarifications, additions, and corrections to the draft permit you sent. There are not too many and hopefully they are straightforward. We regret the necessity of you working over the weekend, however we greatly appreciate your cooperation in finalizing our permit tomorrow for our Monday morning 6:00am load-in start time.

Please do not hesitate to contact us.

Thank you,

Robert

Questions for clarification:
1) As discussed in our November 1, 2017 meeting, we do not yet wish to withdraw our permit requested dates through March 3, 2018. In the next day or so we will be responding to Mr. Obernessor's letter seeking further clarity on what solutions exist for installing R-Evolution and commencing our planned extended vigil. Please amend the memo to include dates through March 3, 2018 with authorization for up to 3 shift pod tents, theme artwork and billboards, and heaters, cooking stove, tables, chairs.

2) The "Site Monitoring" section (Page 30, excerpted below), states that "The permittee is responsible for additional safety and crowd management and selecting a contract security company to provide 24-hr security of equipment for the event, from installation through load out. Be advised armed security is not permitted at any time." We will have 24-hour site monitoring provided by staff and volunteers of our organization and partner organizations, as in years past. Please confirm this plan.

3) In the general vigil schedule (page 7), it is written that on Sundown Thursday 11/9 "other temporary structures going on turf can begin setup at this time". We would like to begin loading in and setting up temporary structures such as the center camp prior to sundown on Thursday to make use of daylight hours. Please confirm that we may begin setting up temporary structures prior to sundown thursday, so long as we begin breakdown sunday afternoon and photosynthesis requirements are thus complies with.

Additions:

- Painted Thematic Billboards - We would like to include 1 or 2 additional plywood billboards, very similar to the Rainbow Portal boards, for mural painting. The materials would be plywood frame with a 2x4 base + Enkamat (see attached sample photo from last year). These could be simply added to the list of authorized structural equipment on Page 4 as "Additional painted theme boards." If you require any further information to add these into the permit please let us know.

Equipment Additions:

- 10 small consumer grade electric heaters (We think these are better option than propane because we can heat the some shift pods, domes with small electric heaters as intense warming stations.)
- 10 video projectors (not 3)
- 8 propane heaters (not 5 or 6)
- 15 6 ft. x 4 ft (approx) plywood seating loveseats
- 2-4 2ft-diameter x 4 ft tall (approx) round wooden tables
- 1 6 foot diameter (approx) round plywood desk
- 800’ of rubber coated LED light ropes (not 200’)
- 16 Metal Light Stands for night time lighting (I think these somehow may have been inserted out of order on the bottom of page 18. please move to equipment list as well.)
- 2 Honda 6500 watt generators (not 1)
- 2-4 plywood pallets (containing gifted cans of nonalcoholic juice or tea)

Corrections

There are some errors in the descriptions of the ceremonial burn and burn pad. Please make sure to use the current information that was provided in the Site Safety Plan & Vigil Burn Ceremony section of the updated memo, which is reattached here. For example,
the temple and Fire Ceremony schedule (Page 5) states that the temple will be burned. This is incorrect as we plan on burning just the 5x5x5 memorial wheels, not the temple itself.

- Burn pad is 10x10 (not 18' x 18) (Page 4, 33)

The name of the scaffolding banner tower is "Our Evolution Banner Tower" not "R-Evolution Banner Tower" (Page 6). Also, it is 26 feet, not 44’11" (Page 6, 7, etc.).

Abraxas (and hopefully Solarbeatz) will only be doing one lap around the Mall for the March

Good morning Marisa!

Thank you so much for the quick turnaround for us on this and the opportunity to review today. I know Robert is reviewing and compiling some of the details, I noticed this and wanted to express appreciation on behalf of the artist for this exception!

"In addition, to allow for visual inspection and monitoring, all temporary structures must continue to have at least one open side with the exception of the Reflection: The Stars that Change Who Are Ourselves."

I had been thinking about the one open side requirement in regard to this piece so I'm grateful that you clarified it explicitly. In the spirit of "no good deed goes unpunished" (as my father likes to remind me, haha) I wanted to ask if we could get the same exception for one other piece by Farrah Abubaker, "Paradise Lies at the Feet of the Mother". This is the blacklit installation with the steel drums that I showed you the short video of on Wednesday. I spoke with Farrah briefly and she said she prefers to be able to have the entrance closed briefly while folks are inside so they can fully experience the blacklight, if possible. Having an immersive aspect is important to the vision of the piece since it intends to evoke her experience of the world and her soul. Her words below (and short video). I can ask her to make a sign or something that says "keep door open when not in use" or similar. Open to your thoughts.

"Paradise Lies at the Feet of the Mother brings to life an installation of my soul. Incorporating audio recorded from my handmade steel tongue-drums, paintings, and knitting activated by black-lights, my objective is to create an immersive space for the viewer to connect with. The periodic change in the lights represents the rhythm of the change in my life. I want you to feel that you have stepped inside my soul, and leave
feeling like you have an understanding of how I cope and understand the world around me. See short video [here]."

Thank you!
Joshua

Hi Marisa,

Here is the list of our requested clarifications, additions, and corrections to the draft permit you sent. There are not too many and hopefully they are straightforward. We regret the necessity of you working over the weekend, however we greatly appreciate your cooperation in finalizing our permit tomorrow for our Monday morning 6:00am load-in start time.

Please do not hesitate to contact us.

Thank you,
Robert

Questions for clarification:

1) As discussed in our November 1, 2017 meeting, we do not yet wish to withdraw our permit requested dates through March 3, 2018. In the next day or so we will be responding to Mr. Obernessor's letter seeking further clarity on what solutions exist for installing R-Evolution and commencing our planned extended vigil. Please amend the memo to include dates through March 3, 2018 with authorization for up to 3 shift pod tents, theme artwork and billboards, and heaters, cooking stove, tables, chairs.

2) The "Site Monitoring" section (Page 30, excerpted below), states that "The permittee is responsible for additional safety and crowd management and selecting a contract security company to provide 24-hr security of equipment for the event, from installation through load out. Be advised armed security is not permitted at any time." We will have 24-hour site monitoring provided by staff and volunteers of our organization and partner organizations, as in years past. Please confirm this plan.

3) In the general vigil schedule (page 7), it is written that on Sundown Thursday 11/9 "other temporary structures going on turf can begin setup at this time". We would like to begin loading in and setting up temporary structures such as the center camp prior to sundown on Thursday to make use of daylight hours. Please confirm that we may begin setting up temporary structures prior to sundown thursday, so long as we begin breakdown sunday afternoon and photosynthesis requirements are thus complies with.

Additions:

- Painted Thematic Billboards - We would like to include 1 or 2 additional plywood billboards, very similar to the Rainbow Portal boards, for mural painting. The materials would be plywood frame with a 2x4 base + Enkamat (see attached sample photo from last year). These could be simply added to the list of authorized structural equipment on Page 4 as "Additional painted theme boards." If you require any further information to add these into the permit please let us know.

- Additional names for Onsite Coordinators (Page 12, Paragraph F): Tim Clark, Natalie De Leon, Atticus Mooney, Chuck Moran, Equipment Additions:
- 10 small consumer grade electric heaters (We think these are better option than propane because we can heat the some shift pods, domes with small electric heaters as intense warming stations.)
- 10 video projectors (not 3)
- 8 propane heaters (not 5 or 6)
- 15 6 ft. x 4 ft (approx) plywood seating loveseats
- 2-4 2ft-diameter x 4 ft tall (approx) round wooden tables
- 1 6 foot diameter (approx) round plywood desk
- 800' of rubber coated LED light ropes (not 200')
- 16 Metal Light Stands for night time lighting (I think these somehow may have been inserted out of order on the bottom of page 18. please move to equipment list as well.)
- 2 Honda 6500 watt generators (not 1)
- 2-4 plywood pallets (containing gifted cans of nonalcoholic juice or tea)

**Corrections**

There are some errors in the descriptions of the ceremonial burn and burn pad. Please make sure to use the current information that was provided in the Site Safety Plan & Vigil Burn Ceremony section of the updated memo, which is reattached here. For example,

Hi Roland,

This is my planned note to Catharsis.

Good Afternoon Robert,

Please see attached amended permit which now reflects a more detailed description of the various artworks and clarification in regards to movement of flooring from the build location to final placement.

I understand from Darwin, Miss Utility conducted a scan of the NW quadrant of the Washington Monument grounds but didn't actual mark the area with flags. Flags are used to indicate where various utilities are located. I know from experience there are utilities located underground (page 4 of Level 2 Turf Planning Guide and Condition Z of permit). So Without proper flagging there is a great risk a utility may be struck in the process of grounding. Please have a private utility locating company mark the area where you plan to ground generators to ensure nothing damaged in the process of grounding.

I have noted Although we recognize that you have applied to use the NW quadrant of the
Washington Monument Grounds through March 3, 2018, your permit is only for November 5-November vigil. Consistent with our representation, we recognize that you have applied to use the NW quadrant of the Washington Monument grounds through March 3, 2018. to include dates through terminates on March 3, 2018. During our the November 1 meeting, you indicated that you will decide on whether you will litigate the variance denial letter a decision to use the dates is forthcoming, specifically you stated by November 26. Your November 5, 2017, email explains that you intend to seek further clarification from the Regional Director Vogel regarding the placement of R-Evolution on the Washington Monument Grounds' hardscape or turf areas.

However, please clarify that if Catharsis will conduct a 24 hour vigil in the northwest quadrant of the Washington Monument Grounds until November 26. from November 15-26 (or until Catharsis solidifies further demonstration plans), Catharsis on the Mall does not plan to

Or Are you requesting I amend your current permit to reflect an end date of March 3, 2018 and that Specifically, do you plan to conduct a 24hr vigil beginning on November 16 with the following structures: 3 shift pod tents, theme artwork, billboards, heaters, cooking stove, tables and chairs, or will Catharsis cease occupying the space after November 15?

Thank you

Marisa

Questions for clarification:

1) As discussed in our November 1, 2017 meeting, we do not yet wish to withdraw our permit requested dates through March 3, 2018. In the next day or so we will be responding to Mr. Obernessor's letter seeking further clarity on what solutions exist for installing R-Evolution and commencing our planned extended vigil. Please amend the memo to include dates through March 3, 2018 with authorization for up to 3 shift pod tents, theme artwork and billboards, and heaters, cooking stove, tables, chairs.

2) The "Site Monitoring" section (Page 30, excerpted below), states that "The permittee is responsible for additional safety and crowd management and selecting a contract security company to provide 24-hr security of equipment for the event, from installation through load out. Be advised armed security is not permitted at any time." We will have 24-hour site monitoring provided by staff and volunteers of our organization and partner organizations, as in years past. Please confirm this plan.

3) In the general vigil schedule (page 7), it is written that on Sundown Thursday 11/9 "other temporary structures going on turf can begin setup at this time". We would like to
begin loading in and setting up temporary structures such as the center camp prior to sundown on Thursday to make use of daylight hours. Please confirm that we may begin setting up temporary structures prior to sundown Thursday, so long as we begin breakdown Sunday afternoon and photosynthesis requirements are thus complies with.

**Additions:**

- Painted Thematic Billboards - We would like to include 1 or 2 additional plywood billboards, very similar to the Rainbow Portal boards, for mural painting. The materials would be plywood frame with a 2x4 base + Enkamat (see attached sample photo from last year). These could be simply added to the list of authorized structural equipment on Page 4 as "Additional painted theme boards." If you require any further information to add these into the permit please let us know.

**Equipment Additions:**

- 10 small consumer grade electric heaters (We think these are better option than propane because we can heat the Some shift pods, domes with small electric heaters as intense warming stations.)
- 8 propane heaters (not 5 or 6)
- 15 6 ft. x 4 ft (approx) plywood seating loveseats
- 2-4 2ft-diameter x 4 ft tall (approx) round wooden tables
- 1 6 foot diameter (approx) round plywood desk
- 800’ of rubber coated LED light ropes (not 200’)
- 16 Metal Light Stands for night time lighting (I think these somehow may have been inserted out of order on the bottom of page 18, please move to equipment list as well.)
- 2 Honda 6500 watt generators (not 1)
- 2-4 plywood pallets (containing gifted cans of nonalcoholic juice or tea)

**Corrections**

There are some errors in the descriptions of the ceremonial burn and burn pad. Please make sure to use the current information that was provided in the Site Safety Plan & Vigil Burn Ceremony section of the updated memo, which is reattached here. For example,

- the temple and Fire Ceremony schedule (Page 5) states that the temple will be burned. This is incorrect as we plan on burning just the 5x5x5 memorial wheels, not the temple itself.
- Burn pad is 10x10 (not 18’ x 18) (Page 4, 33)

The name of the scaffolding banner tower is "Our Evolution Banner Tower" not "R-Evolution Banner Tower" (Page 6). Also, it is 26 feet, not 44’11" (Page 6, 7, etc.).

Abraxas (and hopefully Solarbeatz) will only be doing one lap around the Mall for the March.

Hi Marisa,

Here is the list of our requested clarifications, additions, and corrections to the draft permit you sent. There are not too many and hopefully they are straightforward. We regret the necessity of you working over the weekend, however we greatly appreciate your cooperation in finalizing our permit tomorrow for our Monday morning 6:00am load-in start time.

Please do not hesitate to contact us.

Thank you,

Robert

Questions for clarification:

1) As discussed in our November 1, 2017 meeting, we do not yet wish to withdraw our permit
requested dates through March 3, 2018. In the next day or so we will be responding to Mr. Obernessor's letter seeking further clarity on what solutions exist for installing R-Evolution and commencing our planned extended vigil. Please amend the memo to include dates through March 3, 2018 with authorization for up to 3 shift pod tents, theme artwork and billboards, and heaters, cooking stove, tables, chairs.

2) The "Site Monitoring" section (Page 30, excerpted below), states that "The permittee is responsible for additional safety and crowd management and selecting a contract security company to provide 24-hr security of equipment for the event, from installation through load out. Be advised armed security is not permitted at any time." We will have 24-hour site monitoring provided by staff and volunteers of our organization and partner organizations, as in years past. Please confirm this plan.

3) In the general vigil schedule (page 7), it is written that on Sundown Thursday 11/9 "other temporary structures going on turf can begin setup at this time". We would like to begin loading in and setting up temporary structures such as the center camp prior to sundown on Thursday to make use of daylight hours. Please confirm that we may begin setting up temporary structures prior to sundown Thursday, so long as we begin breakdown Sunday afternoon and photosynthesis requirements are thus complies with.

Additions:

- Painted Thematic Billboards - We would like to include 1 or 2 additional plywood billboards, very similar to the Rainbow Portal boards, for mural painting. The materials would be plywood frame with a 2x4 base + Enkamat (see attached sample photo from last year). These could be simply added to the list of authorized structural equipment on Page 4 as "Additional painted theme boards." If you require any further information to add these into the permit please let us know.

Equipment Additions:

- 10 small consumer grade electric heaters (We think these are better option than propane because we can heat the some shift pods, domes with small electric heaters as intense warming stations.)
- 10 video projectors (not 3)
- 8 propane heaters (not 5 or 6)
- 15 6 ft. x 4 ft (approx) plywood seating loveseats
- 2-4 2ft-diameter x 4 ft tall (approx) round wooden tables
- 1 6 foot diameter (approx) round plywood desk
- 800' of rubber coated LED light ropes (not 200')
- 16 Metal Light Stands for night time lighting (I think these somehow may have been inserted out of order on the bottom of page 18. please move to equipment list as well.)
- 2 Honda 6500 watt generators (not 1)
- 2-4 plywood pallets (containing gifted cans of nonalcoholic juice or tea)

 Corrections

There are some errors in the descriptions of the ceremonial burn and burn pad. Please make sure to use the current information that was provided in the Site Safety Plan & Vigil Burn Ceremony section of the updated memo, which is reattached here. For example,

- the temple and Fire Ceremony schedule (Page 5) states that the temple will be burned.
This is incorrect as we plan on burning just the 5x5x5 memorial wheels, not the temple itself.
- Burn pad is 10x10 (not 18' x 18') (Page 4, 33)

The name of the scaffolding banner tower is "Our Evolution Banner Tower" not "R-Evolution Banner Tower" (Page 6). Also, it is 26 feet, not 44'11" (Page 6, 7, etc.).

Abraxas (and hopefully Solarbeatz) will only be doing one lap around the Mall for the March

Good morning Marisa!

Thank you so much for the quick turnaround for us on this and the opportunity to review today. I know Robert is reviewing and compiling some of the details, I noticed this and wanted to express appreciation on behalf of the artist for this exception!

"In addition, to allow for visual inspection and monitoring, all temporary structures must continue to have at least one open side with the exception of the Reflection: The Stars that Change Who Are Ourselves."

I had been thinking about the one open side requirement in regard to this piece so I'm grateful that you clarified it explicitly. In the spirit of "no good deed goes unpunished" (as my father likes to remind me, haha) I wanted to ask if we could get the same exception for one other piece by Farrah Abubaker, "Paradise Lies at the Feet of the Mother". This is the blacklit installation with the steel drums that I showed you the short video of on Wednesday. I spoke with Farrah briefly and she said she prefers to be able to have the entrance closed briefly while folks are inside so they can fully experience the blacklight, if possible. Having an immersive aspect is important to the vision of the piece since it intends to evoke her experience of the world and her soul. Her words below (and short video). I can ask her to make a sign or something that says "keep door open when not in use" or similar. Open to your thoughts.

"Paradise Lies at the Feet of the Mother brings to life an installation of my soul. Incorporating audio recorded from my handmade steel tongue-drums, paintings, and knitting activated by black-lights, my objective is to create an immersive space for the viewer to connect with. The periodic change in the lights represents the rhythm of the change in my life. I want you to feel that you have stepped inside my soul, and leave feeling like you have an understanding of how I cope and understand the world around me. See short video here."
Thank you!
Joshua

I spoke with DC Fire Lt Hazel today, told him I hope to get together with you tomorrow to discuss where things are happening. You available around 1:30-2pm tomorrow Ms Marisa? I'm also working Friday or Saturday, not sure when yet. Lt Hazel said he'd like to join us at the site(s).

