Getting to Know This Place

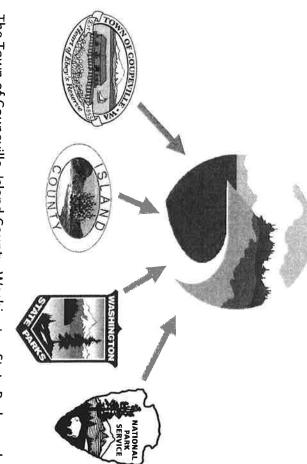

Welcome to Whidbey Island and Ebey's Landing National Historical Reserve!

Tell us where you're visiting from:

How did you get here? Trace your route on the dotted line that shows how you got to Ebey's Reserve. Look at the map and color in

The Making of a Reserve

Ebey's Reserve is the very first national historical reserve, created by the US Congress in 1978. The Reserve is a living, working community just like yours. Most of the land in the Reserve is privately owned, but you will also find wonderful state & community parks and trails that are open to the public. Enjoy yourself!

The Town of Coupeville, Island County, Washington State Parks, and the National Park Service all work together to protect the special places you see in the Reserve. The Ebey's Landing emblem is a symbol of their partnership.

When have you done something with other people that you could not have done alone?

Ebey's Reserve Bingo

As you explore the island, mark the things that you see. When you have five in a row, you have a **BINGO!**

The Duck	Ferry Boat	Rabbit Rabbit	Blockhouse	Tractor
Sull Kelp	Cemetery	Goat	Baid Eagle	Ebey House
Lighthouse	Pumpkin	Free Space	Ebey's Reserve Symbol	THE TE
American Robin	Barn	Mountain	Crop Sign GRAIN DRGANIC	1 Cow
Historical Marker	Great Blue Heron	Raindrops	Clam Shell	Chicken

Skagit Village Names

Find the big map of Penn Cove at the kiosk at the Coupeville Wharf. Then find the native names for these traditional Skagit villages around Penn Cove. Write the name we use today for those sites.

Čekwolá

Today we call this place:

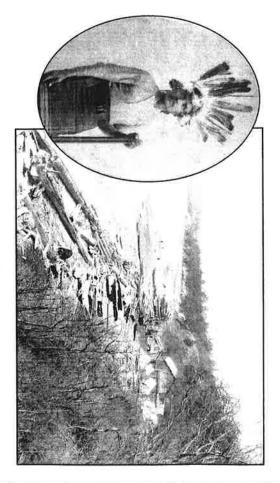

Čoba?álšid

Today we call this place:

B**3**á**3**ale

Today we call this place:

Coastal Salish People

The Coastal Salish people called "Skagit" [SKAD-jit], lived on Whidbey Island in the heart of present-day Ebey's Reserve for 10,000 years. Penn Cove was home to at least three permanent villages. One of them was called Bah-TSAHD-zah-lee, or 'snake place'. This is the area of present-day Coupeville.

The Skagit and their neighbors fished and harvested shellfish from Penn Cove and the surrounding waters of the Salish Sea. In nearby prairies and forests they hunted game and fowl, and they collected plants such as berries and camas bulbs. Here nature supported the largest native population in the region.

If you were a Salish person on Central Whidbey, 500 years ago, what else would you need to survive?

What Helped Make the Prairies?

Glaciers had a heavy impact in forming the prairies you see today. Long ago, the entire Reserve was covered in ice over a mile deep.

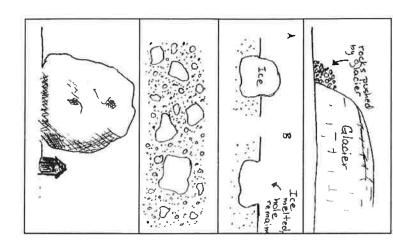

Match the glacial term and definition with the drawing.

Glacial erratic: a boulder transported and deposited by a glacier having a different source than the bedrock upon which it is sitting.

Kettle: A depression left in a mass of glacial drift, formed by the melting of an isolated block of glacial ice.

