## Gray Whale Math Worksheet

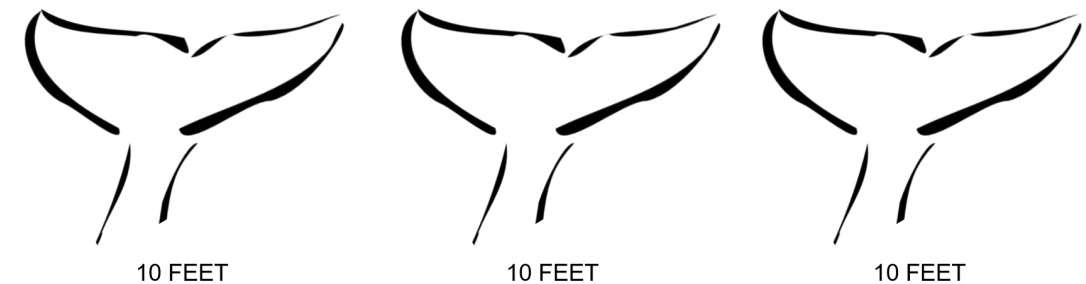

1. Gray Whales eat hundreds of pounds of food each day. That's about 8 trash cans full of food! Color in 8 trash cans below to show how much a Gray Whale eats.

2. Gray Whales travel about 10,000 miles during their yearly migration. If you walked 10 miles every day, it would take you almost 3 years to go the same distance! How old will you be in 3 years?

3. A whale's tail is called a fluke. The largest fluke belongs to the Blue Whale, and it's about 15 feet across! A Gray Whale's fluke is about 10 feet across. How many Gray Whale flukes would it take to make 1 Blue Whale fluke? Color in the flukes below to show your answer.