Yes, we require DC Fire have some type of fire apparatus on scene while the burn is happening (like 4th of July). It is incumbent on the permitee to assure DC Fire has adequate information to respond and stand by during the burn. Raul is out for 2 weeks.

Hello Mr. King,

They were awaiting our approval regarding the DC Fire Unit. I thought DC Fire was coordinating directly with Raul until I received a call from Lt Hazel today. Do you DC to have the brush unit on site since you all are the AHJ? I just want to make sure. They've had it the last two years so I would recommend it.

I am available tomorrow. They won't have a lot set up until Wednesday and Thursday but I can show you the site. Just let me know what time.

Hi Marisa,

Here is the list of our requested clarifications, additions, and corrections to the draft permit you sent. There are not too many and hopefully they are straightforward. We regret the necessity of you working over the weekend, however we greatly appreciate your cooperation in finalizing our permit tomorrow for our Monday morning 6:00am load-in start time.

Please do not hesitate to contact us.

Thank you,

Robert

Questions for clarification:

1) As discussed in our November 1, 2017 meeting, we do not yet wish to withdraw our permit requested dates through March 3, 2018. In the next day or so we will be responding to Mr. Obernessor's letter seeking further clarity on what solutions exist for installing R-Evolution and commencing our planned extended vigil. Please amend the memo to include dates through March 3, 2018 with authorization for up to 3 shift pod tents, theme artwork and billboards, and heaters, cooking stove, tables, chairs.

2) The "Site Monitoring" section (Page 30, excerpted below), states that "The permittee is responsible for additional safety and crowd management and selecting a contract security company to provide 24-hr security of equipment for the event, from installation through load out. Be advised armed security is not permitted at any time." We will have 24-hour site monitoring provided by staff and volunteers of our organization and...
partner organizations, as in years past. Please confirm this plan.

3) In the general vigil schedule (page 7), it is written that on Sundown Thursday 11/9 "other temporary structures going on turf can begin setup at this time". We would like to begin loading in and setting up temporary structures such as the center camp prior to sundown on Thursday to make use of daylight hours. Please confirm that we may begin setting up temporary structures prior to sundown Thursday, so long as we begin breakdown Sunday afternoon and photosynthesis requirements are thus complied with.

Additions:

- Painted Thematic Billboards - We would like to include 1 or 2 additional plywood billboards, very similar to the Rainbow Portal boards, for mural painting. The materials would be plywood frame with a 2x4 base + Enkamat (see attached sample photo from last year). These could be simply added to the list of authorized structural equipment on Page 4 as "Additional painted theme boards." If you require any further information to add these into the permit please let us know.

- Additional names for Onsite Coordinators (Page 12, Paragraph F): Tim Clark, Natalie De Leon, Atticus Mooney, Chuck Moran

Equipment Additions:

- 10 small consumer grade electric heaters (We think these are better option than propane because we can heat the same pods, domes with small electric heaters as intense warming stations.)
- 10 video projectors (not 3)
- 8 propane heaters (not 5 or 6)
- 15 6 ft. x 4 ft (approx) plywood seating loveseats
- 2-4 2ft-diameter x 4 ft tall (approx) round wooden tables
- 1 6 foot diameter (approx) round plywood desk
- 800' of rubber coated LED light ropes (not 200')
- 16 Metal Light Stands for night time lighting (I think these somehow may have been inserted out of order on the bottom of page 18. please move to equipment list as well.)
- 2 Honda 6500 watt generators (not 1)
- 2-4 plywood pallets (containing gifted cans of nonalcoholic juice or tea)

Corrections

There are some errors in the descriptions of the ceremonial burn and burn pad. Please make sure to use the current information that was provided in the Site Safety Plan & Vigil Burn Ceremony section of the updated memo, which is reattached here. For example,

- the temple and Fire Ceremony schedule (Page 5) states that the temple will be burned. This is incorrect as we plan on burning just the 5x5x5 memorial wheels, not the temple itself.
- Burn pad is 10x10 (not 18' x 18) (Page 4, 33)

The name of the scaffolding banner tower is "Our Evolution Banner Tower" not "R-Evolution Banner Tower" (Page 6). Also, it is 26 feet, not 44'11" (Page 6, 7, etc.).

Abraxas (and hopefully Solarbeatz) will only be doing one lap around the Mall for the March

Good morning Marisa!

Thank you so much for the quick turnaround for us on this and the opportunity to review today. I know Robert is reviewing and compiling some of the details, I noticed this and wanted to express appreciation on behalf of the artist for this exception!

"In addition, to allow for visual inspection and monitoring, all temporary structures must continue to have at least one open side with the exception of the Reflection: The Stars that Change Who Are Ourselves."

I had been thinking about the one open side requirement in regard to this piece so I'm grateful that you clarified it explicitly. In the spirit of "no good deed goes unpunished" (as my father likes to remind me, haha) I wanted to ask if we could get the same exception for one other piece by Farrah Abubaker, "Paradise Lies at the Feet of the Mother". This is the blacklit installation with the steel drums that I showed you the short video of on Wednesday. I spoke with Farrah briefly and she said she prefers to be able to have the entrance closed briefly while folks are inside so they can fully experience the blacklight, if possible. Having an immersive aspect is important to the vision of the piece since it intends to evoke her experience of the world and her soul. Her words below (and short video). I can ask her to make a sign or something that says "keep door open when not in use" or similar. Open to your thoughts.

"Paradise Lies at the Feet of the Mother brings to life an installation of my soul. Incorporating audio recorded from my handmade steel tongue-drums, paintings, and knitting activated by black-lights, my objective is to create an immersive space for the viewer to connect with. The periodic change in the lights represents the rhythm of the change in my life. I want you to feel that you have stepped inside my soul, and leave feeling like you have an understanding of how I cope and understand the world around me. See short video here."

Thank you!
Joshua

Yes, we require DC Fire have some type of fire apparatus on scene while the burn is happening (like 4th of July). It is incumbent on the permitee to assure DC Fire has adequate information to respond and stand by during the burn. Raul is out for 2 weeks.

Cc: Joshua Carroll <adam.eidinger@nps.gov> "Nikolas R. Schiller" <michael.verdon@nps.gov>

Hi Marisa,

Here is the list of our requested clarifications, additions, and corrections to the draft permit you sent. There are not too many and hopefully they are straightforward. We regret the necessity of you working over the weekend, however we greatly appreciate your cooperation in finalizing our permit tomorrow for our Monday morning 6:00am load-in start time.

Please do not hesitate to contact us.

Thank you,

Robert

Questions for clarification:

1) As discussed in our November 1, 2017 meeting, we do not yet wish to withdraw our permit requested dates through March 3, 2018. In the next day or so we will be responding to Mr. Obernessor's letter seeking further clarity on what solutions exist for installing R-Evolution and commencing our planned extended vigil. Please amend the memo to include dates through March 3, 2018 with authorization for up to 3 shift pod tents, theme artwork and billboards, and heaters, cooking stove, tables, chairs.

2) The "Site Monitoring" section (Page 30, excerpted below), states that "The permittee is responsible for additional safety and crowd management
and selecting a contract security company to provide 24-hr security of equipment for the event, from installation through load out. Be advised armed security is not permitted at any time." We will have 24-hour site monitoring provided by staff and volunteers of our organization and partner organizations, as in years past. Please confirm this plan.

3) In the general vigil schedule (page 7), it is written that on Sundown Thursday 11/9 "other temporary structures going on turf can begin setup at this time". We would like to begin loading in and setting up temporary structures such as the center camp prior to sundown on Thursday to make use of daylight hours. Please confirm that we may begin setting up temporary structures prior to sundown Thursday, so long as we begin breakdown Sunday afternoon and photosynthesis requirements are thus complied with.

Additions:

- Painted Thematic Billboards - We would like to include 1 or 2 additional plywood billboards, very similar to the Rainbow Portal boards, for mural painting. The materials would be plywood frame with a 2x4 base + Enkamat (see attached sample photo from last year). These could be simply added to the list of authorized structural equipment on Page 4 as "Additional painted theme boards." If you require any further information to add these into the permit please let us know.

- Additional names for Onsite Coordinators (Page 12, Paragraph F): Tim Clark, Natalie De Leon, Atticus Mooney, Chuck Moran,

Equipment Additions:

- 10 small consumer grade electric heaters (We think these are better option than propane because we can heat the some shift pods, domes with small electric heaters as intense warming stations.)
- 10 video projectors (not 3)
- 8 propane heaters (not 5 or 6)
- 15 6 ft. x 4 ft (approx) plywood seating loveseats
- 2-4 2ft-diameter x 4 ft tall (approx) round wooden tables
- 1 6 foot diameter (approx) round plywood desk
- 800’ of rubber coated LED light ropes (not 200’)
- 16 Metal Light Stands for night time lighting (I think these somehow may have been inserted out of order on the bottom of page 18. please move to equipment list as well.)
- 2 Honda 6500 watt generators (not 1)
- 2-4 plywood pallets (containing gifted cans of nonalcoholic juice or tea)

Corrections

There are some errors in the descriptions of the ceremonial burn and burn pad. Please make sure to use the current information that was provided in the Site Safety Plan & Vigil Burn Ceremony section of the updated memo, which is reattached here. For example,

- the temple and Fire Ceremony schedule (Page 5) states that the temple will be burned. This is incorrect as we plan on burning just the 5x5x5 memorial wheels, not the temple itself.
- Burn pad is 10x10 (not 18’ x 18) (Page 4, 33)
The name of the scaffolding banner tower is "Our Evolution Banner Tower" not "R-Evolution Banner Tower" (Page 6). Also, it is 26 feet, not 44’11" (Page 6, 7, etc.).

Abrajas (and hopefully Solarbeatz) will only be doing one lap around the Mall for the March

Thank you Marisa,

I am reviewing and will let you know if we have any issues, and will respond to your questions. In the meantime I wanted to follow-up with a couple things that the team sent right after you and I spoke when I made "last call." Apologies for not getting them in before you sent.

- I've learned that given the cold we may attempt to place a few more propane heaters. May we have as many as we need, say under 15?
- We also may have a few more car batteries for lights than listed, is this alright? No more than 12.
- 4 solar panels (for charging batteries)

Are these things permissible? Hoping you won't have to write a new permit. Once again I will respond again after reviewing the permit more closely.
Thank you,
Robert

Hello Robert,

Thank you for the information. I will update the permit to reflect the additional equipment, however I will not issue an amended permit until I hear from you that there are no additional changes.

Do you have an update in regards to grounding of the generators?

Marisa

Hello Mr. Haferd,

Please see attached permit for Catharsis on the Mall, LLC scheduled for November 6-15,2017 in the NW Quadrant of the Washington Monument Grounds. Just a couple of outstanding permit notes:
1. Please provide a daily program schedule
2. Please provide the vehicle information for the Solarbeatz stage (license plate information, vehicle registration same information you provided for Abraxas)

Mr. Bob Vogel has returned to his position as Regional Director please address any correspondence to him regarding R-Evolution and the extension of the vigil.

Sgt. Koehler will email you the access passes today.

If you have any questions please do not hesitate to contact me or Robbin Owen.

Thank you
Marisa Richardson

Subject: Re: National Park Service Permit 17-0389 Catharsis on Mall LLC - Corrected Attachments

Marisa,

Thank you for getting the updated version back to us. However, I noticed there are still some sections missing from our Nov2 Memo that are not reflected in the Permit.

Specifically Nov2 Memo pages:
cannot be found in the Permit. Can these pages be added to the Permit?

Finally I noticed Pages 48-53 of our Nov2 Memo were moved to pages 38-41 in your updated Permit. This isn’t a problem per se, but I would suggest moving page 47 in the Permit to page 37 in the Permit so the fire section is contiguous.

Sincerely,
Nikolas

Hello Mr. Haferd,

Please see attached permit for Catharsis on the the Mall, LLC scheduled for November 6-15,2017 in the NW Quadrant of the Washington Monument Grounds. Just a couple of outstanding permit notes:
1. Please provide a daily program schedule
2. Please provide the vehicle information for the Solarbeatz stage (license plate information, vehicle registration-same information you provided for Abraxas)

Mr. Bob Vogel has returned to his position as Regional Director please address any correspondence to him regarding R-Evolution and the extension of the vigil.

Sgt. Koehler will email you the access passes today.

If you have any questions please do not hesitant to contact me or Robbin Owen.

Thank you
Marisa Richardson
Hi Nicholas,

I didn't include those pages because it would make the permit very long and which may effect my ability to send it. I tried to include the elements from the vigil memo that highlight the installations that posed the most questions. However, if you would like to include those pages, I will update the permit in the morning.

The permit monitors and park police have a copy the permit memo to supplement the permit. And most everything outlined in the vigil memo is included in the permit.

Tomorrow, November 6, Martin Torres will be onsite at 6am to monitor the setup and document the conditions of the grounds.

Thank you

Marisa

Thank you for your response Marisa,

We have discussed and we are comfortable with this solution for tomorrow. However, we do need our permit to expressly include everything in the November 2 memo and the
amendments/additions made over the last 48 hours. Can you please update the memo to include everything by Wednesday morning at the latest (as that is the day when most of the installations in those missing sections will be arriving). We appreciate the fact that this may make a single file too large for sending. We are okay with you sending two different emails with the permit split into separate files.

We apologize for causing you additional work, but we would rather have completeness on-site than have to contact you over confusion that comes up. If you feel this is not the best solution, happy to discuss tomorrow.

Thank you,

Robert

Hi Marisa,

Thank you for coordinating the vehicle and parking passes. We have an additional request regarding refueling and important corrections regarding the Temple and Burn. Please confirm these for the updated permit and when we can expect that.

First, regarding generator refuel times, we would like to suggest adding an additional refuel window during non-peak hours, for example 4:00pm - 6:00pm. While the provided evening times (10pm - 12am) may be non-peak for most of your other events, those hours are during peak attendance for our event. We think it is in our collective interest to be able to refuel earlier in the evening. If this is amenable to you, please edit the updated permit.

Second, we have a few requested corrections regarding the Temple and Ceremonial Burn. Here they are below, by page number.

PAGE 3: please add "to be burned" language to the line below:
Flowers, herbs, trays, and bowls (to be burned)

PAGE 6 changes:

9:00pm Wednesday 11/8/17 - 2:00pm Saturday 11/11/17 (sunset) – Public Offerings
Participants and members of the public are invited to interact with the Temple, including by writing offerings on the Temple, and by placing small, non-painted, wooden or paper objects on Burn Pad and offering trays.

6:00pm – 9pm Saturday 11/11/17 - Vigil Ceremony  Prep:
Memorial Wheels and blocks are removed from the Temple and placed on Burn Pad. Ceremonial dancers perform. (Refer to Site Safety Plan for detailed timeline of Burn Prep, Vigil Ceremony and Burn Cleanup.)

9pm Saturday 11/11/17 - 12am Sunday 11/12/17 – Temple Transformation Ceremony:
Objects are burned and cleaned up by Fire Safety Team. Contents within 5 x 5 x 5. (Refer to Site Safety Plan for detailed timeline of Burn Prep, Vigil Ceremony and Burn Cleanup.)

Thank you,
Roman

Thank you for your response Marisa,

We have discussed and we are comfortable with this solution for tomorrow. However, we do need our permit to expressly include everything in the November 2 memo and the amendments/additions made over the last 48 hours. Can you please update the memo to include everything by Wednesday morning at the latest (as that is the day when most of the installations in those missing sections will be arriving). We appreciate the fact that this may make a
single file too large for sending. We are okay with you sending two different emails with the permit split into separate files.

We apologize for causing you additional work, but we would rather have completeness on-site than have to contact you over confusion that comes up. If you feel this is not the best solution, happy to discuss tomorrow.

Thank you,

Robert

On Sun, Nov 5, 2017 at 4:39 PM, Marisa Richardson <marisa_richardson@nps.gov> wrote:

Hi Nicholas,

I didn’t include those pages because it would make the permit very long and which may effect my ability to send it. I tried to include the elements from the vigil memo that highlight the installations that posed the most questions. However, if you would like to include those pages, I will update the permit in the morning.

The permit monitors and park police have a copy the permit memo to supplement the permit. And most everything outlined in the vigil memo is included in the permit.

Tomorrow, November 6, Martin Torres will be onsite at 6 am to monitor the setup and document the conditions of the grounds.

Thank you

Marisa

Marisa,

Thank you for getting the updated version back to us. However, I noticed there are still some sections missing from our Nov2 Memo that are not reflected in the Permit.

Specifically Nov2 Memo pages:
18
21
24
25
26
28
29
39
40
41
42
43
45
cannot be found in the Permit. Can these pages be added to the Permit?

Finally I noticed Pages 48-53 of our Nov2 Memo were moved to pages 38-41 in your updated Permit. This isn’t a problem per se, but I would suggest moving page 47 in the Permit to page 37 in the Permit so the fire section is contiguous.

Sincerely,
Nikolas

Hello Mr. Haferd,

Please see attached permit for Catharsis on the the Mall, LLC scheduled for November 6-15,2017 in the NW Quadrant of the Washington Monument Grounds. Just a couple of outstanding permit notes:
1. Please provide a daily program schedule
2. Please provide the vehicle information for the Solarbeatz stage (license plate information, vehicle registration-same information you provided for Abraxas)

Mr. Bob Vogel has returned to his position as Regional Director please address any correspondence to him regarding R-Evolution and the extension of the vigil.

Sgt. Koehler will email you the access passes today.

If you have any questions please do not hesitate to contact me or Robbin Owen.

Thank you
Marisa Richardson

--
Hello Robert,

I will amend the permit to reflect refueling hours of 5 am-8am and 4:00 pm - 6:00 pm.