Moraine: accumulated earth and stones pushed and deposited by a glacier.

Till: unsorted clay, sand, gravel and boulders deposited by a glacier within moraines.

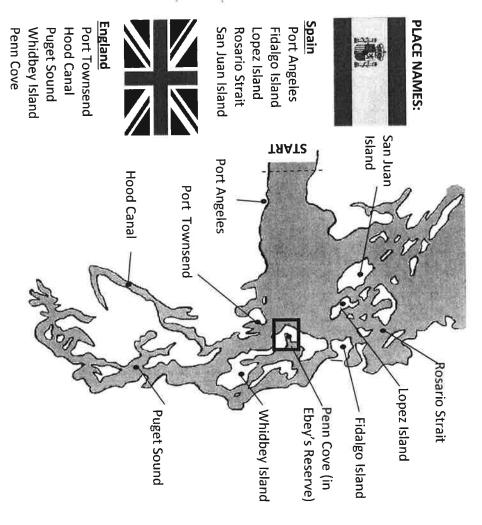

Look around Ebey's Landing National Historical Reserve for a giant glacial erratic.

(Hint—one is located near South Main Street behind the coffee shop!)

The Race for Empire in the Pacific Northwest

In 1792, when George Washington was president of the United States, the kings of both England and Spain sent explorers to chart and claim the Pacific Northwest. Britain's Captain Vancouver and Spain's Bodega y Quadra *could* have gone to war, but instead they worked together to chart the Salish Sea for the benefit of all.

Connect the places named by the Spanish in RED and connect the places named by the English in BLUE.

The Settlers Arrive

A pioneer's prospective on his life

Olympia, Oregon Apríl 25, 1851

My dear brother—

I scarcely know how
I shall write or what I
shall write... The great
desire of [my] heart is, and
has been, to get my own
and father's family to this
country. I think it would
be a great move. I have

Isaac N. Ebey, for whom Ebey's ing National Historical Reserve is named.

always thought so..

To the north down along Admiralty Inlet (that portion of water connecting Puget Sound with the Straits of Juan de Fuca) the cultivating land is generally found confined to the valleys of streams with the exception of Whidby's Island (the large island that blocks up and terminates the Straits of Fuca on the east) which is almost a paradise of nature.

I have taken my claim on it and am now living on the same in order to avail myself of the provisions of the Donation law. If Rebecca, the children, and you all were here, I could live and die here content.

—Isaac N. Ebey

Yours truly,

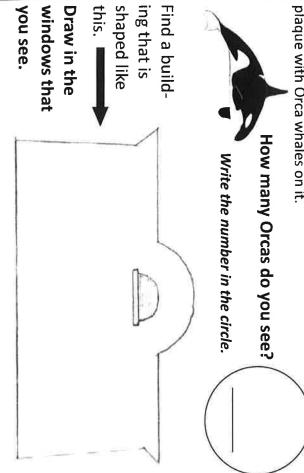

Have you ever gone somewhere new and wished that all your friends and family could come there with you? Write a letter telling a friend or family about a place you think is very special.

					Dear_
					l

A Visit to Historic Front Street

As you explore Historic Front Street, look for details that make this a special part of Ebey's Reserve. The location on Penn Cove and buildings of different ages and styles tell the story of the second oldest town in Washington State.

The waters around Ebey's Reserve are home to family groups of Orcas, whales with distinctive black fins. Near the wharf find a round wooden plaque with Orca whales on it.

Oval metal plaques like this one show the year a building was built.

Find a building on Front Street with a plaque and write the year that you see in the oval.

For an extra challenge, you can learn how old the building is by subtracting this year from the current year.

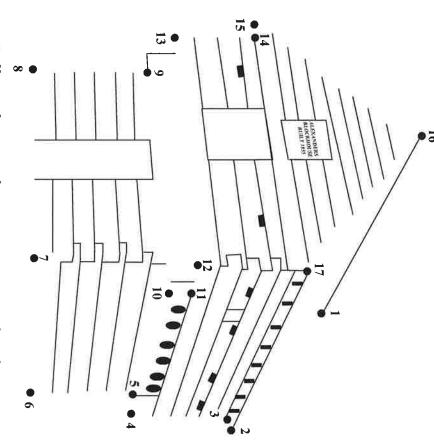

How old is the building you chose?

