

## Photography as a Tool for Studying Climate Change in Glacier NP

12:00-12:45pm

Monday, March 22, 2010

Glacier National Park  
Community Bldg  
West Glacier, MT

### **Lisa McKeon, Physical Scientist, U.S.G.S. Glacier Field Station**

USGS scientists employ the use of repeat photography along with the assessment of aerial and oblique photography as tools to document and communicate the effects of climate change on park resources. Learn about GigaPan photography and other tools being used to document climate change as it happens in Glacier NP.

**Free and open to the public!**