Can you confirm people are writing on both the Memorial Wheels and Temple? Should the text read:

PAGE 6 changes:

9:00pm Wednesday 11/8/17 - 2:00pm Saturday 11/11/17 (sunset) – Public Offerings
Participants and members of the public are invited to interact with the Temple, including by writing offerings on the Temple/Memorial Wheels, and by placing small, non-painted, wooden or paper objects on Burn Pad and offering trays.

I will make the changes to the Temple and Ceremonial Burn language.
I understand from Darwin, Miss Utility conducted a scan of the NW quadrant of the Washington Monument grounds but didn't actual mark the area with flags indicating where various utilities are located. I know from experience there are utilities located underground on the Washington Monument grounds (page 4 of Level 2 Turf Planning Guide and Condition Z of permit). So without proper flagging there is a great risk a utility may be struck in the process of grounding. Please have a private utility locating company mark the area where you plan to ground generators to ensure nothing damaged in the process of grounding.

Please let me know when you can provide the information regarding the utility marking.

Please expect the amended permit shortly.

Marisa

On Mon, Nov 6, 2017 at 1:43 PM, Robert Haferd wrote:

Hi Marisa,

Thank you for coordinating the vehicle and parking passes. We have an additional request regarding refueling and important corrections regarding the Temple and Burn. Please confirm these for the updated permit and when we can expect that.

First, regarding generator refuel times, we would like to suggest adding an additional refuel window during non-peak hours, for example 4:00pm - 6:00pm. While the provided evening times (10pm - 12am) may be non-peak for most of your other events, those hours are during peak attendance for our event. We think it is in our collective interest to be able to refuel earlier in the evening. If this is amenable to you, please edit the updated permit.

Second, we have a few requested corrections regarding the Temple and Ceremonial Burn. Here they are below, by page number.

PAGE 3: please add "to be burned" language to the line below:

Flowers, herbs, trays, and bowls (to be burned)

PAGE 6 changes:

9:00pm Wednesday 11/8/17 - 2:00pm Saturday 11/11/17 (sunset) – Public Offerings Participants and members of the public are invited to interact with the Temple, including by writing offerings on the Temple, and by placing small, non-painted, wooden or paper objects on Burn Pad and offering trays.

6:00pm – 9pm Saturday 11/11/17 - Vigil Ceremony Prep: Memorial Wheels and blocks are removed from the Temple and placed on Burn Pad. Ceremonial dancers perform. (Refer to Site Safety Plan for detailed timeline of Burn Prep, Vigil Ceremony and Burn Cleanup.)

9pm Saturday 11/11/17 - 12am Sunday 11/12/17 – Temple Transformation Ceremony: Objects are burned and cleaned up by Fire Safety Team. Contents within 5 x 5 x 5. (Refer to Site Safety Plan for detailed timeline of Burn Prep, Vigil Ceremony and Burn Cleanup.)

Thank you,

Roman

Hello Robert,

Thank you for the meeting today concerning the vigil elements on the Washington Monument Grounds, NW quadrant. During the meeting, you indicated that you will request additional variances to the National Mall and Memorial Parks Level Turf 2 turf guidelines. It is our understanding that the list immediate below are the requests you intend to make, but if there are additional requests, please advise:

1. Request for the temple to remain on the Washington Monument grounds, NW quadrant turf beyond November 12, 2017;

2. Request an exemption for the Abraxas Stage matrax flooring to remain on the turf one additional day

3. Request an exemption from the requirement to install matrax flooring for the (2) 10 x 20 information tents

4. Request height variance for R-Evolution due to the change of height from 46' 9 5/8" with the base to 47'10" with the base as outlined in your October 10, 2017 email; and

Please provide all variance requests in the form of a letter to Acting Superintendent Cassius Cash. The mailing address is 900 Ohio Drive SW Washington, DC 20024. Another acceptable method is to attach the letter to an email to Cassius_Cash@nps.gov. Please cc Robbin Owen and myself on all requests.

In addition please provide an updated vigil memo to include:

2. An updated production timeline
3. A list of vehicles accessing the 17th Street sidewalk
4. More information regarding the proposed Soundbath reception
5. Insurance information, license plate and vehicle registration for the Abraxas Dragon and Solar Beatz vehicles
6. Daily program schedule

Please let me know if you have any additional questions.

Thank you

Marisa Richardson

Subject: Re: Follow-up to NPS Meeting

Hi Marisa,

Thanks for the recap. As discussed in the meeting today, however, Mr. Cash has already stated that he is reviewing our variance requests for Items 4 and 5 on your list regarding R-Evolution and promised to respond "shortly." In Mr. Cash's October 17, 2017 email acknowledging my October 16, 2017 email requesting the variance for your Item #5 (erecting R-
Evolution sculpture on turf), he stated "We are working diligently to work through this process with the new information pertaining to the sculpture from you," Mr. Cash’s October 10, 2017 email stated that "We are currently reviewing your additional submissions and anticipate responding shortly." in response to our additional details submitted about R-Evolution including the variance request for the additional height of 47'10" (Item #4).

Hence, we expect Mr. Cash to honor his word and provide responses as soon as possible to those variance requests for Items 4 and 5. That said, I am happy to include Items 4 and 5 again in our additional variance requests discussed in today’s meeting. In addition to your list above, we will also request a variance for the Soundbath igloo and Deadly Muppets tent to be installed without matrax.

Thank you,

Robert

Hi Marisa,

I may choose to send two separate variance requests letters - one for R-Evolution (4 and 5) and another for the other event items, to ensure the R-Evolution requests are in as soon as possible. Please standby.

Hi Marisa and Superintendent Cash,

Please find attached our updated permit activity memo, and a letter requesting the additional variances discussed in our October 19, 2017 meeting (except for the temple extension variance, which is now obsolete due to Mr. Obernesser's letter).

The updated memo includes a new vigil start time and the updates requested in Mr.
Obernesser’s October 25, 2017 letter. (Please note, our plans no longer include a Soundbath Reception.) The updated memo also includes revised proposed plans for a “R-Evolution Banner Tower” using OSHA-compliant scaffolding. Please see the attached scaffold vendor quote and safety plan in support of the R-Evolution Banner Tower request.

We are still finalizing our performance and music lineups and will send those as soon as possible.

We appreciate your responses to our variance requests and continued feedback and cooperation on our vigil plans.

Thank you,

Robert

Hi Marisa,

Thanks for the recap. As discussed in the meeting today, however, Mr. Cash has already stated that he is reviewing our variance requests for Items 4 and 5 on your list regarding R-Evolution and promised to respond "shortly." In Mr. Cash’s October 17, 2017 email acknowledging my October 16, 2017 email requesting the variance for your Item #5 (erecting R-Evolution sculpture on turf), he stated "We are working diligently to work through this process with the new information pertaining to the sculpture from you," Mr. Cash’s October 10, 2017 email stated that "We are currently reviewing your additional submissions and anticipate responding shortly." in response to our additional details submitted about R-Evolution including the variance request for the additional height of 47’10" (Item #4).

Hence, we expect Mr. Cash to honor his word and provide responses as soon as possible to those variance requests for Items 4 and 5. That said, I am happy to include Items 4 and 5 again in our additional variance requests discussed in today’s meeting. In addition to your list above, we will also request a variance for the Soundbath igloo and Deadly Muppets tent to be installed without matrix.

Thank you,
Hello Robert,

Thank you for the meeting today concerning the vigil elements on the Washington Monument Grounds, NW quadrant. During the meeting, you indicated that you will request additional variances to the National Mall and Memorial Parks Level Turf 2 turf guidelines. It is our understanding that the list immediate below are the requests you intend to make, but if there are additional requests, please advise:

1. Request for the temple to remain on the Washington Monument grounds, NW quadrant turf beyond November 12, 2017;

2. Request an exemption for the Abraxas Stage matrax flooring to remain on the turf one additional day

3. Request an exemption from the requirement to install matrax flooring for the (2) 10 x 20 information tents

4. Request height variance for R-Evolution due to the change of height from 46' 9 5/8" with the base to 47'10" with the base as outlined in your October 10, 2017 email; and

Please provide all variance requests in the form of a letter to Acting Superintendent Cassius Cash. The mailing address is 900 Ohio Drive SW Washington, DC 20024. Another acceptable method is to attach the letter to an email to Cassius_Cash@nps.gov. Please cc Robbin Owen and myself on all requests.

In addition please provide an updated vigil memo to include:

2. An updated production timeline

3. A list of vehicles accessing the 17th Street sidewalk

4. More information regarding the proposed Soundbath reception

5. Insurance information, license plate and vehicle registration for the Abraxas Dragon and Solar Beatz vehicles

6. Daily program schedule

Please let me know if you have any additional questions.

Thank you

Hi Marisa and Superintendent Cash,

Please find attached our updated permit activity memo, and a letter requesting the additional variances discussed in our October 19, 2017 meeting (except for the temple extension variance, which is now obsolete due to Mr. Obernesser's letter).

The updated memo includes a new vigil start time and the updates requested in Mr. Obernesser's October 25, 2017 letter. (Please note, our plans no longer include a Soundbath Reception.) The updated memo also includes revised proposed plans for a "R-Evolution Banner Tower" using OSHA-compliant scaffolding. Please see the attached scaffold vendor quote and safety plan in support of the R-Evolution Banner Tower request.

We are still finalizing our performance and music lineups and will send those as soon as possible.

We appreciate your responses to our variance requests and continued feedback and cooperation on our vigil plans.

Thank you,

Robert

Subject: Re: Follow-up to NPS Meeting

Good Morning Robert,

Thank you for sending the documents along. Just a couple of quick questions.

Can you confirm the height of the if R-Evolution scaffolding is 44 ft 11 inches (vigil memo) or 15 feet square or 26 feet high? Please provide drawings of what will be on the scaffolding and engineered drawings of the scaffolding with attention to anchoring system, wind loads etc. Is it an exact replica of the statue?

Your memo states that the scaffolding will be installed on Monday November 6 -15 which is 9 days. Do you have a plan to rotate the scaffolding or shorten the length of time to adhere to 5 day turf limit and 3 day photosynthesis? Or will the scaffolding have enough lift to allow for photosynthesis to still occur?

Are you and you team available on Wednesday to meet. I would like to have a draft permit to you review by Thursday?

I will follow up with any additional questions of clarifications.

Thank you
Marisa
(I thought I hit send on this email around 10 am)

Please provide drawings of what will be on the scaffolding and engineered drawings of the scaffolding with attention to anchoring system, wind loads etc. Is it an exact replica of the statue?

Your memo states that the scaffolding will be installed on Monday November 6 -15 which is 9 days. Do you have a plan to rotate the scaffolding or shorten the length of time to adhere to 5 day turf limit and 3 day photosynthesis? Or will the scaffolding have enough lift to allow for photosynthesis to still occur?
Are you and your team available on Wednesday to meet. I would like to have a draft permit to you review by Thursday?

I will follow up with any additional questions of clarifications.

Thank you
Marisa

Hi Marisa and Superintendent Cash,

Please find attached our updated permit activity memo, and a letter requesting the additional variances discussed in our October 19, 2017 meeting (except for the temple extension variance, which is now obsolete due to Mr. Obernesser's letter).

The updated memo includes a new vigil start time and the updates requested in Mr. Obernesser's October 25, 2017 letter. (Please note, our plans no longer include a Soundbath Reception.) The updated memo also includes revised proposed plans for a "R-Evolution Banner Tower" using OSHA-compliant scaffolding. Please see the attached scaffold vendor quote and safety plan in support of the R-Evolution Banner Tower request.

We are still finalizing our performance and music lineups and will send those as soon as possible.

We appreciate your responses to our variance requests and continued feedback and cooperation on our vigil plans.

Thank you,

Robert

Hi Marisa,

Thanks for the recap. As discussed in the meeting today, however, Mr. Cash has already stated that he is reviewing our variance requests for Items 4 and 5 on your list regarding R-Evolution and promised to respond "shortly." In Mr. Cash's October 17, 2017 email acknowledging my October 16, 2017 email requesting the variance for your Item #5 (erecting R-Evolution sculpture on turf), he stated "We are working diligently to work through this process with the new information pertaining to the sculpture from you," Mr. Cash's October 10, 2017 email stated that "We are currently reviewing your additional submissions and anticipate responding shortly." in response to our additional details submitted about R-Evolution including the variance request for the additional height of 47'10" (Item #4).

Hence, we expect Mr. Cash to honor his word and provide responses as soon as possible to those variance requests for Items 4 and 5. That said, I am happy to include Items 4 and 5 again in our additional variance requests discussed in today's meeting. In addition to your list above, we will also request a variance for the Soundbath igloo and Deadly Muppets tent to be installed without matrix.

Thank you,

Robert

Hello Robert,

Thank you for the meeting today concerning the vigil elements on the Washington Monument Grounds, NW quadrant. During the meeting, you indicated that you will request additional variances to the National Mall and Memorial Parks Level Turf 2 turf guidelines. It is our understanding that the list immediate below are the requests you intend to make, but if there are additional requests, please advise:

1. Request for the temple to remain on the Washington Monument grounds, NW quadrant turf beyond November 12, 2017;

2. Request an exemption for the Abraxas Stage matrax flooring to remain on the turf one additional day

3. Request an exemption from the requirement to install matrax flooring for the (2) 10 x 20 information tents

4. Request height variance for R-Evolution due to the change of height from 46' 9 5/8" with the base to 47'10" with the base as outlined in your October 10, 2017 email; and

Please provide all variance requests in the form of a letter to Acting Superintendent Cassius Cash. The mailing address is 900 Ohio Drive SW Washington, DC 20024. Another acceptable method is to attach the letter to an email to Cassius_Cash@nps.gov. Please cc Robbin Owen and myself on all requests.

In addition please provide an updated vigil memo to include:

2. An updated production timeline
3. A list of vehicles accessing the 17th Street sidewalk
4. More information regarding the proposed Soundbath reception
5. Insurance information, license plate and vehicle registration for the Abraxas Dragon and Solar Beatz vehicles
6. Daily program schedule

Please let me know if you have any additional questions.

Thank you

<Catharsis Letter to C. Cash Requesting Additional Vigil Variances 10 27 17.docx (1).pdf>
Good Afternoon Robert,

Sheila sent a meeting notice to the Catharsis team this morning.

I have attached the response letter to your variance requests signed by Robbin Owen. I have attached my notes from your latest vigil proposal. I hope to use this as a point of reference for our discussion tomorrow morning in order to solidify the details for the permit.

In the attached memo I've asked for more information on the following:

1. True Mirror Experience
2. Hanging Balls
3. Created Equal
4. Reflection: The Stars
5. The Graphic Sex Project
6. The Donald Dance Floor (date of setup/strike)
7. Scaffolding for R-Evolution

How is the saw dust from the Chainsaw Portraits contained? In addition please provide Mr. Richardson with a copy of the NCR Outdoor and Tent Requirements and provide the following information:

The contractor will need to follow the "NCR Outdoor Event and Tent Requirements" for propane use or storage:

- Propane cylinder (LPG) will need to be secured
- No storage of propane on site
- A portable fire extinguisher will need to be available, minimum rating, 30BC
- Maintain all combustible material, away from the propane, at least 10 ft

Regards

Marisa

Hi Marisa,

On the sawdust containment, Mr. Richardson says:

I use a 10x10 popup tent with deer fence and fiberglass screen secured to the tent, as pictured. A plastic tarp will be used underneath the carving area. Between the deer fence, window screen and tarp I have good results in controlling wood and chips.

All propane and gasoline fuel will reside off site when I'm not carving.

I will procure a 30-AB extinguisher. currently I own 2x 10-AB extinguishers.

Robert

Please find attached our updated permit activity memo, and a letter requesting the additional variances discussed in our October 19, 2017 meeting (except for the temple extension variance, which is now obsolete due
to Mr. Obernesser's letter).

The updated memo includes a new vigil start time and the updates requested in Mr. Obernesser's October 25, 2017 letter. (Please note, our plans no longer include a Soundbath Reception.) The updated memo also includes revised proposed plans for a "R-Evolution Banner Tower" using OSHA-compliant scaffolding. Please see the attached scaffold vendor quote and safety plan in support of the R-Evolution Banner Tower request.

We are still finalizing our performance and music lineups and will send those as soon as possible.

We appreciate your responses to our variance requests and continued feedback and cooperation on our vigil plans.

Thank you,

Robert

Hi Marisa,

Thanks for the recap. As discussed in the meeting today, however, Mr. Cash has already stated that he is reviewing our variance requests for Items 4 and 5 on your list regarding R-Evolution and promised to respond "shortly." In Mr. Cash's October 17, 2017 email acknowledging my October 16, 2017 email requesting the variance for your Item #5 (erecting R-Evolution sculpture on turf), he stated "We are working diligently to work through this process with the new information pertaining to the sculpture from you," Mr. Cash's October 10, 2017 email stated that "We are currently reviewing your additional submissions and anticipate responding shortly." in response to our additional details submitted about R-Evolution including the variance request for the additional height of 47’10" (Item #4).
Hence, we expect Mr. Cash to honor his word and provide responses as soon as possible to those variance requests for Items 4 and 5. That said, I am happy to include Items 4 and 5 again in our additional variance requests discussed in today's meeting. In addition to your list above, we will also request a variance for the Soundbath igloo and Deadly Muppets tent to be installed without matrax.

Thank you,

Robert

Hello Robert,

Thank you for the meeting today concerning the vigil elements on the Washington Monument Grounds, NW quadrant. During the meeting, you indicated that you will request additional variances to the National Mall and Memorial Parks Level Turf 2 turf guidelines. It is our understanding that the list immediate below are the requests you intend to make, but if there are additional requests, please advise:

1. Request for the temple to remain on the Washington Monument grounds, NW quadrant turf beyond November 12, 2017;
2. Request an exemption for the Abraxas Stage matrax flooring to remain on the turf one additional day
3. Request an exemption from the requirement to install matrax flooring for the (2) 10 x 20 information tents

4. Request height variance for R-Evolution due to the change of height from 46' 9 5/8" with the base to 47'10" with the base as outlined in your October 10, 2017 email; and

Please provide all variance requests in the form of a letter to Acting Superintendent Cassius Cash. The mailing address is 900 Ohio Drive SW Washington, DC 20024. Another acceptable method is to attach the letter to an email to Cassius_Cash@nps.gov. Please cc Robbin Owen and myself on all requests.