4. Draw a line to connect the words to the correct body part on the whale below.

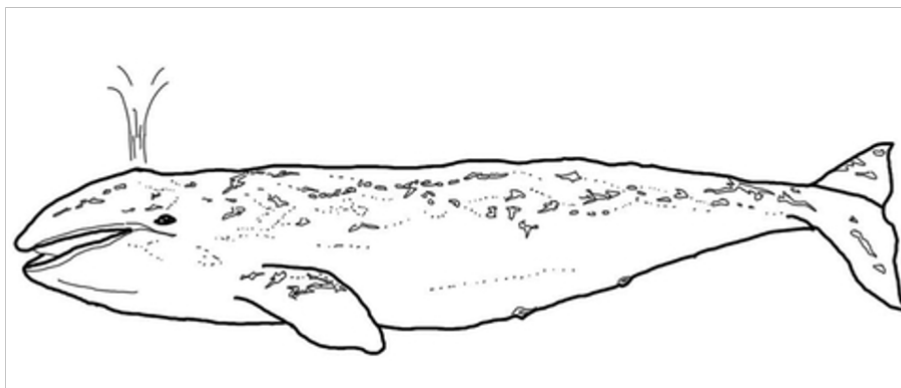

BLOWHOLE

FLIPPER

SPOUT

FLUKE

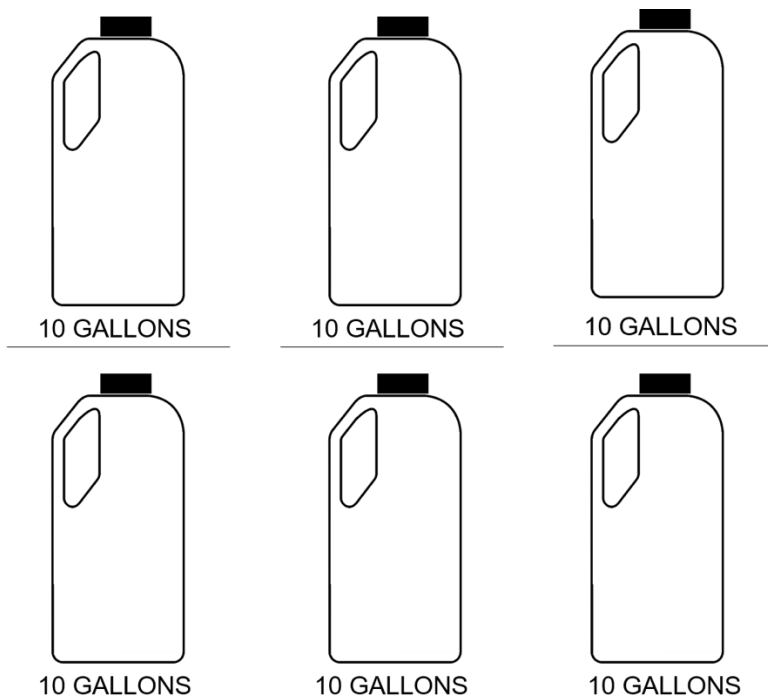

DORSAL  
RIDGES

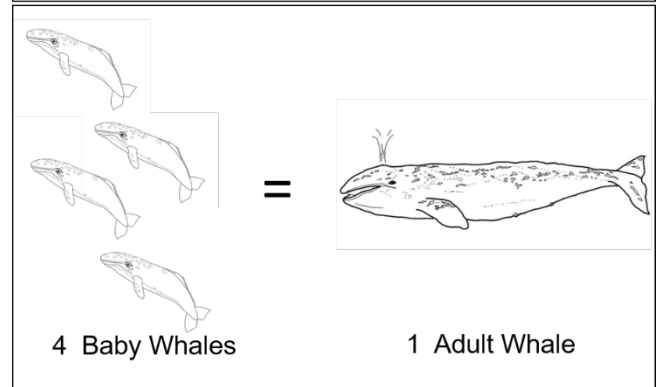

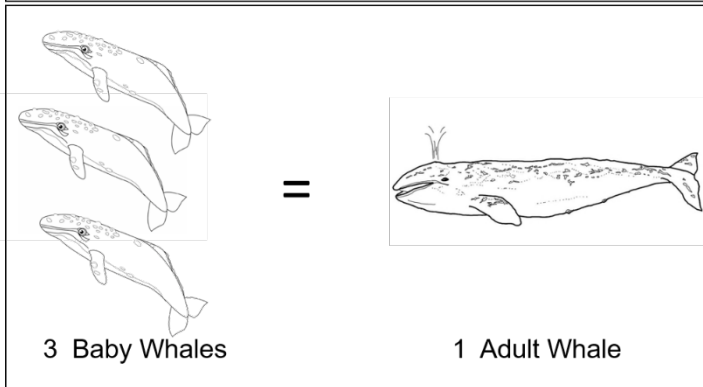

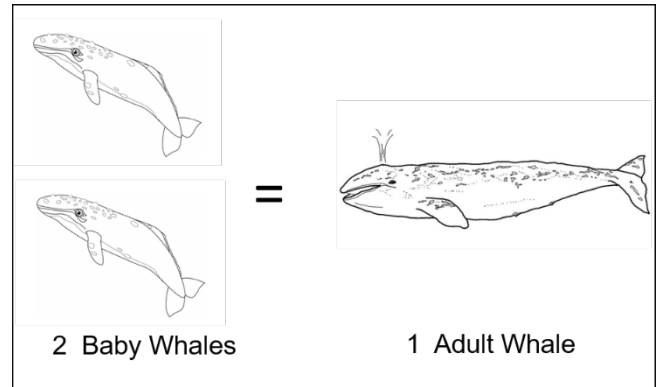

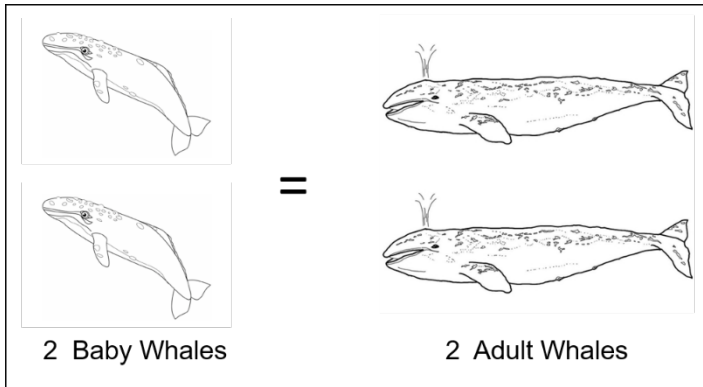

5. Whales are much bigger than humans. The most common adult human is only about 130 pounds, but adult Gray Whales are commonly 60,000 pounds! Color in the graph on the right to show how much 60,000 pounds is – each square is 10,000 pounds.

6. Baby Gray Whales drink milk because they are mammals, just like us! A baby Gray Whale can drink 50 gallons of milk each day! Each jug below is 10 gallons. Color in 5 jugs to show how much milk a baby Gray Whale drinks.

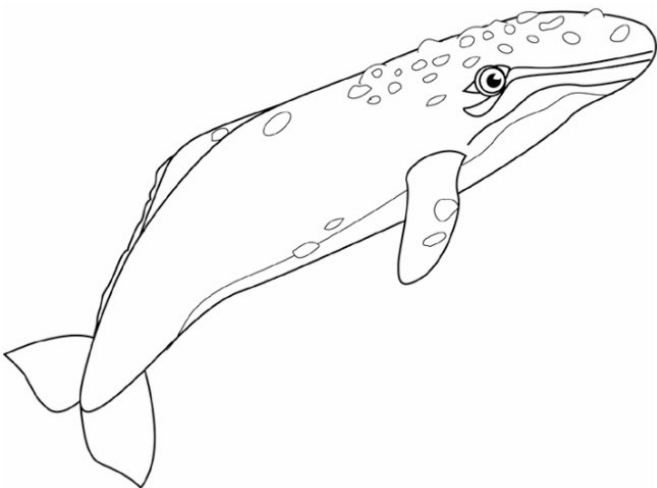

10,000
10,000
10,000
10,000
10,000
10,000
10,000
10,000

7. Baby Gray Whales are about 15 feet long when they are born but are about 45 feet long as adults. That means it takes 3 baby whales to equal the size of 1 adult whale! Circle the correct box below.

8. Some small animals like to ride along with Gray Whales on their journey. A Gray Whale's skin provides a soft place for them to live. Color in the Barnacles and Whale Lice on the Gray Whale below.

9. Gray Whales can hold their breath for up to 30 minutes! How many different things can you do in 30 minutes? Make a list of them below.
