

"Everybody's Got to Live Someplace"

Chorus:

Everybody's got to live someplace.
Everything needs some place to be.
A habitat's a habit with the creatures of the world.
Each has its own community.

Verse 1:

Worm and fish and blackbird,
Dragonfly and duck,
Mushroom, moss, and maple tree,
Human being and microbe,
Squirrel, moose, and goose-
Each has its own community.

Chorus:

Everybody's got to live someplace.
Everything needs some place to be.
A habitat's a habit with the creatures of the world.
Each has its own community.

Verse 2:

Everything's important,
Everybody counts,
From the hippo to the fea.
We all need each other--
That's the secret of
Life in a community.

Chorus:

Everybody's got to live someplace.
Everything needs some place to be.
A habitat's a habit with the creatures of the world.
Each has its own community.
