

“Every Snowflake Counts” Snow Desk Worksheet

Name: _____ Date: _____

What state is Grand Teton National Park in? _____

What is the **weather** like today in Grand Teton National Park? _____ degrees _____ inches of snow.

What is the **weather** like today outside your classroom? _____ degrees _____ inches of snow.

In Grand Teton National Park, all three forms of water (H₂O) exist. What are the three forms of H₂O, the three example features of that form of water, and the animals that need that water feature to survive?

Form of H₂O:

Example Water Feature in GTNP:

Animal that Needs that Feature:

Fill in the three phases of the water cycle:

“Every Snowflake Counts”

Earth’s water is stored in these places:
(Example: rivers)

While there, the H₂O is in this form:
(Example: liquid)

Math Problem: If I leave my faucet running while brushing my teeth, I waste 3 gallons of water.

Question: How many gallons of water could you save, every day, if each person in your class (including your teacher) turned off their water while brushing their teeth?

Known:

Number of people in your class (including teacher(s)) = ____

Gallons used every time we brush our teeth with the faucet on = 3 gallons

Number of times we brush our teeth each day = 2 times

Name three things you can do to help save/conserve water:

1. _____
2. _____
3. _____

How can you have a positive impact on Grand Teton National Park and other special places in the future? _____