In addition please provide an updated vigil memo to include:

2. An updated production timeline
3. A list of vehicles accessing the 17th Street sidewalk
4. More information regarding the proposed Soundbath reception
5. Insurance information, license plate and vehicle registration for the Abraxas Dragon and Solar Beatz vehicles
6. Daily program schedule
Please let me know if you have any additional questions.

Thank you

Hi Marisa,
Looking forward to talking in the morning but will answer a few questions as well:

- Confirmed the domes and other tent structures will not be walled/skinned until after sundown on Thursday Nov 9
- Acknowledge and appreciate your recommendations and concurrence around center camp and live stage
- **SolarBeatz** - confirmed we will not drive SolarBeatz over any turf. Based on our experience last year and the size, my suspicion is that we can make the turn to get it around the corner from the wide walkway to the diagonal walkway (it is *significantly* smaller than Abraxas)... if that's not the case or we aren't allowed to try, we will build a roadway. FYI I believe SolarBeatz is planning to arrive on Tuesday night for setup (Nov 7) so we will have it in a temporary spot for setup adjacent to the final spot until Thursday night. We will rearrange Matrax as needed to make this happen. Can discuss in the morning as needed.
- **Rainbow Portal/Nataraja placement** - acknowledged on the enkamat and matrax, that won't be a problem. The pieces of Nataraja will be carried over by hand cart from the sidewalk and assembled on matrax.
- Shade tent - yes we will put double enkamat and plywood under post legs
• **Nest Project** - Acknowledged on matrax under the Nest.
• **Searching for Eon** - this will just be folding tables and chairs. Should not require matrax.
• **Da Wa Da** - acknowledged on dates
• **Donald Trump Dance Floor** - Acknowledged on Matrax.
• **Graphic Sex Project** - yes this will be in a tentstallation with folding tables and chairs. See attached photos.

- **Reflection: The Stars...** - see photos here. I suspect a concern will be raised about keeping one face open. Essential to the artistic integrity of the piece here is folks experiencing it in darkness. Have a few ideas on how to accommodate that in a way that's satisfactory to the NPS requirements. Can discuss in the morning.

- **True Mirrors Experience** - I expect Michael or Leonard will remember this project from last year, it was right on the walkway and a *huge* hit with all the folks in town for veterans day.. John had many veterans there crying and experiencing themselves in a new way. See the attached photo. Basically they set it up as two of these pole walls meeting at an angle with a couple poles out to hold it up. It is filled with a cloth curtain and then the mirrors are attached to the vertical columns. The only thing that touches the ground is the round blocks, we put double enkamat and plywood under those. I don't think it will significantly block photo synthesis but we'll only have the curtains in place on Friday and Saturday and half of Sunday anyway.

- **Hanging Balls** - this is super simple. Photo attached. The touch point is little poles just like what you see in the photo. I believe it can go direct on the turf but we can put in enkamat if needed.

- **Meso Creso** - confirmed 4 pieces matrax under the DJ truck.

I still need to get back to you on:

- **Created Equal** - more details / diagram - will review with the artist and get to you tomorrow.

- **Paradise Lies at the Feet of the Mother** - not included in the meeting sent yesterday, this is a small partially enclosed 8x10 temporary "room" art piece that I was waiting to hear back from the artist to confirm.. I will send photos and details after the meeting tomorrow. I expect we can follow photosynthesis requirements and it won't be controversial in any way. I expect this is the last significant new free standing small art piece we will add to the memo (besides what falls under the tentstallations).

Hope this is helpful,
Joshua

Good Afternoon Robert,

Sheila sent a meeting notice to the Catharsis team this morning.
I have attached the response letter to your variance requests signed by Robbin Owen. I have attached my notes from your latest vigil proposal. I hope to use this as a point of reference for our discussion tomorrow morning in order to solidify the details for the permit.

In the attached memo I've asked for more information on the following:

1. True Mirror Experience
2. Hanging Balls
3. Created Equal
4. Reflection: The Stars
5. The Graphic Sex Project
6. The Donald Dance Floor (date of setup/strike)
7. Scaffolding for R-Evolution

How is the saw dust from the Chainsaw Portraits contained? In addition please provide Mr. Richardson with a copy of the NCR Outdoor and Tent Requirements and provide the following information:

The contractor will need to follow the "NCR Outdoor Event and Tent Requirements" for propane use or storage

- Propane cylinder (LPG) will need to be secured
- No storage of propane on site
- A portable fire extinguisher will need to be available, minimum rating, 30BC
- Maintain all combustible material, away from the propane, at least 10 ft

Regards

Marisa

Thank you for sending the documents along. Just a couple of quick questions.

Can you confirm the height of the if R-Evolution scaffolding is 44 ft 11 inches (vigil memo) or 15 feet square or 26 feet high? Please provide drawings of what will be on the scaffolding and engineered drawings of the scaffolding with attention to anchoring system, wind loads etc. Is it an exact replica of the statue?

Your memo states that the scaffolding will be installed on Monday November 6 -15 which is 9 days. Do you have a plan to rotate the scaffolding or shorten the length of time to adhere to 5 day turf limit and 3 day photosynthesis? Or will the scaffolding have enough lift to allow for photosynthesis to still occur?

Are you and you team available on Wednesday to meet. I would like to have a draft
permit to you review by Thursday?
I will follow up with any additional questions of clarifications.

Thank you
Marisa

I apologized, our team last night shortened the height to 26 feet for artistic reasons. I was sleepy when I forward it along.

The attached document height is correct.
Hello All,

Attached you will find Catharsis scaffolding diagram. The proposed scaffolding is 24’ wide x 14’ deep x 26’ high. Over the weekend the group decided not to display images of R-Evolution but create new images centered around women's rights and the Equal Rights Amendment. Once the artwork is created Catharsis will share the images with the NPS as a courtesy. Their intent is to share the images either today or tomorrow. The scaffolding will be erected on November 7th and removed on November 13, 2017. The banners (images) will be attached to the scaffolding on November 10-12.

The total event including setup/vigil/strike will take place from November 7-15, however the group reserves the right hold the NW Quadrant of the Washington Monument Grounds until March 1, 2018, while they explore other options.

The variance denial letter for the turf exemptions and time limits were not challenged by Catharsis and they adjusted their load in and load out accordingly.

We desire to issue a draft permit tomorrow for Catharsis review, do you see any issues with this and are you in concurrence.

Marisa

Dear Marisa,

I am replying to your question below about the Scaffolding and providing additional specifications about the materials and drawings.

We are not going to call it R-Evolu
Marisa, thanks for your time this morning (and that of your team) and patience on the last details. Here are details on the two art pieces I mentioned which were missing them. I'm also copying this into our working version of the permit memo which I understand is receiving other final updates as discussed this morning. Feel free to call me direct if you have any questions/concerns on this or any of the other art pieces.

**Paradise Lies at the Feet of the Mother**

**Artist:** Farrah Abubaker  
**Logistics:** 8x10 footprint, will be on Matrax and follow photosynthesis guidelines

Paradise Lies at the Feet of the Mother brings to life an installation of my soul. Incorporating audio recorded from my handmade steel tongue-drums, paintings, and knitting activated by black-lights, my objective is to create an immersive space for the viewer to connect with. The periodic change in the lights represents the rhythm of the change in my life. I want you to feel that you have stepped inside my soul, and leave feeling like you have an understanding of how I cope and understand the world around me. See short video [here](#) and attached photo.

**Created Equal**

**Artist:** Branden Hall  
**Logistics:** The frame touches the ground with flat 2x4's which will have enkamat and plywood squares, it is secured with 12" long rebar stakes. There is a marked out safety perimeter of 10' x 8' around the piece. It consists 4 homemade wood stanchions and bright yellow plastic chain. There's a sign about the piece and how to start it on one of the stanchions. See attached daytime and nighttime photo. I am going to propose to the artist that we bungie the arm to the frame when it is not being supervised, would welcome any other guidance or suggestions on possible safety concerns.

We think of Americans as "created equal", but that certainly does not mean we all live the same kind of lives. Much of how our lives go is outside of our control, yet there's still beauty in chaos. That's what Created Equal is all about. Created Equal is an interactive, kinetic LED sculpture that allows participants to experience how tiny changes can have huge effects. The sculpture is a wooden triple pendulum that participants start swinging using their own strength that has LEDs on the bottom-most arm. The motion of the piece is unique every time. [Video](#)

Hello Robert,

Thank you for the meeting today concerning the vigil elements on the Washington Monument Grounds, NW quadrant. During the meeting, you indicated that you will request additional variances to the National Mall and Memorial Parks Level Turf 2 turf guidelines. It is our understanding that the list immediate below are the requests you intend to make, but if there are additional requests, please advise:

1. Request for the temple to remain on the Washington Monument grounds, NW quadrant turf beyond November 12, 2017;
2. Request an exemption for the Abraxas Stage matrax flooring to remain on the turf one additional day;
3. Request an exemption from the requirement to install matrax flooring for the (2) 10 x 20 information tents;
4. Request height variance for R-Evolution due to the change of height from 46' 9 5/8" with the base to 47'10" with the base as outlined in your October 10, 2017 email; and

Please provide all variance requests in the form of a letter to Acting Superintendent Cassius Cash. The mailing address is 900 Ohio Drive SW, Washington, DC 20024. Another acceptable method is to attach the letter to an email to Cassius_Cash@nps.gov. Please cc Robbin Owen and myself on all requests.

In addition please provide an updated vigil memo to include:

2. An updated production timeline.
3. A list of vehicles accessing the 17th Street sidewalk.
4. More information regarding the proposed Soundbath reception.
5. Insurance information, license plate and vehicle registration for the Abraxas Dragon and Solar Beatz vehicles.
6. Daily program schedule.

Please let me know if you have any additional questions.

Thank you,

Marisa, thanks for your time this morning (and that of your team) and patience on the last details. Here are details on the two art pieces I mentioned which were missing them. I'm also copying this into our working version of the permit memo which I understand is receiving other final updates as discussed this morning. Feel free to call me direct if you have any questions/concerns on this or any of the other art pieces.

Paradise Lies at the Feet of the Mother
Artist: Farrah Abubaker
Logistics: 8x10 footprint, will be on Matrax and follow photosynthesis guidelines

Paradise Lies at the Feet of the Mother brings to life an installation of my soul. Incorporating audio recorded from my handmade steel tongue-drums, paintings, and knitting activated by black-lights, my objective is to create an immersive space for the viewer to connect with. The periodic change in the lights represents the rhythm of the change in my life. I want you to feel that you have stepped inside my soul, and leave feeling like you have an understanding of how I cope and understand the world around me. See short video here and attached photo.

Created Equal
Artist: Branden Hall
Logistics: The frame touches the ground with flat 2x4's which will have enkamat and plywood squares, it is secured with 12" long rebar stakes. There is a marked out safety perimeter of 10' x 8' around the piece. It consists 4 homemade wood stanchions and bright yellow plastic chain. There's a sign about the piece and how to start it on one of the stanchions. See attached daytime and nighttime photo. I am going to propose to the artist that we bungie the arm to the frame when it is not being supervised, would welcome any other guidance or suggestions on possible safety concerns.

We think of Americans as "created equal", but that certainly does not mean we all live the same kind of lives. Much of how our lives go is outside of our control, yet there's still beauty in chaos. That's what Created Equal is all about. Created Equal is an interactive, kinetic LED sculpture that allows participants to experience how tiny changes can have huge effects. The sculpture is a wooden triple pendulum that participants start swinging using their own strength that has LEDs on the bottom-most arm. The motion of the piece is unique every time. Video

Hi Marisa,
Looking forward to talking in the morning but will answer a few questions as well:

- Confirmed the domes and other tent structures will not be walled/skinned until after sundown on Thursday Nov 9
- Acknowledge and appreciate your recommendations and concurrence around center camp and live stage
- **SolarBeatz** - confirmed we will not drive SolarBeatz over any turf. Based on our experience last year and the size, my suspicion is that we can make the turn to get it around the corner from the wide walkway to the diagonal walkway (it is *significantly* smaller than Abraxas)... if that's not the case or we aren't allowed to try, we will build a roadway. FYI I believe SolarBeatz is planning to arrive on Tuesday night for setup (Nov
7) so we will have it in a temporary spot for setup adjacent to the final spot until Thursday night. We will rearrange Matrax as needed to make this happen. Can discuss in the morning as needed.

- **Rainbow Portal/Nataraja placement** - acknowledged on the enkamat and matrax, that won't be a problem. The pieces of Nataraja will be carried over by hand cart from the sidewalk and assembled on matrax.
- Shade tent - yes we will put double enkamat and plywood under post legs
- **Nest Project** - Acknowledged on matrax under the Nest.
- **Searching for Eon** - this will just be folding tables and chairs. Should not require matrax.
- **Da Wa Da** - acknowledged on dates
- **Donald Trump Dance Floor** - Acknowledged on Matrax.
- **Graphic Sex Project** - yes this will be in a tentstallation with folding tables and chairs. See attached photos.
- **Reflection: The Stars...** - see photos [here](#). I suspect a concern will be raised about keeping one face open. Essential to the artistic integrity of the piece here is folks experiencing it in darkness. Have a few ideas on how to accommodate that in a way that's satisfactory to the NPS requirements. Can discuss in the morning.
- **True Mirrors Experience** - I expect Michael or Leonard will remember this project from last year, it was right on the walkway and a *huge* hit with all the folks in town for veterans day.. John had many veterans there crying and experiencing themselves in a new way. See the attached photo. Basically they set it up as two of these pole walls meeting at an angle with a couple poles out to hold it up. It is filled with a cloth curtain and then the mirrors are attached to the vertical columns. The only thing that touches the ground is the round blocks, we put double enkamat and plywood under those. I don't think it will significantly block photo synthesis but we'll only have the curtains in place on Friday and Saturday and half of Sunday anyway.
- **Hanging Balls** - this is super simple. Photo attached. The touch point is little poles just like what you see in the photo. I believe it can go direct on the turf but we can put in enkamat if needed.
- **Meso Creso** - confirmed 4 pieces matrax under the DJ truck.

I still need to get back to you on:

- **Created Equal** - more details / diagram - will review with the artist and get to you tomorrow.
- **Paradise Lies at the Feet of the Mother** - not included in the meeting sent yesterday, this is a small partially enclosed 8x10 temporary "room" art piece that I was waiting to hear back from the artist to confirm.. I will send photos and details after the meeting tomorrow. I expect we can follow photosynthesis requirements and it won't be controversial in any way. I expect this is the last significant new free standing small art piece we will add to the memo (besides what falls under the tentstallations).

Hope this is helpful,
Joshua

Good Afternoon Robert,

Sheila sent a meeting notice to the Catharsis team this morning.

I have attached the response letter to your variance requests signed by Robbin Owen. I have attached my notes from your latest vigil proposal. I hope to use this as a point of reference for our discussion tomorrow morning in order to solidify the details for the permit.

In the attached memo I've asked for more information on the following:

1. True Mirror Experience
2. Hanging Balls
3. Created Equal
4. Reflection: The Stars
5. The Graphic Sex Project
6. The Donald Dance Floor (date of setup/strike)
7. Scaffolding for R-Evolution

How is the saw dust from the Chainsaw Portraits contained? In addition please provide Mr. Richardson with a copy of the NCR Outdoor and Tent Requirements and provide the following information:

The contractor will need to follow the "NCR Outdoor Event and Tent Requirements" for propane use or storage

- Propane cylinder (LPG) will need to be secured
- No storage of propane on site
- A portable fire extinguisher will need to be available, minimum rating, 30BC
- Maintain all combustible material, away from the propane, at least 10 ft

Regards

Marisa

Good Morning Robert,

Thank you for sending the documents along. Just a couple of quick questions.

Can you confirm the height of the if R-Evolution scaffolding is 44 ft 11 inches (vigil memo) or 15 feet square or 26 feet high? Please provide drawings of what will be on
the scaffolding and engineered drawings of the scaffolding with attention to anchoring system, wind loads etc. Is it an exact replica of the statue?

Your memo states that the scaffolding will be installed on Monday November 6 -15 which is 9 days. Do you have a plan to rotate the scaffolding or shorten the length of time to adhere to 5 day turf limit and 3 day photosynthesis? Or will the scaffolding have enough lift to allow for photosynthesis to still occur?

Are you and you team available on Wednesday to meet. I would like to have a draft permit to you review by Thursday?

I will follow up with any additional questions of clarifications.

Thank you
Marisa

Hi Marisa and Superintendent Cash,

Please find attached our updated permit activity memo, and a letter requesting the additional variances discussed in our October 19, 2017 meeting (except for the temple extension variance, which is now obsolete due to Mr. Obernesser's letter).

The updated memo includes a new vigil start time and the updates requested in Mr. Obernesser's October 25, 2017 letter. (Please note, our plans no longer include a Soundbath Reception.) The updated memo also includes revised proposed plans for a "R-Evolution Banner Tower" using OSHA-compliant scaffolding. Please see the attached scaffold vendor quote and safety plan in support of the R-Evolution Banner Tower request.

We are still finalizing our performance and music lineups and will send those as soon as possible.

We appreciate your responses to our variance requests and continued feedback and cooperation on our vigil plans.

Thank you,

Robert

Hi Michael and Marisa,

Regarding the chainsaw portraits, we understand form today that the 10x10 would need matrax...
if there is a tarp used. The artist can use fiberglass window screen mesh, which allows light through but catches sawdust and woodchips just as well as the tarp. Would this require matrax?

