Long Island, New York

# 2012 Tide Tables

## *Fire Island National Seashore*

Fire Island National Seashore was established in September 1964 "for the purpose of conserving and preserving for the use of future generations certain relatively unspoiled and undeveloped beaches, dunes, and other natural features within Suffolk County, New York, which possess high values to the Nation."

## *Welcome to Fire Island National Seashore*

The annual Tide Tables booklet is a tradition at Fire Island National Seashore. It is provided as a benefit to all park users but is prepared primarily for individuals who have obtained permits to drive off-road vehicles on Fire Island's beach. The beach is a dynamic system that is constantly changing. Every tide provides a new scenic landscape. To protect that landscape and maintain Fire Island's remote character and natural resources, beach driving is limited.

From Long Island, New York to Brownsville, Texas, a string of barrier islands skirt the coastline of the eastern seaboard. Barrier islands are large dynamic sandbars, which are constantly moving and changing. They are shaped by tides, wave action, off-shore sand movement, and human manipulation. Fire Island is one of five barrier islands along the south shore of Long Island.

**Beneath its visible leaves, beach grass rhizomes and rootlets secure grains of sand that form the protective primary dune.**

**Mycorrhizal fungi bind sand grains to rootlets, enhancing resistance to erosion.**

Fire Island is 32 miles long with a south-facing shoreline and has been migrating from the east to the west. In 1826, the first Fire Island Lighthouse was built on the western end of the island. Today, the Fire Island Inlet is more than 5 miles west of the Lighthouse. The beach is constantly changing due to cyclic erosion and accretion of sand.

The dunes are the backbone of this dynamic barrier island that buffers Long Island from the forces of the Atlantic Ocean. Naturally formed dunes consist of multiple layers of sand held together by the roots and rhizomes of beach grass. Foot and/or vehicle traffic easily damages beach grass and its roots. To protect Fire Island's dunes always use designated dune crossings and never drive within twenty feet of the base of the dunes or the vegetation line.

Driving permits are required for all off-road driving on Fire Island. Unpermitted vehicles are restricted to roads and parking lots near the bridges connecting Fire Island to Long Island. Beach driving is permitted for some recreational uses and to a limited number of residents, contractors, essential service providers, public utilities, and official vehicles to gain access to communities within the park's boundaries.

**Thank you for your efforts to help preserve and protect Fire Island.**

**A weakened dune line leaves structures and habitats more vulnerable to storm damage, and increases the island's susceptibility to a breach.**

Off-road driving regulations help protect natural beaches and primary dunes at Fire Island National Seashore, while providing a reasonable amount of access to island communities. Under certain conditions, the beach may be closed to vehicles for safety purposes.

## Beach Driving Permits

*A valid permit is required for every vehicle driven on Fire Island beaches. Each Fire Island National Seashore permit has its own stipulations and requirements. Smith Point County Park and Robert Moses State Park have separate recreational use permits.*

### Sportsman's Vehicle Permits (Recreational)

Recreational vehicles are permitted to drive on designated portions of Fire Island National Seashore beach (see map, page 12) as a means of access for fishing or hunting. Permits are issued at the Otis Pike Wilderness Visitor Center at Smith Point on or after September 1, for use between September 15 and December 31, unless beach conditions prevent or restrict driving activities. The cost of these permits is \$50.00. Call 631-281-3010 for hours of operation. A current fishing and/or hunting license is required to receive this driving permit. (A park issued hunting permit is also required for hunting on park lands.)

### Non-Recreational Vehicle Permits

A limited number of resident, contractor, public utility and essential service vehicles may be permitted access, subject to conditions established for each individual permit. Applications for non-recreational vehicle permits are made through the Chief Ranger's Office at Fire Island National Seashore, 120 Laurel Street, Patchogue, NY 11772. Call 631-687-4758 for information.

At certain times of the year, beach traffic may need to be diverted through some of the Fire Island communities.

While roads through these communities do not easily accommodate the 4-wheel drive vehicles needed for driving on the beach, this is a sacrifice most people are willing to make in order to provide essential services to the island communities.

Living on Fire Island means learning to co-exist with wildlife.

## Access to Fire Island Communities

When Fire Island National Seashore was established in 1964, its enabling legislation stated that seventeen communities and preexisting commercial uses would be allowed to remain as long as construction was consistent with zoning ordinances established by the Secretary of the Interior.

Today each community has its own character, providing a great diversity of experiences for visitors and residents.