見

Alexander Blockhouse

At one time, there were over a dozen blockhouses in Central Whidbey. Today only four remain. The Jacob Ebey Blockhouse and the Davis Blockhouse are both located near the Sunnyside Cemetery and the Crockett Blockhouse is on Fort Casey Road.

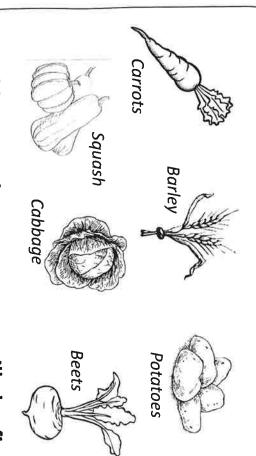

Follow the numbers to connect the dots.

Where is the Alexander Blockhouse located?

Why do you think people built blockhouses?

Growing Food On the Prairies

Typical crops grown in Ebey's Reserve are:

In addition to these crops, you will also find:

Cucumbers	Pumpkins	Wheat	Corn	Mustard
Herbs	Alfalfa	Raspberries	Strawberries	Beans
Garlic	Barley	Peas	Lavender	Hay

Do you have a garden? What do you grow?

What is your favorite vegetable? Draw a Picture of it

Be a "Sense-ational" Explorer in Ebey's Reserve!

Almost everyone has 5 senses: Sight, Taste, Touch, Hearing and Smell. As you explore Ebey's Reserve, thank about what your senses are telling you:

Tell us something you **SAW** in Ebey's Reserve:

Tell us something you **SMELLED** in Ebey's Reserve:

Tell us something you TOUCHED in Ebey's Reserve:

Tell us something you **HEARD** in Ebey's Reserve:

Tell us something you **TASTED** in Ebey's Reserve:

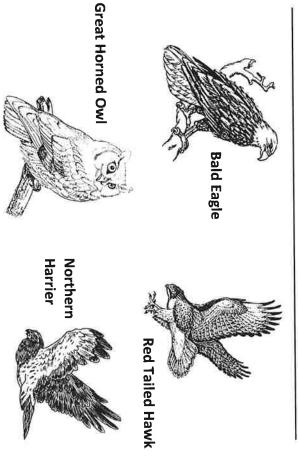

Raptors in the Reserve

A raptor is a large carnivorous bird that feeds on small animals or carrion (dead animals). Ebey's Reserve is home to many raptors. Look for them gliding high in the sky, sitting patiently on a fence post, or even following a tractor in a farm field. In each case, they are probably hunting for their next meal! Raptors share 3 distinct features: powerful eyesight, a hooked beak, and strong talons. In the Reserve, the most common raptors you will see in the daylight are the Bald Eagle, Northern Harrier, and the Red Tailed Hawk. Owls are more frequently seen at twilight or heard at night.

What sound does an owl make?

Did you spot a raptor anywhere in the Reserve? Where?

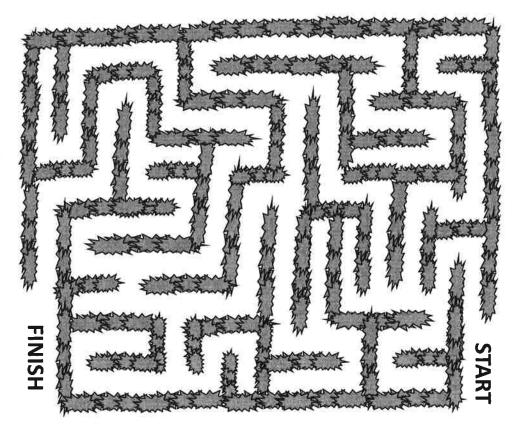

What was it doing?_

Hedgerows

Hedgerows begin when birds rest on a fence and leave behind plants seeds they ate earlier. Hedges are great habitat for small animals, birds and insects. They slow down water runoff after rain and help keep soil from being blown away by wind.

