COPYRIGHT AND RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted materials. The various state privacy acts govern the use of materials that document private individuals, groups, and corporations.

Under certain conditions specified in the law, libraries and archives are authorized to furnish a reproduction if the document does not infringe the privacy rights of an individual, group, or corporation. These specified conditions of authorized use include:

- non-commercial and non-profit study, scholarship, or research, or teaching
- criticism, commentary, or news reporting
- as a NPS preservation or security copy
- as a research copy for deposit in another institution

If a user later uses a copy or reproduction for purposes in excess of "fair use," the user may be personally liable for copyright, privacy, or publicity infringement. This institution's permission to obtain a photographic, xerographic, digital, or other copy of a document doesn't indicate permission to publish, exhibit, perform, reproduce, sell, distribute, or prepare derivative works from this document without first obtaining permission from the copyright holder and from any private individual, group, or corporation shown or otherwise recorded.

Permission to publish, exhibit, perform, reproduce, prepare derivative works from, sell, or otherwise distribute the item must be obtained by the user separately in writing from the holder of the original copyright (or if the creator is dead from his/her heirs) as well as from any individual(s), groups, or corporations whose name, image, recorded words, or private information (e.g., employment information) may be reproduced in the source material. The holder of the original copyright isn't necessarily the National Park Service. The National Park Service is not legally liable for copyright, privacy, or publicity infringement when materials are wrongfully used after being provided to researchers for "fair use."

This institution reserves the right to refuse to accept a copying order if fulfillment of the order is judged in violation of copyright or federal or state privacy or publicity law.

HISTORY

Records and notes most likely for Mills' chapter for the Additional Land Survey, possibly also used for her dissertation on ceramics.

ADL's "Regional Patterns of Ceramic Variability in the San Juan Basin: Ceramics of the Chaco Additions Inventory Survey 1986" is located in COLL 003/004 Folder 8. These file units contain the computerized data used in this publication.

Introduction by Mills: "This chapter reports on the analysis of data on 77,323 ceramic artifacts from 709 sites and 1154 separate proveniences recorded during the inventory survey. The primary goals of the analysis are threefold, and each one of these research goals structures a major section of this chapter. The first goal is to describe the ceramic data base with respect to its spatial, temporal, and traditional ceramic typological variables. The second goal of the analysis is to identify patterns of ceramic production and distribution. Using a limited number of attributes, production and distribution patterns are identified and the implications of these patterns for models of ceramic trade and exchange in the San Juan Basin are explored. The final goal of the analysis is to identify functional patterning in the ceramic assemblages. Interpretations of site function are made on the basis of assemblage patterns and these interpretations are compared with the site and feature type assignments made in the field."

Barbara Mills is an archeologist whose research interests include Southwest archaeology, American Indian ceramics, archaeologies of inequality related to gender and colonialism, migration, identity and heritage preservation.

She has taught at the University of Arizona since 1991 and from 1993 to 2004 Mills directed the UA Archaeological Field School, where she worked on heritage projects with the White Mountain Apache Tribe, the Hopi Tribe and the Apache Sitgreaves National Forests.

In 2008, Barbara Mills became the seventh anthropology department head at The University of Arizona, one of the world's best-known anthropology programs, and the first woman to hold that post.
