- Behaviors
- Physiology
- Concerns
- Habitats

### A Seabird Glossary

List the word each word you find and provide a pronunciation guide. Follow that with a short definition of the word. Complete the entry by adding a sentence in which the word is used. The sentence must provide a context that will help a reader more clearly understand the meaning and use of the word. The word *Seabird* is done for you.

- *Seabird*: (n) *sée bûrd*, a bird that frequents coastal waters and the open ocean: gulls, pelicans, gannets, cormorants, albatrosses, petrels, etc. *The seabird built its nest on an island beach in Glacier Bay.*