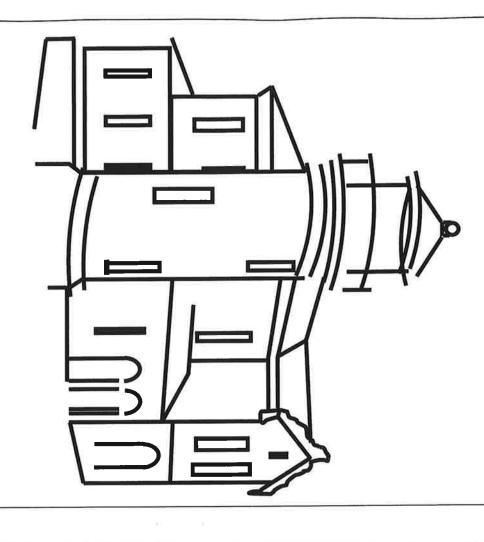

Life's full of Hedges in the Reserve...

... but we all find our way through them!

Admiralty Lighthouse

Admiralty Lighthouse at Fort Casey sits above Admiralty Inlet. The lighthouse helped ships passing between the Strait of Juan de Fuca and Puget Sound. You can visit the lighthouse—it is open to the public throughout the year.

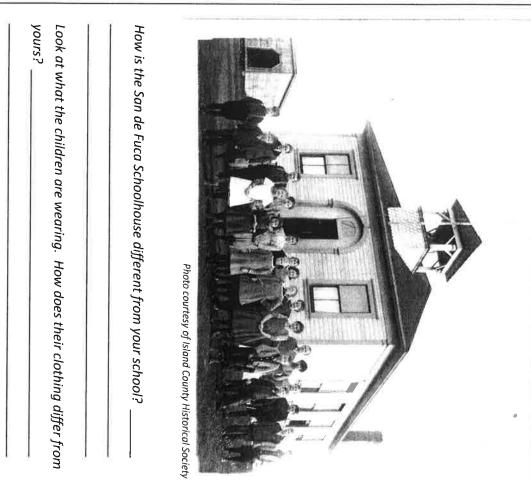

Complete the lines and

color the lighthouse.

School Days at San de Fuca

Below is a picture of the San de Fuca Schoolhouse built in 1903. The school still stands on the north end of the Reserve overlooking Penn Cove. One large main room housed all the grades from 1st Grade up through 8th Grade. Children didn't ride a bus to get to school or have their parents drive them. They would generally walk to school.

Word Search Glossary

Admiralty Inlet—Waterway west of Whidbey Island connecting Seattle and Tacoma to the Strait of Juan de Fuca

Blockhouse—Two-story log-cabin style forts built to protect settlers against attacks by native Americans.

Bluff—The high cliffs along the shorelines of Whidbey Island.

Camas—A native lily, grown for food by native Americans.

Captain Coupe—The New England sea captain who claimed land along Penn Cove in 1852. Coupeville is named for him.

Coastal Salish—Native Americans that live along the coast of the Puget Sound and Salish Sea.

Coveland—The first Island County government, located at the head of Penn Cove in the 1850s.

Donation Land Claim—A law in 1850 that let pioneers claim 320 acres of land in Oregon Territory.

Douglas Fir—A common tall evergreen tree that grows on the island.

Ebey's Landing—The stretch of beach on Whidbey Island's west coast where a ferry to and from Port Townsend landed.

Fort Casey—The army base on Whidbey Island active from the late 1800s through the mid-1900s.

Mosquito Fleet—The privately-owned steamships that provided transportation between Puget Sound towns.

Orca — Also called "killer whale". Resident pods of whales live in Puget Sound waters.

Salal —A native shrub, common in local forests, and a source of berries which native Americans ate.

Smith Prairie—The Eastern-most prairie within Ebey's Reserve, named after the Smith family's Donation Land Claim.