A limited number of resident, contractor, public utility and essential service vehicles may be allowed to drive on the beach and over National Park Service land to access homes or provide services for the homes and businesses on Fire Island. *Home ownership does not automatically entitle one to a vehicle permit.*

Driving permittees should be respectful of the park's and communities' resources and infrastructure. Whenever driving on the beach or through the communities, always be alert for and considerate of the people who share the road, and always be respectful of private property rights.

Limited driving helps retain the character of Fire Island and its 17 communities. Alternatives to motorized vehicles such as bicycles are utilized extensively.

Normally, vehicles travelling east—on the ocean side—have the right-of-way.

National Park Service rangers and Suffolk County Police Marine Bureau patrol Fire Island National Seashore, enforcing driving regulations on the beach and on other park lands.

# Off-Road Vehicle Rules and Regulations

## Designated Use Only

Recreational vehicles are permitted on Fire Island beaches as a means of access for fishing and hunting activities only. Fishing and hunting rules and regulations regarding size and limit of catch are strictly enforced. Non-recreational vehicles are permitted access only under the conditions stipulated in each permit. Misuse of vehicle or failure to obey regulations will result in a fine and loss of permit.

## Check Stations

All vehicles must access Fire Island National Seashore through check stations only. Permitted vehicles must have driving sticker affixed to passenger side front bumper and permit must be kept in vehicle at all times.

## Speed Limits

Speed limit is 5 m.p.h. within 100 feet of pedestrians (pedestrians always have the right of way), near a beach entrance, near posted endangered species habitat or stopped vehicles. Maximum speed on beach is 20 m.p.h.

## Prohibited Activities

Access other than through check stations and riding on tailgates or bumpers are prohibited.

## Stay 20 Feet Away from Dune Vegetation

To protect the fragile primary dunes, these rules are strictly enforced: drive at least 20 feet from the base of dune or vegetation line to protect the fragile root system (rhizomes). If surf approaches the 20 foot boundary, the beach will be closed to driving. Always stay to the seaward side of any posts. **Never drive on, through or behind the dunes.**

## Beach Closures

- Fire Island beaches may be closed to driving at any time due to storms, extremely high tides, or other hazardous conditions.
- Summer vehicle access is restricted to special or essential services and law enforcement.
- The beach from the Wilderness Visitor Center at Smith Point to Long Cove will be closed to driving from March 15 through Labor Day (later if required), in compliance with the park's endangered species habitat protection plan.
- Recreational drivers may not enter the beach through the open emergency vehicle entrance when the recreational driving gate is closed.
- If the west end beach is closed, non-recreational permittees must use the inside route (Burma Trail).

## Weekend Restrictions

From September 15 through October 31, no entry is allowed on the beach between 9 a.m. and 6 p.m. on Saturdays, Sundays, and holidays. Recreational vehicles (from Long Cove to Smith Point) that enter before 9 a.m. may remain on the beach, but upon departure, may not re-enter until 6 p.m. Contractors, residents, municipal and essential service drivers have additional weekend restrictions.

The ocean tide on Fire Island is semi-diurnal (twice a day). Its average tidal range (amplitude) is about 4 feet (1.25 meters).

**Time beach driving carefully.** As a rule of thumb, Fire Island beaches are generally passable from 3 hours before to 3 hours after low tide.

**Never drive on beach grass.** The 20-foot "Rhizome Rule" was established to help protect and encourage the growth of dunes.

## Understanding Tides

Approximately 70 percent of the Earth's surface is covered by a relatively thin layer of water, which responds to the gravitational attraction of the sun and moon with a daily cycle of high and low tides. Times can be predictable and vary by location. This booklet contains the Moriches Inlet tides for 2012.

Tide changes occur from east to west. Correlations between tides at two different points are neither exact nor consistent, but the map in this booklet will help you estimate the tide for your location. Keep in mind that storms or high winds may cause more extreme tides. The "feet" columns list how many feet above or below mean low water each tide is expected to be.

## Tide Adjustments

### Ocean Side, Fire Island:

Talisman/Barrett Beach: + 10 minutes  
Fire Island Lighthouse Beach: + 15 minutes  
Fire Island Breakwater: + 18 minutes

### on Great South Bay:

Point O'Woods: + 3 1/2 hours  
Sayville (Browns River): + 4 1/2 hours  
Patchogue River: +5 hours

## Driving Safety

For your safety, carry a jack and jack board, spare tire, shovel, tow line with chain or hook, tire pressure gauge, first aid kit, and fire extinguisher. Always lower tire pressure to 15-20 psi (pounds per square inch) to prevent washboard tracks. On the beach, stay in established tracks and **at least 20 feet seaward of the beach grass.**

## If You Become Stuck in the Sand...

- Do not spin your tires. Spinning will dig the vehicle in deeper.
- Check to make sure you are in four-wheel drive.
- Lower tire pressure to **15-18 psi.** (Use caution below 15 psi.)
- Dig a small amount of sand away from the front and rear of all four tires.
- If you are really buried, jack up all four wheels in turn and shovel sand underneath.
- Slowly attempt to drive backwards into your tire tracks where the sand is compacted.
- Keep front tires straight while trying to free your vehicle.
- Proceed evenly, keeping up your momentum and speed without spinning your tires.

