

Surviving Winter Snow Desk Worksheet

Name: _____

Date: _____

Which state is Grand Teton National Park in? _____

What is the **weather** like today in Grand Teton National Park? _____ degrees _____ inches of snow.

What is the **weather** like today outside your classroom? _____ degrees _____ inches of snow.

Which of these factors make Grand Teton National Park's winters unique? (circle four)

Light

Warm

All the Food

No Food

Cold

Long

Short

Dark

Name the 3 types of **adaptations** (changes) that animals may have in order to survive winter:

1. Change how they _____.
2. Change where they _____.
3. Change what they _____.

Circle the animal that grows an extra warm winter coat for the winter.

Name one animal in Grand Teton that changes color with the seasons to **camouflage**.

1: _____

Why would an animal want to **live under the snow**? (two reasons)

1. _____ 2. _____

Name an animal whose **large feet** help it move more easily over the snow (like snowshoes).

Please draw a line to match the animal to its food source during the winter months:

ANIMAL

FOOD

How can you have a positive impact on Grand Teton National Park in the future?

What was your favorite animal from the program today? What **adaptations** does it have?
