Tourism to Canaveral National Seashore creates \$68 million in Economic Benefit ***Report shows visitor spending supports 906 jobs in local economy***

Titusville, Florida – A new National Park Service (NPS) report shows that 1,133,689 visitors to Canaveral National Seashore in 2013 spent \$68 million in communities near the park. That spending supported 906 jobs in the local area.

“Canaveral National Seashore is proud to welcome visitors from around the world, across the country as well as our close neighbors and local visitors” said superintendent Myrna Palfrey. “We are delighted to share the beauty and story of this place and the experiences it provides and to use the park as a way to introduce our visitors to this part of the country and all that it offers. National Park tourism is a significant driver in the national economy - returning \$10 for every \$1 invested in the National Park Service. We appreciate the partnership and support of our neighbors and are glad to be able to give back by helping to sustain local communities.”

The peer-reviewed visitor spending analysis was conducted by U.S. Geological Survey economists Catherine Cullinane Thomas and Christopher Huber and Lynne Koontz for the National Park Service. The report shows \$14.6 billion of direct spending by 273.6 million park visitors in communities within 60 miles of a national park. This spending supported more than 237,000 jobs nationally, with more than 197,000 jobs found in these gateway communities, and had a cumulative benefit to the U.S. economy of \$26.5 billion.

According to the 2013 economic analysis, most visitor spending was for lodging (30.3 percent) followed by food and beverages (27.3 percent), gas and oil (12.1 percent), admissions and fees (10.3 percent) and souvenirs and other expenses (10 percent).

The largest jobs categories supported by visitor spending were restaurants and bars (50,000 jobs) and lodging (38,000 jobs).
