

Public Works

Drainage

Analysis

The City of Daly City is preparing the Vista Grande Drainage Basin Alternatives Analysis based on the recommendations of the [Vista Grande Watershed Plan](#). The purpose of the alternatives analysis is to develop and evaluate alternatives that will reduce or eliminate flooding, reduce erosion along Lake Merced, and provide other potential benefits such as habitat enhancement and lake level augmentation. The Vista Grande Drainage Basin Alternatives Draft Report is available below. The recommended program outlined in the plan includes construction of a new stormwater tunnel, construction of a detention basin in Westlake Park, and potential for treatment wetlands in San Francisco to treat stormwater for diversion to Lake Merced.

Public Meetings

The City of Daly City hosted a public meeting on Wednesday, September 17, 2008 at Larcombe Clubhouse (in Westlake Park) to provide residents and interested stakeholders with an update of the alternatives analysis associated with the Vista Grande Drainage Basin. [The presentation is available here.](#) **Please provide your comments on the Draft Report and Supplemental Analyses by October 17, 2008.**

The City of Daly City held two public meetings on February 21, 2008 and February 26, 2008 to provide interested stakeholders with a summary of the draft report. [The presentation is available here.](#)

If you have any questions about the alternatives analyses or the public meetings, please contact Robert Ovardia at (650) 991-8266 or email rovardia@dalycity.org.

Vista Grande Drainage Basin Alternatives Draft Report

Supplemental Analyses (August 2008)

- [Supplemental Alternatives Analyses Summary](#)
- [Attachment 1 - Functional Design Criteria](#)
- [Attachment 2 - Conceptual Design Figures](#)
- [Attachment 3 - Budget Level Cost Estimate](#)
- [Attachment 4 - Alternatives Evaluation](#)

The Draft Report by Section (December 2007):

[Title Page and Table of Contents](#)

- Title
- Distribution
- Table of Contents
- List of Tables
- List of Figures

[1. Executive Summary](#)

[2. Introduction](#)

- 2.1 - Purpose
- 2.2 - Project Background
- 2.3 - Previous Studies
- 2.4 - Ongoing Studies
- 2.5 - Acknowledgements
- 2.6 - Limitations

[3. Watershed Hydrology and System Hydraulics](#)

- 3.1 - Watershed Description
- 3.2 - Preliminary Design Criteria
- 3.3 - Preliminary Hydraulic Evaluation

- 3.4 - Water Quality Improvements

[4 - Description of Alternatives](#)

- 4.1 - Alternative 1A - Beginning of Canal to New Outfall
- 4.2 - Alternative 4 - South of County Line along Northgate Drive
- 4.3 - Alternative 5B - 1/3 up Canal to Existing Outfall
- 4.4 - Alternative 6 - 2/3 up Canal to Existing Outfall
- 4.5 - Alternative 7 - Parallel Tunnel South of the Existing Tunnel
- 4.6 - Alternative 9 - Detention Basins
- 4.7 - Alternative 10 - Stormwater Re-Use Opportunities

[5 - Geologic and Geotechnical Assessments](#)

- 5.1 - Regional and Site Study
- 5.2 - Regional Seismicity
- 5.3 - Geotechnical Literature Research
- 5.4 - Anticipated Subsurface Conditions at Westlake Park
- 5.5 - Anticipated Ground Conditions for New Tunnel
- 5.6 - Recommended Tunneling Methods

[6 - Preliminary Assessment of Construction Method and Constructability Issues](#)

- 6.1 - Construction Approach

[7 - Potential Utility Conflicts and Relocation Requirements](#)

- 7.1 - Electric Utilities
- 7.2 - Telephone
- 7.3 - Storm Drains
- 7.4 - Sanitary Sewer
- 7.5 - Water Pipelines
- 7.6 - Natural Gas Pipelines

[8 - Preliminary Environmental Considerations](#)

- 8.1 - Ecological Setting
- 8.2 - Overview of the Environmental Regulatory Process
- 8.3 - Agency Consultations
- 8.4 - Environmental Characterization Assessment of Alternative Tunnel Alignments

[9 - Evaluation of Alternatives](#)

- 9.1 - Review of Findings
- 9.2 - Screening Methodologies
- 9.3 - Preliminary Evaluation
- 9.4 - Sensitivity Analysis

[10 - Summary and Recommendations](#)

- 10.1 - Summary
- 10.2 - Recommendations

[11 - References](#)

[12 - Revision Log](#)

Appendices

- [Appendix A - Tables](#)
- [Appendix B - Figures \(7.8 Mb\)](#)
