

Crater Lake

Lady of the Woods Scavenger Hunt

While hiking the Lady of the Woods Trail, find as many of the following as you can.

A unique home for a tree

A tree with a bump

Something smaller than a penny

Something carved into a rock

A group of the same plants or trees

Something light green

Something dark green

Something in motion

A tree showing its age

An animal's home

A tree with a curved base (the result of snow pushing on a young tree trunk)

A Mountain Hemlock tree (bent lead branch)

A speckled rock

Weather station (The park's weather has been monitored since 1919)

Lodgepole Pine (2 needles bunched together)

Something used to help snowplow drivers

A 30 second experiment

Stay silent and still for 30 seconds. Notice what you hear, see and feel.

After the 30 seconds, share your experience with someone.

Your thoughts...

Today at a national park, why don't we carve into rocks or any other part of nature?

How does a forest compare to where you live?

How can you help keep a forest healthy?

After this hike, what is something you would like to learn more about?
