

Directions for making a diorama

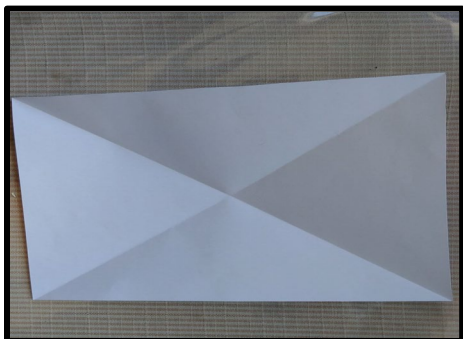

1. Start with a standard piece of copy paper. Fold paper from bottom left corner as shown below.

2. Cut non-folded extra strip off. Save the strip of paper.

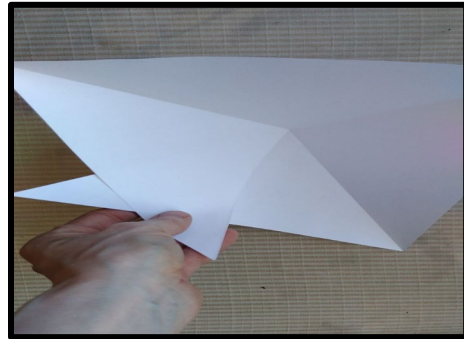

3. Unfold paper (right triangle) and fold in opposite direction (right bottom corner to top left corner).

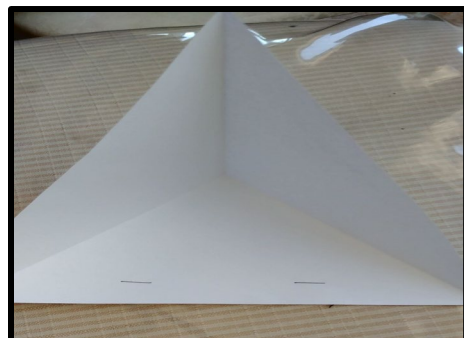

4. Cut one crease on the paper to the center line only.

5. Hold the cut corner and overlap the edges left over right.

6. Once the two sections of the paper are overlapped staple them together or glue.

7. Use the rectangle piece that was cut off in step 2 to draw parts for the diorama.

8. Cut out the parts from the rectangle piece. Color the background and base of diorama. Fold a small horizontal section of each part you cut out. Tape or glue the folded parts onto the diorama.