**Tow Service is not readily available on Fire Island**

**Seabeach Amaranth**  
Federally threatened

**Seabeach Knotweed**  
NY State listed rare

## Threatened and Endangered Species Protection Measures on Fire Island

The National Park Service’s requirement to protect threatened and endangered species and their habitats has seasonal impacts on driving, beach users and the communities within park boundaries.

### Spring

In early spring, piping plovers begin to arrive on Fire Island. By April, suitable habitat is marked and protected with symbolic fencing. Piping plovers are monitored daily beginning in early spring, while breeding and nesting take place from April through June. Nest monitoring occurs once a full nest clutch of 4 eggs is observed. As nests are established, NPS staff construct predator enclosures around the nest to protect both nest and eggs.

**Piping Plover**  
Federally threatened,  
NY State endangered

### Summer

Piping plover nests begin to hatch in early summer once eggs have reached the 27 day incubation period. Off-road vehicle restrictions are implemented once this occurs to ensure the safety of the newborn chicks. This typically lasts until the end of the piping plover season which culminates in August when most chicks are able to fly.

### Fall

Symbolic fencing remains in place through the fall to protect threatened and endangered vegetative species. Seabeach amaranth and seabeach knotweed, two protected species, grow on the shoreline of Fire Island and are inventoried by park staff.

For more information:

[www.nps.gov/fiis/naturescience/threatened-and-endangered-species.htm](http://www.nps.gov/fiis/naturescience/threatened-and-endangered-species.htm)

**Piping Plover Hotline** (May - September): **631-687-5030**

*Other T&E protection measures include monitoring populations of colonial waterbirds such as least tern, common tern, roseate tern, and black skimmer.*

## Stay Connected

Fire Island National Seashore’s park planning process is advancing and several important planning documents are expected to be open for public review and comment during 2012. For updates on the draft General Management Plan and its accompanying Environmental Impact Statement, and alternatives for a White-tailed Deer and Vegetation Management Plan visit:

[www.nps.gov/fiis/parkmgmt/generalmanagementplan.htm](http://www.nps.gov/fiis/parkmgmt/generalmanagementplan.htm)

Poison ivy can cause an irritating rash at any time of year.

Ticks are common on Fire Island.

Help keep wildlife wild.  
Use a camera or binoculars from a distance for a close-up view of animals.  
Never feed deer or other wild animals.

## Enjoy Fire Island Safely

Please follow these safety guidelines for an enjoyable visit:

- Stay on the boardwalk to avoid poison ivy.
- Wear shoes on boardwalks to avoid splinters.
- Avoid grassy areas and check yourself frequently for ticks.
- Use sunscreen and insect repellent as needed.
- Follow safe boating procedures and etiquette, and wear life jackets.
- Swim in life-guarded areas.
- Watch for rapid changes in weather conditions and lightning when on or near the water.

## Adhere to all Park Rules

All natural and cultural features within Fire Island National Seashore are protected by law. Thank you for respecting regulations.

- Stay off the dunes and do not damage plants.
- Do not feed, touch, or harass wildlife; animals can be unpredictable and dangerous.
- When and where permitted, pets must be on a 6-foot leash and under physical control.
- Pets, kites, and glass containers are not permitted on life-guarded beaches.
- Stay out of all areas fenced for wildlife and plant protection.
- Metal detectors are not permitted on park lands.
- Building fires is strictly prohibited.
- Dispose of trash properly. Day use visitors are asked to participate in the park's Carry-In, Carry-Out program to reduce garbage on the island.
- Fire Island personal watercraft (PWC) use is only permitted in the marked channels into some communities. PWCs must remain at least 1,000 feet away from shore in the Atlantic Ocean; in the bay, PWCs must be 1,000 feet away from shore on the western end of Fire Island, and 4,000 feet away from the shore east of the western boundary of Sunken Forest. PWCs are not permitted into Sailors Haven, Barrett Beach/Talisman, Watch Hill or Old Inlet.
- Additional regulations are enforced.
