CCTV Use Policy

The National Park Service's use of Closed Circuit Television (CCTV) for law enforcement and security purposes will only be to visually monitor public park areas and public activities where no constitutionally protected reasonable expectation of privacy exists. Such CCTV use - which will have adequate privacy and First Amendment safeguards — will be to help ensure public safety and security; facilitate the detection, investigation, prevention and deterrence of terrorist attack and crime; help ensure the safety of citizens and officers; help assist in the proper allocation and deployment of law enforcement and public safety resources; help facilitate the protection of the innocent and the apprehension and prosecution of criminals.

This policy does not restrict the official use of CCTV in government administrative areas including administrative buildings, jail holding facilities, revenue collection sites, etc, where the government may record/monitor its facilities. For example, the government may perform unrestricted video/audio recording at revenue collection points (entrance stations, visitor center counters, etc). This policy does not restrict the use of Mobile AudioNideo Recording Equipment (MVRE) in patrol vehicles driven by commissioned law enforcement rangers; that use is addressed in other policy documents, *RM-9, Chapter 26, Section 1*.

This information is included as required by RM-9, Chapter 26, Section 4.6
