

Motor Coach Guide for Rim Rock Drive

Welcome to Colorado National Monument! Your guests are about to experience one of the grandest scenic drives in the American West. Rim Rock Drive offers 23 miles of twists and turns above red rock canyons and alongside pinyon-juniper forest. The road — built from 1931 to 1950 by the Civilian Conservation Corps (CCC), Local Experienced Men (LEMs), and the Works Project Administration (WPA) — is inseparable from the identity of the monument. The drive provides access to Saddlehorn Visitor Center and Campground, three picnic areas, 19 signed overlooks, and 14 hiking trails. Easy access to overlooks will allow your guests to gaze upon towering shrines and scan canyons for raptors. Look for bighorn sheep along the drive. Allow at least one hour driving time, plus additional time for walking, photography, or stopping at pullouts.

Road Grades

From the west entrance to the Saddlehorn Visitor Center and from the east entrance to Cold Shivers Point, the grade is between 6-9 percent (steeper from the east side). The west entrance is at 4690 feet; the highest point in the park is 6640 feet; and the east entrance is at 4930 feet.

Tunnel Dimensions

Clearance ranges from a low of 11'5" at a point two feet from the curb to a maximum of 16'1" above the center of the road.

- Lower West Tunnel - 236 feet long
- Upper West Tunnel - 182 feet long
- East Tunnel - 530 feet long

Fees

Tour companies pay \$100 for a coach with a seating capacity of 26 or more passengers. The fee is paid at the entrance station by cash, check, or credit card.
