

Bird Checklist

Compiled by Thomas Foti - June 1985

Printed 3/2007

CODES

1st Column - Location

- AP Species seen within the boundaries of Arkansas Post.
- A Species recorded within 7 1/2 miles of the Visitor Center.
- E Species not recorded in the area, but are expected to be seen.
- * Species which have been recorded in the area, but are very rare.

2nd Column - Seasonal Status

- P *Permanent Resident* - Species occurs throughout the year, although in most species individuals migrate and thus change from season to season.
- M *Migrant* - Only found during migration seasons. Spring migration extends from March to May, and fall migration begins in July, but peaks during September and October.
- S *Summer Resident* - Occurs throughout June, the primary month for nesting, and migrates elsewhere for the winter. Breeding is usually presumed.
- W *Winter Resident* - Occurs throughout at least a major portion of the winter season, December through February. Migrates elsewhere for the breeding season.
