COPYRIGHT AND RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted materials. The various state privacy acts govern the use of materials that document private individuals, groups, and corporations.

Under certain conditions specified in the law, libraries and archives are authorized to furnish a reproduction if the document does not infringe the privacy rights of an individual, group, or corporation. These specified conditions of authorized use include:

- non-commercial and non-profit study, scholarship, or research, or teaching
- criticism, commentary, or news reporting
- as a NPS preservation or security copy
- as a research copy for deposit in another institution

If a user later uses a copy or reproduction for purposes in excess of "fair use," the user may be personally liable for copyright, privacy, or publicity infringement. This institution's permission to obtain a photographic, xerographic, digital, or other copy of a document doesn't indicate permission to publish, exhibit, perform, reproduce, sell, distribute, or prepare derivative works from this document without first obtaining permission from the copyright holder and from any private individual, group, or corporation shown or otherwise recorded.

Permission to publish, exhibit, perform, reproduce, prepare derivative works from, sell, or otherwise distribute the item must be obtained by the user separately in writing from the holder of the original copyright (or if the creator is dead from his/her heirs) as well as from any individual(s), groups, or corporations whose name, image, recorded words, or private information (e.g., employment information) may be reproduced in the source material. The holder of the original copyright isn't necessarily the National Park Service. The National Park Service is not legally liable for copyright, privacy, or publicity infringement when materials are wrongfully used after being provided to researchers for "fair use."

This institution reserves the right to refuse to accept a copying order if fulfillment of the order is judged in violation of copyright or federal or state privacy or publicity law.
HISTORY

The Vivian Archive was created by the Chaco Project as a repository for records acquired relating to the history of archaeology in Chaco Canyon. The Chaco Project existed from 1969-1986 and was administered by the NPS Southwest Regional Office in Santa Fe New Mexico. Because many of the original papers belonged to Gordon Vivian, the collection of documents came to be known as the Vivian Archives, an identity possibly assigned by Robert Lister, Director of the Chaco Project. (See the Chaco Project Administrative History by Mary Maruca for further details.)

Richard Gordon Vivian was born in Laurium, Michigan August 27, 1908. In 1918 his family moved from Michigan to Albuquerque, New Mexico. In 1927 he began school at the University of New Mexico and received a B.A. in archeology. In 1929 he became a student in the first field school UNM held at Chaco Canyon. He served as Dr. Edgar L. Hewett's field assistant. He earned his master's degree in 1932. He married Myrtle Perce in Santa Fe on November 19, 1934. They had two daughters and a son, Gwinn. Gwinn has followed in his father's footsteps as an archeologist and has focused most of his research on Chaco Canyon. In the Vivian Archive and other collections, Gordon is often referred to as Vivian I and Gwinn as Vivian II.

In 1937 Vivian became supervisor of the NPS Indian CCC Mobile Unit, which was established to provide ruins stabilization for parks in the Southwest. After World War II, he returned to head the Mobile Unit, stationed in Chaco Canyon, for the NPS in the Southwest Region from 1947-1958. This program resulted in extensive archeological excavation and research work at the park. In 1958, Vivian became Supervisory Archeologist for the NPS Southwest Archeological Center at Globe, Arizona. Gordon Vivian died of leukemia on April 29, 1966 in Globe, Arizona.

According to the history of the Vivian Archive (see CHCU Collection Management Plan, 1993, Appendix Q), lots 1-1316 were Vivian's Chaco-related RSU/SWAC files which were moved to the Chaco Center office in Albuquerque in 1972. Tom Mathews and C. Randall Morrison numbered the first 1316 lots of material. Archival material continued to be collected by the Chaco Project, and was added to the VA as they came in, with numbers assigned sequentially, with no regard for topic or organization. An index card index described each lot of material, and provided some cross-referencing by topic and archaeological site. In 1981, Tom Windes ordered that no more material be added to the VA; the last number assigned was 2185. (See CHCU 51829 "A History of the Vivian Archives and Recommendations for Organization" by Tom Windes 1986)

IN 2011 THE VIVIAN ARCHIVE WAS REDUCED TO LOTS 1-1316. ORIGINAL CATALOG (recorded in the "Associated Materials" field) AND VA NUMBERS (re-assigned as file unit numbers) ARE STILL ASSOCIATED WITH MATERIALS DUE TO THE EXISTENCE OF PRIOR PUBLISHED INVENTORIES. VA 1317 - VA 2185 WAS RELOCATED TO THE APPROPRIATE COLLECTIONS.

