Subject: Re: ORVAC VEHICLE SPECIFICATION SUBCOMMITTEE MEETING , FRIDAY, MAY 17.

ORVAC Specs Sub-Committee Members and Others:

I would like the ORV specs. sub-committee to discuss the three year buggy re-inspection cycle at the May 17 meeting. Custom built swamp buggies and factory built ATV's and Side by Sides are rarely changed to any significant degree making re-inspections unnecessary. Swamp buggies and ATV's and Side by Sides only need to be inspected at initial registration and possibly when the buggy changes owners. ATV owners should only be required to keep ORV's within specs.

I also have serious questions as to the need of an ORV drivers license for anyone regardless of age. Kids should simply be under the supervision of an adult when operating an ORV. The typical kid [boy or girl] will be much more interested in going to the woods if they can look forward to driving an ORV. In my opinion, the plusses far outweigh the minuses on this subject.

My two pennies
