Lurline Pier, photographed by W.C. Billington.

Lurline Pier

The Lurline Pier was built at Ocean Beach between Anza and Balboa Streets to protect the intake pipe that supplied ocean water to the Lurline Baths and Olympic Club pool in downtown San Francisco. A pumping station for the intake pipe was located 600 feet offshore at Ocean Beach. Although the Lurline Baths were closed in 1936, the pier remained until 1966.