VIVIAN ARCHIVE
1889-1971 (bulk dates: 1930s-1960s)

COLLECTION NUMBER 0001
CATALOG NUMBER CHCU 85000
VOLUME [Count] [Extent]16 [Type of Unit]LF

DESCRIPTION
The Vivian Archive is a hodgepodge of manuscripts, field notes, photographs, negatives, glass lantern slides, student papers, monthly stabilization reports, galley proofs, copies of government memos, letters, maps, drawings, correspondence, etc. mainly related to Chaco Canyon and its history of archaeology and park management. In some cases, documents associated with archaeological projects were added to the VA and thus are cataloged under its Accession number instead of the project accession number. Because the VA contains such a wealth of material in no logical order, the park decided to catalog the VA at the item level.

HAND-TINTED SLIDES (VA 1313): MADE PRIOR TO COLLAPSE OF THREATENING ROCK IN 1941. DIFFERENT COLOR PALETTE FROM JUDD SLIDES, WHICH THESE DO NOT MATCH: MASONRY HAS REDDISH TINGE. IMAGES PRIMARILY OF PUEBLO BONITO, CHETRO KETL, AND MASONRY STYLES. SEE ARCHIVE MODULE FOR ITEM DESCRIPTIONS. THERE IS NO INFORMATION ABOUT HOW WE ACQUIRED THESE IMAGES OR WHO TOOK THEM. This group of slides was added to the Vivian Archive, presumably prior to the Archive moving to the Chaco Center. This assumption is based on the number assigned, 1313. The numbers 1-1365 were assigned to items from the WACC archive. Slides appear to have been filed in "CC" (for Chaco Canyon) order number. The slide numbers have no discernible organization, and skip from site to site. 1924-1940

ORGANIZATION [Organization]The materials in the Vivian Archive have no
internal organization. Numbers were assigned based on the order files were received from SWAC. Folder titles are not original. [Arrangement] The VA is arranged in number order.

There are no formal series.

AS OF RE-CATALOGUING, AUGUST 2011, VA NUMBERING HAS BEEN MAINTAINED (re-assigned as file unit numbers) AND NO SERIES HAVE BEEN CREATED. BECAUSE THE VA HAS BEEN PUBLISHED IN INVENTORY FORM & MUCH ACCESS HAS BEEN PROVIDED TO THOSE INVENTORIES, WE HAVE KEPT THE ORIGINAL NUMBERING.

NOTE: THE VA #S HAVE BEEN CHANGED TO CONTAIN 4 DECIMEL POINTS FROM THE 3 USED PREVIOUSLY ON THE INVENTORY. USE 4 DECIMEL POINTS WHEN SEARCHING.

AS OF CATALOGUING, THERE ARE ALSO MISSING VA MATERIALS. THEIR NUMBERS ARE: 170, 385, 488, 520, 706, 711, 712, 795, 946, 952, 1036, 1094, 1101, 1103, 1104, 1110, 1112, 1116, 1125, 1126, 1136-1137, 1155, 1257-1261, 1312. VA-795 WAS KEPT AS AN "OPEN NUMBER"

PROVENANCE

The Vivian Archive was acquired from a variety of sources, including the work and personal files of Gordon Vivian and his RSU colleagues; Chaco Project archival collections; and copies of Chaco material held in other institutions.

Title: FIELD NOTES. Pueblo Pintado Irrigation; Werito's Rincon Irrigation

Summary Notes:
2 DRAFTS OF REPORT ON IRRIGATION FEATURES AT PUEBLO PINTADO, Follows outline in VA 549 data from field surveys, early aerial photos, more recent Lindbergh aerial photos, USGS topographic sheet; no previous reports; the terminus of the canal in the flat lying above the Chaco Wash in an irregular area containing a probable maximum of 240 acres; no previous data on these two masonry dams which were designed for the impoundment of surface water running off the mesa top, over the low cliff; concludes that the location was chosen on the primary basis of availability of soil with a suitable exposure, rather than a drainage which offered the greatest amount of surface flow.

EFFORT TO EXPLAIN WHAT MIGHT HAVE HAPPENED AFTER PUEBLO REVOLT (1680) WITH RESPECT TO PUEBLO-NAVAJO JOINT OCCUPATION OF CHACO AND OTHER SITES; 'THE MAJORITY OF FORTIFIED SITES BOTH IN GUBERNATOR AREA AND THOSE AT CHACO CAN BE ATIBUTED TO THIS TIME?ROUGHLY 1730'S WITH ABOUT 20 YEARS ON BOTH SIDES AND THEIR BUILDING I THINK WAS CAUSED BY FEAR OF THE COMANCHE AND UTE AND NOT OF THE SPANISH...TREE RING DATING PLAYED A VERY IMPORTANT PART IN SETTLING THIS QUESTION. IF THERE HAD BEEN NO SUCH DATING WE WOULD PROBABLY HAVE GONE ON THINKING THAT THESE SITES WERE BUILT SOMETIME DIRECTLY AFTER THE PUEBLO REVOLT AND WERE BUILT IN DEFENSE OF THE SPANISH.' DOCUMENT MUST BE DATED SOMETIME AFTER 1951.
