

# Marine Protected Areas Expanded in the Channel Islands National Marine Sanctuary

*Update to the Protecting Your Channel Islands Brochure  
September 2007*

The National Oceanic and Atmospheric Administration has added a network of marine protected areas (MPAs) to the existing state water MPAs. The new MPAs include eight no-take marine reserves, where all extractive activities and injury to sanctuary resources are prohibited, and a marine conservation area, where commercial and recreational lobster fishing and recreational fishing for pelagic species are allowed, while all other resource extraction and injury is prohibited. Transiting and anchoring in MPAs is allowed as long as fishing gear is stowed and not in use.

Some small gaps remain between the state and new MPAs. A decision to fill in the gaps by the California Fish and Game Commission is anticipated in October 2007.

The new MPAs went into effect on July 29, 2007. For more information, visit <http://channelislands.noaa.gov/> or call 805.966.7107.

## Geographic Coordinates for the Channel Islands MPAs

The following geographic coordinates and the mean high water line define the boundaries of the MPAs within the Channel Islands National Marine Sanctuary. Boundary descriptions and regulations are available at the California Department of Fish and Game website ([http://www.dfg.ca.gov/marine/channel\\_islands/index.asp](http://www.dfg.ca.gov/marine/channel_islands/index.asp)) and in the Federal Register 15 CFR Part 922 or the sanctuary website.