Thanks,

Robert

Begin forwarded message:

Hi Michael and Marisa,

Regarding the chainsaw portraits, we understand form today that the 10x10 would need matrax if there is a tarp used. The artist can use fiberglass window screen mesh, which allows light through but catches sawdust and woodchips just as well as the tarp. Would this require matrax?
Thanks,

Robert

Hi Marisa,

On the sawdust containment, Mr. Richardson says:

I use a 10x10 popup tent with deer fence and fiberglass screen secured to the tent, as pictured. A plastic tarp will be used underneath the carving area. Between the deer fence, window screen and tarp I have good results in controlling wood and chips.

All propane and gasoline fuel will reside off site when I’m not carving.

I will procure a 30-AB extinguisher, currently I own 2x 10-AB extinguishers.

Robert

Good Afternoon Robert,

Sheila sent a meeting notice to the Catharsis team this morning.

I have attached the response letter to your variance requests signed by Robbin Owen. I have attached my notes from your latest vigil proposal. I hope to use this as a point of reference for our discussion tomorrow morning in order to solidify the details for the permit.

In the attached memo I’ve asked for more information on the following:

1. True Mirror Experience
2. Hanging Balls
3. Created Equal
4. Reflection: The Stars
5. The Graphic Sex Project
6. The Donald Dance Floor (date of setup/strike)
7. Scaffolding for R-Evolution

How is the saw dust from the Chainsaw Portraits contained? In addition please provide Mr. Richardson with a copy of the NCR Outdoor and Tent Requirements and provide the following information:

The contractor will need to follow the “NCR Outdoor Event and Tent Requirements” for propane use or storage

- Propane cylinder (LPG) will need to be secured
- No storage of propane on site
- A portable fire extinguisher will need to be available, minimum rating, 30BC
- Maintain all combustible material, away from the propane, at least 10 ft

Regards

Marisa

On Oct 30, 2017 4:23 PM, "Marisa Richardson" <marisa_richardson@nps.gov> wrote:

Good Morning Robert,

Thank you for sending the documents along. Just a couple of quick questions.

Can you confirm the height of the if R-Evolution scaffolding is 44 ft 11 inches (vigil memo) or 15 feet square or 26 feet high? Please provide drawings of what will be on the scaffolding and engineered drawings of the scaffolding with attention to anchoring system, wind loads etc. Is it an exact replica of the statue?

Your memo states that the scaffolding will be installed on Monday November 6 -15 which is 9 days. Do you have a plan to rotate the scaffolding or shorten the length of time to adhere to 5 day turf limit and 3 day photosynthesis? Or will the scaffolding have enough lift to allow for photosynthesis to still occur?

Are you and you team available on Wednesday to meet. I would like to have a draft permit to you review by Thursday?

I will follow up with any additional questions of clarifications.

Thank you
Marisa

Hi Marisa and Superintendent Cash,

Please find attached our updated permit activity memo, and a letter requesting the additional variances discussed in our October 19, 2017 meeting (except for the temple extension variance, which is now obsolete due to Mr. Obernesser's letter).

The updated memo includes a new vigil start time and the
updates requested in Mr. Obernesser's October 25, 2017 letter. (Please note, our plans no longer include a Soundbath Reception.) The updated memo also includes revised proposed plans for a "R-Evolution Banner Tower" using OSHA-compliant scaffolding. Please see the attached scaffold vendor quote and safety plan in support of the R-Evolution Banner Tower request.

We are still finalizing our performance and music lineups and will send those as soon as possible.

We appreciate your responses to our variance requests and continued feedback and cooperation on our vigil plans.

Thank you,

Robert

Hi Marisa,

Thanks for the recap. As discussed in the meeting today, however, Mr. Cash has already stated that he is reviewing our variance requests for Items 4 and 5 on your list regarding R-Evolution and promised to respond "shortly." In Mr. Cash's October 17, 2017 email acknowledging my October 16, 2017 email requesting the variance for your Item #5 (erecting R-Evolution sculpture on turf), he stated "We are working diligently to work through this process with the new information pertaining to the sculpture from you," Mr. Cash's October 10, 2017 email stated that "We are currently reviewing your additional submissions and anticipate responding shortly."
response to our additional details submitted about R-Evolution including the variance request for the additional height of 47'10" (Item #4).

Hence, we expect Mr. Cash to honor his word and provide responses as soon as possible to those variance requests for Items 4 and 5. That said, I am happy to include Items 4 and 5 again in our additional variance requests discussed in today's meeting. In addition to your list above, we will also request a variance for the Soundbath igloo and Deadly Muppets tent to be installed without matrax.

Thank you,

Robert

On Wed, Nov 1, 2017 at 3:29 PM, Joshua Carroll wrote:

Marisa, thanks for your time this morning (and that of your team) and patience on the last details. Here are details on the two art pieces I mentioned which were missing them. I'm also copying this into our working version of the permit memo which I understand is receiving other final updates as discussed this morning. Feel free to call me direct if you have any questions/concerns on this or any of the other art pieces.

Paradise Lies at the Feet of the Mother
Artist: Farrah Abubaker
Logistics: 8x10 footprint, will be on Matrax and follow photosynthesis guidelines

Paradise Lies at the Feet of the Mother brings to life an installation of my soul. Incorporating audio recorded from my handmade steel tongue-drums, paintings, and knitting activated by black-lights, my objective is to create an immersive space for the viewer to connect with. The periodic change in the lights represents the rhythm of the change in my life. I want you to feel that you have stepped inside
my soul, and leave feeling like you have an understanding of how I cope and understand the world around me. See short video [here](#) and attached photo.

**Created Equal**  
**Artist:** Branden Hall  
**Logistics:** The frame touches the ground with flat 2x4’s which will have enkamat and plywood squares, it is secured with 12” long rebar stakes. There is a marked out safety perimeter of 10’ x 8’ around the piece. It consists 4 homemade wood stanchions and bright yellow plastic chain. There’s a sign about the piece and how to start it on one of the stanchions. See attached daytime and nighttime photo. I am going to propose to the artist that we bungie the arm to the frame when it is not being supervised, would welcome any other guidance or suggestions on possible safety concerns.

We think of Americans as "created equal", but that certainly does not mean we all live the same kind of lives. Much of how our lives go is outside of our control, yet there's still beauty in chaos. That's what Created Equal is all about. Created Equal is an interactive, kinetic LED sculpture that allows participants to experience how tiny changes can have huge effects. The sculpture is a wooden triple pendulum that participants start swinging using their own strength that has LEDs on the bottom-most arm. The motion of the piece is unique every time. [Video](#)

Hi Marisa,  
Looking forward to talking in the morning but will answer a few questions as well:  

- Confirmed the domes and other tent structures will not be walled/skinned until after sundown on Thursday Nov 9  
- Acknowledge and appreciate your recommendations and concurrence around center camp and live stage  
- **SolarBeatz** - confirmed we will not drive SolarBeatz over any turf. Based on our experience last year and the size, my suspicion is that we can make the turn to get it around the corner from the wide walkway to the diagonal walkway (it is *significantly* smaller than Abraxas)... if that's not the case or we aren't allowed to try, we will build a roadway. FYI I believe SolarBeatz is planning to arrive on Tuesday night for setup (Nov 7) so we will have it in a temporary spot for setup adjacent to the final spot until Thursday night. We will rearrange Matrax as needed to make this happen. Can discuss in the morning as needed.  
- **Rainbow Portal/Nataraja placement** - acknowledged on the enkamat and matrax, that won't be a problem. The pieces of Nataraja will be carried over by hand cart from the sidewalk and assembled on matrax.  
- Shade tent - yes we will put double enkamat and plywood under post legs  
- **Nest Project** - Acknowledged on matrax under the Nest.  
- **Searching for Eon** - this will just be folding tables and chairs. Should not require matrax.  
- **Da Wa Da** - acknowledged on dates  
- **Donald Trump Dance Floor** - Acknowledged on Matrax.  
- **Graphic Sex Project** - yes this will be in a tentstallation with folding tables and chairs. See attached photos.  
- **Reflection: The Stars...** - see photos [here](#). I suspect a concern will be raised about keeping one face open. Essential to the artistic integrity of the piece here is folks experiencing it in darkness. Have a few ideas on how to accommodate that in a way that's satisfactory to the NPS requirements. Can discuss in the morning.  
- **True Mirrors Experience** - I expect Michael or Leonard will remember this project from last year, it was right on the walkway and a “huge” hit with all the folks in town for veterans day.. John had many veterans there crying and experiencing themselves in a new way. See the attached photo. Basically they set it up as two of these pole walls meeting at an angle with a couple poles out to hold it up. It is filled with a cloth
curtain and then the mirrors are attached to the vertical columns. The only thing that touches the ground is the round blocks, we put double enkamat and plywood under those. I don't think it will significantly block photosynthesis but we'll only have the curtains in place on Friday and Saturday and half of Sunday anyway.

- **Hanging Balls** - this is super simple. Photo attached. The touch point is little poles just like what you see in the photo. I believe it can go direct on the turf but we can put in enkamat if needed.
- **Meso Creso** - confirmed 4 pieces matrax under the DJ truck.

I still need to get back to you on:

- **Created Equal** - more details / diagram - will review with the artist and get to you tomorrow.
- **Paradise Lies at the Feet of the Mother** - not included in the meeting sent yesterday, this is a small partially enclosed 8x10 temporary "room" art piece that I was waiting to hear back from the artist to confirm.. I will send photos and details after the meeting tomorrow. I expect we can follow photosynthesis requirements and it won't be controversial in any way. I expect this is the last significant new free standing small art piece we will add to the memo (besides what falls under the tentstallations).

Hope this is helpful,
Joshua

I have attached the response letter to your variance requests signed by Robbin Owen. I have attached my notes from your latest vigil proposal. I hope to use this as a point of reference for our discussion tomorrow morning in order to solidify the details for the permit.

In the attached memo I’ve asked for more information on the following:

1. True Mirror Experience
2. Hanging Balls
3. Created Equal
4. Reflection: The Stars
5. The Graphic Sex Project
6. The Donald Dance Floor (date of setup/strike)
7. Scaffolding for R-Evolution

How is the saw dust from the Chainsaw Portraits contained? In addition please provide Mr. Richardson with a copy of the NCR Outdoor and Tent Requirements and provide the following information:

   The contractor will need to follow the "NCR Outdoor Event and Tent Requirements" for propane use or storage
   
   • Propane cylinder (LPG) will need to be secured
   • No storage of propane on site
   • A portable fire extinguisher will need to be available, minimum rating, 30BC
   • Maintain all combustible material, away from the propane, at least 10 ft

Regards

Marisa

On Oct 30, 2017 4:23 PM, "Marisa Richardson" <marisa_richardson@nps.gov> wrote:

Good Morning Robert,

Thank you for sending the documents along. Just a couple of quick questions.

Can you confirm the height of the if R-Evolution scaffolding is 44 ft 11 inches
(vigil memo) or 15 feet square or 26 feet high? Please provide drawings of what will be on the scaffolding and engineered drawings of the scaffolding with attention to anchoring system, wind loads etc. Is it an exact replica of the statue?

Your memo states that the scaffolding will be installed on Monday November 6 -15 which is 9 days. Do you have a plan to rotate the scaffolding or shorten the length of time to adhere to 5 day turf limit and 3 day photosynthesis? Or will the scaffolding have enough lift to allow for photosynthesis to still occur?

Are you and you team available on Wednesday to meet. I would like to have a draft permit to you review by Thursday?

I will follow up with any additional questions of clarifications.

Thank you
Marisa

Hi Marisa and Superintendent Cash,

Please find attached our updated permit activity memo, and a letter requesting the additional variances discussed in our October 19, 2017 meeting (except for the temple extension variance, which is now obsolete due to Mr. Obernesser's letter).

The updated memo includes a new vigil start time and the updates requested in Mr. Obernesser's October 25, 2017 letter. (Please note, our plans no longer include a Soundbath Reception.) The updated memo also includes revised proposed plans for a "R-Evolution Banner Tower" using OSHA-compliant scaffolding. Please see the attached scaffold vendor quote and safety plan in support of the R-Evolution Banner Tower request.

We are still finalizing our performance and music lineups and will send those as soon as possible.

We appreciate your responses to our variance requests and continued feedback and cooperation on our vigil plans.

Thank you,

Robert

Hi Marisa,

Thanks for the recap. As discussed in the meeting today, however, Mr. Cash has already stated that he is reviewing our variance requests for Items 4 and 5 on your list regarding R-Evolution and promised to respond "shortly." In Mr. Cash's October 17, 2017 email acknowledging my October 16, 2017 email requesting the variance for your Item #5 (erecting R-Evolution sculpture on turf), he stated "We are working diligently to work through this process with the new information pertaining to the sculpture from you," Mr. Cash's October 10, 2017 email stated that "We are currently reviewing your additional submissions and anticipate responding shortly." in response to our additional details submitted about R-Evolution including the variance request for the additional height of 47'10" (Item #4).

Hence, we expect Mr. Cash to honor his word and provide responses as soon as possible to those variance requests for Items 4 and 5. That said, I am happy to include Items 4 and 5 again in our additional variance requests discussed in today's meeting. In addition to your list above, we will also request a variance for the Soundbath igloo and Deadly Muppets tent to be installed without matrax.

Thank you,

Robert

Hello Robert,
Thank you for the meeting today concerning the vigil elements on the Washington Monument Grounds, NW quadrant. During the meeting, you indicated that you will request additional variances to the National Mall and Memorial Parks Level Turf 2 turf guidelines. It is our understanding that the list immediate below are the requests you intend to make, but if there are additional requests, please advise:

1. Request for the temple to remain on the Washington Monument grounds, NW quadrant turf beyond November 12, 2017;
2. Request an exemption for the Abraxas Stage matrax flooring to remain on the turf one additional day
3. Request an exemption from the requirement to install matrax flooring for the (2) 10 x 20 information tents
4. Request height variance for R-Evolution due to the change of height from 46' 9 5/8" with the base to 47'10" with the base as outlined in your October 10, 2017 email; and

Please provide all variance requests in the form of a letter to Acting Superintendent Cassius Cash. The mailing address is 900 Ohio Drive SW, Washington, DC 20024. Another acceptable method is to attach the letter to an email to Cassius_Cash@nps.gov. Please cc Robbin Owen and myself on all requests.

In addition please provide an updated vigil memo to include:

2. An updated production timeline
3. A list of vehicles accessing the 17th Street sidewalk
4. More information regarding the proposed Soundbath reception
5. Insurance information, license plate and vehicle registration for the Abraxas Dragon and Solar Beatz vehicles
6. Daily program schedule

Please let me know if you have any additional questions.

On Wed, Nov 1, 2017 at 3:29 PM, Joshua Carroll <joshua.carroll@nps.gov> wrote:

Marisa, thanks for your time this morning (and that of your team) and patience on the last details. Here are details on the two art pieces I mentioned which were missing them. I’m also copying this into our working version of the permit memo which I understand is receiving other final updates as discussed this morning. Feel free to call me direct (b) (6)
if you have any questions/concerns on this or any of the other art pieces.

**Paradise Lies at the Feet of the Mother**  
**Artist:** Farrah Abubaker  
**Logistics:** 8x10 footprint, will be on Matrax and follow photosynthesis guidelines

Paradise Lies at the Feet of the Mother brings to life an installation of my soul. Incorporating audio recorded from my handmade steel tongue-drums, paintings, and knitting activated by black-lights, my objective is to create an immersive space for the viewer to connect with. The periodic change in the lights represents the rhythm of the change in my life. I want you to feel that you have stepped inside my soul, and leave feeling like you have an understanding of how I cope and understand the world around me. See short video [here](#) and attached photo.

**Created Equal**  
**Artist:** Branden Hall  
**Logistics:** The frame touches the ground with flat 2x4's which will have enkamat and plywood squares, it is secured with 12" long rebar stakes. There is a marked out safety perimeter of 10' x 8' around the piece. It consists 4 homemade wood stanchions and bright yellow plastic chain. There's a sign about the piece and how to start it on one of the stanchions. See attached daytime and nighttime photo. I am going to propose to the artist that we bungee the arm to the frame when it is not being supervised, would welcome any other guidance or suggestions on possible safety concerns.

We think of Americans as "created equal", but that certainly does not mean we all live the same kind of lives. Much of how our lives go is outside of our control, yet there's still beauty in chaos. That's what Created Equal is all about. Created Equal is an interactive, kinetic LED sculpture that allows participants to experience how tiny changes can have huge effects. The sculpture is a wooden triple pendulum that participants start swinging using their own strength that has LEDs on the bottom-most arm. The motion of the piece is unique every time. [Video](#)

Hi Marisa,  
Looking forward to talking in the morning but will answer a few questions as well:

- Confirmed the domes and other tent structures will not be walled/skinned until after sundown on Thursday Nov 9  
- Acknowledge and appreciate your recommendations and concurrence around center camp and live stage  
- **SolarBeatz** - confirmed we will not drive SolarBeatz over any turf. Based on our experience last year and the size, my suspicion is that we can make the turn to get it around the corner from the wide walkway to the diagonal walkway (it is *significantly* smaller than Abraxas)... if that's not the case or we aren't allowed to try, we will build a roadway. FYI I believe SolarBeatz is planning to arrive on Tuesday night for setup (Nov 7) so we will have it in a temporary spot for setup adjacent to the final spot until Thursday night. We will rearrange Matrax as needed to make this happen. Can discuss in the morning as needed.  
- **Rainbow Portal/Nataraja placement** - acknowledged on the enkamat and matrax, that won't be a problem. The pieces of Nataraja will be carried over by hand cart from the sidewalk and assembled on matrax.  
- Shade tent - yes we will put double enkamat and plywood under post legs  
- **Nest Project** - Acknowledged on matrax under the Nest.  
- **Searching for Eon** - this will just be folding tables and chairs. Should not require matrax.  
- **Da Wa Da** - acknowledged on dates  
- **Donald Trump Dance Floor** - Acknowledged on Matrax.  
- **Graphic Sex Project** - yes this will be in a tentstallation with folding tables and
chairs. See attached photos.

