LANDS END

Located at the edge of San Francisco, this wild and rugged piece of land has recently seen an exciting transformation—a beautiful new promenade and overlook, improvements to the coastal trail that skirts the area, and a revitalization of the surrounding forest. We continue to build on these dramatic achievements to complete the vision for this extraordinary park site with support from our donors, members, and all park visitors.

Our upcoming planned work includes:

- Resurfacing and stabilizing additional segments of the trail
- Creating open views to the ocean
- Eliminating damaged “social” trails
- Replanting native species in the local forest and surrounding areas
- Improving visitor amenities
- Engaging the community in park stewardship

The goal of the Trails Forever team in the Lands End project is to improve access, increase safety, and bring enjoyment to the thousands of people who visit this wonderful park site.
