COPYRIGHT AND RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted materials. The various state privacy acts govern the use of materials that document private individuals, groups, and corporations.

Under certain conditions specified in the law, libraries and archives are authorized to furnish a reproduction if the document does not infringe the privacy rights of an individual, group, or corporation. These specified conditions of authorized use include:

- non-commercial and non-profit study, scholarship, or research, or teaching
- criticism, commentary, or news reporting
- as a NPS preservation or security copy
- as a research copy for deposit in another institution

If a user later uses a copy or reproduction for purposes in excess of "fair use," the user may be personally liable for copyright, privacy, or publicity infringement. This institution's permission to obtain a photographic, xerographic, digital, or other copy of a document doesn't indicate permission to publish, exhibit, perform, reproduce, sell, distribute, or prepare derivative works from this document without first obtaining permission from the copyright holder and from any private individual, group, or corporation shown or otherwise recorded.

Permission to publish, exhibit, perform, reproduce, prepare derivative works from, sell, or otherwise distribute the item must be obtained by the user separately in writing from the holder of the original copyright (or if the creator is dead from his/her heirs) as well as from any individual(s), groups, or corporations whose name, image, recorded words, or private information (e.g., employment information) may be reproduced in the source material. The holder of the original copyright isn't necessarily the National Park Service. The National Park Service is not legally liable for copyright, privacy, or publicity infringement when materials are wrongfully used after being provided to researchers for "fair use."

This institution reserves the right to refuse to accept a copying order if fulfillment of the order is judged in violation of copyright or federal or state privacy or publicity law.
HISTORY

R. Gwinnet Vivian, son of R. Gordon and Myrtle Vivian, has been associated with Chaco Canyon his whole life and professional career. His father was a student at the University of New Mexico field school in Chaco in the 1930s-1940s, then went on to a long career in the National Park Service. Gordon Vivian founded the NPS mobile ruins stabilization unit (RSU) in the Southwest. This unit did all the stabilization work at the sites in Chaco until the park developed its own preservation crew in the 1970s.

As a result of the RSU, Gwinn Vivian arrived at Chaco at age one, and had his first experience in archaeology in Chaco Canyon at the age of three. He is widely recognized for his contributions in the areas of Southwestern archaeology, museology, historic preservation, and cultural resource management. Of special importance are his contributions to the understanding of the prehistory of Chaco Canyon and the surrounding region. He received his BA (1957) and MA (1960) from the University of New Mexico. He received his Ph.D. in anthropology from the University of Arizona in 1970.

From 1970 to his retirement in 1999 Gwinn worked at the Arizona State Museum as staff archaeologist, as associate director, and as curator of archaeology for public programs. Vivian was one of the early leaders in cultural resource management. He ran the Arizona Highway Salvage Program for the Arizona State Museum and was its leading investigator for several years. He developed procedures and policies for the new CRM programs that were being developed throughout the nation. He was involved in the development and construction of major Arizona State Museum exhibits such as one depicting Tarahumara life in a cave setting and "Paths of Life," a major exhibit that highlights the diversity of Southwest Indian life in historical and modern times.

In the area of historic preservation, Gwinn worked with leaders of Arizona's Indian communities and members of the Arizona legislature to develop new rules and regulations for the revised Arizona Antiquity Act. Of particular note is his work in Chaco Canyon, where his fieldwork centered on making sense of the elaborate road and water control systems. In addition to writing numerous chapters in edited books, he is the author of The Chacoan Prehistory of the San Juan Basin.

Since his retirement, Vivian has been heavily involved in public outreach, both as a lecturer and popular tour guide of the Chaco Canyon region.

SERIES DESCRIPTIONS AND FILE UNITS

Collection/Series: 0030/001
Series Title: CHACO CANYON WATER CONTROL PROJECT/ROADS SURVEY
Accession: CHCU-00464  Catalog Nbr: CHCU 41042

History: This collection was made by Gwinn Vivian and Robert Buettner in 1970 and March and April of 1971, during testing for prehistoric roads and water control features such as canals. The collection includes ceramics, lithics, and archaeological samples. Presumably this collection was made under a permit to Arizona State Museum, but there are no records regarding a permit. A portion of this collection was received by the park in 1982; the rest remained on loan to ASM until 1993. The 1982 material was accessioned as No. 464. The 1993 material was incorrectly accessioned as a new collection, No. 661. On January 4, 2005, the ANCS records were changed to the correct accession number, 464.

Scope: The majority of the archival material was originally added to the Vivian Archive (Acc 605) and cataloged as such. In 2006, these records were removed from the VA and housed with this collection.

Arrangement: Organized into 4 Subseries: Subseries A: Field Notes; Subseries B: Maps; Subseries C: Images; Subseries D: Reports The Field Notes materials are arranged in their original Vivian Archive number order.

Provenance: Gwinn Vivian, Arizona State Museum

Series Title: CLY CANYON RESERVOIR PROJECT

Accession: CHCU-00549  Catalog Nbr: CHCU 41042

History: Testing in Clys Canyon to obtain information on prehistoric water catchment. In April 1991, R. Gwinn Vivian conducted testing at two sites, 29SJ 1791 and 1792 to determine if reservoirs had been constructed that would indicate domestic water use. No walled reservoirs were detected. A few sherds were collected during this project, and slides and photographs were taken, along with field notes.

Scope: Includes notes, slides, photos.

Arrangement: Organized into 2 subseries: Subseries A: Field Notes; Subseries B: Images

**History:** In the area of historic preservation, Gwinn's work in Chaco Canyon is of particular note, where his fieldwork centered on water control systems and roads, which he believes were critical aspects of Chaco culture growth in the 11th century. In 1981 he was retained as a consultant to the BLM survey team due to his fieldwork on the elaborate Chacoan road and water control systems.

Gwinn Vivian has devoted much of his time to writing and since his retirement, has been heavily involved in public outreach, both as a lecturer and popular tour guide of the Chaco Canyon region.

In addition to writing numerous chapters in edited books, he is the author of The Chacoan Prehistory of the San Juan Basin and The Chaco Handbook: An Encyclopedia Guide.

**Scope:** Contains material on BC Sites (mostly BC 59), Dendrochronology, Gwinn Vivian's involvement with the Bureau of Land Management, Research and Reference materials and correspondence.

**Arrangement:** Organized into 5 subseries: 001 - BC Sites 002 - Dendrochronology 003 - Correspondence 004 - Bureau of Land Management 005 - Research / Reference Documentation

Title: Tom Windes - Corresp., 1987. Gwinn Vivian
Summary Notes:
History: When BLM undertook this survey, Gwinn Vivian was Director of the Arizona State Museum. He was not part of the BLM survey team but had already done fieldwork in the 1960's centered on the elaborate road and water control systems. At that time, people thought the roads might be canals.

Much of Gwinn Vivian's archeological interest has centered on pre-historic roads. In Arizona, Gwinn Vivian became the first Highway Salvage Archaeologist in 1964 and remained in that position through 1970. Arizona State Museum had begun an informal highway salvage program in 1955 in response to concerns that archaeological resources were being destroyed during highway construction.