- **Reflection: The Stars...** - see photos here. I suspect a concern will be raised about keeping one face open. Essential to the artistic integrity of the piece here is folks experiencing it in darkness. Have a few ideas on how to accommodate that in a way that's satisfactory to the NPS requirements. Can discuss in the morning.

- **True Mirrors Experience** - I expect Michael or Leonard will remember this project from last year, it was right on the walkway and a “huge” hit with all the folks in town for veterans day.. John had many veterans there crying and experiencing themselves in a new way. See the attached photo. Basically they set it up as two of these pole walls meeting at an angle with a couple poles out to hold it up. It is filled with a cloth curtain and then the mirrors are attached to the vertical columns. The only thing that touches the ground is the round blocks, we put double enkamat and plywood under those. I don’t think it will significantly block photo synthesis but we’ll only have the curtains in place on Friday and Saturday and half of Sunday anyway.

- **Hanging Balls** - this is super simple. Photo attached. The touch point is little poles just like what you see in the photo. I believe it can go direct on the turf but we can put in enkamat if needed.

- **Meso Creso** - confirmed 4 pieces matrax under the DJ truck.

I still need to get back to you on:

- **Created Equal** - more details / diagram - will review with the artist and get to you tomorrow.

- **Paradise Lies at the Feet of the Mother** - not included in the meeting sent yesterday, this is a small partially enclosed 8x10 temporary "room" art piece that I was waiting to hear back from the artist to confirm.. I will send photos and details after the meeting tomorrow. I expect we can follow photosynthesis requirements and it won't be controversial in any way. I expect this is the last significant new free standing small art piece we will add to the memo (besides what falls under the tentstallations).

Hope this is helpful,

Joshua

Good Afternoon Robert,

Sheila sent a meeting notice to the Catharsis team this morning.

I have attached the response letter to your variance requests signed by Robbin
Owen. I have attached my notes from your latest vigil proposal. I hope to use this as
a point of reference for our discussion tomorrow morning in order to solidify the
details for the permit.

In the attached memo I've asked for more information on the following:

1. True Mirror Experience
2. Hanging Balls
3. Created Equal  
4. Reflection: The Stars  
5. The Graphic Sex Project  
6. The Donald Dance Floor (date of setup/strike)  
7. Scaffolding for R-Evolution

How is the saw dust from the Chainsaw Portraits contained? In addition please provide Mr. Richardson with a copy of the NCR Outdoor and Tent Requirements and provide the following information:

The contractor will need to follow the "NCR Outdoor Event and Tent Requirements" for propane use or storage:

- Propane cylinder (LPG) will need to be secured
- No storage of propane on site
- A portable fire extinguisher will need to be available, minimum rating, 30BC
- Maintain all combustible material, away from the propane, at least 10 ft

Regards

Marisa

Can we confirm Wednesday 8am for a meeting?

Thank you,

Robert

On Oct 30, 2017 4:23 PM, "Marisa Richardson" <marisa_richardson@nps.gov> wrote:

Good Morning Robert,

Thank you for sending the documents along. Just a couple of quick questions.

Can you confirm the height of the if R-Evolution scaffolding is 44 ft 11 inches (vigil memo) or 15 feet square or 26 feet high? Please provide drawings of what will be on the scaffolding and engineered drawings of the scaffolding with attention to anchoring system, wind loads etc. Is it an exact replica of the statue?

Your memo states that the scaffolding will be installed on Monday November 6-15 which is 9 days. Do you have a plan to rotate the scaffolding or shorten the length of time to adhere to 5 day turf limit and 3 day photosynthesis? Or will the scaffolding have enough lift to allow for photosynthesis to still occur?

Are you and you team available on Wednesday to meet. I would like to have a draft permit to you review by Thursday?

I will follow up with any additional questions of clarifications.
Thank you
Marisa

Hi Marisa and Superintendent Cash,

Please find attached our updated permit activity memo, and a letter requesting the additional variances discussed in our October 19, 2017 meeting (except for the temple extension variance, which is now obsolete due to Mr. Obernesser's letter).

The updated memo includes a new vigil start time and the updates requested in Mr. Obernesser's October 25, 2017 letter. (Please note, our plans no longer include a Soundbath Reception.) The updated memo also includes revised proposed plans for a "R-Evolution Banner Tower" using OSHA-compliant scaffolding. Please see the attached scaffold vendor quote and safety plan in support of the R-Evolution Banner Tower request.

We are still finalizing our performance and music lineups and will send those as soon as possible.

We appreciate your responses to our variance requests and continued feedback and cooperation on our vigil plans.

Thank you,

Robert

On Thu, Oct 19, 2017 at 6:10 PM, Robert Haferd wrote:

Hi Marisa,

Thanks for the recap. As discussed in the meeting today, however, Mr. Cash has already stated that he is reviewing our variance requests for Items 4 and 5 on your list regarding R-Evolution and promised to respond "shortly." In Mr. Cash's October 17, 2017 email acknowledging my October 16, 2017 email requesting the variance for your Item #5 (erecting R-Evolution sculpture on turf), he stated "We are working diligently to work through this process with the new information pertaining to the sculpture from you," Mr. Cash's October 10, 2017 email stated that "We are currently reviewing your additional submissions and anticipate responding shortly." In response to our additional details submitted about R-Evolution including the variance request for the additional height of 47'10" (Item #4).

Hence, we expect Mr. Cash to honor his word and provide responses as soon as possible to those variance requests for Items 4 and 5. That said, I am happy to include Items 4 and 5 again in our additional variance requests discussed in today's meeting. In addition to your list above, we will also request a variance for the Soundbath igloo and Deadly Muppets tent to be installed without matrax.

Thank you,

Robert

Hello Robert,

Thank you for the meeting today concerning the vigil elements on the Washington Monument Grounds, NW quadrant. During the meeting, you indicated that you will request additional variances to the National Mall and Memorial Parks Level Turf 2 turf guidelines. It is our understanding that the list immediate below are the requests you intend to make, but if there are additional requests, please advise:

1. Request for the temple to remain on the Washington Monument grounds, NW quadrant turf beyond November 12, 2017;
2. Request an exemption for the Abraxas Stage matrax flooring to remain on the turf one additional day
3. Request an exemption from the requirement to install matrax flooring for the (2) 10 x 20 information tents

4. Request height variance for R-Evolution due to the change of height from 46' 9 5/8" with the base to 47'10" with the base as outlined in your October 10, 2017 email; and

Please provide all variance requests in the form of a letter to Acting Superintendent Cassius Cash. The mailing address is 900 Ohio Drive SW, Washington, DC 20024. Another acceptable method is to attach the letter to an email to Cassius_Cash@nps.gov. Please cc Robbin Owen and myself on all requests.

In addition please provide an updated vigil memo to include:

2. An updated production timeline
3. A list of vehicles accessing the 17th Street sidewalk
4. More information regarding the proposed Soundbath reception
5. Insurance information, license plate and vehicle registration for the Abraxas Dragon and Solar Beatz vehicles
6. Daily program schedule

Please let me know if you have any additional questions.

Thank you

Marisa, thanks for your time this morning (and that of your team) and patience on the last details. Here are details on the two art pieces I mentioned which were missing them. I'm also copying this into our working version of the permit memo which I understand is receiving other final updates as discussed this morning. Feel free to call me direct if you have any questions/concerns on this or any of the other art pieces.

Paradise Lies at the Feet of the Mother
Artist: Farrah Abubaker
Logistics: 8x10 footprint, will be on Matrax and follow photosynthesis guidelines

Paradise Lies at the Feet of the Mother brings to life an installation of my soul. Incorporating audio recorded from my handmade steel tongue-drums, paintings, and knitting activated by black-lights, my objective is to create an immersive space for the viewer to connect with. The periodic change in the lights represents the rhythm of the change in my life. I want you to feel that you have stepped inside my soul, and leave feeling like you have an understanding of how I cope and understand the world around me. See short video here and attached photo.

Created Equal
Artist: Branden Hall
Logistics: The frame touches the ground with flat 2x4's which will have enkamat and plywood squares, it is secured with 12" long rebar stakes. There is a marked out safety perimeter of 10' x 8' around the piece. It consists 4 homemade wood stanchions and bright yellow plastic chain. There's a sign about the piece and how to start it on one of the stanchions. See attached daytime and nighttime photo. I am going to propose to the artist that we bungie the arm to the frame when it is not being supervised, would welcome any other guidance.
or suggestions on possible safety concerns.

We think of Americans as "created equal", but that certainly does not mean we all live the same kind of lives. Much of how our lives go is outside of our control, yet there's still beauty in chaos. That's what Created Equal is all about. Created Equal is an interactive, kinetic LED sculpture that allows participants to experience how tiny changes can have huge effects. The sculpture is a wooden triple pendulum that participants start swinging using their own strength that has LEDs on the bottom-most arm. The motion of the piece is unique every time. Video

Hi Marisa,
Looking forward to talking in the morning but will answer a few questions as well:

- Confirmed the domes and other tent structures will not be walled/skinned until after sundown on Thursday Nov 9
- Acknowledge and appreciate your recommendations and concurrence around center camp and live stage
- **SolarBeatz** - confirmed we will not drive SolarBeatz over any turf. Based on our experience last year and the size, my suspicion is that we can make the turn to get it around the corner from the wide walkway to the diagonal walkway (it is *significantly* smaller than Abraxas)... if that's not the case or we aren’t allowed to try, we will build a roadway. FYI I believe SolarBeatz is planning to arrive on Tuesday night for setup (Nov 7) so we will have it in a temporary spot for setup adjacent to the final spot until Thursday night. We will rearrange Matrax as needed to make this happen. Can discuss in the morning as needed.
- **Rainbow Portal/Nataraja placement** - acknowledged on the enkamat and matrax, that won't be a problem. The pieces of Nataraja will be carried over by hand cart from the sidewalk and assembled on matrax.
- Shade tent - yes we will put double enkamat and plywood under post legs
- **Nest Project** - Acknowledged on matrax under the Nest.
- **Searching for Eon** - this will just be folding tables and chairs. Should not require matrax.
- **Da Wa Da** - acknowledged on dates
- **Donald Trump Dance Floor** - Acknowledged on Matrax.
- **Graphic Sex Project** - yes this will be in a tent installation with folding tables and chairs. See attached photos.
- **Reflection: The Stars**... - see photos [here](#). I suspect a concern will be raised about keeping one face open. Essential to the artistic integrity of the piece here is folks experiencing it in darkness. Have a few ideas on how to accommodate that in a way that's satisfactory to the NPS requirements. Can discuss in the morning.
- **True Mirrors Experience** - I expect Michael or Leonard will remember this project from last year, it was right on the walkway and a *huge* hit with all the folks in town for veterans day.. John had many veterans there crying and experiencing themselves in a new way. See the attached photo. Basically they set it up as two of these pole walls meeting at an angle with a couple poles out to hold it up. It is filled with a cloth curtain and then the mirrors are attached to the vertical columns. The only thing that touches the ground is the round blocks, we put double enkamat and plywood under those. I don't think it will significantly block photo synthesis but we'll only have the curtains in place on Friday and Saturday and half of Sunday anyway.
- **Hanging Balls** - this is super simple. Photo attached. The touch point is little poles just like what you see in the photo. I believe it can go direct on the turf but we can put in enkamat if needed.
- **Meso Creso** - confirmed 4 pieces matrax under the DJ truck.

I still need to get back to you on:
• **Created Equal** - more details / diagram - will review with the artist and get to you tomorrow.

• **Paradise Lies at the Feet of the Mother** - not included in the meeting sent yesterday, this is a small partially enclosed 8x10 temporary "room" art piece that I was waiting to hear back from the artist to confirm. I will send photos and details after the meeting tomorrow. I expect we can follow photosynthesis requirements and it won't be controversial in any way. I expect this is the last significant new free standing small art piece we will add to the memo (besides what falls under the tent installations).

Hope this is helpful,
Joshua

Good Morning Robert,

Thank you for sending the documents along. Just a couple of quick questions.

Can you confirm the height of the if R-Evolution scaffolding is 44 ft 11 inches (vigil memo) or 15 feet square or 26 feet high? Please provide drawings of what will be on the scaffolding and engineered drawings of the scaffolding with attention to anchoring system, wind loads etc. Is it an exact replica of the statue?

Your memo states that the scaffolding will be installed on Monday November 6 -15 which is 9 days. Do you have a plan to rotate the scaffolding or shorten the length of time to adhere to 5 day turf limit and 3 day photosynthesis? Or will the scaffolding have enough lift to allow for photosynthesis to still occur?

Are you and you team available on Wednesday to meet. I would like to have a draft permit to you review by Thursday?

I will follow up with any additional questions of clarifications.

Thank you

Marisa

Hi Marisa and Superintendent Cash,

Please find attached our updated permit activity memo, and a letter requesting the additional variances discussed in our October 19, 2017 meeting (except for the temple extension variance, which is now obsolete due to Mr. Obernesser's letter).

The updated memo includes a new vigil start time and the updates requested in Mr. Obernesser's October 25, 2017 letter. (Please note, our plans no longer include a Soundbath Reception.) The updated memo also includes revised proposed plans for a "R-Evolution Banner Tower" using OSHA-compliant scaffolding. Please see the attached scaffold vendor quote and safety plan in support of the R-Evolution Banner Tower request.

We are still finalizing our performance and music lineups and will send those as soon as possible.

We appreciate your responses to our variance requests and continued feedback and cooperation on our vigil plans.

Thank you,

Robert

Hi Marisa,

Thanks for the recap. As discussed in the meeting today, however, Mr. Cash has already stated that he is reviewing our variance requests for Items 4 and 5 on your list regarding R-Evolution and promised to respond.
"shortly." In Mr. Cash's October 17, 2017 email acknowledging my October 16, 2017 email requesting the variance for your Item #5 (erecting R-Evolution sculpture on turf), he stated "We are working diligently to work through this process with the new information pertaining to the sculpture from you," Mr. Cash's October 10, 2017 email stated that "We are currently reviewing your additional submissions and anticipate responding shortly." in response to our additional details submitted about R-Evolution including the variance request for the additional height of 47’10” (Item #4).

Hence, we expect Mr. Cash to honor his word and provide responses as soon as possible to those variance requests for Items 4 and 5. That said, I am happy to include Items 4 and 5 again in our additional variance requests discussed in today's meeting. In addition to your list above, we will also request a variance for the Soundbath igloo and Deadly Muppets tent to be installed without matrax.

Thank you,

Robert

Hello Robert,

Thank you for the meeting today concerning the vigil elements on the Washington Monument Grounds, NW quadrant. During the meeting, you indicated that you will request additional variances to the National Mall and Memorial Parks Level Turf 2 turf guidelines. It is our understanding that the list immediate below are the requests you intend to make, but if there are additional requests, please advise:

1. Request for the temple to remain on the Washington Monument grounds, NW quadrant turf beyond November 12, 2017;

2. Request an exemption for the Abraxas Stage matrax flooring to remain on the turf one additional day

3. Request an exemption from the requirement to install matrax flooring for the (2) 10 x 20 information tents

4. Request height variance for R-Evolution due to the change of height from 46’ 9 5/8” with the base to 47’10” with the base as outlined in your October 10, 2017 email; and

Please provide all variance requests in the form of a letter to Acting Superintendent Cassius Cash. The mailing address is 900 Ohio Drive SW Washington, DC 20024. Another acceptable method is to attach
the letter to an email to Cassius_Cash@nps.gov. Please cc Robbin Owen and myself on all requests.

In addition please provide an updated vigil memo to include:

2. An updated production timeline
3. A list of vehicles accessing the 17th Street sidewalk
4. More information regarding the proposed Soundbath reception
5. Insurance information, license plate and vehicle registration for the Abraxas Dragon and Solar Beatz vehicles
6. Daily program schedule

Please let me know if you have any additional questions.

Thank you

Marisa, thanks for your time this morning (and that of your team) and patience on the last details. Here are details on the two art pieces I mentioned which were missing them. I’m also copying this into our working version of the permit memo which I understand is receiving other final
updates as discussed this morning. Feel free to call me direct if you have any questions/concerns on this or any of the other art pieces.

Paradise Lies at the Feet of the Mother
Artist: Farrah Abubaker
Logistics: 8x10 footprint, will be on Matrax and follow photosynthesis guidelines

Paradise Lies at the Feet of the Mother brings to life an installation of my soul. Incorporating audio recorded from my handmade steel tongue-drums, paintings, and knitting activated by black-lights, my objective is to create an immersive space for the viewer to connect with. The periodic change in the lights represents the rhythm of the change in my life. I want you to feel that you have stepped inside my soul, and leave feeling like you have an understanding of how I cope and understand the world around me. See short video here and attached photo.

Created Equal
Artist: Branden Hall
Logistics: The frame touches the ground with flat 2x4's which will have enkamat and plywood squares, it is secured with 12" long rebar stakes. There is a marked out safety perimeter of 10’ x 8’ around the piece. It consists 4 homemade wood stanchions and bright yellow plastic chain. There's a sign about the piece and how to start it on one of the stanchions. See attached daytime and nighttime photo. I am going to propose to the artist that we bungee the arm to the frame when it is not being supervised, would welcome any other guidance or suggestions on possible safety concerns.

