Leadership

- Harold (Hal) Spencer, Branch Chief, Structural Fire
- Brian Johnson, National Fire Prevention Program Manager
- Mark Gorman, National Fire Operations Program Manager
- Bill Kaage, Acting Chief - Division of Fire and Aviation

Mission

The mission of the National Park Service Structural Fire Management Program is to establish, maintain and operate a viable, integrated and multi-disciplinary structural fire protection program to keep visitors, employees, dependents, buildings and cultural resources of the National Park Service safe from fire and related hazards.

Administration

The National Park Service is the nation's steward for over 28,000 structures, many of them historic, many national icons, such as the Statue of Liberty, and over 80 million artifacts. These structures include hotels, motels, cabins, visitor centers, interpretive centers, and historical buildings, such as Independence Hall and many former presidents' homes. In terms of buildings alone, the National Park Service is the federal government's third largest landlord, behind only the Department of Defense and the U.S. Postal Service.
