## Estimating Costs and Finding Actual Costs

Name\_\_\_\_\_

Of the things you've decided to take, list those items you don't already own and would have to buy. Next, estimate how much you'd spend for each item. Then total your estimated costs.

After completing the estimated cost column, find the actual cost of the items (from store catalogs or the internet) and total the costs for both the estimated cost and the actual cost.

Items to Buy	Estimated Cost	Actual Cost
Totals of Estimated and Actual Costs