We think of Americans as "created equal", but that certainly does not mean we all live the same kind of lives. Much of how our lives go is outside of our control, yet there's still beauty in chaos. That's what Created Equal is all about. Created Equal is an interactive, kinetic LED sculpture that allows participants to experience how tiny changes can have huge effects. The sculpture is a wooden triple pendulum that participants start swinging using their own strength that has LEDs on the bottom-most arm. The motion of the piece is unique every time. Video

Hi Marisa,
Looking forward to talking in the morning but will answer a few questions as well:

- Confirmed the domes and other tent structures will not be walled/skinned until after sundown on Thursday Nov 9
- Acknowledge and appreciate your recommendations and concurrence around center camp and live stage
- **SolarBeatz** - confirmed we will not drive SolarBeatz over any turf. Based on our experience last year and the size, my suspicion is that we can make the turn to get it around the corner from the wide walkway to the diagonal walkway (it is *significantly* smaller than Abraxas)... if that's not the case or we aren't allowed to try, we will build a roadway. FYI I believe SolarBeatz is planning to arrive on Tuesday night for setup (Nov 7) so we will have it in a temporary spot for setup adjacent to the final spot until Thursday night. We will rearrange Matrax as needed to make this happen. Can discuss in the morning as needed.
- **Rainbow Portal/Nataraja placement** - acknowledged on the
enkamat and matrax, that won't be a problem. The pieces of Nataraja will be carried over by hand cart from the sidewalk and assembled on matrax.

- Shade tent - yes we will put double enkamat and plywood under post legs
- **Nest Project** - Acknowledged on matrax under the Nest.
- **Searching for Eon** - this will just be folding tables and chairs. Should not require matrax.
- **Da Wa Da** - acknowledged on dates
- **Donald Trump Dance Floor** - Acknowledged on Matrax.
- **Graphic Sex Project** - yes this will be in a tentstallation with folding tables and chairs. See attached photos.
- **Reflection: The Stars...** - see photos [here](#). I suspect a concern will be raised about keeping one face open. Essential to the artistic integrity of the piece here is folks experiencing it in darkness. Have a few ideas on how to accommodate that in a way that's satisfactory to the NPS requirements. Can discuss in the morning.
- **True Mirrors Experience** - I expect Michael or Leonard will remember this project from last year, it was right on the walkway and a "huge" hit with all the folks in town for veterans day.. John had many veterans there crying and experiencing themselves in a new way. See the attached photo. Basically they set it up as two of these pole walls meeting at an angle with a couple poles out to hold it up. It is filled with a cloth curtain and then the mirrors are attached to the vertical columns. The only thing that touches the ground is the round blocks, we put double enkamat and plywood under those. I don't think it will significantly block photo synthesis but we'll only have the curtains in place on Friday and Saturday and half of Sunday anyway.
- **Hanging Balls** - this is super simple. Photo attached. The touch point is little poles just like what you see in the photo. I believe it can go direct on the turf but we can put in enkamat if needed.
- **Meso Creso** - confirmed 4 pieces matrax under the DJ truck.

I still need to get back to you on:

- **Created Equal** - more details / diagram - will review with the artist and get to you tomorrow.
- **Paradise Lies at the Feet of the Mother** - not included in the meeting sent yesterday, this is a small partially enclosed 8x10 temporary "room" art piece that I was waiting to hear back from the artist to confirm.. I will send photos and details after the meeting tomorrow. I expect we can follow photosynthesis requirements and it won't be controversial in any way. I expect this is the last significant new free standing small art piece we will add to the memo (besides what falls under the tentstallations).

Hope this is helpful,
Joshua

On Tue, Oct 31, 2017 at 7:28 PM, Robert Haferd wrote:

Hi Marisa,

On the sawdust containment, Mr. Richardson says:
I use a 10x10 popup tent with deer fence and fiberglass screen secured to the tent, as pictured. A plastic tarp will be used underneath the carving area. Between the deer fence, window screen and tarp I have good results in controlling wood and chips.

All propane and gasoline fuel will reside off site when I'm not carving.

I will procure a 30-AB extinguisher. currently I own 2x 10-AB extinguishers.

Good Afternoon Robert,

Sheila sent a meeting notice to the Catharsis team this morning.

I have attached the response letter to your variance requests signed by Robbin Owen. I have attached my notes from your latest vigil proposal. I hope to use this as a point of reference for our discussion tomorrow morning in order to solidify the details for the permit.

In the attached memo I've asked for more information on the following:

1. True Mirror Experience
2. Hanging Balls
3. Created Equal
4. Reflection: The Stars
5. The Graphic Sex Project
6. The Donald Dance Floor (date of setup/strike)
7. Scaffolding for R-Evolution

How is the saw dust from the Chainsaw Portraits contained? In addition please provide Mr. Richardson with a copy of the NCR Outdoor and Tent Requirements and provide the following information:
The contractor will need to follow the "NCR Outdoor Event and Tent Requirements" for propane use or storage

• Propane cylinder (LPG) will need to be secured
• No storage of propane on site
• A portable fire extinguisher will need to be available, minimum rating, 30BC
• Maintain all combustible material, away from the propane, at least 10 ft

Regards

Marisa

Good Morning Robert,

Thank you for sending the documents along. Just a couple of quick questions.

Can you confirm the height of the if R-Evolution scaffolding is 44 ft 11 inches (vigil memo) or 15 feet square or 26 feet high? Please provide drawings of what will be on the scaffolding and engineered drawings of the scaffolding with attention to anchoring system, wind loads etc. Is it an exact replica of the statue?

Your memo states that the scaffolding will be installed on Monday November 6 -15 which is 9 days. Do you have a plan to rotate the scaffolding or shorten the length of time to adhere to 5 day turf limit and 3 day photosynthesis? Or will the scaffolding have enough lift to allow for photosynthesis to still occur?

Are you and you team available on Wednesday to meet. I would like to have a draft permit to you review by Thursday?

I will follow up with any additional questions of clarifications.

Thank you
Marisa
(I thought I hit send on this email around 10 am)

Hi Marisa and Superintendent Cash,

Please find attached our updated permit activity memo, and a letter requesting the additional variances discussed in our October 19, 2017 meeting (except for the temple extension variance, which is now obsolete due to Mr. Obernesser's letter).

The updated memo includes a new vigil start time and the updates requested in Mr. Obernesser's October 25, 2017 letter. (Please note, our plans no longer include a Soundbath Reception.) The updated memo also includes revised proposed plans for a "R-Evolution Banner Tower" using OSHA-compliant scaffolding. Please see the attached
scaffold vendor quote and safety plan in support of the R-Evolution Banner Tower request.

We are still finalizing our performance and music lineups and will send those as soon as possible.

We appreciate your responses to our variance requests and continued feedback and cooperation on our vigil plans.

Thank you,

Robert

Hi Marisa,

Thanks for the recap. As discussed in the meeting today, however, Mr. Cash has already stated that he is reviewing our variance requests for Items 4 and 5 on your list regarding R-Evolution and promised to respond "shortly." In Mr. Cash's October 17, 2017 email acknowledging my October 16, 2017 email requesting the variance for your Item #5 (erecting R-Evolution sculpture on turf), he stated "*We are working diligently to work through this process with the new information pertaining to the sculpture from you,*" Mr. Cash’s October 10, 2017 email stated that "*We are currently reviewing your additional submissions and*
anticipate responding shortly." in response to our additional details submitted about R-Evolution including the variance request for the additional height of 47'10" (Item #4).

Hence, we expect Mr. Cash to honor his word and provide responses as soon as possible to those variance requests for Items 4 and 5. That said, I am happy to include Items 4 and 5 again in our additional variance requests discussed in today's meeting. In addition to your list above, we will also request a variance for the Soundbath igloo and Deadly Muppets tent to be installed without matrax.

Thank you,

Robert

Hello Robert,

Thank you for the meeting today concerning the vigil elements on the Washington Monument Grounds, NW quadrant. During the meeting, you indicated that you will request additional variances to the National Mall and Memorial Parks Level Turf 2 turf guidelines. It is our understanding that the list immediate below are the requests you intend to make, but if there are additional requests, please advise:

1. Request for the temple to remain on the Washington Monument grounds, NW quadrant turf beyond November 12, 2017;
2. Request an exemption for the Abraxas Stage matrax flooring to remain on the turf one additional day
3. Request an exemption from the requirement to install matrax flooring for the (2) 10 x 20 information tents
4. Request height variance for R-Evolution due to the change of height from 46' 9 5/8" with the base to 47'10" with the base as outlined in your October 10, 2017 email; and

Please provide all variance requests in the form of a letter to Acting Superintendent Cassius Cash. The mailing address is 900 Ohio Drive SW Washington, DC, 20024. Another acceptable method is to attach the letter to an email to Cassius_Cash@nps.gov. Please cc Robbin Owen and myself on all requests.
In addition please provide an updated vigil memo to include:

2. An updated production timeline
3. A list of vehicles accessing the 17th Street sidewalk
4. More information regarding the proposed Soundbath reception
5. Insurance information, license plate and vehicle registration for the Abraxas Dragon and Solar Beatz vehicles
6. Daily program schedule

Please let me know if you have any additional questions.

Thank you

Marisa, thanks for your time this morning (and that of your team) and patience on the last details. Here are details on the two art pieces I mentioned which were missing them. I'm also copying this into our working version of the permit memo which I understand is receiving other final updates as discussed this morning. Feel free to call me direct [redacted] if you have any questions/concerns on this or any of the other art pieces.

Paradise Lies at the Feet of the Mother

Artist: Farrah Abubaker

Logistics: 8x10 footprint, will be on Matrax and follow photosynthesis guidelines

Paradise Lies at the Feet of the Mother brings to life an installation of my soul. Incorporating audio recorded from my handmade steel tongue-drums, paintings, and knitting activated by black-lights, my objective is to create an immersive space for the viewer to connect with. The periodic change in the lights represents the rhythm of the change in my life. I want you to feel that you have stepped inside my soul, and leave feeling like you have an understanding of how I cope and understand the world around me. See short video here and attached photo.

Created Equal

Artist: Branden Hall

Logistics: The frame touches the ground with flat 2x4's which will have enkamat and plywood squares, it is secured with 12" long rebar stakes. There is a marked out safety perimeter of 10' x 8' around the piece. It consists 4 homemade wood stanchions and bright yellow plastic chain. There's a sign about the piece and how to start it on one of the stanchions. See attached daytime and nighttime photo. I am going to propose to the artist that we bungie the arm to the frame when it is not being supervised, would welcome any other guidance or suggestions on possible safety concerns.

We think of Americans as "created equal", but that certainly does not mean we all live the same kind of lives. Much of how our lives go is outside of our control, yet there's still beauty in chaos. That's what Created Equal is all about. Created Equal is an interactive, kinetic LED sculpture that allows participants to experience how tiny changes can have huge effects. The sculpture is a wooden triple pendulum that participants start swinging using their own strength that has LEDs on the bottom-most arm. The motion of the piece is unique every time. Video
Hi Marisa,
Looking forward to talking in the morning but will answer a few questions as well:

- Confirmed the domes and other tent structures will not be walled/skinned until after sundown on Thursday Nov 9
- Acknowledge and appreciate your recommendations and concurrence around center camp and live stage
- **SolarBeatz** - confirmed we will not drive SolarBeatz over any turf. Based on our experience last year and the size, my suspicion is that we can make the turn to get it around the corner from the wide walkway to the diagonal walkway (it is *significantly* smaller than Abraxas)... if that's not the case or we aren't allowed to try, we will build a roadway. FYI I believe SolarBeatz is planning to arrive on Tuesday night for setup (Nov 7) so we will have it in a temporary spot for setup adjacent to the final spot until Thursday night. We will rearrange Matrax as needed to make this happen. Can discuss in the morning as needed.
- **Rainbow Portal/Nataraja placement** - acknowledged on the enkamat and matrax, that won't be a problem. The pieces of Nataraja will be carried over by hand cart from the sidewalk and assembled on matrax.
- Shade tent - yes we will put double enkamat and plywood under post legs
- **Nest Project** - Acknowledged on matrax under the Nest.
- **Searching for Eon** - this will just be folding tables and chairs. Should not require matrax.
- **Da Wa Da** - acknowledged on dates
- **Donald Trump Dance Floor** - Acknowledged on Matrax.
- **Graphic Sex Project** - yes this will be in a tentstallation with folding tables and chairs. See attached photos.
- **Reflection: The Stars...** - see photos [here](#). I suspect a concern will be raised about keeping one face open. Essential to the artistic integrity of the piece here is folks experiencing it in darkness. Have a few ideas on how to accommodate that in a way that's satisfactory to the NPS requirements. Can discuss in the morning.
- **True Mirrors Experience** - I expect Michael or Leonard will remember this project from last year, it was right on the walkway and a *huge* hit with all the folks in town for veterans day... John had many veterans there crying and experiencing themselves in a new way. See the attached photo. Basically they set it up as two of these pole walls meeting at an angle with a couple poles out to hold it up. It is filled with a cloth curtain and then the mirrors are attached to the vertical columns. The only thing that touches the ground is the round blocks, we put double enkamat and plywood under those. I don't think it will significantly block photo synthesis but we'll only have the curtains in place on Friday and Saturday and half of Sunday anyway.
- **Hanging Balls** - this is super simple. Photo attached. The touch point is little poles just like what you see in the photo. I believe it can go direct on the turf but we can put in enkamat if needed.
- **Meso Creso** - confirmed 4 pieces matrax under the DJ truck.
I still need to get back to you on:

- **Created Equal** - more details / diagram - will review with the artist and get to you tomorrow.
- **Paradise Lies at the Feet of the Mother** - not included in the meeting sent yesterday, this is a small partially enclosed 8x10 temporary "room" art piece that I was waiting to hear back from the artist to confirm. I will send photos and details after the meeting tomorrow. I expect we can follow photosynthesis requirements and it won't be controversial in any way. I expect this is the last significant new free standing small art piece we will add to the memo (besides what falls under the tentstallations).

Hope this is helpful,
Joshua

Good Afternoon Robert,

Sheila sent a meeting notice to the Catharsis team this morning.

I have attached the response letter to your variance requests signed by Robbin Owen. I have attached my notes from your latest vigil proposal. I hope to use this as a point of reference for our discussion tomorrow morning in order to solidify the details for the permit.

In the attached memo I've asked for more information on the following:

1. True Mirror Experience
2. Hanging Balls
3. Created Equal
4. Reflection: The Stars
5. The Graphic Sex Project
6. The Donald Dance Floor (date of setup/strike)
7. Scaffolding for R-Evolution

How is the saw dust from the Chainsaw Portraits contained? In
addition please provide Mr. Richardson with a copy of the NCR Outdoor and Tent Requirements and provide the following information:

The contractor will need to follow the "NCR Outdoor Event and Tent Requirements" for propane use or storage

- Propane cylinder (LPG) will need to be secured
- No storage of propane on site
- A portable fire extinguisher will need to be available, minimum rating, 30BC
- Maintain all combustible material, away from the propane, at least 10 ft

Regards

Marisa

How is the saw dust from the Chainsaw Portraits contained? In addition please provide Mr. Richardson with a copy of the NCR Outdoor and Tent Requirements and provide the following information:

The contractor will need to follow the "NCR Outdoor Event and Tent Requirements" for propane use or storage:

- Propane cylinder (LPG) will need to be secured
- No storage of propane on site
- A portable fire extinguisher will need to be available, minimum rating, 30BC
- Maintain all combustible material, away from the propane, at least 10 ft

Regards

Marisa

Good Morning Robert,

Thank you for sending the documents along. Just a couple of quick questions.

Can you confirm the height of the if R-Evolution scaffolding is 44 ft 11 inches (vigil memo) or 15 feet square or 26 feet high? Please provide drawings of what will be on the scaffolding and engineered drawings of the scaffolding with attention to anchoring system, wind loads etc. Is it an exact replica of the statue?

Your memo states that the scaffolding will be installed on Monday November 6 -15 which is 9 days. Do you have a plan to rotate the scaffolding or shorten the length of time to adhere to 5 day turf limit and 3 day photosynthesis? Or will the scaffolding have enough lift to allow for photosynthesis to still occur?

Are you and your team available on Wednesday to meet. I would like to have a draft permit to you review by Thursday?

I will follow up with any additional questions of clarifications.

Thank you

Marisa

Hi Marisa and Superintendent Cash,

Please find attached our updated permit activity memo, and a letter requesting the additional variances discussed in our October 19, 2017 meeting (except for the temple extension variance, which is now obsolete due to Mr. Obernesser's letter).

The updated memo includes a new vigil start time and the updates requested in Mr. Obernesser's October 25, 2017 letter. (Please note, our plans no longer include a Soundbath Reception.) The updated memo also includes revised proposed plans for a "R-Evolution Banner Tower" using OSHA-compliant scaffolding. Please see the attached scaffold vendor quote and safety plan in support of the R-Evolution Banner Tower request.

We are still finalizing our performance and music lineups and will send those as soon as possible.

We appreciate your responses to our variance requests and continued feedback and cooperation on our vigil plans.

Thank you,

Robert

Hi Marisa,

Thanks for the recap. As discussed in the meeting today, however, Mr. Cash has already stated that he is reviewing our variance requests for Items 4 and 5 on your list regarding R-Evolution and promised to respond "shortly." In Mr. Cash's October 17, 2017 email acknowledging my October 16, 2017 email requesting the variance for your Item #5 (erecting R-Evolution sculpture on turf), he stated "We are working diligently to work through this process with the new information pertaining to the sculpture from you," Mr. Cash's October 10, 2017 email stated that "We are currently reviewing your additional submissions and anticipate responding shortly." in response to our additional details submitted about R-Evolution including the variance request for the additional height of 47'10" (Item #4).

Hence, we expect Mr. Cash to honor his word and provide responses as soon as possible to those variance requests for Items 4 and 5. That said, I am happy to include Items 4 and 5 again in our additional variance requests discussed in today's meeting. In addition to your list above, we will also request a variance for the Soundbath igloo and Deadly Muppets tent to be installed without matrax.

