

# **“Let the Water Flow!”**

## **Big Cypress National Preserve**

**Name:** \_\_\_\_\_ **Date:** \_\_\_\_\_ **Class Period:** \_\_\_\_\_

**Vocabulary:** Watershed, Brackish, Rainfall, Groundwater, Infiltration, Aquifer, Dry/Wet Season

**Instructions:** During the video, questions will be asked about the Big Cypress Watershed. Write down your answers to each question as they come up in the video.

1. Is the water flowing faster above the ground, or will it flow faster underneath the ground?
2. What are some things that can affect the flow of water in the cypress swamp?
3. Where is the water flowing in the prairie during the dry season?
4. When does the water flow faster in the Big Cypress Swamp? During the dry or wet season?
5. Why would a frog need clean water?
6. What types of marine animals are using the mangrove estuaries and why?
7. Where are we getting the water [that we use at home] from the swamp?
