

# Assateague Puppet Theater Presents: Island Habitats

[Assateague Puppet Theater Presents: Island Habitats - YouTube](#)

## Post Activity Instructions

As you just learned in the *Assateague Puppet Theater Presents: Island Habitats* video, habitats provide animals with food, water, shelter, and space. For this activity, think about what you have learned and place each animal in the correct habitat.

### Materials Needed:

- Scissors
- Color Crayons
- Glue or Tape
- 4 Activity Printout Sheets

### Directions:

1. Print out each sheet.
2. Find the sheet with different animals on it.
3. Color each animal.
4. Cut out each animal shape.
5. Match the animal outlines to the outlines on the appropriate habitat sheet.
6. Glue or tape animals in their proper outline and habitat.
7. Color each habitat.

### Follow-Up Questions:

1. Ask: “Why do you think (animal) is the (habitat)?”
2. Ask: “Do you think (animal) could also be in the (habitat)? Why or why not?”