Thank you,

Robert

On Thu, Oct 19, 2017 at 5:07 PM, Richardson, Marisa
Hello Robert,

Thank you for the meeting today concerning the vigil elements on the Washington Monument Grounds, NW quadrant. During the meeting, you indicated that you will request additional variances to the National Mall and Memorial Parks Level Turf 2 turf guidelines. It is our understanding that the list immediate below are the requests you intend to make, but if there are additional requests, please advise:

1. Request for the temple to remain on the Washington Monument grounds, NW quadrant turf beyond November 12, 2017;

2. Request an exemption for the Abraxas Stage matrax flooring to remain on the turf one additional day

3. Request an exemption from the requirement to install matrax flooring for the (2) 10 x 20 information tents

4. Request height variance for R-Evolution due to the change of height from 46’ 9 5/8” with the base to 47’10” with the base as outlined in your October 10, 2017 email; and

Please provide all variance requests in the form of a letter to Acting Superintendent Cassius Cash. The mailing address is 900 Ohio Drive SW, Washington, DC 20024. Another acceptable method is to attach the letter to an email to Cassius_Cash@nps.gov. Please cc Robbin Owen and myself on all requests.

In addition please provide an updated vigil memo to include:

2. An updated production timeline

3. A list of vehicles accessing the 17th Street sidewalk

4. More information regarding the
proposed Soundbath reception

5. Insurance information, license plate and vehicle registration for the Abraxas Dragon and Solar Beatz vehicles

6. Daily program schedule

Please let me know if you have any additional questions.

Thank you

Marisa, thanks for your time this morning (and that of your team) and
patience on the last details. Here are details on the two art pieces I mentioned which were missing them. I'm also copying this into our working version of the permit memo which I understand is receiving other final updates as discussed this morning. Feel free to call me direct [REDACTED] if you have any questions/concerns on this or any of the other art pieces.

Paradise Lies at the Feet of the Mother
Artist: Farrah Abubaker
Logistics: 8x10 footprint, will be on Matrax and follow photosynthesis guidelines

Paradise Lies at the Feet of the Mother brings to life an installation of my soul. Incorporating audio recorded from my handmade steel tongue-drums, paintings, and knitting activated by black-lights, my objective is to create an immersive space for the viewer to connect with. The periodic change in the lights represents the rhythm of the change in my life. I want you to feel that you have stepped inside my soul, and leave feeling like you have an understanding of how I cope and understand the world around me. See short video [HERE] and attached photo.

Created Equal
Artist: Branden Hall
Logistics: The frame touches the ground with flat 2x4's which will have enkamat and plywood squares, it is secured with 12" long rebar stakes. There is a marked out safety perimeter of 10' x 8' around the piece. It consists 4 homemade wood stanchions and bright yellow plastic chain. There's a sign about the piece and how to start it on one of the stanchions. See attached daytime and nighttime photo. I am going to propose to the artist that we bungie the arm to the frame when it is not being supervised, would welcome any other guidance or suggestions on possible safety concerns.

We think of Americans as "created equal", but that certainly does not mean we all live the same kind of lives. Much of how our lives go is outside of our control, yet there's still beauty in chaos. That's what Created Equal is all about. Created Equal is an interactive, kinetic LED sculpture that allows participants to experience how tiny changes can have huge effects. The sculpture is a wooden triple pendulum that participants start swinging using their own strength that has LEDs on the bottom-most arm. The motion of the piece is unique every time. Video

On Wed, Nov 1, 2017 at 12:06 AM, Joshua Carroll <[REDACTED]> wrote:
Hi Marisa,
Looking forward to talking in the morning but will answer a few questions as well:

- Confirmed the domes and other tent structures will not be walled/skinned until after sundown on Thursday Nov 9
- Acknowledge and appreciate your recommendations and concurrence around center camp and live stage
- **SolarBeatz** - confirmed we will not drive SolarBeatz over any turf. Based on our experience last year and the size, my suspicion is that we can make the turn to get it around the corner from the wide walkway to the diagonal walkway (it is *significantly* smaller

than Abraxas)... if that's not the case or we aren't allowed to try, we will build a roadway. FYI I believe SolarBeatz is planning to arrive on Tuesday night for setup (Nov 7) so we will have it in a temporary spot for setup adjacent to the final spot until Thursday night. We will rearrange Matrax as needed to make this happen. Can discuss in the morning as needed.

- **Rainbow Portal/Nataraja placement** - acknowledged on the enkamat and matrax, that won't be a problem. The pieces of Nataraja will be carried over by hand cart from the sidewalk and assembled on matrax.
- Shade tent - yes we will put double enkamat and plywood under post legs
- **Nest Project** - Acknowledged on matrax under the Nest.
- **Searching for Eon** - this will just be folding tables and chairs. Should not require matrax.
- **Da Wa Da** - acknowledged on dates
- **Donald Trump Dance Floor** - Acknowledged on Matrax.
- **Graphic Sex Project** - yes this will be in a tentstallation with folding tables and chairs. See attached photos.
- **Reflection: The Stars...** - see photos [here](#). I suspect a concern will be raised about keeping one face open. Essential to the artistic integrity of the piece here is folks experiencing it in darkness. Have a few ideas on how to accommodate that in a way that's satisfactory to the NPS requirements. Can discuss in the morning.
- **True Mirrors Experience** - I expect Michael or Leonard will remember this project from last year, it was right on the walkway and a "huge" hit with all the folks in town for veterans day.. John had many veterans there crying and experiencing themselves in a new way. See the attached photo. Basically they set it up as two of these pole walls meeting at an angle with a couple poles out to hold it up. It is filled with a cloth curtain and then the mirrors are attached to the vertical columns. The only thing that touches the ground is the round blocks, we put double enkamat and plywood under those. I don't think it will significantly block photosynthesis but we'll only have the curtains in place on Friday and Saturday and half of Sunday anyway.
- **Hanging Balls** - this is super simple. Photo attached. The touch point is little poles just like what you see in the photo. I believe it can go direct on the turf but we can put in enkamat if needed.
- **Meso Creso** - confirmed 4 pieces matrax under the DJ truck.

I still need to get back to you on:

- **Created Equal** - more details / diagram - will review with the artist and get to you tomorrow.
- **Paradise Lies at the Feet of the Mother** - not included in the meeting sent yesterday, this is a small partially enclosed 8x10 temporary "room" art piece that I was waiting to hear back from the artist to confirm.. I will send photos and details after the meeting tomorrow. I expect we can follow photosynthesis requirements and it won't be controversial in any way. I expect this is the last significant new free standing small art piece we will add to the memo (besides what falls under the tentstallations).

Hope this is helpful,

"Good Afternoon Robert,

Sheila sent a meeting notice to the Catharsis team this morning.

I have attached the response letter to your variance requests signed by Robbin Owen. I have attached my notes from your latest vigil proposal. I hope to use this as a point of reference for our discussion tomorrow morning in order to solidify the details for the permit.

In the attached memo I've asked for more information on the following:

1. True Mirror Experience
2. Hanging Balls
3. Created Equal
4. Reflection: The Stars
5. The Graphic Sex Project
6. The Donald Dance Floor (date of setup/strike)
7. Scaffolding for R-Evolution

How is the saw dust from the Chainsaw Portraits contained? In addition please provide Mr. Richardson with a copy of the NCR Outdoor and Tent Requirements and provide the following information:

The contractor will need to follow the "NCR Outdoor Event and Tent Requirements" for propane use or storage

- Propane cylinder (LPG) will need to be secured
- No storage of propane on site
- A portable fire extinguisher will need to be available, minimum rating, 30BC
- Maintain all combustible material, away from the propane, at least 10 ft

Regards

Marisa"

Good Afternoon Robert,

Sheila sent a meeting notice to the Catharsis team this morning.

I have attached the response letter to your variance requests.
signed by Robbin Owen. I have attached my notes from your latest vigil proposal. I hope to use this as a point of reference for our discussion tomorrow morning in order to solidify the details for the permit.

In the attached memo I've asked for more information on the following:

1. True Mirror Experience
2. Hanging Balls
3. Created Equal
4. Reflection: The Stars
5. The Graphic Sex Project
6. The Donald Dance Floor (date of setup/strike)
7. Scaffolding for R-Evolution

How is the saw dust from the Chainsaw Portraits contained? In addition please provide Mr. Richardson with a copy of the NCR Outdoor and Tent Requirements and provide the following information:

The contractor will need to follow the "NCR Outdoor Event and Tent Requirements" for propane use or storage:

- Propane cylinder (LPG) will need to be secured
- No storage of propane on site
- A portable fire extinguisher will need to be available, minimum rating, 30BC
- Maintain all combustible material, away from the propane, at least 10 ft

Regards

Marisa

On Oct 30, 2017 4:23 PM, "Marisa Richardson" <marisa_richardson@nps.gov> wrote:

Good Morning Robert,

Thank you for sending the documents along. Just a couple of quick questions.

Can you confirm the height of the If R-Evolution scaffolding is 44 ft 11 inches (vigil memo) or 15 feet square or 26 feet high? Please provide drawings of what will be on the scaffolding and engineered drawings of the scaffolding with
attention to anchoring system, wind loads etc. Is it an exact replica of the statue?

Your memo states that the scaffolding will be installed on Monday November 6 -15 which is 9 days. Do you have a plan to rotate the scaffolding or shorten the length of time to adhere to 5 day turf limit and 3 day photosynthesis? Or will the scaffolding have enough lift to allow for photosynthesis to still occur?

Are you and you team available on Wednesday to meet. I would like to have a draft permit to you review by Thursday?

I will follow up with any additional questions of clarifications.

Thank you
Marisa

Hi Marisa and Superintendent Cash,

Please find attached our updated permit activity memo, and a letter requesting the additional variances discussed in our October 19, 2017 meeting (except for the temple extension variance, which is now obsolete due to Mr. Obernesser's letter).

The updated memo includes a new vigil start time and the updates requested in Mr. Obernesser's October 25, 2017 letter. (Please note, our plans no longer include a Soundbath Reception.) The updated memo also includes revised proposed plans for a "R-Evolution Banner Tower" using OSHA-compliant scaffolding. Please see the attached scaffold vendor quote and safety plan in support of the R-Evolution Banner Tower request.

We are still finalizing our performance and music lineups and will send those as soon as possible.

We appreciate your responses to our variance requests and continued feedback and
cooperation on our vigil plans.

Thank you,

Robert

Hi Marisa,

Thanks for the recap. As discussed in the meeting today, however, Mr. Cash has already stated that he is reviewing our variance requests for Items 4 and 5 on your list regarding R-Evolution and promised to respond "shortly." In Mr. Cash's October 17, 2017 email acknowledging my October 16, 2017 email requesting the variance for your Item #5 (erecting R-Evolution sculpture on turf), he stated "We are working diligently to work through this process with the new information pertaining to the sculpture from you," Mr. Cash's October 10, 2017 email stated that "We are currently reviewing your additional submissions and anticipate responding shortly." in response to our additional details submitted about R-Evolution including the variance request for the additional height of 47'10" (Item #4).
Hence, we expect Mr. Cash to honor his word and provide responses as soon as possible to those variance requests for Items 4 and 5. That said, I am happy to include Items 4 and 5 again in our additional variance requests discussed in today's meeting. In addition to your list above, we will also request a variance for the Soundbath igloo and Deadly Muppets tent to be installed without matrax.

Thank you,

Robert

Hello Robert,

Thank you for the meeting today concerning the vigil elements on the Washington Monument Grounds, NW quadrant. During the meeting, you indicated that you will request additional variances to the National Mall and Memorial Parks Level Turf 2 turf guidelines. It is our understanding that the list immediate below are the requests you intend to make, but if there are additional requests, please advise:

1. Request for the temple to remain on the Washington Monument grounds, NW quadrant turf beyond November 12, 2017;
2. Request an exemption for the Abraxas Stage matrax flooring to remain on the turf one additional day
3. Request an exemption from the requirement to install matrax flooring for the (2) 10 x 20 information tents
4. Request height variance for R-Evolution due to the change of height from 46’ 9 5/8” with the base to 47”10” with the base as outlined in your October 10, 2017 email; and

Please provide all variance requests in the form of a letter to Acting Superintendent Cassius Cash. The mailing address is 900 Ohio Drive SW Washington, DC 20024. Another acceptable method is to attach the letter to an email to Cassius_Cash@nps.gov. Please cc Robbin Owen and myself on all requests.
In addition please provide an updated vigil memo to include:

2. An updated production timeline

3. A list of vehicles accessing the 17th Street sidewalk

4. More information regarding the proposed Soundbath reception

5. Insurance information, license plate and vehicle registration for the Abraxas Dragon and Solar Beatz vehicles

6. Daily program schedule

Please let me know if you have any additional questions.

Thank you

On Wed, Nov 1, 2017 at 3:29 PM, Joshua Carroll <Joshua.Carroll@nps.gov> wrote:

Marisa, thanks for your time this morning (and that of your team) and patience on the last details. Here are details on the two art pieces I mentioned which were missing them. I'm also copying this into our working version of the permit memo which I understand is receiving other final updates as discussed this morning. Feel free to call me direct if you have any questions/concerns on this or any of the other art pieces.

Paradise Lies at the Feet of the Mother

**Artist:** Farrah Abubaker

**Logistics:** 8x10 footprint, will be on Matrax and follow photosynthesis guidelines

Paradise Lies at the Feet of the Mother brings to life an installation of my soul. Incorporating audio recorded from my handmade steel tongue-drums, paintings, and knitting activated by black-lights, my objective is to create an immersive space for the viewer to connect with. The periodic change in the lights represents the rhythm of the change in my life. I want you to feel that you have stepped inside my soul, and leave feeling like you have an understanding of how I cope and understand the
world around me. See short video here and attached photo.

Created Equal
Artist: Branden Hall
Logistics: The frame touches the ground with flat 2x4's which will have enkamat and plywood squares, it is secured with 12" long rebar stakes. There is a marked out safety perimeter of 10' x 8' around the piece. It consists 4 homemade wood stanchions and bright yellow plastic chain. There's a sign about the piece and how to start it on one of the stanchions. See attached daytime and nighttime photo. I am going to propose to the artist that we bungie the arm to the frame when it is not being supervised, would welcome any other guidance or suggestions on possible safety concerns.

We think of Americans as "created equal", but that certainly does not mean we all live the same kind of lives. Much of how our lives go is outside of our control, yet there's still beauty in chaos. That's what Created Equal is all about. Created Equal is an interactive, kinetic LED sculpture that allows participants to experience how tiny changes can have huge effects. The sculpture is a wooden triple pendulum that participants start swinging using their own strength that has LEDs on the bottom-most arm. The motion of the piece is unique every time. Video

On Wed, Nov 1, 2017 at 12:06 AM, Joshua Carroll <(b) (6)> wrote:

Hi Marisa,
Looking forward to talking in the morning but will answer a few questions as well:

- Confirmed the domes and other tent structures will not be walled/skinned until after sundown on Thursday Nov 9
- Acknowledge and appreciate your recommendations and concurrence around center camp and live stage
- SolarBeatz - confirmed we will not drive SolarBeatz over any turf. Based on our experience last year and the size, my suspicion is that we can make the turn to get it around the corner from the wide walkway to the diagonal walkway (it is *significantly* smaller than Abraxas)... if that's not the case or we aren't allowed to try, we will build a roadway. FYI I believe SolarBeatz is planning to arrive on Tuesday night for setup (Nov 7) so we will have it in a temporary spot for setup adjacent to the final spot until Thursday night. We will rearrange Matrax as needed to make this happen. Can discuss in the morning as needed.
- Rainbow Portal/Nataraja placement - acknowledged on the enkamat and matrax, that won't be a problem. The pieces of Nataraja will be carried over by hand cart from the sidewalk and assembled on matrax.
- Shade tent - yes we will put double enkamat and plywood under post legs
- Nest Project - Acknowledged on matrax under the Nest.
- Searching for Eon - this will just be folding tables and chairs. Should not require matrax.
- Da Wa Da - acknowledged on dates
- Donald Trump Dance Floor - Acknowledged on Matrax.
- Graphic Sex Project - yes this will be in a tentstallation with folding tables and chairs. See attached photos.
- Reflection: The Stars... - see photos here. I suspect a concern will be raised about keeping one face open. Essential to the artistic integrity of the piece here is folks experiencing it in darkness. Have a few ideas on how to accommodate that in a way that's satisfactory to the NPS requirements. Can discuss in the morning.
- True Mirrors Experience - I expect Michael or Leonard will remember this project from last year, it was right on the walkway and a *huge* hit with all the folks in town for veterans day.. John had many veterans there crying and experiencing themselves in a new way. See the attached photo. Basically they set it up as two of these pole walls meeting at an angle with a couple poles out to hold it up. It is filled with a cloth curtain and then the mirrors are attached to the vertical columns. The
only thing that touches the ground is the round blocks, we put double enkamat and plywood under those. I don't think it will significantly block photo synthesis but we'll only have the curtains in place on Friday and Saturday and half of Sunday anyway.

- **Hanging Balls** - this is super simple. Photo attached. The touch point is little poles just like what you see in the photo. I believe it can go direct on the turf but we can put in enkamat if needed.

- **Meso Creso** - confirmed 4 pieces matrax under the DJ truck.

I still need to get back to you on:

- **Created Equal** - more details / diagram - will review with the artist and get to you tomorrow.
- **Paradise Lies at the Feet of the Mother** - not included in the meeting sent yesterday, this is a small partially enclosed 8x10 temporary "room" art piece that I was waiting to hear back from the artist to confirm. I will send photos and details after the meeting tomorrow. I expect we can follow photosynthesis requirements and it won't be controversial in any way. I expect this is the last significant new free standing small art piece we will add to the memo (besides what falls under the tentstallations).

Hope this is helpful,
Joshua

Hi Marisa,

On the sawdust containment, Mr. Richardson says:

I use a 10x10 popup tent with deer fence and fiberglass screen secured to the tent, as pictured. A plastic tarp will be used underneath the carving area. Between the deer fence, window screen and tarp I have good results in controlling wood and chips.

All propane and gasoline fuel will reside off site when I'm not carving.

I will procure a 30-AB extinguisher. currently I own 2x 10-AB extinguishers.

Robert
