

Learn about Badlands National Park!

Animal Tracks

Here in the Badlands, animals have learned to hide from the sun as well as predators and curious people. Because of this, scientists and visitors may only get to see traces of some species.

Can you tell what has walked (or hopped) by recently? Draw a line from the animal to its track.

Turkey Vulture

Mountain Bluebird

Bobcat

Bison

Mule Deer

Thirteen-lined Ground Squirrel

Cottontail Rabbit
