Subject: From NPS.gov: 10pm-5am daily orv closure

This item should be on the agenda soon. This Preserve wide temporal closure began years ago concerning airboats south of loop road, before the orv plan and designated trails. Then at some point it was expanded to the entire preserve. Prior to any discussion of this issue at a meeting I would suggest that NPS staff prepare a thorough presentation that would explain all the steps from the small beginning of this rule that only effected airboats South of loop Rd. to where we are today, in a chronological sequence. After that the public and committee could discuss the issue and hopefully adopt a recommendation to remove it since the conditions that existed when this rule was developed I believe no longer exist with the ORV plan and designated trails - especially South of Loop Rd.
